**CHMY 1211. General Chemistry 1. (3,4 Hours)**
Introduces the principles of chemistry, focusing on the states and structure of matter and chemical stoichiometry. Presents basic concepts and definitions, moles, gas laws, atomic structure, periodic properties and chemical bonding, all within a contextual framework.

**CHMY 1212. Lab for CHMY 1211. (1 Hour)**
Accompanies CHMY 1211. Covers a range of topics from the lecture course, including qualitative and quantitative analysis and the characteristics of chemical and physical processes.

**Prerequisite(s):** CHMY 1211 (may be taken concurrently) with a minimum grade of D-
