The Master of Design for Sustainable Urban Environments (MDes-SUEN) brings together the allied professional fields of environmental design, landscape architecture, and urban planning to offer advanced study and research opportunities in the design of ecologically and economically productive urban environments. The program seeks to supply graduates for the rapidly growing field of sustainable urbanism through a dynamic curricular mix of design, dialogue, and technical courses, enriched by diverse interdisciplinary electives.

The pedagogic and research focus of the MDes is the design, implementation, and management of sustainable urban environments from the scale of individual parcels to regional systems. Key topics include brownfield and waterfront revitalization, sustainable and secure pedestrian environments, urban habitat design and management, and green and blue infrastructure design and planning with an emphasis handling increased storm water and tidal influx in the urban landscape.

Contemporary urban theory includes a significant body of writing in the area of “Landscape-” and “Ecological-Urbanism,” a critical discourse that looks at the full range of environmental strategies for urban sites with an emphasis on ecological thinking. The paradigm of sustainable environmental design is moving away from form-based planning toward dynamic ecosystem services. This program seeks to prepare students to be innovative and entrepreneurial designers able to combine economic, environmental, and social priorities to make next-generation public spaces and systems.

Programs

Master of Architecture (MArch)

- One-Year Program (http://catalog.northeastern.edu/graduate/arts-media-design/architecture/one-year-program-march)
- Two-Year Program (http://catalog.northeastern.edu/graduate/arts-media-design/architecture/two-year-program-march)
- Three-Year Program (http://catalog.northeastern.edu/graduate/arts-media-design/architecture/three-year-program-march)
- Three-Year Program—Advanced Degree Entrance (http://catalog.northeastern.edu/graduate/arts-media-design/architecture/three-year-program-advanced-degree-entrance-march)

Master of Design for Sustainable Urban Environments (MDes-SUEN)

- One-Year Program (http://catalog.northeastern.edu/graduate/arts-media-design/architecture/one-year-program-mdes-su-en)
- Two-Year Program (http://catalog.northeastern.edu/graduate/arts-media-design/architecture/two-year-program-mdes-su-en)

Combined Programs

- One-Year Master of Architecture and Sustainable Urban Environments (http://catalog.northeastern.edu/graduate/arts-media-design/architecture/one-year-program-combined-su-en)

Courses

Architecture Courses

ARCH 1000. Architecture at Northeastern. 1 Hour.

Intended for freshmen in the College of Arts and Sciences. Introduces students to liberal arts; familiarizes them with their major; develops the academic skills necessary to succeed (analytical ability and critical thinking); provides grounding in the culture and values of the University community; and helps to develop interpersonal skills—in short, familiarizes students with all skills needed to become a successful university student.
ARCH 1030. Introduction to Architectural Education, Practice, and Culture. 2 Hours.
Seeks to answer the question of how architects work as problem solvers on a variety of scales and in collaboration with a variety of disciplines. Studies how architects frame problems, iteratively test options, and implement solutions that are both practical and creative. Considers both traditional and emerging modes of practice. Comprised of lectures, small-group discussions, readings, case studies, visits to local design offices, and field trips to important buildings and landscapes in the greater Boston area.

ARCH 1050. Introduction to Architectural Design. 4 Hours.
Offers students an opportunity for hands-on investigations in the design process. The course begins with instruction on representational techniques such as drawing and sketching, model making, diagramming, and collage, using Boston as a laboratory for investigation. Individual and group design work seeks to encourage the development of skills in critical thinking, leadership, collaboration, and graphic communication. Emphasizes a solutions-based approach to design problem solving. Also introduces students to studio culture, including regular individual desk critiques with instructors, collaborative working pinups, and formal reviews with guest critics.

ARCH 1110. Fundamental Architectural Representation. 6 Hours.
Introduces students to architectural representation as a form of documentation, experimentation, and communication, through a series of exercises in orthographic, axonometric, and perspectival drawing as well as physical modeling. Emphasizes the development of an iterative design methodology. Includes workshops in introductory digital media. Prereq. ARCH 1310 (may be taken concurrently).

ARCH 1120. Fundamental Architectural Design. 6 Hours.
Introduces architectural design. Examines a number of approaches to spatial organization, massing, and envelope articulation through the analysis of pertinent case studies as well as through a series of fast-paced design exercises. Offers students an opportunity to develop a single design through a series of design studies that deal with issues of site planning, program, user input, and collective negotiation. Requires a portfolio demonstrating the student's representational abilities and iterative design process. Prereq. ARCH 1110 and ARCH 1320 (which latter may be taken concurrently).

ARCH 1310. Architecture and Global Cultures, Prehistory to 1400. 4 Hours.
Offers a chronological history of civilizations from prehistory to 1400. Global in scope, introduces key themes including housing, the vernacular, materials and techniques, sacred architecture, architecture and power, and urban planning. Emphasizes the relationship between architectural works and the cultures that produce them. Coreq. ARCH 1311.

ARCH 1311. Recitation for ARCH 1310. 0 Hours.
Offers a small-group discussion format to cover material in ARCH 1310. Coreq. ARCH 1310.

ARCH 1320. Architecture and Global Cultures, 1400 to Present. 4 Hours.
Offers a chronological history of early modern architecture. Focuses on significant moments in Western culture as well as the architecture and planning of Mughal India, Ottoman Empire, and Japan. Continues major themes from ARCH 1310. Also covers ideal cities and urban planning, the relationship between theory and practice, the Enlightenment, the emergence of the professional architect, trade, colonization, and landscape. Coreq. ARCH 1321.

ARCH 1321. Recitation for ARCH 1320. 0 Hours.
Offers a small-group discussion format to cover material in ARCH 1320. Coreq. ARCH 1320.

ARCH 1350. American Architecture. 4 Hours.
Offers an introduction to the history, theory, and criticism of American architecture and urban planning from the mid-1600s to the 1930s. Explores the social and cultural forces that shape the built environment. Examines European influences as well as uniquely American contributions. Emphasizes the work of Louis Sullivan, H. H. Richardson, and Frank Lloyd Wright.

ARCH 1450. Understanding Design. 4 Hours.
Introduces undergraduates at all levels to the importance of design thinking as a method of inquiry and problem solving. Each class meeting includes a short presentation on a different kind of design problem (houses, furniture, electronics, automobiles, apparel, tools, interiors, cities, typography, information, tall buildings, networks, etc.) and then an interview with a leading practitioner at a roundtable on the stage. Evaluation is based on quizzes and student presentations. Seeks to expose students to the power of design thinking as a tool for multi-variable problem solving.

ARCH 1990. Elective. 1-4 Hours.
Offers elective credit for courses taken at other academic institutions.

ARCH 2130. Site, Space, and Program. 6 Hours.
Studies how to analyze, draw, and model the built environment. Students engage in issues of program, composition, type, and material. Offers students the opportunity to think conceptually about architectural design. Prereq. ARCH 1120; restricted to BS students in architecture and architectural studies, BLA students, and three-year MArch students.

ARCH 2140. Urban Institutions. 6 Hours.
Studies how to analyze, model, and intervene in the city. Offers students an opportunity to engage in urban analysis, urban massing strategies, and architectural design of urban institutions. Prereq. ARCH 2130; restricted to BS students in architecture and architectural studies, BLA students, and three-year MArch students.

ARCH 2170. Urban Research Studio: Context, Sustainability, Development. 6 Hours.
Seeks to develop students' technical skills and critical thinking in the studio environment through a semesterlong research and design project. Offers students an opportunity to investigate an urban site in the Boston area: investigating possible solutions, focusing on strengthening conceptual strategies, and articulating a developed argument through their research and design process. Prereq. ARCH 2130 and sophomore standing or above; architecture studies students only.

ARCH 2230. Structural Systems. 4 Hours.
Introduces the theory of materials and structures. Examines basic structural elements in masonry and wood construction. Uses historical and current building types to explore the relationship between structure, materials, construction process, and architectural space. Includes lectures, discussions, field trips, and student presentation of structural models and diagrams. Prereq. (a) either PHYS 1141 or PHYS 1151 and either MATH 1241 or MATH 1341 or (b) graduate standing; restricted to students in the architecture BS program and to students in the three-year MArch program. Coreq. ARCH 2231.

ARCH 2231. Recitation for ARCH 2230. 0 Hours.
Provides a small-group discussion format to cover examples from the material in ARCH 2230. Coreq. ARCH 2230.
ARCH 2240. Architectonic Systems. 4 Hours.
Introduces the theory of materials and structures. Examines basic structural elements in masonry and wood construction. Uses historical and current building types to explore the relationship between structure, materials, construction process, and architectural space. Includes lectures, discussions, field trips, and student presentation of structural models and diagrams. Prereq. Restricted to students in the architecture BS program and to students in the three-year MArch program.

ARCH 2250. Introduction to Sustainable Design in Architecture. 4 Hours.
Explores the issues and practices of architectural design as it relates to natural systems, using critical readings of seminal and current texts, lectures, films, field trips, and projects that use both design and analysis as means of inquiry. Examines varied approaches to sustainable design, including using nature and wilderness as models; biophilia; biomimicry; material sources and reuse; accounting systems such as LEED, Zero Net Carbon, and the 2030 Challenge; and the Living Building Challenge. Course work couples these thematic explorations with projects that investigate the application of the ideas in built form. Designed to offer both a broad understanding of sustainable design and a deep understanding of the varied ways one might approach green as a design professional. Prereq. Sophomore standing or above.

ARCH 2260. Introduction to Building Systems. 4 Hours.
Introduces fundamentals of building technology and explores technology as means and manifestation of architecture in the world. Using a systems approach, studies the interactions among natural forces, material properties, technological capabilities, and human cultural values and the ways these relationships give rise to architecture. Considers a series of physical principles—including gravity, moisture, heat, light, and air—to reveal specific architectural possibilities and material responses. Explores the ways design shapes the interaction of materials and forces to provide for human safety, shelter, comfort, and delight through a combination of hands-on workshops, seminal readings, and design exercises.

ARCH 2310. Chinese Architecture 1: Premodern. 4 Hours.
Covers the development of the built environment in China from prehistory to the nineteenth century. Emphasizes technological transformation, structural and stylistic evolvement, cultural exchange, and ideological engagement. Prereq. ARCH 1310, ASNS 1150, or HIST 1250.

ARCH 2320. Chinese Architecture 2: Modern. 4 Hours.
Covers the development of the built environment in China from 1840 to the present. Emphasizes educational and professional shifts in architectural practice, political engagement in the design process, structural and technological transformation, conceptual background, and global impact. Prereq. ARCH 1320, ASNS 1150, or HIST 1250.

ARCH 2330. Architecture, Modernity, and the City, 1800 to 1910. 4 Hours.
Focuses on architecture and urban design in the United States and Europe from 1800 to 1910. Major topics include the birth of the modern city and urban planning, capitalism and industrialization, modern typologies, infrastructure, urban parks and early suburbs, materials and technology, Western architecture in colonial India and Asia, architectural education, and modern architectural theory. Prereq. ENGW 1111, ENGW 1102, ENGL 1111, ENGL 1102, or graduate standing; restricted to students in the architecture BS program with sophomore standing or above and to students in the three-year MArch program. Coreq. ARCH 2331.

ARCH 2331. Recitation for ARCH 2330. 0 Hours.
Offers a small-group discussion format to cover material in ARCH 2330. Coreq. ARCH 2330.

ARCH 2340. Architecture, Modernity, and the City, 1910 to 1980. 4 Hours.
Examines the forms and principles of European and American architecture of the twentieth century in the context of society's changing conditions. Major topics include craft vs. industry, avant-garde and "other" modernisms, the architect and critical positions, suburbs, new concepts of space, modernism and its critique, and global extensions of modernism. Prereq. ENGW 1111, ENGW 1102, ENGL 1111, ENGL 1102, or graduate standing; restricted to students in the architecture BS program with sophomore standing or above and to students in the three-year MArch program. Coreq. ARCH 2341.

ARCH 2341. Recitation for ARCH 2340. 0 Hours.
Offers a small-group discussion format to cover material in ARCH 2340. Coreq. ARCH 2340.

ARCH 2360. Design Thinking and Architecture. 4 Hours.
Explores the ways design shapes the interaction of materials and forces to provide for human safety, shelter, comfort, and delight through a combination of hands-on workshops, seminal readings, and design exercises.

ARCH 2370. Elective. 1-4 Hours.
Offers elective credit for courses taken at consortium institutions. Prereq. Architecture students only.

ARCH 3150. Introduction to Sustainable Design in Architecture. 4 Hours.
Explores the issues and practices of sustainable design as it relates to natural systems, using critical readings of seminal and current texts, lectures, films, field trips, and projects that use both design and analysis as means of inquiry. Examines varied approaches to sustainable design, including using nature and wilderness as models; biophilia; biomimicry; material sources and reuse; accounting systems such as LEED, Zero Net Carbon, and the 2030 Challenge; and the Living Building Challenge. Course work couples these thematic explorations with projects that investigate the application of the ideas in built form. Designed to offer both a broad understanding of sustainable design and a deep understanding of the varied ways one might approach green as a design professional. Prereq. Sophomore standing or above.

ARCH 3155. Studio Abroad. 6 Hours.
Offers students an opportunity to develop a more detailed understanding. Prereq. Sophomore standing or above.

ARCH 3165. Suburban Types. 6 Hours.
Explores the issues and practices of sustainable design as it relates to natural systems, using critical readings of seminal and current texts, lectures, films, field trips, and projects that use both design and analysis as means of inquiry. Examines varied approaches to sustainable design, including using nature and wilderness as models; biophilia; biomimicry; material sources and reuse; accounting systems such as LEED, Zero Net Carbon, and the 2030 Challenge; and the Living Building Challenge. Course work couples these thematic explorations with projects that investigate the application of the ideas in built form. Designed to offer both a broad understanding of sustainable design and a deep understanding of the varied ways one might approach green as a design professional. Prereq. Sophomore standing or above.

ARCH 3170. Architecture, Infrastructure, and the City. 6 Hours.
Offers a studio course addressing the architectural and urbanistic consequences of the intersection of large-scale infrastructure and the contemporary city. Focuses on how to integrate buildings and neighborhoods with highways, rail lines, storm water management, bus, bike, parking, rivers, watersheds, and industrial networks. Prereq. ARCH 3155; architecture majors only.
ARCH 3350. American Houses and Housing. 4 Hours.
Examines the architecture of American houses from first settlements of European colonists in the sixteenth century to issues in the twentieth century. Aims to uncover the ways that architecture, seen through the lens of a particular building type, responds to the demands of materials, climate and geography, ethnic traditions, artistic expression, and changing societal forms. Prereq. Previous architectural history course or permission of instructor; architecture students only.

ARCH 3351. Architecture Topics Abroad: Theory. 4 Hours.
This course explores, defines, and analyzes the embodied time within urban artifacts (ruins, buildings, urban landscape and space, infrastructure) of a historic context. Offers students an opportunity to focus on the architecture and urban artifacts that are the consequence of the evolutionary forces of urban civilization over long durations of time rather than focusing on iconographic examples of architecture and urbanism produced within a specific moment in history. Students have an opportunity to engage in theoretical readings, group discussions, site visits, analyses of evolutionary urban artifacts, writing, and drawings. Assigned readings provide students with a broad range of theories about analyzing and interpreting the urban context and its history. These readings are complemented by both required writing assignments and site visits to many urban artifacts, buildings, and spaces.

ARCH 3352. Architecture Topics Abroad: Drawing. 4 Hours.
Offers students an opportunity to examine and engage historic architecture and urbanism through freehand drawing. Teaches them how to draw in freehand like an architect: drawing in a creative, interpretive, precise, and analytical manner. Concurrently, students have an opportunity to learn about the history and cultural context of the great architectural monuments and urban spaces that they are analyzing and drawing. Includes opportunities to freehand draw on site at major architectural monuments. Offers students an opportunity to learn new skills of drawing, the conventions of architectural representation, and the cultural history of the built environment within which they will be immersed.

ARCH 3361. Architecture and Urbanism Abroad. 4 Hours.
Covers the detailed history of architecture and urban development in the host city, from its founding to the present. Offered only abroad. Prereq. ARCH 2340; architecture majors only.

ARCH 3362. Seminar Abroad. 4 Hours.
Offers students an opportunity to learn and discuss historical and contemporary European theory and criticism, from Vitruvius and Alberti to contemporary figures. Raises and addresses architectural questions of composition, society, politics, and environment. Offered only abroad. Prereq. ARCH 2340; architecture majors only.

ARCH 3364. Architecture and Planning in Twenty-First-Century China. 4 Hours.
Offers real-world insight into the fastest-growing urbanization process in the world. Offers students an opportunity to learn about the physical history of Chinese cities, especially Shanghai, Beijing, and Hangzhou. Explores the differences in scale of both contemporary and historic urban fabric, building types, and development types. Students are encouraged to produce case studies comparing and contrasting these elements. Prereq. Architecture students only.

ARCH 3370. Topics in Architectural History. 4 Hours.
Covers a variety of topics in architectural history and theory with the aim of offering students a greater degree of choice in shaping their curriculum and the opportunity to study subjects that interest them in greater detail. Course topics encompass a wide range of themes and complement the mission of the department, the college, and the university. Taught by a number of different faculty members according to their interests and expertise.

ARCH 3450. Advanced Architectural Communication. 4 Hours.
Builds on CAD (computer-aided design) skills to develop ability to model in three dimensions and develop surfaces and lighting. Also addresses strategies in design communication for effective presentation of digital material. Prereq. ARCH 2130 or graduate standing.

ARCH 3990. Elective. 1-4 Hours.
Offers elective credit for courses taken at consortium institutions. Prereq. Architecture students only.

ARCH 4850. Urban and Urbanistic Architecture Abroad. 4 Hours.
Offers an on-site study of architecture and urban history conducted abroad. Instructors accompany students to visit and lecture about the most significant sites in the history of architecture, art, and urban development of a specific country. In comparison to a traditional on-campus course, the number of examples covered is smaller; however, each example is discussed in much greater detail. Encourages students to discover problems and aspects in art, architecture, and urbanism that have not been raised before, something only possible through direct survey and observation. Offers students an opportunity to obtain a real sense of architectural research without neglecting the basics of the field. Interactions with practicing architects, city planners, policymakers, preservationists, museum professionals, and artists are integral parts of this course.

ARCH 4970. Junior/Senior Honors Project 1. 4 Hours.
Focuses on in-depth project in which a student conducts research or produces a product related to the student's major field. Combined with Junior/Senior Project 2 or college-defined equivalent for 8 credit honors project. Prereq. Architecture students only.

ARCH 4971. Junior/Senior Honors Project 2. 4 Hours.
Focuses on second semester of in-depth project in which a student conducts research or produces a product related to the student's major field. Prereq. ARCH 4970; architecture students only.

ARCH 4990. Elective. 1-4 Hours.
Offers elective credit for courses taken at consortium institutions. Prereq. Architecture students only.

ARCH 4991. Research. 4 Hours.
Offers an opportunity to conduct research under faculty supervision. Prereq. Architecture students only.

ARCH 4992. Directed Study. 1-4 Hours.
Offers independent work under the direction of members of the department on a chosen topic. Course content depends on instructor. Prereq. Architecture students only.

ARCH 4993. Independent Study. 1-4 Hours.
Offers independent work under the direction of members of the department on a chosen topic. Course content depends on instructor. Prereq. Architecture students only.

ARCH 4994. Internship. 4 Hours.
Offers students an opportunity for internship work. Prereq. Architecture students only.

ARCH 4996. Experiential Education Directed Study. 4 Hours.
Draws upon the student's approved experiential activity and integrates it with study in the academic major. Restricted to those students who are using the course to fulfill their experiential education requirement. Prereq. Architecture students only.

ARCH 5110. Housing and Aggregation. 6 Hours.
Provides an understanding of multiunit housing in the United States and Europe. Working in teams, students develop new patterns of housing for Boston-area sites and develop those sites with their own individual interventions. Prereq. ARCH 3170 or graduate standing; architecture students only with junior, senior, or graduate standing.
ARCH 5115. Option Studio. 6 Hours.
Offers an upper-level design studio that covers new studio topics, content, and studio instructors each semester. The studio instructors offer topical content that best aligns with their research and practice expertise, which provides students with the latest concepts in architectural design, theory, and research on a consistently updated and rotating basis. Students select their top choices of studio topics and instructors, giving them more flexibility in the areas for which they would like to focus their education. Prereq. (a) ARCH 3170 or graduate standing and (b) junior, senior, or graduate standing; restricted to students in the College of Arts, Media and Design.

ARCH 5120. Comprehensive Design Studio. 6 Hours.
Focuses on the materials and making of architecture. Considers architectural connections at all scales, from the nut and bolt to the scale of a door or window to the scale of the whole building and the city. Grounds design proposals upon a tectonic strategy, unlike traditional design studios that produce a schematic design before considering constructional ideas. Prereq. ARCH 5110; architecture students with junior, senior, or graduate standing.

ARCH 5210. Environmental Systems. 4 Hours.
Explores the ways in which architectural form can create particular conditions of light and shadow; provide shelter from heat, cold, and rain; and incorporate systems that provide for water, electricity, and sanitation. Provides a series of simple and straightforward small-scale design projects. Prereq. Junior, senior, or graduate standing; restricted to selected programs in architecture, architectural studies, landscape architecture, energy systems, sustainable urban environments, and sustainable building systems. Coreq. ARCH 5211.

ARCH 5211. Recitation for ARCH 5210. 0 Hours.
Offers a small-group discussion format to cover material in ARCH 5210. Coreq. ARCH 5210.

ARCH 5220. Integrated Building Systems. 4 Hours.
Studies how to integrate into students’ building designs all the environmental and tectonic systems that they have covered in previous architecture courses. Prereq. ARCH 5210; architecture students with junior, senior, or graduate standing.

ARCH 5310. Design Tactics and Operations. 4 Hours.
Encourages students to develop the connections between critical attitudes and techniques in design, through important historical texts. Offers a kind of “great books” approach to the integration of design and history, introducing the writings and seminal designs of Alberti, Palladio, Wright, Le Corbusier, Semper, Sitte, Rowe, Colquhoun, Moneo, Koolhaas, Rossi, Frampton, Venturi and Scott Brown, Scarpa, and Lynch. Prereq. Architecture students with junior, senior, or graduate standing.

ARCH 5320. Applications of Architectural Design Methods. 4 Hours.
Explores the different means through which we analyze, interpret, and ultimately understand the built environment and how, in turn, the built environment contributes to our understanding of the world itself. Offers students an opportunity to learn how to think critically themselves, to learn to ask questions, and to develop their own perspectives on the production of architecture and design. Prereq. (a) ARCH 1450 or permission of instructor and (b) junior, senior, or graduate standing.

ARCH 5530. Innovative Models in Real Estate Development and Design. 4 Hours.
Addresses advanced topics in real estate development and finance and examines innovative models of practice in real estate development available to design professionals. Studies a set of advanced analytical tools and techniques for evaluating the cash flows and economic returns of real estate investment and development. Introduces advanced methods of financing real estate and the structure of capital markets involved in property assets. Uses the case instruction method and includes active, discussion-oriented learning. Prereq. Junior, senior, or graduate standing.

ARCH 5976. Directed Study. 1-4 Hours.
Offers independent work under the direction of members of the department on a chosen topic. Course content depends on instructor. Prereq. Architecture students with junior, senior, or graduate standing.

ARCH 5978. Independent Study. 1-4 Hours.
Offers independent work under the direction of members of the department on a chosen topic. Course content depends on instructor. Prereq. Architecture students with junior, senior, or graduate standing.

ARCH 5984. Research. 1-4 Hours.
Offers an opportunity to conduct research under faculty supervision. Prereq. Architecture students with junior, senior, or graduate standing.

ARCH 6100. Graduate Skills Studio. 6 Hours.
Presents students new to architecture with the fundamentals of three-dimensional thinking and spatial representation with a series of increasingly complex assignments. Offers students an opportunity to learn a wide variety of graphical software tools and then use these tools to complete their assignments. Covers freehand sketching and physical model building skills. This intensive course is taught as a hands-on design studio (with ample studio access outside class meetings). Prereq. Three-year MArch students only.

ARCH 6110. Graduate Architectural History Case Studies. 4 Hours.
Presents students new to architecture with an overview of architectural history and key concepts that have framed the disciplinary focus of architecture over the centuries. The overall organization of this intensive course is roughly chronological, with each lecture focusing on a series of influential or important buildings in a given period. Considers theoretical ideas and professional discourse, as well as larger cultural, political, and social contexts. Also discusses the lasting impact of certain buildings, historical styles, and theoretical concepts. Prereq. Three-year MArch students only.

ARCH 6140. Urban Institutions. 6 Hours.
Studies how to analyze, model, and intervene architecturally in the urban context. Offers students an opportunity to engage in urban analysis, urban massing strategies, and architectural design of urban institutions. Prereq. ARCH 6200; restricted to students in architecture and in sustainable urban environments.

ARCH 6200. Graduate Studio 1: Architectural Design. 6 Hours.
Focuses on a series of increasingly complex assignments that emphasize the fundamentals of architectural design. Offers students an opportunity to propose and test proposals through an iterative process using a wide variety of tools and media, including design software, physical models, and freehand sketches. Explores spatial definition, the orchestration of a spatial sequence, modulation of natural light, and responsiveness to existing conditions (whether natural or man-made). Taught as a hands-on design studio (with ample studio access outside class meetings). Prereq. Three-year MArch students only.
ARCH 6210. Graduate Studio 2: Urbanism. 6 Hours.
Focuses on a mixed-use building program proposed for an urban infill site in Berlin. Covers not only the conception and design of a complex work of architecture but also the broader urban design issues raised by the problem. Offers students an opportunity to test and recommend urban design proposals for the district where their proposed building is located. The course is taught as a hands-on design studio in the Berlin studio as part of the School of Architecture’s Berlin program. Prereq. MArch students only.

ARCH 6330. Seminar in Modern Architecture. 4 Hours.
Examines the state of architecture and urbanism in the two decades leading up to 2000. Explores contemporary issues in architectural theory and urban design. Examines a broad range of ideas affecting contemporary developments in architectural practice. Engages cultural and historical forces as well as contemporary criticism to define the nature of modernism, late modernism, postmodernism, and deconstruction. Case studies, analysis of theoretical models, and application of methods of history provide students with support for their own design work in studio and co-op experiences. Prereq. Architecture students only.

ARCH 6340. Graduate Topics in Architecture. 4 Hours.
Explores focused research topics relevant to the graduate program curriculum. The professor presents his or her research related to a particular urban, architectural, or technical topic. This exposes the students to methods of research and topics in current and ongoing research in the field. The students have an opportunity to engage in related and parallel research projects during the course of the semester. Prereq. Architecture students only.

ARCH 6430. Case Studies 1. 4 Hours.
Focuses on how architectural practice occurs and must be understood within a larger social context. The cultures-interests and objectives of the constellation of participants in the bringing of a building to completion are dynamic, diverse, and complex, especially in an urban environment. Seeks to make sense of this broader social contract from within the perspective of professional design practice. As one of many participants in the process of bringing a building to completion, students review the roles, responsibilities, and interests of each contributor. Our task is to understand the obligations and constraints that constitute these relationships. Examines the products of design as manifestations of these relationships and situates them within a discourse of value-determined actions. Investigates normative and critical professional practices through selected readings and individual field research. Develops project case studies that provide examples of excellent design results achieved through the application of expert professional practices. Prereq. Architecture students only.

ARCH 6440. Case Studies 2. 4 Hours.
Continues ARCH 6430. Builds on the understanding of professional practice developed in the previous course and investigates the array of “artful ways in which some practitioners deal competently with the indeterminacies and value conflicts of practice.” These indeterminacies, uncertainties, and value conflicts are part of a rapidly changing, dynamic world. There is an unprecedented need for flexible and responsive practices that can bridge the gap between traditional professional techniques and these situations. Requires core competencies that are not mismatched with the changing situations of practice. Requires new skills as well as traditional analytic techniques to respond adequately to these unique conditions of work. Through a closer examination and development of an in-depth project case study, students speculate on possible approaches to a revised and restructured model of professional knowledge and guidelines for reflective practice that can sustain a culture of design excellence. Prereq. ARCH 6430; architecture students only.

ARCH 6960. Exam Preparation—Master’s. 0 Hours.
Offers the student the opportunity to prepare for the master’s qualifying exam under faculty supervision. Prereq. Architecture students only.

ARCH 6962. Elective. 1-4 Hours.
Offers elective credit for courses taken at other academic institutions.

ARCH 6964. Co-op Work Experience. 0 Hours.
Provides eligible students with an opportunity for work experience. Prereq. Architecture students only.

ARCH 6966. Practicum. 1-4 Hours.
Provides eligible students with an opportunity for practical experience. Prereq. Architecture students only.

ARCH 7000. Qualifying Exam. 0 Hours.
Provides eligible students with an opportunity to take the master’s qualifying exam. Prereq. Architecture students only.

ARCH 7130. Master’s Research Studio. 6 Hours.
Offers the research portion of a two-part graduate project focused on the complex issues facing the postindustrial landscape of the contemporary city. Examines in detail the design elements of everyday building types, such as office buildings, labs, parking garages, and retail spaces, with an eye toward creating new prototypes for urban architecture that are informed by the realities of contemporary market forces. Provides the foundation for the more speculative design proposals of ARCH 7140. Prereq. Architecture students only.

ARCH 7140. Master’s Degree Project. 6 Hours.
Offers the second of a two-part degree project focused on manipulating contemporary market-driven building types. Seeks to invent new variations and hybrids from the existing store of urban building types to address new challenges, such as irregular sites, new adjacencies, and other unmet demands in cities. Based on research, analysis, and modeling of different types done in the first semester, offers students an opportunity to propose synthetic solutions to the complex problems of postindustrial development, housing, and identity facing the contemporary city. Prereq. Architecture students only.

ARCH 7962. Elective. 1-4 Hours.
Offers elective credit for courses taken at consortium institutions. Prereq. Architecture students only.

ARCH 7976. Directed Study. 1-4 Hours.
Offers independent work under the direction of members of the department on chosen topics. Prereq. Architecture students only.

ARCH 7978. Independent Study. 1-4 Hours.
Offers independent work under the direction of members of the department on a chosen topic. Course content depends on instructor. Prereq. Architecture students only.

ARCH 7996. Thesis Continuation. 0 Hours.
Offers thesis supervision by members of the department. Prereq. Architecture students only.
