General Admission and Transfer Credit

- Regulations Applying to All Degree Programs (p. 8)
- Regulations Applying only to Doctor of Philosophy (PhD) Programs (p. 9)
- General Regulations and Requirements for Nondegree Certificate Programs (p. 9)
- General Regulations and Requirements for the Master’s Degree (p. 9)
- General Regulations and Requirements for the Certificate of Advanced Graduate Study (p. 10)
- General Regulations and Requirements for the Research Doctorate (PhD and EdD) (p. 10)
- General Regulations and Requirements for Interdisciplinary Graduate Degrees (p. 11)

Regulations Applying to All Degree Programs

A copy of each graduate degree program as approved by the Board of Trustees and as officially amended is on file in the Office of the Provost. This record contains the goals of all requirements for the program. All descriptions of the program in the university, college, and department publications must conform to this officially approved record. Descriptions of PlusOne programs are also on file in the provost’s office.

Standards of admission are specific to certificate and degree programs.

Admission Requirements

Prior to beginning a graduate program, students must meet one of the following conditions:

- Have received a bachelor’s degree or equivalent from an accredited college or university
- Have received a master’s degree or equivalent degree from an accredited college or university
- Have received a first professional or equivalent degree from an accredited college or university
- Have been accepted into an approved bachelor’s-to-graduate-degree program

Registration

Northeastern University has a policy of continuous registration while enrolled full-time in a graduate degree program.

All students must register for course work, research, thesis, dissertation, or continuation courses for each semester in order to be in good standing in the program. Registration is continuous with the exception of summer. A student must be registered in summer only if he or she will be graduating in the summer or holds an award that requires registration. Students must be registered during the semester in which they complete all requirements for their degree.

When circumstances warrant, e.g., medical exigency, a student may seek a leave of absence.

The university parental leave policy is available in the University Policies section of the Office of the Provost (http://www.northeastern.edu/provost/policies/graduate.html) website.

Transfer Credit

A maximum of 9 semester hours of credit (or 12 quarter hours) obtained at another institution may be accepted toward the degree, provided the credits consist of work taken at the graduate level for graduate credit, carry grades of 3.000 or better, have been earned at an accredited institution, and have not been used toward any baccalaureate or advanced degree or certificate at another institution.

Transfer credits must be no more than five academic years old at the time the student is admitted to graduate study. Courses older than five years will be accepted only in rare circumstances.

Grades earned in transferred credits are not counted as part of the overall grade-point average earned at Northeastern.

Transfer credits will only be accepted at the discretion of the academic department and the college’s graduate office.

Note: The College of Professional Studies’ (CPS) transfer policy (p. 257) is available in the CPS section of the catalog.

Special Student Status

Those students who are not pursuing a specific degree program are classified as special students. Special students must satisfy the requirements for admission and perform at a satisfactory level in coursework in order to continue as special students. Performance of a special student in graduate courses should average at least 3.000 in order for the student to be allowed to register for any subsequent classes. The number of credits that may be earned by a student enrolled as a special student is at the discretion of each graduate office. However, only a maximum of 12 graduate semester hours may be applied to a graduate program. Students interested in pursuing a degree program must make a formal application to the degree program. Special students who do not register for four consecutive semesters, excluding summer semester, will be subject to review and possible withdrawal.

Special students are not eligible for Northeastern financial aid awards or federal financial aid.

Provisional Student Status

Provisional students are students whose academic records do not qualify them for acceptance as regular students. Provisional students must obtain a 3.000 grade-point average in the first 9 semester hours of graduate courses in order to continue in the graduate program or meet specifically delineated departmental requirements to qualify for full acceptance to a degree program. Students may not earn more than 9 semester hours while enrolled in provisional status. After the completion of 9 semester hours, students must either satisfy regular admission standards or be denied further registration in the graduate program.

Provisional students are not eligible for Northeastern financial aid awards or federal financial aid.

International students cannot be admitted provisionally or conditionally.

Undergraduate Credit for Graduate Courses

Undergraduate students who are juniors or seniors may enroll in graduate courses for credit toward their undergraduate degrees if they meet all prerequisites as determined by the graduate director and they receive
permission from the instructor of the course and from the student’s undergraduate academic advisor.

**Inter- and Intracollege Graduate Courses**

In colleges that have a graduate school, units within the college that do not offer graduate degree programs may offer a maximum of two courses per year if the courses are approved within a unit or units offering a graduate degree program. These courses will be subject to the same review process as other graduate courses.

**University-Mandated Training**

All students must fulfill all university-mandated ethics and safety training.

---

**Regulations Applying only to Doctor of Philosophy (PhD) Programs**

**Committee in Charge of the Graduate Student’s Degree Program**

The committee in charge of the graduate student’s degree program is that body charged with overseeing all academic and administrative matters relating to the program. This committee will be a departmental or, in the case of colleges without departments, a college committee.

**PhD Dissertation Committees**

No dissertation committee shall have fewer than three faculty members, two of whom shall be from Northeastern University. The chair of the dissertation committee will be a full-time tenured or tenure-track member of the faculty of Northeastern University and will hold an appropriate doctorate. A research faculty member may chair a dissertation committee if he or she holds an appropriate doctorate and has received the approval to do so from the tenured and tenure-track faculty members of the unit(s) in which his or her appointment resides.

If a student’s major advisor leaves Northeastern, that person may continue the research direction of the dissertation or thesis. However, a co-advisor must be appointed from the academic department or program. The student will then have two advisors, one an official member of the Northeastern faculty who will be available for research and administrative matters and the ex-Northeastern advisor. If a new major advisor is appointed, the ex-Northeastern faculty member may serve as an outside member of the committee.

The PhD committee should be appointed early enough to advise in the formulation of the student’s program and in refining the research topic for the dissertation. Within the constraints of the above criteria, the PhD program faculty will determine the process by which dissertation committees are established. The final list of dissertation committee members shall be reported to the associate dean for graduate education.

Each PhD student shall have an annual review of his or her progress toward the degree. A copy of the review shall be submitted to the student.

After reaching candidacy, students must register for Dissertation for a minimum of two semesters in order to fulfill their formal residency requirement. Continuation status enrollment is for students who are postcandidacy, have completed all course work, and are actively engaged in completing a thesis or dissertation.
Course Requirements
A candidate for the master’s degree must satisfactorily complete an approved program conforming to the requirements of the graduate school and department or program in which the candidate is registered.

The requirements for the master’s degree are a minimum of 30 semester hours of graduate work beyond the bachelor’s degree, except in the College of Professional Studies, in which 45 quarter hours of graduate work are required. There may also be other study required by the graduate school and department or program concerned. Students enrolled in a PlusOne program will be allowed to double-count prescribed graduate courses as part of their undergraduate degree.

Language Requirement
The committee in charge of the degree program may establish a language requirement.

Comprehensive Examination
At the discretion of the committee in charge of the degree program, final written or oral comprehensive examination(s) may be required. Such examinations will be given at least two weeks before the Commencement at which the degree is to be awarded.

Thesis
If a thesis is required in partial fulfillment of degree requirements, it must show independent work based, in part, on original material and must meet the approval of the student’s thesis committee. The committee in charge of the degree program is responsible for providing instructions concerning preparation of the thesis.

The student must submit the thesis to ProQuest in sufficient time to allow for acceptance before the Commencement clearance deadline. Information on archiving a thesis with ProQuest is available in the program-relevant graduate office.

Time Limitation
Course credits earned in the program of graduate study, or accepted by transfer, are valid for a maximum of seven years unless the relevant graduate office grants an extension.

The Certificate of Advanced Graduate Study (CAGS) provides specialized study above the master’s degree. It is a course of study that falls between the master’s and doctoral degree and culminates in a graduate certificate.

Admission
An applicant for the CAGS must hold a master’s degree in a related field from an accredited institution and must complete the admission procedure described in the material of the graduate school. All students admitted to a CAGS program must satisfy the general requirements for admission as a graduate student and the requirements for the specific CAGS program.

Academic Classifications and Degree Candidacy
Students admitted to a CAGS program will be designated as candidates for the Certificate of Advanced Graduate Study.

Course Requirements
A candidate for the CAGS must satisfactorily complete an approved program conforming to the requirements of the graduate school and department or program in which the candidate is registered. The candidate must complete a minimum of 24 semester hours or, in the case of the College of Professional Studies, 32 quarter hours of credit beyond the master’s degree.

Time Limitation
Course credits earned in the program of graduate study, or accepted by transfer, are valid for a maximum of seven years unless the relevant graduate office grants an extension.

The formal requirements for the PhD degree are the following:

• Completion of the course work mandated by the individual degree program.
• Fulfillment of the residency requirement.
• Formal training in the Responsible Conduct of Research (http://ori.hhs.gov/sites/default/files/rcrintro.pdf) for students as appropriate.
• A comprehensive examination or equivalent if required by the degree program.
• Continuous registration.
• A final examination conducted by the student’s PhD committee.
• Submission of a dissertation to the relevant graduate office and to ProQuest for archiving. The dissertation must be based on original and independent research.

Admission
All students admitted to a doctor of philosophy program must satisfy the general requirements for admission as a graduate student and the requirements for the specific PhD program.

Academic Classification and Degree Candidacy

DOCTORAL STUDENT
Students in this classification have been admitted to a doctoral program.

DOCTORAL CANDIDATE
Every degree program shall have a policy defining candidacy. Students in this classification will have completed all departmental, college, and university requirements except for the dissertation. These requirements vary by program but minimally include completion of approximately 30 semester hours of acceptable graduate work beyond the bachelor’s degree or possession of a previously earned master’s degree that is acceptable to the department and certified by the graduate office. The requirements frequently include a comprehensive examination or a proposal defense.

Residence
Every degree program shall have a policy defining residency for candidates for doctoral degrees. The committee in charge of the degree program defines residency and specifies the method by which any residence requirement is satisfied.

Course Requirements
The program committee in charge of the degree program specifies the doctoral course requirements.

Language Requirements
The committee in charge of the degree program establishes the nature of the language requirement, if any.
Effective Date: Fall 2023

General Regulations and Requirements for Interdisciplinary Graduate Degrees

Northeastern University offers individually designed and ongoing interdisciplinary graduate programs. The individually designed program is for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, the student may design, in consultation with the faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern’s established degree standards but need not agree exactly with the regulations of individual units. There are also ongoing programs for students who wish to pursue graduate studies in areas in which two or more units have joined to create a graduate program. As with individually designed programs, ongoing programs correspond in scope and depth to Northeastern’s established degree standards but do not agree exactly with the regulations of individual units.

The general regulations and requirements for graduate programs apply to interdisciplinary programs. Additional regulations and requirements are stated below.

Admission

UNIVERSITY-APPROVED INTERDISCIPLINARY PROGRAMS

Ongoing interdisciplinary programs are university-approved programs in areas of study that combine study in two or more units.

Each interdisciplinary graduate program shall be managed as established in the approved design of the program. All interdisciplinary programs, both master’s and PhD, shall identify a committee with representation from all of the units involved to oversee the administration of the program in accordance with the guidelines established above. All administrative details, including but not limited to admission, probation notification, and graduation clearance, shall be carried out by the registration unit. Curriculum design and any subsequent modifications to a program shall be approved by the established procedures within all of the units involved.

INDIVIDUALLY DESIGNED INTERDISCIPLINARY PROGRAMS

In order to pursue an individually designed interdisciplinary graduate program, a student must have been accepted into an approved graduate program that will serve as the registration unit for the interdisciplinary program.

Successful application for admission to an individually designed interdisciplinary program consists of a carefully thought-out, written proposal describing the areas of proposed study and research. Part of this proposal will be a list of courses to be taken; a description of the qualifying and comprehensive examination process to be used, if any; a timeline; and any other requirements of the program. This proposal must be designed and prepared in consultation with a terminal faculty member at Northeastern University. In the case of an interdisciplinary PhD proposal, this faculty member must meet the qualifications defined in the section on PhD Dissertation Committees (p. 9). At least two units must be participating in order for the proposal to be deemed interdisciplinary. The proposal must correspond in scope and depth to Northeastern’s established degree standards. All of the units and the associate dean(s) for graduate education of the participating college(s) must approve the proposal. Approval of the proposal indicates that appropriate curricular and other academic norms for the specified degree are satisfied. A proposal for a PhD must define an area of study in which original and independent research can take place.
Admission of the student to the interdisciplinary program of study requires favorable recommendation by all units involved, including the registration unit. It also requires the commitment by a faculty member at Northeastern University to be the advisor of the student and chair of the interdisciplinary committee for the student. In the case of an interdisciplinary PhD program, this faculty member must meet the qualifications defined in the section on PhD Dissertation Committees (p. 9). This faculty member may or may not be a member of the registration unit. The committee must be assembled within the first semester of the program and must include faculty members from all of the participating units. At least two units must be represented on the committee.

This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the registration unit on an annual basis.
Information for Entering Students

Graduate education at Northeastern integrates the highest level of scholarship across disciplinary boundaries with significant research and experiential learning opportunities in Boston and around the world. Northeastern offers more than 165 graduate programs, ranging from doctoral and full-time master’s programs to part-time programs and graduate certificates, including an array of innovative PhD and master’s programs designed to prepare students for emerging new fields. Students are able to take courses on campus, online, or in hybrid formats. This multidimensional learning environment offers students the knowledge and experience to excel and the flexibility to create the educational experience that best meets their needs. Our graduates are well positioned to meet the diverse demands of careers in academia, industry, and the professions.

Living in Boston

Boston is an exciting city that is the perfect place for students. For links to Boston landmarks, cultural institutions, news sources, city guides, and off-campus apartment listings, visit the Graduate Student Life website (http://www.northeastern.edu/graduatetudentlife).

Off Campus Student Services

226 Curry Student Center
617.373.8480
offcampus@northeastern.edu
Website (http://www.northeastern.edu/offcampus)

Off Campus Student Services provides a wide range of information, resources, and educational workshops for students who are interested in living off campus or who already live off campus.

Off Campus Student Services provides assistance in searching for off-campus housing, finding roommates, and learning more about the communities surrounding Northeastern University. Our website offers a host of resources including an apartment search database, information on transportation, and City of Boston tenant services, as well as contact information for area real estate professionals.

Off Campus Student Services publishes a monthly e-newsletter that provides valuable tips and information on upcoming programs and events both on campus and off campus. Individuals interested in receiving our newsletter can email us at offcampus@northeastern.edu or stop into the office Monday through Friday.

For more information, visit the Off Campus Student Services website (http://www.northeastern.edu/offcampus).

Information for International Students

Office of Global Services

405 Ell Hall
617.373.2310
617.373.8788 (fax)
Website (http://www.northeastern.edu/ogs)

The Office of Global Services (OGS) offers a vast array of programs and services to more than 11,000 international students and scholars who represent approximately 130 nations.

The OGS also works to promote meaningful interaction and intercultural understanding among citizens of other countries and their peers from the United States, providing educational and cultural enrichment opportunities for all members of Northeastern and the community at large.

The OGS oversees the Student and Exchange Visitor Information System (SEVIS) at Northeastern, as mandated by the U.S. federal government, in order to ensure compliance with regulations and procedures affecting those international students and scholars in specified nonimmigrant visa classifications.

Affiliation with the OGS begins with admission to the academic program and continues through such initiatives as the OGS’s cultural festival in February, “OGS Carnevale,” which celebrates the cultural diversity of the entire university community. For a list of OGS services and programs, visit the website.

International students must maintain full-time status at Northeastern to be in compliance with immigration and SEVIS regulations. Also, they must not engage in any type of employment unless authorized by the OGS. Note that timely registration for courses is especially important so that they may remain in compliance with current federal regulations. They should consult with the OGS if they have questions about their individual status.

Coming to Boston

Preparing to travel to Boston and begin your studies at Northeastern University is exciting, and you have many things to do in preparation for both. When you plan carefully, your travels and arrival in Boston should go smoothly. Here are some of the key things you should do to prepare.

- Obtain your F-1 or J-1 visa from the U.S. embassy or consulate in your home country to be eligible to study in the United States. An international student may attend Northeastern in a nonimmigrant status other than F-1 or J-1 only if U.S. immigration regulations allow for study in the United States under that specific nonimmigrant visa classification. Some international students must apply and be approved for a change of status (e.g., from F-2 to F-1) before beginning the program at Northeastern. For detailed information/instructions specific to your current nonimmigrant status, as well as eligibility to participate in co-op or other forms of experiential learning required by your academic program, contact the OGS (http://www.northeastern.edu/ogs/visaprocess.html).

- Mandatory Student Health Insurance: Since September 1989, Massachusetts law (M.G.L. c.15A, § 18) has required every full-time and part-time student enrolled in a certificate, diploma, or degree-granting program in a Massachusetts institution of higher learning to participate in a Student Health Insurance Program (SHIP) or in a health benefit plan with comparable coverage. The Student Health Program defines a part-time student as a student enrolled in at least 75 percent of the full-time curriculum.
Studies graduate students—7 credits, part-time graduate students—6 credits).

- **Health report:** Prior to entering Northeastern, all enrolled students must complete and submit a health report to University Health and Counseling Services (UHCS). It must be completed and returned by the stated deadline. The required record of immunity section is necessary for compliance with the Massachusetts immunization requirements for college-age students. Failure to meet the requirement will prevent future course registration. Additionally, further documentation of immunity is mandatory for students in Bouvé College of Health Sciences. Visit the UHCS web page (http://www.northeastern.edu/uhcs) to access the health report online.

**Planning Information**

As a new international student you are expected to arrive by the start date of your program stated on the I-20 or DS-2019, and you should not arrive after the report date on your I-20 or DS-2019.

When you make your travel arrangements, you should seek admission to the United States no more than 30 days prior to the report date on your I-20 or DS-2019, and you should not arrive after the report date on your I-20 or DS-2019.

All international students will need to attend the scheduled international student orientation program and complete the international student online check-in process. For further details on the OGS international student orientation and online check-in process, and for other information pertinent to international students, check the OGS website (http://www.northeastern.edu/ogs).

**International Student Orientation**

At the beginning of each semester the OGS organizes sessions, events, and activities designed to ensure you have completed all U.S. documentation requirements and to provide you with information and support to ease your transition to life in the United States and at Northeastern University. During these sessions, you will also have the opportunity to meet other international students, learn from shared experiences, and find any assistance you may need.

Orientation week is very important. Make sure you are following all the instructions provided by your academic department and the OGS about the program, and attend as many scheduled events as you can to ensure a smooth transition during your first few weeks on campus.

For a schedule of required sessions and other events, see the OGS website (http://www.northeastern.edu/ogs/schedule.html).

If you are a U.S. citizen living abroad, you are not required to complete OGS’s activities and sessions. You are more than welcome, however, to attend other sessions and events planned by the OGS during orientation. Visit the orientation schedule on the OGS website (http://www.northeastern.edu/ogs/schedule.html) to see a full listing of other sessions and events.

**Participate in Cultural Events**

We are proud to offer cultural events throughout the academic year to the Northeastern community. For more information and to register, check the schedule of events on the OGS website (http://www.northeastern.edu/ogs/schedule.html).

**SEVIS Compliance**

The OGS is required to comply with immigration regulations governing your student status and must submit information every semester as required by the Department of Homeland Security.

**The OGS: Your Resource for SEVIS Advice and Assistance**

The OGS advises students on the complexities of immigration compliance and interfaces with various U.S. government agencies. The OGS maintains and updates the SEVIS system and advises students on relevant issues related to nonimmigrant student status by individual appointments or through workshops and information sessions. Consult the OGS whenever you have a question relating to your nonimmigrant student status or any aspect of SEVIS compliance.

**Academic Resources**

- **Libraries (p. 14)**
- **Office of the Registrar (p. 15)**

** Libraries

Northeastern University Libraries
617.373.8778
Website (http://www.library.northeastern.edu)

Snell Library is the university’s primary research library, with collections and services supporting research and teaching across disciplines. Holdings are extensive, with a large proportion available digitally. Collections include more than 800,000 print volumes, more than 500,000 e-books, 70,000 serial subscriptions, 74,000 licensed e-journals, and more than 6,300 feet of archival and manuscript collections. Additionally, Northeastern University Libraries is a selective federal depository, maintaining a collection of materials (mostly online) published and distributed by the federal government.

Snell Library is also the primary study environment on campus, open 24/7 to the whole university community, year-round. Spaces include group, quiet, and silent work areas, with more than thirty group study rooms with whiteboards and plug-in displays for collaborative group work. Individual study rooms are also available for graduate students. In partnership with Information Technology Services, the library supports the Digital Media Commons and InfoCommons computing areas, providing high-level media creation and editing capabilities. The Digital Media Commons also includes a 3D printing studio with a full suite of fabrication technologies and professional-level audio and video recording studios.

Services provided by Snell Library include both on-site and distance reference, the latter including 24/7 live chat with a reference librarian; subject-specialist librarians who provide in-depth consultation and research support for each academic program at the university; and an interlibrary loan system for providing materials not readily available at Northeastern. Digital scholarship project support and tools are also available through an institutional repository and data management services. The library also teaches workshops on digital media tools and resources and instructional sessions about library research for students and faculty.

A free, university-operated shuttle service provides students with a safe ride home (within a mile radius of campus) from Snell Library every 20 minutes from 7:00 p.m. to 6:00 a.m.
The School of Law Library, located on five floors in the Knowles Law Center, includes a comprehensive collection of U.S. legal materials in print and in electronic format. Of particular note is the library’s collection in the areas of public interest law; international human rights law; and public health, death penalty issues, and progressive lawyering. Access to print and electronic materials is provided through Scholar OneSearch, the university’s online library catalog. More information can be found at the School of Law Library web page (http://www.northeastern.edu/law/library).

**Office of the Registrar**

**Walk-in address**
271 Huntington Avenue

**Mailing address**
Northeastern University
ATTN: Office of the Registrar, 230-271
360 Huntington Avenue
Boston, MA 02115-5000

617.373.2300
617.373.5351 (fax)
registrar@northeastern.edu
Website (http://www.northeastern.edu/registrar)

The Office of the University Registrar provides an important link between the university’s academic programs and policies and the student. It administers a number of specific services, including class scheduling, registration, record functions, verification of enrollment, reporting, transcript services, and Commencement.

The registrar’s office utilizes the myNEU web portal (http://myneu.neu.edu/cp/home/displaylogin) to provide students convenient access to information and services, including class schedules and registration, most recent grades, unofficial transcripts, and transcript and enrollment verification requests. Additional information is available at the registrar’s office website (http://www.northeastern.edu/registrar).

**Information Technology Services**

617.373.4357 (xHELP)
help@northeastern.edu
Website (http://www.northeastern.edu/its)

Information Technology Services (ITS) is the centralized technology resource for students, faculty, and staff. ITS provides secure, high-speed Internet access through the on-campus networks NUnet and ResNet; wireless internet connectivity through NUwave; centralized computer labs—the InfoCommons and the Digital Media Commons (DMC)—with the latest software; on-site and remote printing; access to the Blackboard learning management system; a vast array of software applications for Windows and Mac; access to myNEU, Northeastern’s online portal; on-site and online training on popular software; and high-performance research computing.

**ITS Service Desk**

Help and Information Desk, Snell Library
617.373.4357 xHELP
help@northeastern.edu

The ITS Service Desk provides phone-based and walk-up technology support services to students, faculty, and staff. The ITS Service Desk staff also offers support for ITS-managed printers and answers general computing questions. Contact the ITS Service Desk for the following services:

- Troubleshooting Northeastern University—provided accounts and applications, including email
- Investigating wired and wireless network connection problems
- Troubleshooting network printer problems
- Assisting students with myNEU and Blackboard questions
- Support with ITS-managed labs
- Access to equipment available for loan including AV equipment, and laptop adapters

The ITS Service Desk is located at the Help and Information Desk on the first floor of Snell Library near the InfoCommons and provides assistance on computer-related issues to students, faculty, and staff with a valid Northeastern ID.

**myNEU**

Website (http://myneu.neu.edu)

myNEU—the online portal for the Northeastern community—is a central resource for students, faculty, and staff. Your myNEU username and password provide access to key university platforms, from the myNEU portal to other university systems, including wireless network access, printing, and email.

The myNEU portal offers services tailored to your role at Northeastern for all academic, personal, and recreational needs. Resources available for students include links to student email, information channels, financial aid, Blackboard and online course registration. NU Alert, our real-time university emergency notification system, utilizes the contact information provided within myNEU. It is your responsibility to maintain accurate personal and emergency contact information.

**ResNet and the ResNet Resource Center**

Speare Commons
617.373.HELP (x4357)
resnet@northeastern.edu
Website (http://www.northeastern.edu/resnet)

ResNet—a service of Information Technology Services and Housing Services—provides internet access to all students living in Northeastern residence halls. The ResNet Resource Center, located in Speare Commons, provides students with support for the HuskyCable TV service, mobile devices, gaming systems and other devices, student email, computer troubleshooting, and repair services for Apple and Dell computers.

**Printing**

The Northeastern Printing Program provides a limited amount of free printing each year to students, faculty, and staff. Each September, as an active member of the community, you are given a credit of $120 on your Husky Card to use at your discretion at any of the ITS-managed printers located across campus. Print credits do not carry over from one academic year to the next.

Print jobs can be directly sent to the appropriate printer queue from any ITS computer labs or from your own computer by using the Virtual Print Client software to remotely print. When you locate a printer associated with the appropriate printing queue, simply swipe your Husky Card, select your print job, and it will print.
Appropriate Use Policy
The information systems of Northeastern University are intended for the use of authorized members of the community in the conduct of their academic and administrative work. The Appropriate Use Policy (AUP) describes the terms and conditions of Northeastern information systems use. For more information, visit the Appropriate Use Policy web page (http://www.northeastern.edu/aup).

Training Services
Snell Library
617.373.5858
training@northeastern.edu

Information Technology Services training provides the following instructor-led and web-based courses to all members of the Northeastern community:

- **Web-based training.** ITS training offers computer training over the internet, including Mac tutorials, MS Office tutorials, some application-specific training provided by the application vendors, and via Lynda.com, which offers 24/7 access to an extraordinary breadth of training modules. Web-based training is an innovative, self-paced learning method that allows students, faculty, and staff to train anytime or anywhere, using a computer with an internet connection.
- **Instructor-led training** includes classes such as Public Speaking for Presentations, Advanced Excel, SharePoint, Adobe Photoshop, and Blackboard. These workshops are available at no charge to the entire university community.

To register for a class, visit the training section of the ITS website.

Academic Technology Services (ATS)
212 Snell Library
Website (http://www.ats.neu.edu)
ats@northeastern.edu

For graduate students performing teaching assistant/graduate assistant work, Academic Technology Services (ATS) is a resource for choosing and implementing technological solutions for a wide range of classroom goals. Whether creating online classes or incorporating flipped classroom techniques into on-ground classes, ATS offers consultation and support for implementation. Additionally, ATS manages the Discovery Lab, located on the first floor of Snell Library, which is a space for showcasing ideas and innovations at Northeastern. The Discovery Lab is an area to host both events and exhibitions.

Career Services
103 Stearns Center
617.373.2430
617.373.4231 (fax)
careerservices@northeastern.edu
Website (http://www.northeastern.edu/careerservices)

Career Services provides resources, guidance, and opportunities that help students and alumni with the following:

- Choose a major and explore career options that fit their unique attributes
- Make career decisions that will engage them in productive and fulfilling work
- Prepare for and conduct successful job searches
- Create meaningful and effective engagement with employers
- Contribute to meeting global and societal needs

Northeastern’s Career Services does not guarantee employment nor do student referrals to prospective employers regarding job openings.

Campus Recreation
Marino Recreation Center
617.373.4433
Website (http://www.campusrec.neu.edu)

Exercise your body, mind, and spirit. The campus recreation program provides many outlets to help clear your mind and recharge your spirit. Our fitness facilities, unique among Boston-area colleges and universities, are open year-round. All programs were designed with you in mind; so whether you enjoy group fitness classes, ice hockey or street hockey, basketball, weight training, or swimming, campus recreation has something for everyone.

Full-time Northeastern students in good standing who are enrolled in classes and/or co-op, or scheduled for vacation but have paid the campus recreation fee, have access to the Marino Recreation Center, Cabot Center, and the Badger and Rosen SquashBusters Center. Part-time students in good standing have access during any academic quarter in which they are enrolled and attending classes, as long as they have requested and paid the campus recreation fee. Help us maintain a safe and secure environment. Your Northeastern photo ID card—which must be a current, valid, and active card—must be swiped upon arrival in order to enter all facilities.

Center for Advancing Teaching and Learning Through Research
215 Snell Library
617.373.3157
617.373.7779 (fax)
learningresearch@northeastern.edu
Website (http://www.northeastern.edu/learningresearch)

The Center for Advancing Teaching and Learning Through Research supports graduate students at Northeastern University in their roles as teaching assistants, instructors, and future faculty. We provide a range of opportunities for graduate students to develop their teaching practices in
ways that enhance student learning and that are grounded in the learning sciences research. The center offers:

- Workshops in which graduate students explore specific topics in teaching and learning
- Classroom observations and student focus groups in which graduate students receive and reflect on feedback on their teaching
- One-on-one consultations in which graduate students can discuss any aspect of teaching and learning, such as writing a teaching statement and designing teaching materials and activities
- Future Faculty Program for Teaching in Higher Education in which graduate students prepare for the teaching responsibilities of a faculty career

All of the center’s services are provided on a formative and confidential basis. While we work with and provide feedback to graduate students as they design teaching materials and reflect on their own practices, we do not evaluate graduate students. Furthermore, we do not provide any information about feedback and consultation services, or even that such a service was provided, without the express consent of the graduate student who has used these services.

**Disability Resource Center**

20 Dodge Hall  
617.373.2675  
617.373.7800 (fax)  
617.373.2730 (TTY)  
Website (http://www.northeastern.edu/drc)

The Disability Resource Center (DRC) strives to create an environment in which all are empowered to make their unique contributions to the rich academic and social life of Northeastern. Its staff takes a creative approach to assisting students who have disabilities or who are Deaf or hard of hearing by providing services that will enable them to succeed.

In accordance with federal laws and guidelines, services cannot be provided unless acceptable documentation is submitted to the DRC. Students must provide recent diagnostic documentation indicating that the disability substantially limits one or more major life activities. They must also register with the DRC and meet with a counselor.

Students who are disabled, Deaf, or hard of hearing are strongly encouraged to contact the DRC upon their acceptance to Northeastern. It is also most beneficial to schedule a meeting with a DRC counselor at least three months prior to arriving on campus in order to register and request services. Early contact with the center will allow enough time to assemble the required diagnostic documentation, register at the DRC, and set up services.

Services are individually tailored on a case-by-case basis to meet each student’s needs. Support services are available for, but are not limited to, students with a documented diagnosis of learning disabilities, blindness or visual disabilities, mobility disabilities, deafness or hard of hearing disability, head injuries, psychiatric disorders, degenerative or chronic conditions, HIV-positive status or AIDS, and temporary disabilities.

The center’s services include examination modification and accommodation; disability-related academic advising and course modification; note-taking services; readers and scribes; sign-language interpreters and transliterators; computer-aided, real-time information about classrooms’ accessibility; advising and referral services; campus orientations; acquisition of assistive listening devices, Braille materials, taped textbooks, and raised-line drawings; and assistive technology, such as the Reading Edge machine. The center also provides liaison, advocacy, and training services for faculty, staff, and administration and coordinates special-interest groups.

DRC does not provide personal care assistance (PCA) services; the center will provide referral to local PCA service agencies, such as the Boston Center for Independent Living (http://www.bostoncil.org).

Northeastern does not offer transportation services; however, public transportation in greater Boston is run by the Massachusetts Bay Transportation Authority (MBTA), which offers a curb-to-curb transportation service known as The Ride for persons with disabilities. Several stops on the Orange Line branch of the MBTA subway system are very convenient to the Northeastern campus. See the MBTA website (http://www.mbta.com) for more information.

**Graduate Student Government**

236 Curly Student Center  
617.373.4502  
GSG@northeastern.edu  
Website (http://www.northeastern.edu/gsg)

The Graduate Student Government (GSG) represents graduate students at Northeastern University, serving as a liaison among the administration, faculty, staff, and students. The role of the GSG is to address the professional, financial, social, and representative needs of the graduate community as follows:

- Seeks to improve the quality of graduate student life, academic affairs, and research
- Offers access to professional development resources and networking
- Facilitates cooperation among the graduate student groups and organizations
- Distributes the graduate activity fee
- Sponsors graduate orientation programs
- Fosters interdepartmental and intercultural communication and appoints graduate representatives to serve on university committees

All graduate students are eligible to be part of the GSG Senate. Representatives from the eight graduate and professional schools assist the executive board in the affairs of this governing organization. The senate meets regularly during the fall and spring semesters, and all meetings are open to all students.

**Husky Card Services**

4 Speare Commons  
617.373.8740  
HuskyCard@northeastern.edu

Husky Card Services prints Husky Cards, the official identification card of Northeastern University. The Husky Card is used for many purposes, including access to locations, parking, laundry, printing, vending machines, dining services, off- and on-campus vendors, and library book checkout.

Students who are registered for courses on the Boston campus of Northeastern University can come to the Husky Card Services office to obtain their card. A government-issued photo ID must be presented when receiving your Husky Card.
Students who have registered for courses at the Charlotte and Seattle campuses may contact their campus to obtain a Husky Card.

Students who are registered in online courses only are eligible to have their Husky Cards mailed to them. If you are an online student and would like a Husky Card mailed to you, send an email to HuskyCard@neu.edu with your name, Northeastern University ID number, address, and college/degree. Once we have this information, we will open the photo upload option through your myNEU account, which will allow you to upload a photo. Once your photo is submitted, it will take up to two weeks for the photo to be approved and the Husky Card to be mailed to you. Allow more time for international mail.

**John A. and Marcia E. Curry Student Center**

434 Curry Student Center
617.373.2642
Website (http://www.northeastern.edu/curry)

This campus “living room” serves as a hub of student activity. It is the crossroads of community life at Northeastern, offering cultural, social, and recreational programs and services.

The center offers ATM machines, an art gallery, the afterHOURS late-night club, food court and cafeteria, game room, lounge space, meeting rooms, Starbucks Coffee, student organization offices, a TV viewing area, and WRBB-FM.

Student center facilities may be reserved by recognized student organizations and university departments. The university reserves the right to limit the use of its facilities when the general public is involved.

**Northeastern University Bookstore**

*Main Campus*
Curry Student Center, ground floor
617.373.2286
Website (http://www.northeastern.bncollege.com)

The bookstore operates during the entire academic year, but days and hours may vary in accordance with the university’s calendar.

Purchases can be made by cash, check, American Express, MasterCard, VISA, Discover, or Husky Card.

**Parking**

Student Financial Services
354 Richards Hall
617.373.7010
Website (http://www.northeastern.edu/parking)

Parking spaces in the university lots and garages are filled on a first-come, first-served basis. To park in a university lot or garage, students must have a valid parking permit displayed on their vehicles. A parking permit does not guarantee a parking space.

New students may purchase a day-parking permit. Only eligible students will receive a permit. To be eligible, students must be registered for a class or on co-op. The cost of the permit will be charged to the student’s tuition account.

Overnight parking permits are limited.

To apply for a parking permit, visit the self-service tab on myNEU and select “Apply for Parking.”

To park in a handicap space, individuals must purchase a parking decal and display a state-issued handicap license plate, placard, or hangtag. Handicap parking spaces are located throughout campus.

Operators of vehicles driven or parked on university property are responsible for knowing and complying with university driving and parking regulations.

Refer to the parking website for more information.

**Public Safety**

Public Safety Division Administrative Offices
100 Columbus Place
617.373.2696
Website (http://www.northeastern.edu/publicsafety)

Police Operations Center
100 Columbus Place
617.373.3333 (EMERGENCY—police, fire, or medical)
617.373.2121 (noneyergency regular business)
617.373.3934 (TTY emergency or nonemergency)

Personal Safety Escort Service
617.373.2121

The Public Safety Division’s mission is to provide a comprehensive program of police, security, fire safety, and emergency medical services to help ensure the campus remains a safe and pleasant place to live, work, and learn.

The University Police Department is the largest and most visible unit of the division and consists of professionally trained officers charged with the protection of life and property and the prevention and detection of crime on campus. University police officers have the same authority as municipal police officers and enforce both the Massachusetts laws and university regulations. Regulations mandate that students show their university ID cards whenever requested to do so by any university police officer. For more information, visit the public safety website (http://www.northeastern.edu/publicsafety).

The Public Safety Division takes pride in its comprehensive plan to minimize crime and protect the safety of the Northeastern community. But the division needs students’ help and urges students to take responsibility for creating and maintaining a safe and secure environment. For tips on safety around campus and in the neighborhood, pick up a brochure or visit the website.

Fire egress drills are held each semester in all residence halls to familiarize residents and staff with the alarm system and the evacuation routes. Special fire safety and evacuation training is provided for students, faculty, researchers, and staff in high-risk laboratories. All building occupants are required to participate when an egress drill is held. For tips on fire safety, pick up a brochure or visit the website.

The Personal Safety Escort Service provides a door-to-door escort from one on-campus location to another whenever personal safety is a concern. After receiving your call, the university police dispatcher will assign an officer or cooperative education cadet within ten to fifteen minutes (if necessary, the dispatcher will advise you of any expected delays).
A special, nighttime off-campus escort service runs from dusk to dawn to transport students who reside within approximately one mile of the campus from the campus to their residence after dark. The only destination this service will take you to is your residence. A van stops at Snell Library and the Ruggles Public Safety Substation on the hour from 7:00 p.m. to 6:00 a.m. to pick up students.

If you are sexually assaulted, either by a stranger or an acquaintance, get to a safe place, then telephone the university police and a friend or family member. A university police officer who is a state-certified sexual assault investigator will meet with you and address your physical and emotional needs, as well as inform you of your rights and options regarding filing charges against the perpetrator. The police will provide you with important information about on-campus as well as off-campus counseling services as well as other options regarding changing your residence or class schedule.

If the sexual assault took place off campus, the University Police Department can still provide emergency medical treatment, transportation to a medical facility, and counseling referrals. However, the criminal investigation of such cases is the responsibility of the police department that has jurisdiction in the locale where the assault took place, and university police will assist you with making contact with the appropriate agency.

**University Health and Counseling Services**

Forsyth Building, Suite 135  
617.373.2772  
UHCS@northeastern.edu  
Website (http://www.northeastern.edu/uhcs)

The University Health and Counseling Services team is eager to serve you. We hope that you will use our center as a resource to help stay healthy, physically and mentally, and for care when you are ill or injured, deshy, pressed, or stressed.

**We Care**

104 Ell Hall  
617.373.4384  
we_care@northeastern.edu  
Website (http://www.northeastern.edu/wecare)

We Care is a program that assists students experiencing unexpected challenges maintaining their academic progress. We Care works with the student to coordinate among university offices and to offer appropriate on- and off-campus referrals to support successfully resolving issues.

### Refund Policies

Inquiries about credit balances should be directed to Student Accounts. Refund requests for credit balances are made via the “Self-Service” tab on the student’s myNEU web portal (http://myneu.neu.edu). Credit balances will be refunded to the student unless otherwise directed by the student or the bill payer.

Note the following exception: If the credit in your account is due to a Parent Plus/Alternative Loan and/or payment plan payment(s), the borrower or bill payer must complete the Refund Authorization form (http://www.northeastern.edu/financialaid/forms) prior to releasing the funds requested.

### Official Withdrawal Adjustments

Students who officially withdraw, either from a course or from the university, during an academic term will receive a tuition refund based on the policy specified below. Institutional funds awarded by Northeastern University will be adjusted based on the actual charges incurred during the semester. Funds from federal Title IV programs will be returned to the government according to federal regulations. The federal government return-of-funds policy dictates that a student’s eligibility for federal financial aid is determined by the number of days enrolled during the semester. The refund will be calculated from the day the student submits a notification of withdrawal to the Office of the University Registrar.

Tuition credits are granted through the first five weeks of a semester or first four weeks of a half-semester, based on the date of the official
withdrawal processed by the Office of the University Registrar. Nonattendance does not constitute official withdrawal. Credit policies vary according to the duration of the course. Typical tuition adjustments are made according to the following schedule. (The end of week three corresponds with the last day to drop a class without a W grade.)

**DURING FULL SEMESTER**
- During weeks one through three—100% refund
- During the fourth week—60% refund
- During the fifth week—40% refund
- After the fifth week—no refund

**SUMMER HALF SEMESTERS AND COURSES OFFERED IN PART-OF-TERM FORMAT**
- During weeks one through two—100% refund
- During the third week—50% refund
- During the fourth week—25% refund
- After the fourth week—no refund

**Leave of Absence Tuition and Fee Adjustments**
Leaves are granted when a student cannot complete the current academic period for health or personal reasons but is confident that he or she will reenroll (additional information about leaves of absence (p. 24)). Northeastern’s medical and emergency leave policy states that all tuition paid for such periods of leave will be held by the university and applied to future charges. Outstanding balances (including unpaid balances) for the academic semester in which the leave is taken are still due to the university during that semester. Financial aid recipients should contact the graduate financial aid office to understand the effects on aid received. Medical leave information is available at the University Health and Counseling Services (http://www.northeastern.edu/uhcs) website. Students who take a leave of absence should be aware that more than six months on leave will cause many student loans to go into repayment.

**Disability Resource Center Tuition Adjustments**
Students who are registered with Northeastern University’s Disability Resource Center (DRC) and are approved for reduced course loads may be eligible to petition the center for tuition adjustments directly related to their documented disability. Further information is available from the DRC.

**State-Specific Refund Policies**
For refund information for Maryland, Oregon, and Wisconsin residents, visit the Student Financial Services (http://www.northeastern.edu/financialaid/policies) website.

### Financial Aid Assistance

**Student Financial Services**
354 Richards Hall
617.373.5899
617.373.2897 (College of Professional Studies)
sfs@northeastern.edu
Website (http://www.northeastern.edu/financialaid)

Northeastern University is eager to assist students in developing a plan for financing a Northeastern education. Through a variety of options—federal financial aid, Northeastern’s monthly payment plan, supplemental loans, and your own resources—a plan can be designed that will make your education costs affordable. Visit the Office of Student Financial Services (http://www.northeastern.edu/financialaid) on the web or call 617.373.5899 for additional information.

### Federal Financial Aid
For many students, financial aid is a major element in making Northeastern University affordable. The Office of Student Financial Services is committed to working with you to identify federal financial aid options that can help make a Northeastern education affordable. To take advantage of federal financial aid programs, students must submit the Free Application for Federal Student Aid (FAFSA) form. Meeting priority filing dates will allow the review of your eligibility for all available financial aid programs. The priority deadline for graduate students is March 1. For information regarding your financial aid application, visit the myNEU web portal (http://www.myneu.neu.edu/cp/home/displaylogin), click on the “Self-Service” tab, and select “My Financial Aid Status.”

Students in the graduate colleges must meet the following criteria to be eligible for federal financial aid:

- Be enrolled in at least 6 credits per term for federal financial aid, unless you are on a co-op, clinical rotation, or residency or are enrolled in a full-time or part-time stand-alone course listed on the Office of the Registrar’s (http://www.northeastern.edu/registrar/ref-udc-fulltime.pdf) website
- Be citizens or eligible noncitizens of the United States
- Be matriculated in a degree-granting program
- Have received high school diploma or GED
- Be registered with Selective Service if required
- Not be convicted of a drug-related crime in the last year
- Not be in default from previous student loans
- Maintain satisfactory academic progress

### How to Apply
File the FAFSA by March 1 in order to be considered for all available federal aid. Northeastern’s FAFSA school code is 002199.

You will need your Department of Education PIN to electronically sign your FAFSA online. If you do not have one or have forgotten your PIN, go to the Federal Student Aid (http://www.PIN.ed.gov) webpage to obtain one before starting the FAFSA online.

### Awarding Timelines
New students are awarded on an ongoing basis throughout the spring after we have been notified that they have been accepted into their program.

Returning students who have met the March 1 priority filing deadline are awarded throughout the summer.

### Typical Graduate Financial Aid Award
Students who file the FAFSA will be eligible to receive up to $20,500 in a Federal Unsubsidized Stafford Loan, assuming that all eligibility requirements have been met.

For more information about Stafford loans, visit the Student Financial Services (http://www.northeastern.edu/financialaid/aid/graduate/typesofaid) webpage.

### Graduate Assistantships and Scholarships
These positions and awards are offered directly by the individual graduate schools or academic departments. Students seeking such assistance should contact their graduate school for eligibility criteria.

To review a description of available graduate assistantships and scholarships, visit the Student Financial Services (http://www.northeastern.edu/financialaid/aid/graduate/typesofaid) webpage.
**Health Professions Student Loans and Nursing Student Loans**

These federal loan programs carry a 5 percent interest rate during repayment. You must demonstrate financial need and meet Northeastern’s priority filing date for consideration, as funds are limited. Northeastern serves as the lender, and the loan is made with government funds. Repayment is made to Northeastern. For nursing loans, there is a nine-month grace period prior to repayment following graduation, withdrawal, or a drop below half-time status. The grace period is twelve months for Health Professions Student Loans. Repayment on the loan is for a period of up to ten years with a minimum forty dollar monthly payment. The loan may be prepaid at any time without penalty.

To be eligible for the Health Professions Loan Program, applicants must be enrolled full-time in the School of Pharmacy in the Bouvé College of Health Sciences. To be eligible for the Federal Nursing Student Loan, applicants must be enrolled full-time in the School of Nursing in the Bouvé College of Health Sciences.

**Physician Assistant Loan**

The Physician Assistant Loan is awarded to full-time students in the graduate Physician Assistant program who demonstrate financial need after filing the FAFSA. The interest rate is fixed at 7 percent. Northeastern University is the lender, and repayment is made directly to Northeastern. The loan amounts range from $1,000 to $3,000, depending upon the student’s financial need. Repayment begins one month after the student ceases to be enrolled full-time at Northeastern University.

**Federal Direct Graduate PLUS Loan**

Unlike Federal Direct Stafford Loans, the Federal Direct Graduate PLUS Loan requires credit approval by the direct loan servicer. Application requests are submitted to Student Financial Services. Students have up to 25 years to repay the grad PLUS loan. The grad PLUS loan can be consolidated with federal Stafford and Perkins loans upon graduation.

Grad PLUS loans do not have a grace period. Repayment begins after a student is no longer enrolled at least half-time. Students who drop below half-time status and then reenroll above half-time status will need to request their loans be deferred again through their assigned direct loan servicer.

Graduate students with myNEU access can apply for a graduate PLUS loan through the student portal by clicking on the “Federal Graduate PLUS Loan Application” link under the “Self-Services” tab. Students who do not have portal access or have trouble applying via the portal should download, print, and complete the paper application that can be found at Student Financial Services (http://www.northeastern.edu/financialaid/financingoptions).

**Supplemental Student Loans**

There are a number of attractive educational loan programs available to assist students in covering their expenses over and above any federal financial aid that may be awarded to them from Student Financial Services. Most private lenders have credit and income requirements that must be met before being approved for these programs. Additional information regarding private loans is available at Student Financial Services (http://www.northeastern.edu/financialaid/financingoptions.html). Student Financial Services recommends to students that, when researching the loan and lender that best meets their needs, they make sure they take into consideration the interest rate, origination, disbursement, or repayment fees and the quality of customer service.

**General Financial Policies and Procedures**

**FINANCIAL AID POLICIES**

Student Financial Services reserves the right to adjust a student’s initial offer of assistance based upon information brought to the office’s attention subsequent to extension of the offer, including things such as outside scholarships or revised family financial data.

**APPEAL/CHANGE IN CIRCUMSTANCES**

If the student feels that the aid process does not accurately reflect his or her situation, or if family circumstances change during the year, the student should notify his or her graduate student financial services counselor for further evaluation. We may request additional documentation from you that might indicate a change in financial circumstances.

**CHANGE IN ENROLLMENT STATUS**

Students must notify Student Financial Services about any change in planned period of enrollment, whether due to withdrawal from a class, a leave of absence, a change in co-op or academic division, or withdrawal from the university. Students should be aware that any change in enrollment status may result in a change in federal or institutional aid eligibility. It is the student’s responsibility to notify Student Financial Services about any change in enrollment status and to ensure understanding of the ramifications of such changes. It is highly recommended that whenever possible, students discuss the impact of such changes with their financial aid counselor before making them.

**OUTSIDE SOURCES OF AID**

Students must notify Student Financial Services of any aid received from outside sources, such as scholarships. Receipt of outside sources of financial aid may require that financial aid offered by Northeastern needs to be adjusted.

**REAPPLICATION PROCESS**

Students must reapply for financial aid each year by filing the FAFSA. To receive priority consideration for aid, the federal processor must receive the FAFSA by March 1. File the FAFSA (http://www.fafsa.ed.gov) online.

Students should not wait to file an income tax return before completing the FAFSA but use estimated information.

**SATISFACTORY ACADEMIC PROGRESS**

To continue receiving financial aid, graduate students need to maintain the academic requirements for satisfactory progress set forth by their college. Refer to the Student Financial Services website (http://www.northeastern.edu/financialaid/policies) for more information about how satisfactory progress affects financial aid.

**VERIFICATION**

If a student is selected for verification, the Student Financial Services office is required to collect tax returns and other financial documents to verify the information provided on the FAFSA. Aid cannot be disbursed until this process is completed.

**RETURN OF TITLE IV FUNDS**

Northeastern University is required by federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60 percent of a term. Recalculation is based on the percentage of earned aid using the Federal Return of Title IV funds formula. Federal regulations require students to obtain at least one A, B, C, D, or S in at least one course for the term; students who receive all unsuccessful grades for a term (F, NE, W, I, U) may be considered unofficially withdrawn from the term and subject to an aid recalculation, including the possible loss of financial aid for that term.
Bill Payment

Student Financial Services
354 Richards Hall
617.373.2270
617.373.8222 (fax)
studentaccounts@northeastern.edu

Full payment of tuition and other related charges is due prior to the start of the term as specified on the original bill. For questions related to the billing process, late fees, payment methods, tuition payment plan, and refunds, contact us at the phone number and email address provided above.

Payment of Tuition
Full payment of tuition, residence hall fees, and other related charges is due before the start of each semester. Payments will be accepted for billable charges only. The university is not able to process payments for more than the balance due on the student’s account. Accepted methods of payment are:

- Electronic check (E-check). Payments can be made online via NUPay on myNEU (http://myneu.neu.edu) and are processed the same day they are received by the university.
- Through the monthly payment plan. Call 800.635.0120 or visit the Tuition Payment Plan website (http://www.tuitionpaymentplan.com/enroll).
- Supplemental loans. Review options at the Student Financial Services website (http://www.northeastern.edu/financialaid/financingoptions).
- Additional payment options and details can be found at the Student Financial Services website (http://catalog.northeastern.edu/graduate/expenses/bill-payment/2http://www.northeastern.edu/financialaid/financingoptions.html).

Bills must be paid promptly. If a bill has not been received by the first week of the semester, contact Student Accounts. Transcripts and other academic records will not be released until all financial obligations to the university have been met.

Discrepancies in Your Bill
Discrepancies in your bill should be addressed in writing via email to Student Financial Services at studentaccounts@northeastern.edu. Include your name, account number, dollar amount in question, date of invoice, and any other information you believe is relevant.

If there is a billing problem, pay the undisputed part of the bill to avoid responsibility for any late fees.

Late Fees
In cases where students default on financial obligations, the student is liable for the outstanding balance, collection costs, and any legal fees incurred by the university during the collection process.

Tuition Paid Directly by Employers
In those situations where the tuition is paid directly to the university by a third party, the student must provide Student Accounts with a purchase order or a written statement of intent to pay by the third party. If there are stipulations associated with the payment agreement, such as a minimum grade level, then the student must either pay the university directly or enroll in one of the payment options. Address correspondence to:

Student Financial Services/Third Party

Tuition Reimbursement
Many companies, embassies, and agencies directly reimburse students for their educational expenses upon successful completion of courses. In these situations, the student is responsible for paying the bill at the beginning of the semester or selecting another payment option. Tuition may not be left unpaid pending reimbursement by a third party.

Tuition and Fees and Default Policy
Tuition rates, all fees, rules and regulations, and courses and course content are subject to revision by the president and the Board of Trustees at any time. In cases where the student defaults on his or her tuition, the student shall be liable for the outstanding tuition and all reasonable associated collection costs incurred by the university, including attorneys’ fees.

Mandatory Student Health Plan
Since September 1989, Massachusetts law (M.G.L. c.15A, § 18) has required every full-time and part-time student enrolled in a certificate, diploma, or degree-granting program in a Massachusetts institution of higher learning to participate in a Student Health Insurance Program (SHIP) or in a health benefit plan with comparable coverage. Under SHIP a part-time student is defined as one who is enrolled in at least 75 percent of the full-time curriculum. (College of Professional Studies graduate students—7 credits, part-time graduate students—6 credits).

Students who have comparable health plan coverage may waive the Northeastern University Student Health Plan (NUSHP) by completing a waiver on the myNEU web portal (http://myneu.neu.edu) by the designated deadline date each academic year. For deadlines and additional information, visit the NUSHP website. (http://www.northeastern.edu/nushp)
Graduate Schools Academic Policies

Note that this information applies to both undergraduate and graduate students. Not all of the policies and procedures are applicable to both types of students. Note: International students must consult with the Office of Global Services (OGS) (http://www.northeastern.edu/ogs) for any of the following items in order to maintain compliance with Student and Exchange Visitor Information System (SEVIS) regulations and institutional policy. It is best to set up an appointment to discuss individual cases and learn about appropriate procedures to follow.

Attendance Requirements

The university expects students to meet attendance requirements in all courses to qualify for credit. Attendance requirements vary; it is the student's responsibility to ascertain what each instructor requires.

Failure to meet attendance requirements may force a student to drop the course, as recommended by the instructor and the college.

Permission to make up work may be granted by instructors for reasonable cause. Requests must be made immediately upon a student's return to class.

Absence Because of Student Activities

If students must miss classes to participate in athletic contests or other forms of scheduled intercollegiate activity, they are entitled to makeup privileges. Faculty members may require a written statement from the administrator in charge of the activity.

Absence Because of Illness

A student who is absent from school for an extended period of time must inform his or her college by email from an official university email account or by telephone.

Absence Because of Religious Beliefs

The university maintains the following guidelines regarding student absences because of religious beliefs:

Any student who is unable, because of his/her religious beliefs, to attend classes or to participate in any examination, study, or work requirement shall be provided with an opportunity to make up such examination, study, or work requirement that he/she may have missed because of such absence on any particular day; provided, however, that such makeup examination or work shall not create an unreasonable burden upon such school. No fees of any kind shall be charged by the institution for making available to the said student such opportunity. No adverse or prejudicial effects shall result to any student because of availing himself/herself of the provisions of this section. (Massachusetts General Laws, Chapter 151C, Section 2B, 1985)

Absence Because of Jury Duty

Members of the university community are expected to fulfill their obligations to serve on a jury if called upon.

A student selected for jury duty should inform his or her instructors and/or activity advisors. They will provide a reasonable substitute or compensatory opportunities for any required work missed. Absence will not be penalized in any way.

University Leave of Absence Policies

GENERAL POLICY

Students who wish to take a leave of absence are encouraged to apply for the leave by submitting a petition through the myNEU web portal (http://myneu.neu.edu) one month prior to the start of the semester during which they plan to take the leave.

The usual limit for a leave of absence is one academic semester. International students must contact the OGS (http://www.northeastern.edu/ogs) for specific leave of absence procedures. A leave of absence (general, medical, or emergency), if approved, will take into account the following conditions:

- Students who do not return at the end of the leave will be withdrawn and must submit a petition for subsequent readmission to the program.
- Students must return to classes, not cooperative education (co-op).
- Students must be currently enrolled in academic courses or co-op. If a student is withdrawn for any reason, a request for a leave of absence cannot be considered until the withdrawal is resolved.
- Students who receive financial aid should meet with a financial aid counselor before going on a leave.
- Students in university housing should refer to Residential Life and Housing for policy information.
- Students' enrollment status cannot include more than one academic year of consecutive nonclass enrollments.
- After the eleventh week of the semester, a student may apply for a leave of absence only for medical reasons or due to military deployment.
- Students who take leaves should be aware that more than six months on leave will cause many student loans to go into repayment. Students should see their financial aid counselor for more information on how their loans may be affected by a leave of absence.

RETURNING FROM A GENERAL LEAVE OF ABSENCE

Students returning from an approved leave of absence may be required to submit to their college's student services office a notification of intent to return. It should be submitted no later than one month prior to the start of the semester in which they intend to return. Students are required to preregister for courses upon returning from a leave of absence. International students returning from a leave of absence should contact the OGS (http://www.northeastern.edu/ogs) regarding SEVIS procedures three to four months prior to anticipated return time.
LEAVE OF ABSENCE DUE TO MILITARY DEPLOYMENT
When a student in the Reserves or in the National Guard is called to active duty, the student must notify his or her college dean’s office and provide proof of deployment prior to being deployed. The proof may be faxed, mailed, or hand-carried to the college dean’s office. It may take the form of general orders cut by the company commander.

When a student is activated during the term, the university will:

• Excuse tuition for that term. Any payment made will be credited to the student’s account.
• Place a “W” on the student’s transcript for each class enrollment.

If a student is called to active duty near the end of the term, the student and faculty members may determine that incomplete (I) grades are more appropriate. In this case, tuition will not be waived.

When a student returns to the university after completion of a tour of duty, he or she will notify the college dean’s office. The college dean’s office will assist the student with registration.

MEDICAL OR EMERGENCY LEAVE OF ABSENCE
Medical leave is an option available to those Northeastern students who develop a major medical condition that precludes class attendance, completion of requirements, and/or co-op. Medical leave petitions must be initiated at University Health and Counseling Services (UHCS). Students are not allowed to take courses for credit toward their degree at Northeastern while on medical leave of absence. International students must contact the OGS (http://www.northeastern.edu/ogs) regarding medical leave of absence procedures. Students can petition their college for an exception to take courses elsewhere based on extenuating circumstances.

Students who wish to reenter the university following a medical leave must contact UHCS. Reentry from a medical leave requires receipt of all documentation delivered to UHCS on or around one month prior to the planned reentry to classes. Once all documentation is received by UHCS, it will be reviewed and the student will be notified of the decision. Students must attend classes on the Northeastern campus for the semester they wish to return from medical leave of absence.

More specific information about the medical leave and reentry process, along with the application for leave, can be found at the UHCS web page (http://www.northeastern.edu/uhcs/access-to-care/medical-leave-of-absence).

Emergency leaves may be granted when a student cannot continue attending class after the start of the term due to life-changing situations beyond the student’s control.

The university’s medical leave of absence and emergency leave policy states that all tuition charged for the term in which the leave has been granted will be held by the university and applied toward future tuition charges in the same academic program. Outstanding balances (including unpaid balances) for the academic term in which the leave is taken are still due the university. Tuition adjustments are made depending on the timing of the leave. The adjustments would follow the same schedule as the official withdrawal adjustments. Financial aid recipients must contact their financial aid counselor to understand the effects on aid received.

If the leave extends more than six months, student loans may go into repayment. Students enrolled in the Northeastern University Student Health Plan (NUSHP) will remain enrolled in the plan for the plan year, ending August 31.

Emergency leave petitions are available in college academic student services offices and specify the conditions and procedures under which such leaves may be granted.

MEDICAL WITHDRAWAL
Permanent departure from the university due to the diagnosis of a major medical illness or injury, or psychiatric illness, necessitates a petition for medical withdrawal. The procedure follows that for the medical leave of absence.

University Withdrawal
Students seeking to withdraw from the university for any reason should contact the student services office of their college.

Students may be withdrawn from the university for financial, disciplinary, academic, or health reasons. In the last case, a committee will review the recommendations of the director of health services to determine whether the student should withdraw. The student has an opportunity to present his or her case to the committee. Withdrawals are made only when it is determined that the student is a danger to himself or herself, or to other members of the university community, or when the student has demonstrated behavior detrimental to the educational mission of the university. International students must contact the OGS (http://www.northeastern.edu/ogs) regarding any compliance issues implications deriving from university withdrawal.

University-Sponsored Travel
Northeastern University is committed to the health, safety, and security of its students and all other members of the university community. As a global institution, our university members undertake international travel in pursuit of teaching, research, consulting, service, co-curricular activities, and work intended to advance learning and the interests of the university. As a result, the university supports standards and expectations associated with international travel that are designed to reduce personal and university risk.

To ensure the safety of our students, you are required to comply with the university international travel policy when traveling abroad on university-sponsored travel. Such travel may include teaching, research, co-op, service, field studies, and volunteer and administrative work.

In order to provide assistance and support to you while traveling abroad, the university maintains a travel registry. In advance of any planned international travel, all students are required to enter their travel plans along with other requested information into the travel registry. To access the registry, go to the myNEU web portal (http://myneu.neu.edu), “Services and Links,” and register your travel.

Students are responsible for familiarizing themselves with the university international travel policy and are encouraged to visit the international travel website for guidance.

ACADEMIC CALENDARS
The graduate schools’ programs are offered on a semester calendar consisting of fifteen weeks. The College of Professional Studies graduate programs are offered on a quarter calendar consisting of twelve weeks.

QUARTER PROGRAMS
For student records that include quarter hours, the approved semester-hour conversion rate is (quarter hours) x 0.750. For example, a 4-credit quarter course is equivalent to a 3-credit semester course.
Semester Programs
Traditional semester hours apply.

Student Records and Transcripts

Full-Time Status
Note: Full-time status may be defined differently for federal loan purposes.

A graduate student is considered a full-time student if enrolled in a minimum of 8 semester hours of credit for the semester with the following considerations:

• Students who hold stipended graduate assistantships will be considered full-time if enrolled for a minimum of 6 semester hours of credit.
• Students for whom English is a second language, at the discretion of their departments, will be considered full-time if they are enrolled in a minimum of 8 semester hours or three courses, whichever is less.
• Students holding Dean’s scholarships, Diversity fellowships, Double Husky awards, or being supported by Graduate Student Scholarships (GSSs) will be considered full-time if they are enrolled in a minimum of 8 semester hours.
• Students enrolled in Dissertation or Continuation are considered full-time.
• International students enrolled in graduate programs at Northeastern University must consult with the Office of Global Services (OGS) (http://www.northeastern.edu/ogs) on all matters regarding the maintenance of full-time status.

Overload Conditions for Graduate Assistants
Graduate assistants are expected to devote full-time effort to their studies and the duties of their award.

They are not permitted to hold any other job during the term of their assistantship; however, they may be offered limited extra work on campus. Graduate assistants who are not on F-1 or J-1 visas can be offered overload work that does not exceed an average of 6 hours a week or 90 hours a semester, for a total of 270 hours a year (or three semesters). As part of this work, graduate assistants may be hired to teach one 3-semester-hour course as an overload during the year (180 hours). The hours worked during the weeks between semesters are included in this total.

The OGS issues and verifies on-campus work authorization to eligible students in nonimmigrant visa classifications. Due to federal regulations, international graduate assistants cannot be offered overload work. All international students must acquire the appropriate work authorization from the OGS, 405 Ell Hall, prior to engaging each and every time in any form of employment.

Grading System
Grades are officially recorded by letters, evaluated as follows.

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Numerical Equivalent</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.000</td>
<td>Outstanding achievement</td>
</tr>

<tr>
<td>W</td>
<td></td>
<td>Course withdrawal</td>
</tr>
</tbody>
</table>

An I, IP, or X grade shows that the student has not completed the course requirements.

Note: In the College of Professional, the incomplete, or I, grade may be given only when the student was approved to make up a single key requirement of a course, such as a paper or major report. The student and instructor must complete an Incomplete-Grade Contract (http://www.northeastern.edu/registrar/form-inc-grade.pdf) before the end of the course. The completed contract should be sent to the Office of Academic and Student Support Services for the signature from the Office of the Dean: 50 Nightingale Hall; fax 617.373.5545; email (cpsadviser@neu.edu). The university has a one-year-limit policy to make up incomplete grades. Students have access to their online course materials in Blackboard for up to one year.

The IP grade is intended for courses that extend over several semesters. The time restrictions on the incomplete grade do not apply to the IP grade. While the IP grade is left unchanged, it is not included in computing the GPA. If the IP grade is never changed, the course does not count toward graduation requirements.

Dropping Courses
Not attending class does not constitute withdrawal. Students receiving a grade of W or NE in any course are responsible for the costs associated with that course. Students must drop courses using processes described below.

IN FALL AND SPRING SEMESTERS
• Through the third week of the semester, students may withdraw without any grade being posted to the transcript. Courses may be dropped via the myNEU web portal (http://myneu.neu.edu/cp/home/displaylogin).
• Between the fourth week and the last day of classes, course withdrawals are indicated by a W on the student’s record. Courses may be dropped via the myNEU web portal (http://myneu.neu.edu/cp/home/displaylogin) No financial adjustment is made for courses receiving a W grade.
• After the last day of classes, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.
• Dropping below full-time enrollment may affect financial aid, health insurance eligibility, and the maintenance of proper nonimmigrant visa status.

**IN SUMMER HALF SEMESTERS**

• Through the second week of the half semester, students may withdraw without any grade being posted to the transcript. Courses may be dropped via the myNEU web portal (http://myneu.neu.edu/cp/home/displaylogin).

• Between the third week and the last day of classes, course withdrawals are indicated by a W on the student’s record. Courses may be dropped via the myNEU web portal (http://myneu.neu.edu/cp/home/displaylogin). No financial adjustment is made for courses receiving a W grade.

• After the last day of classes, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.

• Dropping below full-time enrollment may affect financial aid.

**Pass/Fail System**
The individual schools and colleges state how and when the pass/fail system may be used.

**Clearing an Incomplete or Changing Other Grades**
An incomplete grade may be reported by the instructor when a student has failed to complete a major component of a required course, such as homework, a quiz or final examination, a term paper, or a laboratory project. Students can make up an incomplete grade by satisfying the requirements of the instructor or, if the instructor is absent, the chair of the department. Be aware that instructors’ policies on the granting of incomplete grades may vary and that the final decision on an incomplete grade is up to the instructor. The period for clearing an incomplete grade and for changing a grade other than an incomplete or failure (F or U) is restricted to one calendar year from the date it is first recorded on the student’s permanent record.

To clear an incomplete grade, a student must obtain an Incomplete-Grade Contract (http://www.northeastern.edu/registrar/form-inc-grade.pdf) on which the precise agreement for clearing an incomplete grade is specified and that is signed by the student and the instructor. The student must make an appointment with the instructor to arrange for clearing the incomplete grade. He or she must then complete the form, sign the agreement, and obtain the instructor’s signature; leave a copy with the instructor, take one copy to the college academic student services office, and retain a copy as a personal receipt. Any exception to this policy on change of grades must be recommended by the Academic Standing Committee (ASC) of the college in which the course was offered and must be forwarded in writing by the ASC to the registrar for implementation. (Finishing the agreed-upon course work must be completed within one calendar year from the end of the semester in which the course was offered.)

Commencing with grades given in the fall of 1986, the university policy is that any grade outstanding for twelve or more months cannot be changed.

Any exception to this policy on change of grades must be recommended by the ASC of the college in which the course was offered and must be forwarded in writing by the dean to the registrar for implementation.

**Repeating Courses**
When the appropriate course is available, courses may be repeated in order to earn a better grade. In all cases, the most recent grade earned in a course is the one used in calculating the overall GPA; however, previous grades remain on the transcript followed by the word “Repeat.” Consult your academic advisor before repeating a course. Students are required to pay normal tuition charges for all repeated course work.

**Substituting Courses**
In some cases, it may not be possible to repeat a course if a student wishes to do so. In certain, unusual circumstances, students may petition to substitute one course for another they have already taken, as long as the subject matter of both courses is substantially alike. With the approval of the student’s academic advisor and the agreement of the department that offered the first course taken, a grade received in the new course will be labeled “Substitute” on the transcript and will be treated in the grade-point-average calculation as a “repeat” grade, as described above. The original grade will remain on the student’s Northeastern transcript. Consult your academic advisor before enrolling in any proposed substitute course. Students are required to pay normal tuition charges for all substitute course work.

**Audit Policy**
Graduate students may, with permission, audit one class per term with no additional charge. Students are permitted to petition from the end of the course-add period to the end of the third week of classes. Permission is based on the availability of a seat in the class and is at the discretion of the instructor and college.

Students must obtain advisor approval and meet the prerequisites and any other required approvals for the class. Instructor permission as well as approval by the associate dean of the college offering the course is required. The course work required is at the discretion of the instructor. Once a student opts to audit a course, the audit status of the course cannot be changed. A signed Petition to Audit must be presented to the Office of the Registrar during the designated audit-add period. Excluded courses are co-op, labs, language courses, any off-campus course, any online course, and any course required for the major or degree. Audits carry no academic credit.

**Clearing an Academic Deficiency**
An academic deficiency occurs when a student fails to complete a course with a satisfactory grade. The deficiency may occur because the student has failed the course or because the student has passed the course but with a grade that does not meet the minimum required by the student’s program.

Students who have academic deficiencies may be required to clear them before progressing within the curriculum, especially if the course work is a prerequisite for future course work. Deficiencies can affect the student’s expected year of graduation.

With the approval of the appropriate program faculty and/or academic advisor, students can clear deficiencies in the following ways:

1. Repeat the same course at one of Northeastern’s colleges, which will result in a “repeat” grade (see “Repeating Courses” policy above).

2. Substitute a comparable course at one of Northeastern’s colleges, which will result in a “repeat” grade.

**Appeal of Final Grades**
Under certain circumstances, students have the right to appeal final grades given by either academic faculty or cooperative education coordinators. Criteria and procedures can be found under Appeals Policies and Procedures.

**GPA**
Numerical equivalents for scholastic averages are weighted according to the number of hours the course carries. For example, suppose a student
receives a grade of B in a course carrying 4 semester hours and a grade of A in a course carrying 1 semester hour. The weightings for these example courses are as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Numerical Equivalent</th>
<th>Semester Hours</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>3.000</td>
<td>4</td>
<td>12</td>
</tr>
<tr>
<td>A</td>
<td>4.000</td>
<td>1</td>
<td>4</td>
</tr>
<tr>
<td>Totals:</td>
<td></td>
<td>5</td>
<td>16</td>
</tr>
</tbody>
</table>

The GPA for both courses would then be the total weight (16) divided by the total semester hours (5), or 3.200. Grades of I, IP, S, U, and X are not included in the calculation of the GPA.

**Minimum Cumulative Grade-Point Average**

Grades submitted to satisfy, in whole or in part, the requirements for any graduate degree or certificate of advanced study must yield a cumulative grade-point average of 3.000 or higher. This requirement may be supplemented by additional restrictions established by the graduate program or the college's graduate office such as, but not limited to, the maximum number of individual courses with grades below 3.000 that may be obtained without being required to withdraw or a minimum grade-point average in each semester.

Students falling below 3.000 are placed on academic probation. If the student remains on academic probation for two semesters, he or she may be terminated from the graduate program.

Not more than two courses or 6 semester hours of credit, whichever is greater, may be repeated to satisfy the requirements for the degree. The last grade earned in each of these repeated courses is counted in the calculation of the cumulative grade-point average.

Any incomplete grades must be made up within one calendar year from the semester in which the student took the class that resulted in the incomplete course grade.

More information regarding course grading and academic disputes may be found at “Academic Appeals” under “Appeals Policies and Procedures.”

**Grade Reports**

Grades are available to students approximately three days after the end of each semester via the myNEU web portal (http://myneu.neu.edu/cp/home/display/login). A missing grade means that none was received from the instructor. Grades received late from faculty are processed as they are received.

**Transcripts**

Currently enrolled students may obtain unofficial transcripts from the myNEU web portal (http://myneu.neu.edu/cp/home/display/login) and may also order official transcripts through myNEU. For further information on transcript requests, visit the registrar’s website (http://www.northeastern.edu/registrar/trans_request.html). All questions concerning transcript requests should be directed to 617.373.2300, (TTY) 617.373.5360.

**Maintenance of Student Records**

The university registrar is responsible for ensuring appropriate maintenance and safekeeping of student records. The transcript, which is stored electronically and maintained indefinitely, is the holistic record of student attendance and degree progress. In the event that the university discontinues operations, the archive of student records would be maintained by the Massachusetts Department of Higher Education.

**Course Cancellations**

Northeastern University reserves the right to cancel any course if minimum enrollments, appropriate faculty, or academic facilities do not meet standards.
Final Examinations and Related Policies on Other Exams

All final examinations, term papers, or projects must be returned to the student or be retained by the department for a period of one year.

Graduation Requirements

All eligible degree candidates must complete the graduation application by the applicable deadline. Before you apply to graduate through your myNEU account, we recommend you take the time to review your current program information, i.e., degree, major, and concentration. To review this information, log in to your myNEU account; under the “Self-Service” tab click “Student Self-Service.”

Family Educational Rights and Privacy Act (FERPA)

FERPA for Students—General Information

FERPA is a federal law that applies to educational institutions. Under FERPA, schools must allow students who are 18 years or over or attending a postsecondary institution:

- Access to their education records
- An opportunity to seek to have the records amended (see the Student Handbook for this procedure)
- Some control over the disclosure of information from the records

FERPA General Guidance for Parental Disclosure

When a student turns eighteen years of age or attends a postsecondary institution, the student, and not the parent, may access, seek to amend, and consent to disclosures of his or her education records.

If you are an undergraduate day student and you choose not to share information with your parents, Northeastern will, if asked, indicate that you have restricted access to your records.

Release of Directory Information

Directory information: Information that can be released to third parties without the prior consent of the student, unless the student specifically requests otherwise in accordance with the Office of the University Registrar’s procedures. Although directory information may be released unless the student has notified the Office of the University Registrar otherwise, Northeastern considers each request on an individual basis.

Northeastern treats the following as directory information (the office listed has the most accurate and up-to-date information):

Office of the University Registrar

- Student name
- Home address (city, state, country only)
- Major field of study
- College
- Class year
- Enrollment status (e.g., undergraduate or graduate, full-time or part-time)
- Dates of attendance
- Degrees, honors, and awards received
- Most recent educational agency or institution attended

Department of Athletics

- Sports activity participation, showing weight/height of members of athletic teams

Center for Student Involvement

- Participation in officially recognized activities

Notification of Rights under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights are:

1. The right to inspect and review the student’s education records within forty-five days of the day the university receives a request for access. Students should submit to the registrar, dean, or head of the academic department (or appropriate official) written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education record that the student believes is inaccurate or misleading. Students may ask the university to amend a record that they believe is inaccurate or misleading. They should write the university official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interest. A school official is defined as a person employed by the university in an administrative, supervisory, academic, or support staff position (including law enforcement unit and health staff); a person or company with whom the university has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a person assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the university to comply with the requirements of FERPA. At Northeastern, the Office of the University Registrar, 271 Huntington Avenue, administers FERPA.

Additional Information

Additional information can be obtained at the U.S. Department of Education’s website (http://www.ed.gov/policy/gen/guid/fpco/ferpa) or by writing to:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5920

FERPA and the USA Patriot Act

The USA Patriot Act preempts FERPA, described above. The act provides federal law enforcement agencies access to otherwise confidential
student records upon the presentation of specified authority. The act also says that the university cannot notify the individual whose records or information is being sought that the request has been made. All requests for student information made under the authority of the USA Patriot Act are handled by the Office of the General Counsel, 716 Columbus Avenue.

**Student Right-to-Know Act**

For information about the Student Right-to-Know Act, visit the registrar’s website. ([http://www.northeastern.edu/registrar/right-to-know.html](http://www.northeastern.edu/registrar/right-to-know.html))

**Code of Student Conduct**

The Code of Student Conduct is online at the Office of Student Conduct and Conflict Resolution ([http://www.northeastern.edu/osccr/code-of-student-conduct](http://www.northeastern.edu/osccr/code-of-student-conduct)) website.

**Appeals Policies and Procedures**

**Graduate Student Appeals Procedures**

Northeastern University affirms that it is essential to provide an appeals mechanism to students who believe that they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated.

**Academic Appeals**

It is the policy of the university that all students shall be treated fairly with respect to evaluations made of their academic performance, standing, and progress. The university presumes that academic judgments by its faculty are fair, consistent, and objective. Students must understand that the substitution of a different academic judgment for that of the original evaluator is a serious intrusion upon teaching prerogatives. Nonetheless, the university believes it is essential to provide an appeals mechanism to students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education determination. This includes claims of misinterpretation or inequitable application of any academic provision of the university’s undergraduate or graduate catalog, student handbook, or Faculty Handbook. However, graduate student issues involving admission or readmission in a program cannot be appealed beyond the college level.

Before invoking the appeals procedures, students are always encouraged to speak informally to their instructors or academic advisors about any determination or grade about which they have questions. If students choose to pursue an appeal, the process is described in the appeals section that follows.

**Scientific or Research Misconduct**

Scientific or research misconduct is defined as fabrication, falsification, plagiarism, or other practices that seriously deviate from those that are commonly accepted within the academic and scientific community for proposing, conducting, or reporting research and does not include honest error or honest differences in interpretation or judgments of data. (Further information can be obtained from the U.S. Office of Research Integrity, Department of Health and Human Services ([http://www.ori.dhhs.gov](http://www.ori.dhhs.gov)). Possible incidences of misconduct are to be reported immediately to the vice provost for graduate education, who will initiate the appropriate procedures. Findings of scientific or research misconduct cannot be appealed through the process below.

**Nonacademic Appeals**

It is the policy of the university that all students shall be treated with respect and that all evaluations of their employment performance will be fair, consistent, and objective. This includes claims of misinterpretation or inequitable application of any employment provision of the student handbook. The student is always encouraged to speak informally to his or her supervisor about any determination about which he or she has questions prior to invoking the appeals procedures.

If the student chooses to pursue an appeal, the process is described in the appeals section that follows.

**Appeal of Final Grades**

It is the policy of the university that all students will be treated fairly in evaluations made of their academic performance, standing, and progress. The university presumes that academic judgments by its faculty are fair, consistent, and objective. Students must understand that the substitution of a different academic judgment for that of the original evaluator is a serious intrusion upon teaching prerogatives. Nonetheless, the university believes it is essential to provide an appeals mechanism to students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education determination. This includes claims of misinterpretation or inequitable application of any academic provision of the university’s undergraduate or graduate catalog, student handbook, or Faculty Handbook. However, graduate student issues involving admission or readmission in a program cannot be appealed beyond the college level.

In most cases, students should first discuss their concerns with the faculty member who taught the course to see if it is possible to reach agreement on the issue(s). If the student is not satisfied with the outcome of this discussion, or if the student is not comfortable discussing the issue with the instructor, the student should request a meeting with the department chair, or a person named by the chair, to attempt a department-level resolution of the appeal. If these informal attempts to resolve the issue fail, the student can enter the formal procedure at the college level as follows.

**STEP 1**

A student may appeal an academic determination by submitting a written statement (the Statement) that specifies the details of the action or judgment. This Statement should include when the problem occurred, who was involved, the basis of the appeal, and the resolution sought by the student. For students in the College of Professional Studies (CPS), the Statement is submitted to the school official designated by the Vice President for Professional and Continuing Studies. Graduate students (other than CPS) should submit the Statement to the graduate coordinator in the department (where one exists). If there is no department-level coordinator, the appeal should proceed to Step 2. All appeals of grades should be initiated and resolved before the student graduates. If a student wishes to dispute a grade in his or her final term, this must be done within forty-five calendar days of graduation. If the appeal concerns a cooperative education determination, it is submitted to the dean of the college in which the student is enrolled. The Statement must specify the details of the action or judgment and the basis for the appeal. All parties shall cooperate and act expeditiously in processing the appeal to completion.

Though students are always entitled to seek the advice of legal counsel, students may not be represented by a lawyer in the informal or formal academic appeal procedures. A student may consult with the Vice Provost for Graduate Education, Vice President for Professional and Continuing Studies (in the case of CPS students), or their designees at any point in this procedure for advice or assistance. The dean, vice president, or provost may take whatever steps they deem reasonably appropriate to achieve voluntary resolution of the problem at any stage of these procedures.
The Statement should be submitted within twenty-eight working days (or twenty working days [four calendar weeks] for CPS students) of the day when the student learns of the academic determination in question. For course grade appeal in the CPS, the Statement must be submitted within twenty days after grades are posted to the student academic record. Grades are typically available the Tuesday after the term ends and are viewable through the student’s myNEU account.

If a student feels that he or she has been the victim of harassment or of discrimination prohibited by law or by university policy, he or she should consult with the Office of Institutional Diversity and Equity as soon as he or she becomes aware of alleged prohibited harassment or discrimination and is not required to wait until a term grade or determination is received before seeking advice or redress. If the Office of Institutional Diversity and Equity is advised of such alleged prohibited conduct as part of an academic appeal (see below), the appeal shall be pursued and investigated first through the Office of Institutional Diversity and Equity. In such cases, the student should submit the appeal to the appropriate dean(s) described in this step, with a copy also given to the Office of Institutional Diversity and Equity. Following a resolution of the sexual harassment/discrimination issues, any remaining academic issues will be addressed, at the request of the student, according to the academic appeals procedures.

STEP 2
The dean or CPS vice president shall respond to the student in writing, including specific instructions for the student to seek an informal resolution to the matter, unless such course of action, as outlined by the student in his or her Statement, is demonstrably futile. These directions shall include discussing the matter with the person whom the student identifies as involved in the matter. If the student is not satisfied with the informal resolution, the dean or CPS vice president shall discuss the matter with the department chair (where one exists), graduate coordinator, consultant, program director, or associate dean (as appropriate) or equivalent supervisor and the dean of the college in which the faculty member involved in the matter serves, who shall attempt to effect an informal resolution. The student shall also have the right to discuss the matter with the chair (where one exists) or equivalent supervisor in which department the faculty member involved in the matter serves.

If the appeal involves allegations of prohibited harassment or discrimination, the dean shall consult with the Office of Institutional Diversity and Equity before making this response and shall, as part of this response, explain the role that the Office of Institutional Diversity and Equity will play in steps 2 and 3 of this procedure.

A copy of this response shall be sent to the department chair or equivalent supervisor of the appropriate unit.

STEP 3
If the appeal cannot be resolved informally within thirty calendar days of the student’s original submission of his or her Statement to the dean or CPS vice president, or if he or she is not satisfied with the disposition of the matter at Step 2, the student may proceed with the appeal through his or her college’s or school’s established academic appeals procedure. The dean or the academic standing committee, as applicable, must provide the student and the involved faculty member with a written report of the finding(s) and decision.

This step involves a review by an academic standing committee making the recommendation to the dean or CPS vice president. The student may obtain a copy of the operating rules of the academic standing committee from the dean of the college involved.

In appeals involving allegations of prohibited harassment or discrimination, the dean or academic standing committee shall receive a report of the findings of the investigation of the Office of Institutional Diversity and Equity for incorporation into its own report on matters left unresolved by that finding that were referred to it. The dean/CPS vice president or committee shall be without authority to reverse or modify the Office of Institutional Diversity and Equity finding(s) or resolution.

STEP 4
If the student or the involved faculty member is not satisfied with the dean’s or CPS vice president’s disposition of the matter or if the appeal is not resolved within thirty calendar days after originally submitted to the dean or CPS vice president pursuant to step 1, he or she may further pursue the matter by requesting in writing within fourteen calendar days that the university convene an academic appeals resolution committee to review the issue. Students may obtain information on this process in either the Office of the Vice President for Student Affairs (104 EII) or the Office of the Provost (110 CH). This committee has been designated as the final authority on these matters. This request must be made within fourteen calendar days of the finding of the academic standing committee in step 3.

1. Academic Appeals Resolution Committee
   The academic appeals resolution committee includes:
   - The Vice Provost for Graduate Education or a designee.
   - The student’s faculty advisor will be appointed by the appropriate vice provost except in cases where no specific advisor exists, or where the faculty advisor is involved in the dispute. In those cases, a faculty member from the student’s major college, department, or area of specialization will be appointed.
   - Two faculty members appointed by the Faculty Senate Agenda Committee (if the appeal is based on a cooperative education determination, one of the faculty members shall be a member of the cooperative education faculty, but not from the student’s area of study) and a representative of the Office of Institutional Diversity and Equity (if the appeal had at any point involved a matter of sexual harassment/discrimination).
   - The chair shall be elected from among the committee’s three faculty members but cannot be the student’s faculty advisor.

2. Preliminary Matters
   If the academic appeals resolution committee determines, by a majority vote, that the appeal is patently without substance or merit, it may dismiss the appeal.

3. Investigation
   The academic appeals resolution committee shall investigate the matter under appeal as quickly as possible by studying the relevant documents, interviewing the parties (especially the student and the involved faculty member), and taking any other action it deems appropriate. At no time shall the committee be bound by rules of evidence but shall at all times conduct itself in a manner that is not arbitrary or capricious. The academic appeals resolution committee may, but is not required to, hold a hearing prior to resolving the issues. However, in all instances, the student and the involved faculty member shall have the right to appear and testify separately and privately before the academic appeals resolution committee. The student shall have the right to have an advocate from the university community present during his or her testimony to the academic appeals resolution committee.

4. Authority to Act
The academic appeals resolution committee has been designated as the final authority on these matters. At the conclusion of its investigation, the academic appeals resolution committee shall resolve, by majority vote, the issue by either upholding the finding of the academic standing committee or dean/CPS vice president, in which case no further appeal is available, or granting such relief to the student as the appeals resolution committee deems appropriate.

a. The academic appeals resolution committee may not determine a resolution that contradicts the prior findings or actions of the Office of Institutional Diversity and Equity with respect to elements of this appeal.

b. In the event of a tie vote, the action of the academic standing committee or dean/CPS vice president shall be considered upheld.

5. Resolution

All direct parties to the appeal, including but not limited to the student, the CPS vice president or provost, the dean, the department chair or equivalent supervisors, graduate coordinator or equivalent supervisor, and the faculty member shall be promptly informed in writing of the decisions and actions taken (i.e., the Report) during this academic appeals procedure.

6. Report

A written Report of the appeal and its resolution shall be submitted by the chair of the academic appeals resolution committee to the student, the involved faculty member, the Faculty Senate Agenda Committee, the vice president for student affairs, the appropriate vice provost, the registrar, and the dean or CPS vice president, as appropriate.

7. Action

The dean(s) or CPS vice president or his or her designee in the involved college(s) shall take whatever action is necessary to implement fully the resolution of the academic appeals resolution committee. This includes reporting the change of grade to the registrar.

8. Appeal

No further appeal can be instituted by the student or the involved faculty member with respect to the issue(s) raised at any level of the formal appeals resolutions procedures once adjudicated.

**GRIEVANCE PROCEDURE FOR DISABLED STUDENTS**

It is the policy of Northeastern University to comply with all laws governing access by and discrimination against disabled students. Accordingly, any student who believes that there has been a violation of these laws is encouraged to discuss the matter with the director of the Disability Resource Center and other persons identified by the director, or with the director of the Office of Institutional Diversity and Equality, to resolve the matter in a prompt and equitable manner. If such discussions do not resolve the matter, the student may then initiate a grievance by taking the steps outlined below.

1. All grievances made by students on the basis of being disabled are considered as being made to the president of the university.

2. In the case of a grievance, the student should discuss the objection with the individual responsible for the office or department where the objection was initially raised.

3. If not satisfied, the student should discuss the objection with the dean of the college or director under which the department falls.

4. If the grievance is not satisfactorily resolved, the student should complete a grievance form and file a written request for a formal hearing with the Grievance Committee for Disabled Students. The request should be filed with the vice president for student affairs. Upon receipt of a written request for a formal hearing, the grievance committee (including one faculty member from the student’s college, one faculty member not from the student’s college, one representative from the Disability Resource Center, a representative from the Office of Institutional Diversity and Equality, the vice president for student affairs or a designee, and another administrator not from student affairs) must hold a hearing within three calendar weeks. The grievance committee must allow a full and fair opportunity for the presentation of evidence relevant to the reason(s) for the hearing request and must render a decision in writing to the requesting student within one week of the conclusion of the hearing. The director of the Office of Institutional Diversity and Equality is compliance officer for Section 504 of the Rehabilitation Act of 1973.

**GRIEVANCE PROCEDURE—SEXUAL HARASSMENT**

No employee, agent, supervisory personnel, or faculty member shall exercise his or her responsibilities or authority in such manner as to make submission to “sexual advances, requests for sexual favors, or other verbal or physical conduct of a sexual nature” as an explicit or implicit term or condition of evaluation, employment, admission, advancement, or reward within the university. Neither shall any employee, agent, supervisory personnel, or faculty member make submission to or rejection of such conduct the basis for employment or academic decisions affecting any employee or student. Neither shall any employee, agent, supervisory personnel, or faculty member conduct himself or herself with respect to verbal or physical behavior of a sexual nature where such conduct has the purpose or effect of unreasonably interfering with an individual’s work or academic performance or creating an intimidating, hostile, or offensive work or classroom environment.

Though sexual harassment will not be tolerated, the university recognizes that it is difficult to regulate emotional relationships between consenting adults. However, a consensual relationship may be suspect in instances in which one of the individuals has authority over the other. Therefore, no faculty or employee involved romantically or sexually with a student may teach or supervise that person either individually or as part of a group in any activity connected to the university.

Any student, teaching assistant, employee, or faculty member who feels that he or she has been the victim of sexual harassment may bring the matter to the attention of the director of the Office of Institutional Diversity and Equality. Copies of the sexual harassment grievance procedure can be obtained from the Office of Institutional Diversity and Equality, 424 Columbus Place.

**HAZING—CHAPTER 269 OF THE MASSACHUSETTS GENERAL LAWS**

Section 17. Whoever is a principal organizer or participant in the crime of hazing, as defined herein, shall be punished by a fine of not more than three thousand dollars or by imprisonment in a house of correction for not more than one year, or both such fine and imprisonment. The term hazing as used in this section and in sections eighteen and nineteen, shall mean any conduct or method of initiation into any student organization, whether on public or private property, which willfully or recklessly endangers the physical
or mental health of any student or other person. Such conduct shall include whipping; beating; branding; forced calisthenics; exposure to weather; forced consumption of any food, liquor, beverage, drug, or other substance; or any other brutal treatment or forced physical activity which is likely to adversely affect the physical health or safety of any such student or other person, which subjects such student or other person to extreme mental stress, including extended deprivation of sleep or rest or extended isolation. Notwithstanding any other provisions of this section to the contrary, consent shall not be available as a defense to any prosecution under this action.

Section 18. Whoever knows that another person is the victim of hazing as defined in section seventeen and is at the scene of such crime shall, to the extent that such person can do so without danger or peril to himself or others, report such crime to an appropriate law enforcement official as soon as reasonably practicable. Whoever fails to report such crime shall be punished by a fine of not more than one thousand dollars.

Section 19. Each institution of secondary education and each public and private institution of postsecondary education shall issue to every student group, student team, or student organization that is part of such institution or is recognized by the institution or permitted by the institution to use its name and facilities or is known by the institution to exist as an unaffiliated student group, student team, or student organization, a copy of this section and sections seventeen and eighteen; provided, however, that an institution’s compliance with the section’s requirements that an institution issue copies of this section and sections seventeen and eighteen to unaffiliated student groups, teams, or organizations shall not constitute evidence of the institution’s recognition or endorsement of said unaffiliated student groups, teams, or organizations.

Each such group, team, or organization shall distribute a copy of this section and sections seventeen and eighteen to each of its members, plebes, pledges, or applicants for membership. It shall be the duty of each such group, team, or organization, acting through its designated officer, to deliver annually to the institution an attested acknowledgement stating that such group, team, or organization has received a copy of this section and said sections seventeen and eighteen, that each of its members, plebes, pledges, or applicants has received a copy of sections seventeen and eighteen, and that such group, team, or organization understands and agrees to comply with the provisions of this section and sections seventeen and eighteen. Each institution of secondary education and each public or private institution of postsecondary education shall, at least annually, before or at the start of enrollment, deliver to each person who enrolls as a full-time student in such institution a copy of this section and sections seventeen and eighteen.

Each institution of secondary education and each public or private institution of postsecondary education shall file, at least annually, a report with the regents of higher education and, in the case of secondary institutions, the board of education, certifying that such institution has complied with its responsibility to inform student groups, teams, or organizations and to notify each full-time student enrolled by it of the provisions of this section and sections seventeen and eighteen and also certifying that said institution has adopted a disciplinary policy with regard to the organizers and participants of hazing and that such policy has been set forth with appropriate emphasis in the student handbook or similar means of communicating the institution’s policies to its students. The board of regents and, in the case of secondary institutions, the board of education shall promulgate regulations governing the content and frequency of such reports and shall forthwith report to the attorney general any such institution that fails to make such report.

STUDENT RIGHT-TO-KNOW AND CAMPUS SECURITY ACT
In compliance with the Student Right-to-Know and Campus Security Act, information regarding graduation rates may be obtained in the Office of the Registrar, 271 Huntington Avenue, and in the Department of Athletics, 219 Cabot Physical Education Center; information regarding safety and security may be obtained in the Office of Admissions and the Public Safety Division, 100 Columbus Place. It is Northeastern University’s policy to disclose to an alleged victim of any crime of violence the results of any disciplinary proceeding against the alleged perpetrator of such crime. Further information is available in the Office of Student Conduct and Conflict Resolution, 202 Ell Hall.

USE OF ALCOHOL AND DRUGS
The unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited in or on any Northeastern property. Any university employee or student determined to have violated this policy may be subject to disciplinary action up to and including dismissal. The use of alcohol while on Northeastern property is prohibited except where specifically authorized by the university. No employee may report to work while under the influence of alcohol or illegal drugs. Violation of these regulations may be reason to require evaluation/ treatment for substance abuse in coordination with the University Center for Counseling and Student Development and/or for disciplinary action up to and including dismissal. Northeastern University works to provide a drug-free workplace for all university employees and students. The Center for Counseling and Student Development provides resources for treatment and referral for students and employees with substance abuse problems. Educational programs for students, employees, and managers are presented through Human Resources Management, the Office of Residential Life, and the Center for Counseling and Student Development and cover the dangers of alcohol and drug abuse, the availability of assistance for counseling and rehabilitation, and penalties for violating university policies. To comply with federal law, the university requires that employees directly engaged in performance of a grant or contract must notify their employers of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after the conviction. The university must notify any federal contracting agency within ten days of having received notice that an employee engaged in the performance of such contract has had a criminal drug statute conviction for a violation occurring in the workplace. The university will take appropriate action up to and including dismissal and/or require participation in an approved abuse assistance or rehabilitation program.

USE OF WEAPONS
The use or possession on campus of firearms, explosive agents of any kind, as well as chemicals, mace, and tear gas, is specifically forbidden by the Code of Student Conduct. Violation of this university policy is cause for disciplinary action up to and including expulsion. In addition, it is worth noting that Massachusetts law states: “Whoever, not being a law enforcement officer and notwithstanding any license obtained by him under the provisions of chapter one hundred and forty, carries on his person a firearm as hereinafter defined, loaded or unloaded, in any building or on the grounds of any college or university without the written authorization of the board or officer in charge of said college or university shall be punished by a fine of not more than one thousand dollars or by imprisonment for not more than one year or both. For the purpose of this paragraph, ‘firearm’ shall mean any pistol, revolver, rifle, or smoothbore...
arm from which a shot, bullet, or pellet can be discharged by whatever means.”

Massachusetts general law prohibits the possession of nunchaku or karate sticks; switchblades; knives; starter’s pistols; ammunition; leather armbands or other clothing that has metallic spikes, points, or studs; or other dangerous weapons or articles. A student who possesses any articles for sporting purposes (for example, bow and arrows) should check with the University Police Department or the Department of Residential Life to determine whether such articles are among those prohibited by statute or university regulation. Northeastern University also prohibits the possession of knives other than food utensils.

Policies and Procedures

ACADEMIC INTEGRITY POLICY

Essential to the mission of Northeastern University is the commitment to the principles of intellectual honesty and integrity. Academic integrity is important for two reasons. First, independent and original scholarship ensures that students derive the most from their educational experience and the pursuit of knowledge. Second, academic dishonesty violates the most fundamental values of an intellectual community and depreciates the achievements of the entire university community.

Accordingly, Northeastern University views academic dishonesty as one of the most serious offenses that a student can commit while in college. The following is a broad overview of what constitutes academic dishonesty but is not meant to be an all-encompassing definition.

Cheating

Defined as intentionally using or attempting to use unauthorized materials, information, or study aids in any academic exercise. Examples:

- Unauthorized use of notes, text, or other aids during an examination
- Copying from another student’s examination, research paper, case write-up, lab report, homework, computer disc, and so on
- Talking during an examination
- Handing in the same paper for more than one course without the explicit permission of the instructor
- Perusing a test before it is given
- Hiding notes in a calculator for use during an examination

Fabrication

Defined as intentional and unauthorized falsification, misrepresentation, or invention of any information, data, or citation in an academic exercise. Examples:

- Making up the data for a research paper
- Altering the results of a lab experiment or survey
- Listing a citation for a source not used
- Stating an opinion as a scientifically proven fact

Plagiarism

Defined as intentionally or knowingly representing the words or ideas of another as one’s own in any academic exercise without providing proper documentation of source by way of a footnote, endnote, or intertextual note. The following sources demand notation:

- Word-for-word quotation from a source, including another student’s work
- Paraphrase: using the ideas of others in your own words
- Unusual or controversial facts—facts not apt to be found in many places
- Interviews, radio and television programs, and telephone conversations

Unauthorized Collaboration

This refers to instances when students, each claiming sole authorship, submit separate reports that are substantially similar to one another. While several students may have the same source material (as in case write-ups), the analysis, interpretation, and reporting of the data must be each individual’s.

Participation in Academically Dishonest Activities

Examples:

- Stealing an examination
- Purchasing a prewritten paper through a mail-order or other service, including via the internet
- Selling, loaning, or otherwise distributing materials for the purpose of cheating, plagiarism, or other academically dishonest acts
- Alteration, theft, forgery, or destruction of the academic work of other students, library materials, laboratory materials, or academic records including transcripts, course registration cards, course syllabi, and examination/course grades
- Intentionally missing an examination or assignment deadline to gain an unfair advantage

Facilitating Academic Dishonesty

Defined as intentionally or knowingly helping or attempting to violate any provision of this policy. Examples:

- Inaccurately listing someone as coauthor of a paper, case write-up, or project who did not contribute
- Sharing with another student a take-home examination, homework assignment, case write-up, lab report, and so on, without expressed permission from the instructor
- Taking an examination or writing a paper for another student

All members of the Northeastern University community—students, faculty, and staff—share the responsibility to bring forward known acts of apparent academic dishonesty. Any member of the academic community who witnesses an act of academic dishonesty should report it to the appropriate faculty member or to the director of the Office of Student Conduct and Conflict Resolution. The charge will be investigated and if sufficient evidence is presented, the case will be referred to the Northeastern University Student Judicial Hearing Board. If found responsible for an academic dishonesty violation, a minimum sanction of deferred suspension will follow. If found responsible for a second violation, the student will be expelled from the university.

APPROPRIATE USE OF COMPUTER AND NETWORK RESOURCES POLICY

The information systems of Northeastern University are intended for the use of authorized members of the Northeastern community in the conduct of their academic and administrative work. To protect the integrity of computer resources against unauthorized or improper use, and to protect authorized users from the effects of unauthorized or improper usage, the university reserves the right, with or without notice, to monitor, record, limit, or restrict any account holder’s usage. The university may also monitor, record, inspect, copy, remove, or otherwise alter any data, file, or system resources. The university reserves the right to periodically check these systems and to take any other action necessary to protect the computer and network facilities. The university also retains access rights to all files and electronic mail on its computing and network facilities. Anyone using these systems or networks expressly consents to such monitoring.
Any unauthorized, inappropriate, illegal, or illegitimate use of the university’s computing resources, or failure to comply with these guidelines, shall constitute a violation of university policy and will subject the violator to disciplinary action by the university and may result in legal action. When a violation is identified, the appropriate system manager or unit head will undertake a review and initiate action in accordance with university policy. In addition, the university may require restitution for any use of computer or network services that violate these guidelines. The university may also provide evidence of possible illegal or criminal activity to law enforcement authorities.

Notwithstanding any other provision of this policy, authorization to access the information systems of Northeastern University ends at the termination of employment, the end of a recognized role or relationship, or the loss of sponsorship. Students may continue to use their Northeastern electronic mail account for up to six months after graduation. Any questions about this policy or the applicability of this policy to a particular situation should be referred to the information technology security manager or the director of internal audit. The university’s information systems consist of all networking wiring, equipment, networks, security devices, servers, computer systems, computers, computer laboratory equipment, workstations, internet connections, and all other intermediary equipment, services, and facilities. These assets are the property of Northeastern University.

1. Access to and use of Northeastern information systems is a privilege granted by the university to its faculty, staff, and students. Access for up to one academic year for others, including “sponsored” individuals whose relationship with Northeastern is a result of a university-recognized affiliation or relationship, must be approved by the unit’s dean or vice president. Such access may not be renewed without the written approval of the senior vice president for administration and finance. The university retains sole discretion over the extent to which access privileges are granted.

2. Users may only use those computer accounts that have been authorized by the university for their use. Use of another person’s account, security devices, and/or the presentation of false or misleading information or credentials for the purpose of obtaining access to information systems is prohibited.

3. Users are responsible for all use of information systems conducted under their user ID(s) and are expected to take all precautions including password security and file protection measures to prevent use of their accounts and files by unauthorized persons. Sharing of passwords is prohibited.

4. Users may not offer, provide, lend, rent, or sell access to university information systems. Users may not provide access to individuals outside the university community.

5. Use of university information systems for hosting non-university activities must have the explicit written authorization of the senior vice president for administration and finance prior to the use.

6. While the university attempts to protect electronic communication and files from unauthorized access, this cannot be guaranteed. Users may not access, copy, or move files including, but not limited to, programs, data, and electronic mail that belong to another account without prior authorization from the account holder. Files may not be moved to other computer sites without permission from the holder of the account under which the files reside.

7. Users may not use remote resources such as printer and file systems, regardless of location on or off the Northeastern network, unless the administrator of the remote resource has first granted permission.

8. Northeastern information systems may be used for lawful purposes only. Users must not use their accounts or Northeastern information systems for unlawful purposes including, but not limited to, the installation of fraudulently or illegally obtained software; illegal dissemination of licensed software; sharing of content where the disseminator does not hold lawful intellectual property rights; propagating chain letters, pyramid, Ponzi, other unlawful or deceptive schemes; or for any purpose contrary to local, state, and/or federal law.

9. Use of university information systems must comply with the provisions of copyright law and fair use. Copyright law limits the right of a user to copy, edit, or transmit another’s intellectual property, including written materials, images, sounds, music, and performances, even in an educational context, without permission, except in compliance with the fair use doctrine exception.

10. Users are responsible for the timeliness, accuracy, and content/consequences of their web pages. Posting of personal, family, or other identifying information is at the sole discretion of the user. Users are advised to exercise discretion when posting personal information to minimize the risk to personal privacy and safety.

11. University information systems may not be used for commercial purposes, except only as permitted with explicit prior written approval of university counsel and the senior vice president for administration and finance.

12. Internet use must comply with the terms of service stipulated by our internet service provider(s). These policies are incorporated by reference. In addition, the acceptable use, terms of service, and/or other policies of the system(s) also bind users of the internet connection and resources to which they connect. At the time of writing, the internet service provider for Northeastern University is Genuity (http://www.genuity.com).

13. Users may not use information systems irresponsibly, wastefully, or in a manner that adversely affects the work or equipment of others at Northeastern or on the internet.

14. The university strives to maintain the security and privacy of all electronic communications and content passed on the Northeastern network and, therefore, will not arbitrarily or frivolously review or inspect user files or electronic mail. However, all electronic communications and content presented to and/or passed on the Northeastern network, including that presented to and/or passed to and from the internet connection(s), may be monitored, examined, saved, read, transcribed, stored, or retransmitted in the course of daily operations by any duly authorized employee or agent of Northeastern University in the exercise of their duties or by law enforcement authorities who are called upon to assist the university in investigating possible wrongdoing. Electronic communications and content may be examined by automated means. Further, Northeastern reserves the right to reject from the network electronic communications and content deemed not in compliance with policies governing the use of information systems at the university. By accessing Northeastern information systems, users give Northeastern permission to conduct each of the operations described above.

15. The confidentiality of any message or material should not be assumed. Even when a message or material is deleted, it may still be possible to retrieve and read that message or material. Further, the use of passwords for security does not guarantee confidentiality. Messages read in HTML may identify the reader to the sender. Aside from the right of the university to retrieve and read any electronic communications or content, such messages or materials should be treated as confidential by other students or employees and accessed only by the intended recipient. Without prior authorization, students and employees are not permitted to retrieve or read electronic mail messages that are not sent to them.
16. All users are required to honor and observe the rules of confidentiality and protection of privacy when accessing and using any information that resides on Northeastern information systems and/or any information that pertains to university programs, students, faculty, and staff. All disclosures of student information must comply with the provisions of the Family Educational Rights and Privacy Act (FERPA) of 1974.

17. Northeastern reserves the right at any time, without prior notice or permission from the user or users of a computer or other Northeastern-owned computing device, to copy or have copied any and all information from the data-storage mechanisms of such devices, as may be required at the sole discretion of the university, in connection with investigations of possible wrongdoing.

18. The Appropriate Use of Computer and Network Resources Policy specifically prohibits the use of Northeastern University’s information systems to:
   - Harass, threaten, defame, slander, or intimidate any individual or group.
   - Generate and/or spread intolerant or hateful material, which in the sole judgment of the university is directed against any individual or group, based on race, religion, national origin, ethnicity, age, gender, marital status, sexual orientation, veteran status, or disability.
   - Transmit or make accessible material, which in the sole judgment of the university is offensive, violent, pornographic, annoying, or harassing, including use of Northeastern information systems to access and/or distribute obscene or sexually explicit material unrelated to university-sanctioned work or bona fide scholarship.
   - Generate unsolicited electronic mail such as chain letters, unsolicited job applications, or commercial announcements.
   - Generate falsely identified messages or message content, including use of forged content of any description.
   - Transmit or make accessible password information.
   - Attempt to access and/or access information systems and/or resources for which authority has not been granted by the system owner(s).
   - Capture, decipher, or record user IDs and/or passwords.
   - Intercept electronic communications not intended for the recipient.
   - Probe, by any means, the security mechanisms of any resource on the Northeastern network or on any other network through a connection to the Northeastern network.
   - Disclose or publish, by any means, the security vulnerabilities of or the means to defeat or disable the security mechanisms of any resource connected to or part of the Northeastern University network.
   - Alter, degrade, damage, or destroy data.
   - Transmit computer viruses or malicious/destructive code of any description.
   - Conduct illegal, deceptive, or fraudulent activity.
   - Obtain, use, or retransmit copyrighted information without permission of the copyright holder.
   - Place bets, wagers, or operate games of chance.
   - Tax, overload, impede, interfere with, damage, or degrade the normal functionality, performance, or integrity of any device, service, or function of Northeastern information systems, content, components, or the resources of any other electronic system, network, service, or property of another party, corporation, institution, or organization.

The above enumeration is not all-inclusive. If there is a question as to whether a specific use is appropriate or acceptable under this policy, the university’s sole determination shall prevail.

19. Use of Northeastern University information systems must comply with all applicable local, state, and federal laws, including, but not limited to, the following, which are incorporated by reference:
   - Massachusetts General Laws Chapter 266, Subsections 33(a) and 120(f), which impose sanctions for, among other acts, destroying electronically processed and stored data or gaining unauthorized access to a database or computer system.
   - United States Code, Title 18, Computer Fraud and Abuse Act, which imposes sanctions for, among other acts, knowingly accessing a computer without authorization or in excess of authorized access, knowingly causing damage to protected computers, or trafficking in password information.
   - United States Code, Title 18, Electronic Communications Privacy Act, which imposes sanctions for, among other acts, interception of wire, oral, or electronic communications.

**BEHAVIOR ON CO-OP, ON EXTERNSHIPS, AND IN THE NEIGHBORHOOD**

As an urban institution, Northeastern University is a part of the vibrant community and business life of the surrounding neighborhoods. Maintaining amicable and considerate relations between the university and local residents and businesses is essential to the continued cooperation of the university and its neighbors in civic projects and issues and to the furtherance of the university’s broader mission to contribute to the general good of society. The university endeavors to foster conditions under which such beneficial relations exist. Consequently, the university must consider conduct on the part of members of the university community, whether on or off campus and whether isolated or continuing in nature, that is disruptive of these relations; that impairs, interferes with, or obstructs the lawful missions, processes, and functions of the university; or that is found by the university to be abhorrent or offensive to generally accepted standards of social behavior, as inimical to the university’s interests.

The university’s Code of Student Conduct governs student behavior on co-op, externships, and in the community surrounding the university. In addition, misbehavior in these settings may violate the law, policies of the co-op employer, or rules of the externship sponsor.

**BICYCLES**

Wherever possible, students should use the bike racks available at various locations on campus. Bicycles should not be chained to fences, doors, trees, or other objects, and under no circumstances may bicycles be brought into any university building. The fire code dictates that all entrances, exits, corridors, and stairwells must be free and clear at all times. Bicycles found in violation of this code will be removed from the area.

**CARD PLAYING AND GAMBLING**

The university does not permit card playing of any kind in classrooms unless it is a regularly scheduled activity of an organization recognized officially by the Office of Student Activities. Social card games are permitted in the residence halls and in the Curry Student Center. Students may not gamble, play pyramid games, or sell lottery tickets. Casino or other game events are permitted in designated areas that are approved by city and state laws, as part of properly scheduled events, and in strict accordance with regulations issued by the Office of the Vice President for Student Affairs.
COPYRIGHTABLE MATERIALS

It is the general policy of the university that student papers or projects submitted in partial fulfillment of course requirements remain the property of the student authors.

This policy does not apply to:

1. “Work for hire” as defined by intellectual property laws
2. Work derived wholly or in part from other patented or copyrighted material
3. Work done as part of external grants or contracts in which the contracting documents or regulations define ownership
4. Work in which the university or its agents or employees contribute substantial time or resources
5. Work considered a thesis or dissertation

The university owns the copyright to any work created or developed by one or more students with the significant use of funds, space, facilities, equipment, materials, or other university resources. The university will not normally construe the payment of salary from unrestricted funds or the provision of office and library facilities as constituting significant use of funds, space, facilities, equipment, materials, or other resources of or administered by the university. Use of laboratory and/or computer facilities or assistance from one or more faculty or staff members to a student author specifically pertaining to the work constitutes significant use of university resources. In all cases, the provost or his or her designee shall make a good-faith determination concerning significant use, which shall be final and binding on all parties.

In the case of a thesis generated by research performed in whole or in part by a student in the course of or pursuant to an agreement for sponsored research or other written agreement, including an agreement between the author(s) and the university, or utilizing equipment or facilities provided to the university under conditions that impose copyright restrictions, ownership or control shall be determined in accordance with such agreement or restrictions. In the absence of such agreement or restrictions, copyright ownership in such a thesis shall reside in the student. However, the student, as a condition of a degree award, must grant the university the royalty-free right to reproduce and publicly distribute copies of the thesis for limited and noncommercial purposes.

Where necessary to secure to the university an ownership of copyright, students shall assign such rights of copyright, or grant the specified rights of reproduction and distribution, to the university. The university reserves the right to employ, at its discretion, the materials or portions of any work created or developed in the course of an author’s relationship with the university, or otherwise covered by the University Patent and Copyright Policy, for promotional, professional, or noncommercial purposes on a royalty-free basis. Certain courses taught at Northeastern University involve students in individual or group assignments or projects involving the creation of materials, objects, or techniques that may be patentable or copyrightable. These courses generally require extraordinary levels of faculty organization and participation and/or substantial university resources.

1. Individual teachers or academic units may require that originals or copies of such papers or projects be retained either temporarily or permanently by the individual teacher or by the unit.
2. A thesis is a student work representing significant original or independent research and for which the student receives a substantial amount of credit toward a degree or certificate. Where there is a question concerning whether or not a student’s work is a thesis, the provost or his or her designee shall make a good-faith determination concerning same, which shall be final and binding on all parties.

3. Copies of the university patent and copyright policies are available from the Division of Research Development, 405 Lake Hall, 617.373.4587.

In accordance with university patent and copyright policies, in such courses the university is the owner of all rights in technology, computer programs, or other creative work that may be developed by the undergraduate or graduate student as part of the student’s work in those courses. It is the university’s intention, where applicable, to disclose and authorize the use of such technology, programs, or work to nonprofit organizations and to government agencies without a fee. The university may also have the opportunity to license such materials to a commercial enterprise, and in this event, it is the university’s intention to share any revenue from such a license with student contributors in an amount determined in accordance with the then-existing university policy or plan. Students are informed early in the semester if the course in which they are enrolled falls within this category and will be asked to sign a letter of agreement. Should the student decline to sign an agreement, he or she will be assigned to another course section—one in which such agreement is not required—or will be given alternative activities not involving such assignments or projects.

COPYRIGHTS AND PATENTS

Any student who makes, as sole or joint inventor, an invention that involved significant use of university resources, including funds, space, facilities, equipment, or materials, or that is subject to terms of a sponsored research or other agreement between the university and another party, shall assign this invention and all associated applications and patents to the university or its designee unless the invention has been released to the inventor in accordance with the applicable provisions of the university patent policy. Any student, whether before or after terminating his or her association with the university, shall do whatever is necessary to enable the university or its designee to take out patents in any and all countries on such invention. The cost and expense of making such assignments and procuring such patents shall be borne by the university or its designee. When an invention is made by a student not involving significant use of funds, space, facilities, equipment, materials, or other resources of or administered by the university, the university will waive its rights, and the invention will be the exclusive property of the student, provided the student’s rights in the invention are not altered by the terms of any financial aid received, including external sponsorship, scholarships, fellowships, traineeships, thesis expenses, or other assistance, whether or not administered by the university and provided the invention is not subject to third-party rights.

DEMONSTRATIONS

The university supports as fundamental to the democratic process the rights of all members of the university community to express their views and to protest actions or opinions with which there is disagreement. A university is where individuals express diverse ideas and viewpoints in an atmosphere free of any physical force. The university insists that demonstrations may not be conducted in faculty or administrative offices, classrooms, libraries, or study areas.

Moving picket lines in university corridors are prohibited. (Protests may be registered by individuals or groups standing in a single line
Students, faculty, or other members of the university community who violate these regulations will be subject to disciplinary action; violators also jeopardize their right to remain in the university community.

**DEPARTMENTAL JURISDICTION**

Certain departments of the university shall have the power to set down rules and regulations governing the operation of the departments’ respective areas of responsibility. Such rules and regulations shall be in accord with the “General Statement of Student Rights and Responsibilities” as well as with the policies pertaining to student conduct as defined in this document.

**DISMISSAL FROM CLASS**

Students dismissed from classes for insubordination or other disciplinary reasons may not return without the approval of the college and the vice president for student affairs.

**IDENTIFICATION CARDS**

All students must have in their possession at all times the officially approved and properly validated photo identification card. It will be necessary to show this card as a means of identification when using the library and campus recreational facilities, at athletic contests, at student elections, at University Health and Counseling Services, at Student Accounts, at the Office of the Registrar, to campus police, and elsewhere around the university. All members of the community should be prepared and willing to identify themselves and their guests upon request by authorized personnel. An official photo identification card will be issued to new students during their initial orientation and registration periods. Replacements for lost cards can be obtained at the Office of the Registrar, 271 Huntington Avenue.

**JURY DUTY**

Northeastern expects students to fulfill their civic duties; the university cannot interfere in this process. Students who miss classes because of this obligation must notify their professors in writing, explaining which classes will be missed on which days. The professors will work with students to make up missed assignments or exams. Upon completion of their jury duty, students must bring a copy of the documentation of their service to the appropriate professors. Students on co-op are expected to inform their supervisors if called to jury duty.

**MEDIA AND PUBLIC APPEARANCES**

In all personal communications to newspapers or other media, as well as personal public appearances in which students identify themselves as members of the Northeastern University community, it should be made clear that the opinions presented are a student’s own and not necessarily those of the university. Students who appear on public programs as representatives of Northeastern University must be particularly careful to avoid language or presentations that could be considered in bad taste or offensive.

**PETS**

Pets are prohibited in all university buildings out of consideration for the general community and to maintain a clean and healthy environment. Exceptions are made for guide dogs and other guide animals.

**PUBLIC ACCESS**

Access by the general public to attend special programs or functions is limited to those events approved for such attendance. The facilities of the university were designed for the use of members of this academic community. When appropriate, access may be permitted for events and programs when it is apparent that the students, faculty, staff, and alumni of the university and their guests will not fill the facility reserved for such use. In such cases, special provisions must be made to ensure that members of this academic community have priority to attend and are not precluded from attendance by the general public. Certain facilities, such as residence halls, classrooms, and laboratories, are designed for and are to be used by residence hall residents only, or in the case of classrooms and laboratories, by members of this academic community. In all cases, the essential educational purpose of the university cannot be interrupted or disturbed by the access of the general public. Officials of the university may restrict or prevent access by the public if such access disturbs or has the potential to disturb classes or other functions of Northeastern University. Occasionally, access to an area such as the Krentzman Quad will be granted to distribute free literature or provide a public forum for speakers. Such use requires the prior approval of the director of student activities and will be granted only during the Wednesday and Thursday activity periods. The use of facilities such as residence halls or cafeterias for distribution of literature or for speakers is prohibited.

**SAFETY GLASSES**

Safety glasses must be worn in all chemistry laboratories and other facilities as required.

**SALES AND SOLICITATIONS**

Northeastern University is not a marketplace. Sales of material or solicitations, such as newspapers and other printed matter, insurance, foodstuffs, and all other articles are prohibited without the express written permission of designated officials of the university. Solicitations of any kind are also prohibited without the express written permission of designated officials. Exceptions to this policy are made for recognized student organizations and residence hall residents. Residence hall residents should request permission to sell within their housing unit from the director of residential life; recognized student organizations should request permission for sales from the director of student activities; all others should apply to the business manager of the university. Such permission, when granted, is for designated areas within the university and is subject to the restrictions imposed by the approving officials. General solicitation, especially in such areas as classrooms, lounges, and cafeterias, is not permitted.

**SMOKING**

All university administrative and classroom buildings are smoke free and tobacco free. The policy relates to all campuses. The only university facilities not covered by this policy are residence halls and apartment buildings. The sale of cigarettes and other tobacco products is prohibited on campus. Smoking cessation information and programs are available. For further information, contact the Office of Human Resources Management or University Health and Counseling Services.

**TAPE RECORDERS**

Students may not use tape recorders in the classroom without the instructor’s consent. Students with disabilities who need a tape recorder in the classroom may make arrangements through the Disability Resource Center, 20 Dodge Hall.

**TEXTBOOKS**

Students should purchase or have in their possession the assigned textbooks, problem books, manuals, and other supplies that may be necessary in a classroom or laboratory.

---

This bill was drafted by the Student Senate, the vice president for student affairs, and members of the Faculty Senate. It was passed in the spring of 1992.
Academic Rights
We, the students of Northeastern University, believe that a quality education is the paramount goal of all students. In order to fulfill this goal, the university must recognize certain rights, which are set down in this document. (The student rights, through their representatives in the Student Government Association [SGA], described in these sections arise from faculty and staff employment responsibilities and obligations to the university. Northeastern University students recognize and accept that it is the sole prerogative of the university to enforce these obligations and responsibilities and to determine whether and to what extent they are being carried out or violated in specific instances. Northeastern University students recognize and accept that their ability to effect redress of complaints arising from these rights is limited to the procedures specified in “Appeals Policies and Procedures.”

COURSE-RELATED RIGHTS
Article 1 Students have the right to instructors who attend scheduled classes on time.
Article 2 Students have the right to view work they submit to satisfy course requirements after it is graded.
Article 3 Students have the right to adequate access to instructors.
Article 4 Students have the right to receive a course outline, which includes a fair and explicit grading policy, at the beginning of each course.
Article 5 Students have the right to instructors who communicate the material pertaining to the course effectively in the English language, except in the case of foreign language instruction.
Article 6 Students have the right to participate in and have access to Student Government Association student teacher course evaluations.

RIGHTS TO UNIVERSITY ACADEMIC SERVICES
Article 7 Students have the right to adequate access to effective academic services, as described in the student handbook and other university publications, provided by the university.
Article 8 Students have the right to an environment conducive to learning. (Because the university operates on a twelve-month calendar in an urban environment, many construction, remodeling, renovation, and repair projects must take place while the university is in session and while other potential distractions from the learning process arise from the surrounding urban environment on which it is dependent but over which it exerts little or no control. Thus, though the university is committed to maintaining an appropriate learning environment for its students, Northeastern University students recognize and accept, as part of their relationship with the university, that the conditions described above may cause occasional disturbances to that environment. The articles shall be interpreted by the Office of the Provost in conjunction with the Office of the Vice President for Student Affairs, and shall be monitored by the Student Government Association. Further, should any student discover that he or she has been subject to any violation of the principles stated herein, the student should follow the appropriate complaint resolution procedure in “Appeals Policies and Procedures” (p. 30).” The Student Government Association, if requested by the student, will monitor the progress of any student academic grievances.)
Article 9 Disabled students have the right to be treated in a nondiscriminatory fashion in accordance with the policies described in university publications and consonant state and federal laws.

SCHEDULING RIGHTS
Article 10 Students have the right to nonconflicting final exam schedules.
Article 11 Students have the right to final exam schedules in accordance with established university policy.
Article 12 Students have the right to be excused from academic commitments for a religious observance.

GENERAL ACADEMIC RIGHTS
Article 13 Students have the right to be informed, in a timely fashion, of proposed or actual university action to be taken against them.
Article 14 Students have the right of access to their academic and financial aid records and maintenance of the privacy of these records, as provided by the Federal Educational Rights and Privacy Act.
Article 15 Students have the right to be free from harassment by other members of the university community.
Article 16 Students have the right to the redress of academic grievances.

Student Responsibilities
It is each student’s responsibility to:
1. Contribute to a climate of open inquiry and honesty in all aspects of the university’s academic life.
2. Commit sufficient time and effort for study and the use of library, studio, and computational facilities in connection with each course.
3. Contribute to the classroom/laboratory/studio learning environment through discussion and active participation.
4. Acquire the necessary prerequisites for full participation in each academic course.
5. Attend scheduled classes regularly and on time.
6. Obtain help with problems encountered in a given course by seeking out faculty and teaching assistants outside class time.
7. Respect the concept of academic freedom of each faculty member.
8. Assist the university in its self-evaluation by responding honestly and conscientiously.
Welcome to graduate studies at CAMD. This is an exciting time to pursue advanced education and scholarship in creative fields. Never have the arts and culture been so clearly essential to our social, economic, and environmental future. From artist outreach in underserved communities to “serious” game design for health and security; from green building innovation to sustainable urban design; from international entertainment and media to provocative performances in “found spaces”; from incisive data visualization that changes how we view the world to cutting-edge innovation to sustainable urban design; from international entertainment and media to provocative performances in “found spaces”; from incisive data visualization that changes how we view the world to cutting-edge research and media to provocative performances in “found spaces”; from incisive data visualization that changes how we view the world to cutting-edge research and media to provocative performances in “found spaces”; from incisive data visualization that changes how we view the world to cutting-edge research and media to provocative performances in “found spaces”; from incisive data visualization that changes how we view the world to cutting-edge research and media to provocative performances in “found spaces”; from incisive data visualization that changes how we view the world to cutting-edge research and media to provocative performances in “found spaces”; from incisive data visualization that changes how we view the world to cutting-edge research and media to provocative performances in “found spaces”; from incisive data visualization that changes how we view the world to cutting-edge research and media to provocative performances in “found spaces”;

We look forward to getting to know you and to incorporating your individual education and career interests into the graduate community of CAMD.

Academic Policies and Procedures

- General Information (p. 40)
- Master’s Degree Policies (p. 40)
- Graduate Student Classification (p. 41)

General Information

Five units in the College of Arts, Media and Design offer programs at the graduate level:

- Architecture
- Art + Design
- Game Design
- Journalism
- Music

Master’s Degree Policies

The College of Arts, Media and Design (CAMD) graduate studies sets minimum standards for all students to fulfill. Departments and programs may have additional requirements that exceed those of the college (departmental handbooks can be found at the college’s web page (http://www.northeastern.edu/camd/academics/graduate/current-students)).

A candidate for the master’s degree must complete a minimum of 30 semester hours of graduate-level course work and such other study as may be required by the department in which the student is registered. To qualify for the degree, a minimum cumulative grade-point average (GPA) of 3.000, equivalent to a grade of B, must be obtained. This average will be calculated each semester. A student who does not make satisfactory progress toward degree requirements, as specified by the individual department, may be terminated from the program.

To maintain current student status within CAMD, graduate students must make satisfactory progress in their degree, including working toward the graduation requirement of a GPA of 3.000 and the timely completion of course work. See the university’s policy on academic standing ("Minimum Cumulative Grade-Point Average (p. 26)").

All students must be registered in the last semester of their program. Any student who does not attend Northeastern University for a period of one year will be required to apply for readmission.

Student Aid Awards

Only those students who are registered in degree programs are eligible for awards. Award recipients will receive an official award letter from CAMD graduate studies. Pay attention to this letter as it is an official contract that should be read carefully. Graduate Student Scholarships (GSS) are contingent on satisfactory academic progress toward the degree and meeting department-specific guidelines. Recipients must be in full-time status and be registered for a minimum of 8 semester hours. Receipt of financial support administered by CAMD graduate
studies requires that all students receiving awards will generally have a 3.000 GPA. Students whose cumulative GPA is below 3.000 will be reviewed by their departments and by CAMD graduate studies and may have their funding terminated on recommendation of their department or by decision of CAMD graduate studies in consultation with their department. Renewals of awards depend on the student making satisfactory academic progress toward the degree and satisfactory performance of any duties required by the award.

**Leave of Absence**

Full-time students who are not involved in any academic endeavor for a period of time are required to petition the coordinator of student services, through their department, for a leave of absence by completing the leave of absence petition through the myNEU web portal. CAMD graduate studies will not accept retroactive leave requests. Note that if a student is requesting a leave for medical reasons, students should contact University Health and Counseling Services (http://www.northeastern.edu/uhcs/forms) at 617.373.2772. Leaves of absence generally are not approved for more than one calendar year at a time. International students should consult with an advisor at the International Student and Scholar Institute for proper guidance. Leaves of absence are not appropriate for master’s degree students who are working on a thesis but are away from the Northeastern campus. Except in the case of medical leaves, being on an approved leave of absence does not extend the amount of time allowed for degree completion or the makeup of incomplete grades.

**Time Limitation**

For the master’s degree, course credits earned in the program of graduate study are valid for a maximum of seven years.

If students wish to apply for an extension of the time limit, they must submit a petition to their department of study. The petition must include a detailed plan for completion of all remaining degree requirements. In the case of time limit extension requests for master’s degree coursework, the department must certify that the content of each of the courses has not changed since the time the student completed the course. If deemed appropriate, the department will recommend approval of the extension to CAMD graduate studies.

**Changes in Requirements**

The continuing development of CAMD graduate studies forces regular revision of curricula. When no hardship is imposed on the student because of changes and the facilities of the school permit, the student is expected to meet the most recent requirements. However, if it can be demonstrated that doing so imposes a substantial hardship, the requirements of the year in which the student matriculated will be applicable.

**Thesis**

Theses are required in some programs and should demonstrate the individual’s capacity to execute independent work based on original material. Registration for the thesis is required. Theses must be approved by the departmental graduate committee and must receive a grade of B (3.000) or better to be accepted. Students who have not completed their thesis after having registered for the specified number of thesis credits must register and pay for Master’s Continuation.

**Conditional Student**

Students whose admissions files are missing documentation. Conditional students must submit the requested documentation, to the satisfaction of CAMD graduate studies, no later than the completion of their first month of study. Once the documentation has been submitted, the student’s status will be reevaluated.

**Provisional Student**

Students whose academic records do not qualify them for acceptance as regular students. Provisional students must obtain a B (3.000) average in the first 9 semester hours of study or meet specifically delineated departmental requirements to qualify for full acceptance to a degree program. Provisional students are not eligible for awards or financial aid.

**Special Student**

Special students are enrolled on a part-time basis (no more than 6 semester hours per semester). Credit can be earned for a maximum of 9 semester hours over time. Students interested in taking more than 9 semester hours must make a formal application to the degree program. Use the Internal Admission Application form (http://www.northeastern.edu/camd/academics). Special students who do not register for four consecutive semesters (excluding summer semester) will be subject to review and possible withdrawal by CAMD graduate studies.

**Graduate Student Classification**

**Regular Student**

Those students who are admitted to a degree program.
at case studies of architecture firms in practice, problem solving, and innovation. We seek to have students leave our program with a unique balance of technical, theoretical, and strategic tools to make a real difference in the profession.

**Master of Design for Sustainable Urban Environments**

The Master of Design for Sustainable Urban Environments (MDes-SUEN) brings together the allied professional fields of environmental design, landscape architecture, and urban planning to offer advanced study and research opportunities in the design of ecologically and economically productive urban environments. The program seeks to supply graduates for the rapidly growing field of sustainable urbanism through a dynamic curriculum mix of design, dialogue, and technical courses, enriched by diverse interdisciplinary electives.

The pedagogic and research focus of the MDes is the design, implementation, and management of sustainable urban environments from the scale of individual parcels to regional systems. Key topics include brownfield and waterfront revitalization, sustainable and secure pedestrian environments, urban habitat design and management, and green and blue infrastructure design and planning with an emphasis on handling increased storm water and tidal influx in the urban landscape.

The MDes is a unique program of study in which urban landscape design, planning, and policy dovetail with environmental engineering, environmental science, art, and visualization. Boston's history of innovation in environmental design as well as its legacy of urban redevelopment provide a rich backdrop and laboratory of urban, infrastructural, and ecological prototypes that ideally position the program to creatively and critically explore local issues with global implications.

Contemporary urban theory includes a significant body of writing in the area of "Landscape" and "Ecological-Urbanism," a critical discourse that looks at the full range of environmental strategies for urban sites with an emphasis on ecological thinking. The paradigm of sustainable environmental design is moving away from form-based planning toward dynamic ecosystem services. This program seeks to prepare students to be innovative and entrepreneurial designers able to combine economic, environmental, and social priorities to make next-generation public spaces and systems.

**Programs**

**Master of Architecture (MArch)**

- One-Year Program (p. 42)
- Two-Year Program (p. 42)
- Three-Year Program (p. 43)
- Three-Year Program—Advanced Degree Entrance (p. 44)

**Master of Design for Sustainable Urban Environments (MDes-SUEN)**

- One-Year Program (p. 45)
- Two-Year Program (p. 46)

**Combined Programs**

- One-Year Master of Architecture and Sustainable Urban Environments (p. 47)

**Master of Architecture—One-Year Program**

This program gives eligible candidates the opportunity to get a NAAB-accredited Master of Architecture degree in one year.

Open to candidates with either a BS in Architecture from Northeastern University or a professional Bachelor of Architecture degree from an accredited North American program with at least one year of IDP-approved professional experience.

Students engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty, or students may propose an independent research and design project. Team research is conducted and compiled into online and physical research books. This body of compiled research then becomes the basis of the intellectual framework for the individual students’ design projects. This final degree project parallels an in-depth two-semester professional practice sequence that analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

**Master of Architecture—Two-Year Program**

This program offers students who have earned a BS in Architecture from an institution other than Northeastern to engage in the urban-focused curriculum that is offered at the School of Architecture.

**YEAR ONE**

In the urban housing studio, students have an opportunity to learn to develop new patterns of housing for specific Boston sites and to develop those sites with their own individual interventions. The comprehensive design studio challenges the students to consider
architectural connections at all scales, from the nut and bolt to the scale of the door or window to the scale of the whole building and the city. Additionally, students can opt to study abroad in our Berlin program their first semester.

**YEAR TWO**

In the final year, students engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty, or students may propose an independent research and design project. Team research is conducted and compiled into online and physical research books. This body of compiled research then becomes the basis of the intellectual framework for the individual students' design projects. This final degree project parallels an in-depth two-semester professional practice sequence that analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

**Electives**

In consultation with your faculty advisor, complete 8–16 semester hours from outside the following subject area: ARCH

**Program Credit/GPA Requirements**

60–68 total semester hours required
Minimum 3.000 GPA required

**Plan of Study**

**YEAR ONE**

In the first year, students take intensive studios, technology classes, and architectural history classes to immerse them in the studio culture of the school and to give them a strong foundation to begin the upper-level studios. The introductory graduate skills and design studios are specifically designed for the students in this program who do not have experience doing architectural drawing and designing. Students complete a series of projects that will give them an opportunity to develop the skills and the critical thinking needed in the graduate curriculum.

**YEAR TWO**

In the second-year studios, students have an opportunity to learn to develop new patterns of housing for specific Boston sites and to develop those sites with their own individual interventions. Students also have the option to study abroad at the school's Berlin program during the fall. The comprehensive design studio challenges the students to consider architectural connections at all scales, from the detail, to building systems, to the whole building, and ultimately to an architecture situated in an urban and climatological context. Additionally, students take building technology and architecture seminar courses.

**YEAR THREE**

In the final year, students engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty, or students may propose an independent research and design project.
project. Team research is conducted and compiled into online and physical research books. This body of compiled research then becomes the basis of the intellectual framework for the individual students’ design projects. This final degree project parallels an in-depth two-semester professional practice sequence that analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

- Students in the Boston option should complete Design Tactics and Operations (ARCH 5310), Housing and Aggregation (ARCH 5110), and Structural Systems (ARCH 2230).
- Students in the Berlin option should complete Architecture and Urbanism Abroad (ARCH 3361), Studio Abroad (ARCH 3155), and Seminar Abroad (ARCH 3362)

*Berlin curriculum

Open to candidates who do not have a BS in Architecture or equivalent but may have related degree. Students with some background in architecture may be eligible for advanced placement into the program. Advanced placement will be determined by an applicant’s transcript and portfolio.

Only select courses in the first year of the program will be waived.
All waivers are at the discretion of the school and applicants may be
required to provide documentation if they seek additional waivers (78–100 credits total based on waivers).

The minimum course work for all students in the first year of the program is:

- Two studio courses (minimum 10 credits total)
- Two graduate electives (minimum 8 credits total)

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

All advanced-entry students must complete a minimum of 10 semester hours per semester in the first year. Course waivers are determined by the faculty and students should consult with their advisor.

**Prerequisites**
Courses listed below may be waived as determined by faculty advisor.

Master of Design for Sustainable Urban Environments—Two-Year Program

The two-year Master of Design for Sustainable Urban Environments (MDes-SUEN) is open to students entering with a bachelor’s degree in any field. The 64-credit program provides a full year of core skill sets including design; site analysis, implementation, and visualization; history/theory; and policy. This includes introduction to basic earthworks, water, and plants systems as well as the principles of landscape and urban ecology.

Master of Architecture and Sustainable Urban Environments—Combined Program

This three semester combined Master of Architecture and Sustainable Urban Environments degree creates the ability for M.Arch students to satisfy the requirements for both the Architecture and Sustainable Urban Environments in three semesters instead of the standard four. This combined program allows expedited completion of a degree in complementary fields. This program option is only open to M.Arch students.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Program Requirements

Year One, Fall
ARCH 6430 Case Studies 1 4

Art + Design

Website (http://www.northeastern.edu/camd/artdesign/academics/graduate)

Andrea Raynor, MFA
Interim Chair

The graduate programs in the Department of Art + Design are designed to cultivate capacity and fluency in a range of disciplines and practices to create and deliver value and benefit for an increasingly connected and diverse world. Spanning many subjects, interests, and intentions across disparate fields and manifold practices of art, media, and design, our master’s and certificate programs will challenge and inspire you to push the boundaries of cultural production and stewardship and social and civic impact. We strive to empower you to bring your ideas to life through design conversations, media making, and artistic expression and enjoy richly rewarding careers and lives.

Programs

Master of Fine Arts (MFA)
• Information Design and Visualization (p. 47)
• Interdisciplinary Arts (p. 48)
• Studio Arts—School of the Museum of Fine Arts (p. 48)

Graduate Certificate
• Arts Management and Cultural Entrepreneurship (p. 50)

Information Design and Visualization, MFA

The Master of Fine Arts in Information Design and Visualization focuses on the analytical and visual communication of information. Successful graduates are experts in the visual languages of data who produce effective and meaningful visual displays of abstract information. They collaborate with other professionals, researchers, or clients in a variety of fields and settings.

Students have an opportunity to gain an understanding of the principles of translating data and information into visual, material, and dynamic forms and to learn to integrate theoretical, visual, and technical
aspects of structuring and representing data to provide a broad range of audiences increased access to socially relevant issues. The curriculum is built upon an established undergraduate program in graphic, information, and interaction design and seeks applicants from diverse fields of study—not just visual communications—who are interested in information visualization and communication of information through visual and analytical means. Practicing professionals and recent undergraduates in a variety of fields (architecture, graphic design, journalism, communications, business, the humanities, and sciences) who desire a fluency in information design should apply.

Graduates are prepared to work effectively in a dynamic and burgeoning field of practice and research in environments including design firms, research centers, corporations, academic institutions, and government and urban agencies. The program seeks to produce professionals skilled in design principles and practices needed to assume leadership roles in an evolving interdisciplinary field. Students will also be well positioned to pursue PhDs and academic careers.

Interdisciplinary Arts, MFA

The Master of Fine Arts in Interdisciplinary Arts emphasizes the arts of social engagement, broadly conceived. Positioned at the intersection of the visual arts, architecture, music, visual and media studies, and the expanded field of design, the curriculum supports the development of ambitious projects by a diverse, international group of creative practitioners.

Students have an opportunity to learn to use the tools and insights of contemporary creative practice to intervene in public discourse through media, research-, and/or community-based methods. The curriculum centers around a core critique seminar, Arts in the Public Sphere Seminar 1 (ARTD 5001), providing a foundation and home base for students who then customize their education from a wide array of studio and academic courses. Regular workshops with visiting faculty emphasize hands-on engagement in the creative process of leading artists, while offsite and international summer residencies allow students to complete self-directed projects, supported by online faculty and peer mentoring. The MFA degree requires a minimum 3.000 GPA over 60 semester hours of study, with 64 semester hours recommended.

The program seeks to help students articulate their goals, context, and audience and develop the professional skills necessary to sustain their practices. Successful graduates are prepared to forge their own paths as publicly engaged artists working independently or in arts organizations, social entrepreneurship ventures, the nonprofit sector, and as faculty in academic institutions.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Requirements

Seminars Required Courses

Enrollment in a section of Arts in the Public Sphere is required each term. The format of the course is critique-seminar.

Studio Arts—School of the Museum of Fine Arts, MFA

The Master of Fine Arts in Studio Arts is offered in conjunction with the School of the Museum of Fine Arts, Boston (http://www.smfa.edu) (SMFA, Boston), adjacent to the Northeastern campus. The SMFA, Boston is part of the Museum of Fine Arts, Boston, one of the most comprehensive art museums in the world, with a collection of nearly 450,000 works of fine art. Rigorous and highly selective, the studio art program seeks to prepare students for a career as a working artist or a faculty at the college level.

Students hone their practices through individual innovation, creative collaborations, informal mentorship, and academic discourse. Students are enrolled at both Northeastern University and the SMFA, Boston and graduate in two years with an MFA degree from Northeastern. Course work includes 44 semester hours of studio work and graduate seminars at SMFA, Boston and 16 hours of art history and academic electives at Northeastern. Students receive semiprivate studio spaces at the SMFA, Boston and access to SMFA, Boston faculty and equipment. A final thesis exhibition is required. This program is designed to prepare students for careers in art, museums, and cultural institutions. Students will also be well positioned to pursue academic careers.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Choose course work in consultation with the School of the Museum of Fine Arts and Northeastern University faculty.

Requirements

Studio Electives
Complete 8 semester hours of studio art course work. 8

Nonstudio Electives
Courses are selected under advisement of the graduate coordinator or faculty advisor. Courses may be from Art + Design or other colleges:

- ARTH 5100 Contemporary Art Theory and Criticism
- ARTH 5200 Issues in Contemporary Art
- ARTS 5100 Visual Ideation
Arts Administration and Cultural Entrepreneurship, Graduate Certificate

The arts sector is more vital and dynamic than ever, flourishing in major arts institutions and “non-hierarchical organizations,” including artist-run spaces and community organizations. This context, paired with changes in the nonprofit funding climate of the past thirty years, has generated a need to transform leadership training in the arts sector. Increasingly, creative thinkers must be equipped with administrative, analytical, entrepreneurial, and technological skill sets to work within the complex, interdependent arts and cultural ecosystem. In response, the Graduate Certificate in Arts Administration and Cultural Entrepreneurship offers an interdisciplinary graduate program focused on leadership innovation in nonprofit performance, visual arts, cultural, and community organizations.

The Graduate Certificate in Arts Administration and Cultural Entrepreneurship challenges students to create diverse, viable, and sustainable arts and culture projects and organizations; to use entrepreneurial practices in order to create transformation; to develop and deploy new arts and culture sector-focused business and analytic skills; and to design innovative planning and engagement strategies. Course and project work contains embedded experiential opportunities to explore and demonstrate transformational arts management approaches. This program is offered 100 percent online.

Program Requirements

Requirements

Students take three required courses and select one directed elective in consultation with faculty advisor.

Game Design

Website (http://www.northeastern.edu/camd/gamedesign)

Andrea Raynor, MFA
Interim Chair

Alessandro Canossa
Associate Professor and Graduate Coordinator
100 Meserve Hall
617.373.5242

The game design program offers a Master of Science in Game Science and Design. The degree is joint between the College of Arts, Media and Design and the College of Computer and Information Science. This MS degree is focused on the science and design of game development. The degree will weave the design and technology necessary to build a game but focus on the playability and analytics to make the product successful, thus creating a coherent vision enabling students to understand the process of creating successful game products in a player-centric environment.

The degree offers three concentrations:
• Game analytics: focusing on data analysis of gameplay and other game data to make the game successful
• Game user research: focusing on gauging the user experience to enable designers to develop an enjoyable game experience
• Game design and development: focusing on the design or technical side of game development

Admissions Requirements
Applicants must submit an official application, including the following documents: official transcripts, a statement of purpose projecting their career goals, a description of any experience in the games field and/or a portfolio if available, official GRE General Test, and three letters of recommendation. International students must also submit official scores of the TOEFL examination. Acceptance to the MS in Game Science and Design program is granted upon recommendation from the master’s admissions committee after review of the completed application.

Applicants will be expected to have a minimum 3.000 undergraduate GPA. International applicants must have a minimum TOEFL score of 100 (internet based) or 250 (computer based) or a minimum IELTS of 6.0.

We will consider applications from students who hold a bachelor’s degree from any of the following fields or closely related fields:
• Computer science
• Information science
• Informatics
• Engineering
• Human computer interaction
• Psychology
• Social science
• Interaction design
• Game design

All admitted students will be assigned to an advisor who will help them select a pathway with a coherent set of electives depending on their career goals. The advisor will also monitor their progress through the master’s degree.

Degree Requirement
This is a two-year, 34-semester-hour degree.

Programs
Master of Science (MS)
• Game Science and Design (p. 51)

Graduate Certificate
• Game Analytics (p. 52)

The Master of Science (MS) in Game Science and Design is a program that seeks to give students a comprehensive understanding of how successful game products are created in a player-centric environment. Focusing on the science of game development, students have an opportunity to learn the design and technological skills needed to build a game and develop a deep understanding of playability and analytics that make products successful in an increasingly competitive marketplace.

The game industry has expanded to include social and mobile gaming; games in health, education, and training; and innovations in play psychology, middleware, graphics tools, game mechanics, game evaluation methods, and advanced artificial intelligence and narrative techniques. It has become an increasingly competitive space.

The selectiveness of the industry and the diversity of the skills required mean that students seeking entry need both broad and deep skills. As an emergent industry using diverse technology and collaborative practices, games needs professionals with interdisciplinary skill sets who can meld knowledge about development with knowledge about evaluation methods and players’ behavior and psychology.

Jointly offered by Northeastern’s Colleges of Arts, Media and Design and Computer and Information Sciences (http://www.ccs.neu.edu), the MS in Game Science and Design is a one-of-a-kind interdisciplinary program that seeks to prepare students to meet this need by weaving together science and design. This is a two-year, 34-credit-hour program.

The degree offers three concentrations:
• Game analytics: focusing on data analysis of gameplay and other game data to make the game successful
• Game user research: focusing on gauging the user experience to enable designers to develop an enjoyable game experience
• Game design and development: focusing on the design or technical side of game development

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

The Graduate Certificate in Game Analytics offers students an opportunity to obtain the ability to analyze vast amounts of data, which has become critical as big data has rapidly become a competitive space across multiple industries from games to healthcare, urban planning, and social media.

In the game industry, data-driven techniques for analyzing game data have become a strategic necessity. The game development process has shifted from “design, develop, release” to “design, develop, release, and continuously fine-tune based on analytics.” All free-to-play games on mobile, tablets, touch devices, and web-delivered platforms use analytics to develop strategies for monetization and assessment.

As game companies have realized the importance of data analytics in the process of design and production, they have dramatically increased the demand for qualified game analysts. Northeastern’s unique Graduate Certificate in Game Analytics is a one-year, 20-semester-hour program developed to meet this need.

**Admissions Requirements**

Students are considered based on their application package, which includes the following documents:

- Statement of purpose projecting career goals and/or relevant work experience
- A description of any experience in the games field and/or a portfolio, if available
- Transcripts of undergraduate degree with a minimum GPA of 3.000
- General GRE scores
- Minimum TOEFL score of 100 (internet based) or 250 (computer based) or IELTS score of 6.0 for international students who have a bachelor’s degree from a non–English-speaking country
- Three letters of reference from individuals who understand the student’s potential for graduate study

Acceptance is based on an assessment of the student’s ability to succeed in the advanced course work of the program.

All admitted students meet with an advisor who help them select a pathway with a coherent set of electives depending on their career goals. The advisor also monitors their progress throughout the course work.

**Degree Requirement**

See the following page for program requirements.

Welcome to the graduate program at Northeastern University's School of Journalism. Our school offers a master of arts in two tracks—professional or media innovation. Our master's program offers a chance to study in Boston with a small and dedicated faculty of specialists with years of experience and extensive contacts in the media world.

The program offers students hands-on training in preparation for careers in reporting, editing, multimedia design and production, social media, and data journalism.

The program typically takes three semesters: fall, spring, and fall. Students can also choose to take part in Northeastern's acclaimed cooperative education program. The co-ops can last either four or six months. Full-time students can complete the program in a year by enrolling in classes during the two summer semesters. It is also possible to enroll part-time. Students have up to seven years to fulfill the requirements of the program.

Program Credit/GPA Requirements
20 total semester hours required
Minimum 3.000 GPA required

Programs
Master of Arts (MA)
• Journalism (p. 53)

The School of Journalism offers two pathways in a Master of Arts degree that seeks to prepare students for the challenges faced by legacy and new media in the digital age.

Students new to the field or those with experience can choose programs tailored to help them thrive during this time. Our programs are designed to merge traditional journalism with the latest information technology. Our professional track is designed for those with little or no journalism experience who want to pursue a career in journalism. Our media innovation track is designed for students with previous journalism experience who want to learn digital and multimedia skills.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.
MMIL offers advanced education in the areas of music management, leadership, research, and entrepreneurship with opportunities for immediate and ongoing application to each student’s unique professional aspiration.

The Master of Science program focuses on the core scholarly areas of music industry. Students specialize in one of four curricula pathways: professional, research, entrepreneurship, and practice. Courses seek to provide a solid foundation in music industry theory and analysis while offering students the opportunity to apply the foundational skills to an area of personal interest. Elective courses emphasize the creation and sustainability of music organizations in a rapidly evolving environment. Using an active-learning approach, the program focuses on developing music executives intellectually and ethically, while providing them with a keen appreciation for the complexities of managing in the creative industries. This approach focuses on long-term skill sets that enhance the potential of graduates within a fluid and ever-changing field. The program also emphasizes global leadership qualities that provide a broader vision of the music industry on an international level.

The JD/MS in Music Industry Leadership is a dual-degree program that offers students a variety of opportunities for real-world, experiential learning at the intersection of law and music business. Candidates for the JD/MS program must independently apply and gain admission to the School of Law and the College of Arts, Media and Design. Admission to one school does not ensure admission to the other. Candidates may apply to both schools prior to matriculation at the law school, or students may wait until they are enrolled in the School of Law before seeking admission to the College of Arts, Media and Design. During either the first or second year of law school, students may apply to the MS program during the winter or spring for enrollment the following September. Students enrolled in law school who are interested in pursuing this dual degree should contact the Office of Academic and Student Affairs and Professor Kara Swanson, JD/MS faculty advisor, during the fall or winter of their first or second year for further information.

Curriculum
The MMIL offers students four curriculum options for degree completion. A minimum of 32 semester hours and nine courses (not including the intensive reporting seminar), with a GPA of 3.000, are required for graduation. Each option is designed to highlight a student’s strength and longer-term goals. Consultation with the graduate coordinator prior to degree commencement is required to establish a student’s ideal curriculum pathway.

Programs
Master of Science (MS)
- Music Industry Leadership (p. 54)

Certificate
- NEC/NU Joint Certificate Program—General Certificate of Merit in Music Performance (p. 55)
- NEC/NU Joint Certificate Program—Professional Studies Certificate in Music Performance (p. 56)

Dual Degree (JD/MS)
- Music Industry Leadership (p. 58)

Engaged with the Industry—and the World
Leveraging Northeastern’s excellence in global experiential learning, our program allows students to study in Boston and gain real-world experience in New York, Nashville, Los Angeles, and other music capitals across the world.

Expert Faculty
With real-world research and professional experience with the issues facing today’s music industry, our exceptional faculty bring fresh insight and innovation to their teaching.

Options
Students shape their own curriculum, following paths that meet personal and professional aspirations through a focus on practice, entrepreneurship, the profession, and research. We also offer a joint JD/Music Industry Leadership program in partnership with the Northeastern University School of Law.

Minimum 3.000 GPA required

NEC/NU Joint Certificate Program—General Certificate of Merit in Music Performance

The School of Continuing Education at the New England Conservatory (NEC) and the Department of Music at Northeastern University (NU) jointly offer a General Certificate of Merit in Music Performance (24 credits) and a Professional Studies Certificate in Music Performance (48 credits). These programs are geared toward Northeastern undergraduate and graduate students who are interested in improving their abilities to perform on an instrument or voice in the classical or jazz styles.

The certificate in music performance is in addition to the student's Northeastern undergraduate or graduate degree—it is an entirely separate and distinct credential. Credits for courses toward the music performance certificate are accumulated and billed separately from credits toward Northeastern undergraduate or graduate degree programs and are not eligible for financial aid.

Courses are offered at NEC (predominantly related to music performance) and at NU (predominantly related to music history and music theory). NEC courses are scheduled during evenings and weekends.

Program Requirements

Northeastern University Requirements

Complete 11 credits of course work at Northeastern University as indicated below.

Music Theory and Musicianship Placement

All students must take a theory placement exam. Students who do not place into MUSC 1201 or MUSI 1203 must first take the following course:

- MUSC 1119 Fundamentals of Western Music Theory 4

Credits for MUSC 1119 do not count toward the certificate.

Music Theory and Musicianship

Music theory and musicianship courses should be taken concurrently. 1

- MUSC 1201 Music Theory 1 4

Music History

Complete one of the following:

- MUSC 1104 Survey of African-American Music
- MUSC 1105 Music of the USA
- MUSC 1111 Rock Music
- MUSC 1112 Jazz
- MUSC 1121 Medieval and Renaissance Music
- MUSC 1122 Music of the Baroque Era
- MUSC 1123 Music of the Classical Era
- MUSC 1124 Music of the Romantic Era
- MUSC 1125 Twentieth-Century Music

Note: Since the following course is repeatable, music majors and combined majors may count the credits for the second time they take this course toward the music performance certificate:

- MUSC 3550 Historical Traditions: Special Topics

Ensembles

Complete two music ensembles:

- MUSC 1904 Chorus
- MUSC 1905 Band
- MUSC 1906 Orchestra
- MUSC 1907 Wind Ensemble
- MUSC 1911 Jazz Ensemble
- MUSC 1912 Rock Ensemble
- MUSC 1913 Blues/Rock Ensemble
- MUSC 1914 Create Your Own Music
- MUSC 1915 Chamber Ensemble
- MUSC 1916 Contemporary Music Ensemble
- MUSC 1917 Jazz Choir and Combo
- MUSC 1918 World Music Ensemble
- MUSC 1919 Fusion Ensemble
- MUSC 1920 Pep Band
- MUSC 1921 World Fusion Ensemble

1 Music majors with a concentration in music industry may substitute Music Theory for Music Industry 1 (MUSI 1203) and Musicianship 1 (MUSC 1241).

New England Conservatory Requirements

Complete 13 credits of course work at New England Conservatory School of Continuing Education as indicated below.

Private Studio Instruction

Complete 8 credits of (repeatable) private studio instruction with New England Conservatory School of Continuing Education faculty. These credits may be accumulated in units of 2, 3, or 4 credits per semester. All private lessons require audition by NEC/NU faculty in order to assign private teacher placement. After being placed with a private teacher, and working with their certificate advisor, students must confirm with that teacher the length and number of lessons they will receive.

- MPNC 1102 Music Instruction
- MPNC 1103 Music Instruction
- MPNC 1104 Music Instruction

Music Technology

- MPNC 1201 Contemporary Music Production and Technology 1

Electives
Complete 3 credits from the following: 3

Music Industry Leadership, JD/MS

Over the course of forty-five months, the program enrolls students successively in the School of Law and the College of Arts, Media and Design. JD/MS candidates must complete the first and last years of the program in the School of Law. The year of music industry courses in the College of Arts, Media and Design may be taken during either the second or third year.

Program Requirements

Program Sequence

Year One
Fall and spring—traditional first-year law curriculum

Year Two
Summer—law co-op

Fall, winter, and spring—music industry courses (p. 54)

Year Three
Summer—music industry courses (p. 54)
Fall—law school courses
Winter—law co-op
Spring—law school courses

Year Four
Summer—law co-op
Fall—law school courses
Winter—law co-op
Spring—law school courses
Modern business faces many challenges from unprecedented political change and the effects of foreign policy, high technology, affirmative action regulations, and new economic policies. These challenges have increased the demand for highly trained individuals equipped to analyze and address our economy’s complex social and legal problems.

Programs in the D’Amore-McKim School of Business (DMSB) are designed for students who are preparing to take on managerial responsibility. These programs seek to help students develop the ability to recognize and solve business and organizational problems and understand the role of business in the community, the nation, and the world. The college’s goals are to help students develop ideals that are ethically sound and socially desirable; cultivate an awareness of the social, political, and economic developments to which businesses must adapt; develop sound judgment and effective communication skills; and develop their individual interests and talents.

### Master of Science

Master of Science programs offer students the opportunity for in-depth study in a particular functional business area. Depending on a student’s prior academic background, certain prerequisite courses of study may apply.

Designed for undergraduate accounting majors, the Master of Science in Accounting seeks to give you the advanced accounting knowledge and skills you need to sit for the CPA exam. No prior work experience is required.

With an MS in Taxation, you have an opportunity to learn to analyze the Internal Revenue Code, expand your professional network, and advance your career in taxation. Courses begin three times per year: in fall, spring, and summer.

Northeastern’s MS in Finance program emphasizes the skills that are essential for a successful career in finance. You can pursue study in either corporate finance or investments.

Northeastern’s MS in International Business (MSIB) is designed for globally focused individuals who want to begin careers in international business.

The Master of Science in Innovation is a one-year cohort program for working professionals who want to dive into innovation as it applies to products, services, operations, and processes. The program begins in September.

The Master of Science in Technological Entrepreneurship is an intensive one-year (September to June) ten-course sequence that seeks to teach you the skills you need to know to effectively integrate technology and business.

#### Programs

**Master of Science (MS)**
- Business Analytics (p. 59)
- Innovation (p. 60)
- International Management (p. 60)
- Technological Entrepreneurship (p. 61)

**Master of Science in Accounting (MSA)**
- Accounting (p. 61)

**Master of Science in Finance (MSF)**
- Finance (p. 62)
- Finance—Evening/Part-Time Program (p. 62)
- Finance—Online Program (p. 62)

**Master of Science in International Business (MSIB)**
- International Business (p. 63)

**Master of Science in Taxation (MST)**
- Taxation (p. 63)
- Taxation—Online Program (p. 63)

#### Business Analytics, MS

The Master of Science in Business Analytics is a 31-semester-hour degree that is structured around four interdisciplinary core courses. After completion of the core, the student will be able to select from courses specific to the MS in Business Analytics.

Students may apply directly to the Master of Science in Business Analytics, or they may apply after successful completion of the data analysis requirement.
Innovation, MS

In both cases, students will complete the required interdisciplinary core courses before continuing study in business analytics.

Program Requirements
The Required Interdisciplinary Core

The four interdisciplinary core courses in data science/analytics serve as a foundation for the professional master’s degree in business analytics.

The goal of the core is to provide foundational knowledge in data science/analytics that is applicable to any discipline. Students who complete the core can apply these principles to data-driven decision making in their own discipline.

The four required core courses (16 semester hours) were developed by an interdisciplinary committee comprised of active researchers who utilize big data. These faculty, many who have interdisciplinary appointments, are from the College of Computer and Information Science; the College of Social Sciences and the Humanities; the D’Amore McKim School of Business; and the College of Arts, Media and Design. The faculty reviewed content of existing master’s programs to design the core. The four courses are:

Introduction to Computational Statistics (pending approval)
Collecting, Storing, and Retrieving Data (pending approval)
Data Mining and Machine Learning (pending approval)
Information Design and Visual Analytics (pending approval)

Following successful completion of the shared core courses, students in the business analytics program would take the following courses:

Introduction to Business Analytics (pending approval)
New Media and Digital Marketing Analytics (pending approval)
Advanced Enterprise Data Practice (pending approval)
Business Analytics Strategic Capstone (pending approval)
Business Analytics Elective (pending approval)

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work

Fall Term
Management
BUSN 6280 How Executives Shape and Lead Innovation and Enterprise Growth 3

Innovation
MGMT 6280 Innovation for Next-Generation Products and Systems 3

Marketing
MKTG 6280 Gaining Customer Insight 3

Spring Term
Accounting
ACCT 6280 Planning and Budgeting for Innovation 3

Marketing
MKTG 6283 Marketing and Selling Innovation 3

Innovation
ENTR 6217 Lean Innovation 3

Business
FINA 6284 Financing Innovation and Growth 3

Management
HRMG 6280 The Human Side of Innovation 3

Summer Term
Management
HRMG 6281 Leading and Implementing Innovation in Organizations 3

Innovation
MGSC 6281 Service Innovation and Management 3

Program Credit/GPA Requirements

30 total semester hours required
Minimum 3.000 GPA required

International Management, MS

In collaboration with the International Partnership of Business Schools (IPBS), the Master of Science in International Management (MIM) is designed to prepare students for careers in global economy. The MIM offers an opportunity to study in two continents, in two very different countries, with very different educational systems. Students who study for their first or second semesters at Northeastern University take the courses listed under the Program Requirements tab. Students who study at Northeastern University during the fall semester earn the Master of Science in International Management from the partner university where they study during their second semester. Students who study at Northeastern University during the spring semester earn the Northeastern University Master of Science in International Management. Learn more about the IPBS MIM program (http://www.ipbsmim.com).

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work

FALL SEMESTER
Required courses
FINA 6209 Introduction to International Accounting and Finance 3
MGSC 6209 Business Statistics 3
Electives
Complete three electives from the following:

- INTB 6201 International Business Management
- MECN 6203 Global Managerial Economics
- MKTG 6206 International Marketing
- ENTR 6220 Family Business Leadership and Governance
- ENTR 6225 Corporate Entrepreneurship through Growth, Acquisitions, and Alliances

SPRING SEMESTER
Required Courses

- FINA 6204 International Finance Management 3
- INTB 6226 Becoming a Global Leader 3
- INTB 6260 Advanced Topics in Global Management and Strategy 3

Electives
Complete two electives from the following:

- ENTR 6200 Enterprise Growth and Innovation
- STRT 6210 Workforce Metrics and Analytics
- SCHM 6213 Global Supply Chain Strategy

Program Credit/GPA Requirements

- 30 total semester hours required
- Minimum GPA 3.000 required

---

The Master of Science in Technological Entrepreneurship is a 30-credit graduate degree program comprised of nine required courses and one graduate business elective course. Curriculum focuses on developing know-how to create new product lines and services from innovations, strong business models, go-to-market strategies, and business plans for investors. Students study how to segment customers, differentiate users and buyers, and delve into their respective needs. Curriculum will expose students to how to rapidly prototype designs and explore business models and construct financial projections. Students will be encouraged to participate in IDEA, our on-campus accelerator.

Program Requirements

- Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work

**Entrepreneurship**

- ENTR 6200 Enterprise Growth and Innovation 3
- ENTR 6212 Business Planning for New Ventures 3
- ENTR 6218 Business Model Design and Innovation 3
- ENTR 6219 Financing Ventures from Early Stage to Exit 3

**Technology**

- TECE 6222 Emerging and Disruptive Technologies 3
- TECE 6230 Entrepreneurial Marketing and Selling 3
- TECE 6250 Lean Design and Development 3
- TECE 6300 Managing a Technology-Based Business 3
- TECE 6340 The Technical Entrepreneur as Leader 3

Elective

Complete 3 semester hours from the following subject areas: 3

- ACCT, BUSN, ENTR, FINA, HRMG, INTB, MECN, MKTG, MGMT, SCHM, STRT, or TECE

30 total semester hours required
Minimum 3.000 GPA required

---

The D'Amore-McKim MS in Accounting program for accounting majors is designed to prepare you with the advanced knowledge of accounting necessary to take the CPA exam. Our program is approved by the State Board of Accountancy in Massachusetts. No prior work experience is required, so you can get started as soon as you have completed your undergraduate degree.

Program Requirements

- Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work

**Accounting**

- ACCT 6203 Business Entity Taxation 3
- ACCT 6204 Financial Reporting for Integrated Multinational Enterprises 3
- ACCT 6229 Accounting for Foreign Currency Transactions 1

**Ethics**

- ACCT 6253 Ethics in the Accounting Profession 3

**Financial Reporting**

- ACCT 6207 Contemporary and Emerging Issues in Financial Reporting 3
- ACCT 6216 Financial Reporting for Governments and Nonprofit Entities 2

**Tracks**

Complete one of the following tracks:

**AUDIT TRACK**

Required Course Work

- ACCT 6205 Professional Environment of the Audit and Assurance Industry 3
- ACCT 6217 Corporate Governance, Ethics, and Financial Reporting 3
- ACCT 6254 Accounting Research and Communication 3

**Electives**

Note: An alternative course may be substituted for one of the courses listed below with the approval of the program administrator.

- ACCT 6255 Forensic Accounting 3
- ACCT 6256 Internal Auditing 3

**TAXATION TRACK**

Required Course Work

- ACCT 6231 Corporations and Shareholders 3
- ACCT 6235 Partners and Partnerships 3
ACCT 6254 Accounting Research and Communication 3

Electives
Complete 6 semester hours from the following: 6
Note: An alternative course may be substituted for one of the electives listed below with the approval of the program administrator.
ACCT 6239 State and Local Taxation
ACCT 6240 International Taxation: Inbound Transactions
ACCT 6246 Retirement Plans
ACCT 6248 Income Taxation of Trusts and Estates

Program Credit/GPA Requirements
30 total semester hours required
Minimum 3.000 GPA required

Finance—Evening/Part-Time Program, MSF
The Master of Science in Finance (MSF) is a 30-credit graduate degree program. The curriculum offers rigorous training in finance, helping you to develop your analytical and financial management skills, and is taught by faculty who are recognized as expert researchers by leading industry journals. Courses are offered in the evening to accommodate working professionals.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work
FINA 6201 Financial Theory and Policy 3
FINA 6202 Analysis of Financial Institutions and Markets 3
FINA 6203 Investment Analysis 3
FINA 6204 International Finance Management 3
FINA 6205 Financial Strategy 3
FINA 6206 Finance Seminar 3

Electives
Finance Electives
Complete 9 semester hours of FINA courses.
Business Elective
Complete 3 semester hours from one of the following subject areas. Note that this course may be a finance course:
ACCT, ENTR, FINA, HRMG, INTB, MECN, MKTG, MGMT, SCHM, or STRT

Program Credit/GPA Requirements
30 total semester hours required
Minimum 3.000 GPA required

Finance—Online Program, MSF
The practice-oriented curriculum of Northeastern University's Online Master of Science in Finance (OMSF) explores a comprehensive range of relevant financial topics. Designed to serve the needs of working professionals in the finance field, this 30-credit-hour program—which includes six core courses and four electives—can be completed entirely online in as few as sixteen months. Students in the OMSF are classified as part-time and participate in one course at a time, completing core courses in the first year and capstone and elective courses in the second year.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work
FINA 6201 Financial Theory and Policy 3
FINA 6202 Analysis of Financial Institutions and Markets 3
FINA 6203 Investment Analysis 3
FINA 6204 International Finance Management 3
FINA 6205 Financial Strategy 3

Electives
Complete four electives (course offerings are at the discretion of the finance department):
FINA 6211 Financial Risk Management
FINA 6212 Fixed Income Securities and Risk
FINA 6214 Mergers and Acquisitions
FINA 6217 Real Estate Finance and Investment
FINA 6219 Portfolio Management
FINA 6250 Entrepreneurial Finance, Innovation Valuation, and Private Equity
FINA 6292 Advanced Topics in Finance

Program Credit/GPA Requirements
30 total semester hours required
Minimum cumulative 3.000 GPA required
FINA 6206  Finance Seminar  3

Electives  
Complete 12 semester hours from the following range:  12  
FINA 6211 to FINA 6219

Program Credit/GPA Requirements  
30 total semester hours required  
Minimum 3.000 GPA required

International Business, MSIB

The Master of Science in International Business is designed to expose talented, driven students to the global business environment that will distinguish them as they enter the workforce. This program, which can be completed in just one year of full-time study or two years of part-time study, offers the opportunity to learn in the heart of Boston, home to one of the largest, most vibrant, and highly regarded global marketplaces in the United States.

Successful graduates of this master’s program will be culturally sensitive, with an international orientation, business acumen, and the analytic skills needed to best be prepared to navigate an increasingly interconnected and fast-paced world. You will have an opportunity to develop critical skills to handle the opportunities and challenges in organizations and businesses operating internationally.

Program Requirements  
Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work  
Core  
FINA 6204  International Finance Management  3  
FINA 6209  Introduction to International Accounting and Finance  3  
INTB 6200  Managing the Global Enterprise  3  
INTB 6226  Becoming a Global Leader  3  
MECN 6203  Global Managerial Economics  3  
MKTG 6206  International Marketing  3  
SCHM 6213  Global Supply Chain Strategy  3  
International Field Study  
INTB 6230  International Field Study  3

Electives  
Complete 6 semester hours from the following subject areas:  6  
ACCT, BUSN, ENTR, FINARMG, INTSTRT, TECB, MECN, MKTG, MGMT, MGSC, SCHM; Students may also consider political science or sociology courses.

30 total semester hours required  
Minimum 3.000 cumulative GPA required

Taxation, MST

The D’Amore-McKim MS in Taxation program is designed with the working professional in mind. Courses begin three times per year: in fall, spring, and summer. The MST program is focused on teaching you to analyze the Internal Revenue Code. You can also expand your professional network by connecting with other tax professionals in Northeastern’s alumni and corporate communities.

Program Requirements  
Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work  
ACCT 6230  Federal Tax Issues and Analysis  3  
ACCT 6231  Corporations and Shareholders  3

**Program Credit/GPA Requirements**
60 total semester hours required
Minimum 3.000 GPA required

---

The flexibility of D’Amore-McKim’s part-time MBA program allows students to complete their degree in as little as two or as long as seven years. Students can commit to courses just one night a week or accelerate their studies by taking multiple classes that fit individual schedules, including classes online and on Saturdays.

Beyond building a strong foundation of management and leadership skills, students can choose a concentration that meets their specific career objectives, such as marketing, corporate finance, investments, or supply chain management.

Earning an MBA from the D’Amore-McKim School of Business can help you build a strong peer-to-peer and alumni network to support you as an MBA student, in your current job, and throughout your career. Learn more about the student and alumni experience (http://www.damoremckim.northeastern.edu/academic-programs/graduate-programs/mba/part-time/student-experiences).

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Required Courses**

**Accounting**
ACCT 6200 Financial Reporting and Managerial Decision Making 3
ACCT 6201 Financial Reporting and Managerial Decision Making 1.5

**Management**
HRMG 6200 Managing People and Organizations 3
INTB 6200 Managing the Global Enterprise 3
MGSC 6204 Managing Information Resources 1.5
MGSC 6206 Management of Service and Manufacturing Operations 3

**Marketing**
MKTG 6200 Creating and Sustaining Customer Markets 3
MECN 6200 Global Competition and Market Dominance 3

**Analysis**
FINA 6200 Value Creation through Financial Decision Making 3
MGSC 6200 Information Analysis 3
STRT 6200 Strategic Decision Making in a Changing Environment 3

**Entrepreneurship**
ENTR 6200 Enterprise Growth and Innovation 3

**Electives**
15-18

Note: students may opt to take an additional concentration in lieu of elective coursework

**Concentration Options**
This major requires a concentration. Complete one of the following concentrations:

- Corporate finance (p. 66)
- Corporate renewal (p. 67)
- Entrepreneurship (p. 67)
- Healthcare management (p. 67)
- International business (p. 67)
- Investments (p. 67)
- Marketing (p. 67)
- Mutual fund management (p. 68)
- Supply chain management (p. 67)
- Technical entrepreneurship (p. 68)

Consult your college administrator for more information.

**Business Administration, MBA—Online Program**

The Northeastern University Online MBA (OMBA) is a fully online program with no campus residency requirements. Students may enter the program at one of nine start dates per academic year. By adhering to a schedule established at the semester of entry, the program may be completed in as little as two years. Students in the OMBA are classified as part-time and participate in one course at a time, completing core courses in the first year and capstone and elective courses in the second year.

### Program Credit/GPA Requirements
- 50 total semester hours required
- Minimum 3.000 GPA required

**Dual Degrees**

With an MSA/MBA from Northeastern, you can earn two degrees—an MS in Accounting and an MBA—in just fifteen months. This program is designed for liberal arts, nonaccounting majors. The program includes a three-month, paid internship that may lead to full-time placement in public accounting upon completion.

The MS in Finance/MBA (MSF/MBA) program is open to students admitted to the full-time MBA program, the evening MBA program, the online MBA program, or the MS in Finance program.

Northeastern’s School of Nursing and D’Amore-McKim School of Business offer the MS/MBA in Nursing program, linking graduate-level management education with specific clinical and organizational issues relevant to nurse managers. The MS/MBA program seeks to provide students with the knowledge, skills, and attitudes necessary to
understand, shape, and respond to the dynamic forces at play in today’s healthcare environment.

The JD/MBA is a powerful combination that seeks to equip candidates to operate with equal facility in the increasingly interdependent legal and business spheres. Northeastern University offers an accelerated 45-month program in which students concurrently earn an MBA through the D’Amore-McKim School of Business and a JD through the School of Law. Northeastern’s dynamic co-op program gives students hands-on experience in combining the legal and business worlds.

Programs

MSF/MBA—Full-Time Program

Students may be admitted to the MSF/MBA program at the point of their initial enrollment in the D’Amore-McKim School of Business or may petition to change into the MSF/MBA program from either the MBA or
the MSF programs. The MSF/MBA program requires 72 credits vs. 90 to earn the two degrees separately (MBA requires 60 credits, MSF requires 30 credits). Once either the MBA or the MSF has been awarded, it is not possible to apply for the joint degree.

The MSF/MBA program requirement of 72 credits consists of all the required courses in the full-time MBA program or the part-time MBA program, four of the six required courses in the MSF program, and electives.

Students may receive waiver and/or transfer credit of up to 20 credits (transfer credit is limited to 9 credits). A grade-point average of 3.000 is required for graduation.

Minimum 3.000 GPA required

Our MS in Finance/MBA (MSF/MBA) program is designed to help you develop your managerial potential and your practical finance skills in key areas such as valuation, mergers and acquisitions, risk management, insurance, and investments.

In addition to taking all of the courses required in the D'Amore-McKim MBA program, you can also choose a career track (http://www.damore-mckim.northeastern.edu/academic-programs/graduate-programs/dual-degrees/finance-mba/curriculum) by focusing your finance electives in either investments or corporate finance. With a balance of theory and practical skills, you can position yourself for career advancement in an increasingly competitive environment. CFA® and CFP® materials are also integrated into the MSF/MBA program, helping you to prepare for your exam.

Students may be admitted to the MSF/MBA program at the point of their initial enrollment in the D'Amore-McKim School of Business or may petition to change into the MSF/MBA program from either the MBA or the MSF programs. The MSF/MBA program requires 72 credits vs. 90 to earn the two degrees separately (MBA requires 60 credits and MSF requires 30 credits). Once either the MBA or the MSF has been awarded, it is not possible to apply for the joint degree.

The MSF/MBA program requirement of 72 credits consists of all the required courses in the part-time MBA program, four of the six required courses in the MSF program, and electives.

Students may receive waiver and/or transfer credit of up to 20 credits (transfer credit is limited to 9 credits). A grade-point average of 3.000 is required for graduation.

MSF/MBA—Online Program

Our dual MS in Finance/MBA (MSF/MBA) program, offered in a convenient online format, is designed to help you develop your managerial potential and practical finance skills in key areas such as valuation, mergers and acquisitions, risk management, insurance, and investments. The online program (OMBA/OMSF) is available to second-year online MBA students who have achieved a minimum of a 3.000 grade-point average and a B grade in Financial Statement Preparation and Analysis (ACCT 6272), Identifying Strategic Implications in Accounting Data (ACCT 6273), and Value Creation through Financial Decision Making (FINA 6200). Students may apply to the dual program at any point during their second year. The OMBA/OMSF can be completed in as little as three years. The dual degree is listed on both the transcript and the diploma.

Program Credit/GPA Requirements
62 total semester hours required
Minimum 3.000 GPA required
The JD/MBA program offers students an opportunity to obtain both the JD and MBA degrees in a full-time, four-year course of study, which includes four one-quarter co-op work experiences arranged through the law school co-op office. Starting in the fall term, students are enrolled in the School of Law for a total of three years and the D’Amore-McKim School of Business for one year. JD/MBA candidates complete three years of law school, taking a break after either year one or year two to complete one year of business school. Information detailing the three years of JD course work and co-op is available at the School of Law (http://www.northeastern.edu/law/academics/curriculum/dual-degrees/jdmba.html) website.

The course work for the MBA year consists of 49 semester credits, comprised of the established program plan for the first two semesters of the full-time MBA program (30 credits) with some changes in the program schedule. During spring semester, students will take one additional 3-credit elective. During summer, students will take Managing the Global Enterprise (INTB 6200), along with 13 credits of MBA electives.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

MBA Program Requirements

Concurrent degree candidates follow a set schedule, as follows:

Complete 13 semester hours from the following subject areas:

- ACCT, ENTR, FINA, HRMG, INTB, MECN, MKTG, MGMT, SCHM, STRT, and TECE

**Program Credit/GPA Requirements**

49 total semester hours required

Minimum 3.000 GPA required

**Graduate Certificate Programs**

Business professionals are much like businesses themselves—as opportunities emerge and the marketplace evolves, their needs change. And sometimes, the best investment in your future is the one you can make now. D’Amore-McKim’s specialty graduate certificates are the perfect way to learn the specific skills you need to seize a new career opportunity. They’re also a great way to put an educational down payment on longer-term ambitions.

Courses completed with a GPA of 3.000 or better may be applied toward a master’s degree at Northeastern.

**Programs**

- Accounting and Financial Decision Making (p. 74)
- Business Administration (p. 75)
- Business Administration—Online Program (p. 76)
- Corporate Finance (p. 77)
- Corporate Renewal (p. 77)
- Healthcare Administration and Policy (p. 77)
- Innovation Management (p. 78)
- International Business (p. 78)
- Investments (p. 78)
- Leadership and Human Capital (p. 79)
- Marketing (p. 79)
- Mutual Fund Management (p. 79)
- Supply Chain Management (p. 80)
- Supply Chain Management—Online Program (p. 80)
- Technological Entrepreneurship (p. 80)

**Accounting and Financial Decision Making, Graduate Certificate**

Business professionals are much like businesses themselves—as opportunities emerge and the marketplace evolves, their needs change. And sometimes, the best investment in your future is the one you can make now. D’Amore-McKim’s specialty graduate certificates are the perfect way to learn the specific skills you need to seize a new career opportunity. They’re also a great way to put an educational down payment on longer-term ambitions. Credits earned in this program can transfer into the part-time MBA or other master’s programs at Northeastern (check with advisor).

<td>3</td>
</tr>
<tr>
<td>FINA 6200</td>
<td>Value Creation through Financial Decision Making</td>
<td>3</td>
</tr>
</tbody>
</table>

### Elective

Complete one of the following:

- MGSC 6204 Managing Information Resources
- Any MBA core course titled 6200 (see below):
  - HRMG 6200 Managing People and Organizations
  - ENTR 6200 Enterprise Growth and Innovation
  - INTB 6200 Managing the Global Enterprise
  - MKTG 6200 Creating and Sustaining Customer Markets
  - MECN 6200 Global Competition and Market Dominance

### Program Credit/GPA Requirements

12 total semester hours required, may complete a maximum of 15 credits

Minimum 3.000 GPA required

### Business Administration, Graduate Certificate

Business professionals are much like businesses themselves—as opportunities emerge and the marketplace evolves, their needs change. And sometimes, the best investment in your future is the one you can make now. D’Amore-McKim’s specialty graduate certificates are the perfect way to learn the specific skills you need to seize a new career opportunity. They’re also a great way to put an educational down payment on longer-term ambitions. With the advice of their academic advisors, students tailor their own course of study either within a specific discipline or across disciplines.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

### Track Options

- Below are some suggested tracks; however, a track is not required—students can design their own certificate by completing any courses from the MBA program (being mindful of prerequisites). *Note:* The part-time MBA track and the international student track require an additional 3 semester hours.

### Part-Time MBA Track

This track is for students who are specifically interested in pursuing the part-time MBA upon completion of the certificate program. Upon successful completion of this track, students are eligible to waive the GMAT/GRE requirement for admission into the part-time MBA and part-time MBA/MS finance programs. To be eligible for the GMAT/GRE waiver, one must complete the prescribed courses listed below with a B or better in each and earn a minimum cumulative GPA of 3.300.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 6200</td>
<td>Financial Reporting and Managerial Decision Making 1</td>
<td>3</td>
</tr>
</tbody>
</table>

### International Student Track

This track is an opportunity for international students to study full-time, earning 15 graduate credits over two consecutive semesters. Students must take the following five core MBA courses as they become available for this particular section and must be enrolled full-time in their first semester of study.

Technological Entrepreneurship, Graduate Certificate

The Graduate Certificate in Technological Entrepreneurship is tailor-made for engineers, designers, and other technology professionals who want to lead entrepreneurial ventures within their current companies or have product ideas they’d like to develop on their own. Working with your classmates in multidisciplinary teams, you have an opportunity to examine technological and business issues from an integrative perspective and learn the marketing, planning, and product development principles essential to any successful new venture.

Credits earned in the certificate program may be applied toward the MS in Technological Entrepreneurship, the part-time MBA, or other MS programs at Northeastern (check with advisor).

Program Credit/GPA Requirements
12 total semester hours required, may take a maximum of 15 credits
Minimum 3.000 GPA required
The College of Computer and Information Science (CCIS) maintains a strong research program with significant funding from the major federal research agencies and private industry. With a substantial increase in faculty strength and research funding in recent years, we are actively seeking highly motivated, bright, hardworking students who are interested in pursuing a PhD degree in computer science or in the interdisciplinary field of information assurance, network science, data science, or personal health informatics. Graduate students and faculty members are involved in exciting projects in a wide range of research areas, including programming languages, software engineering, distributed and parallel computing, cryptography, network security, health informatics, network science, databases, information retrieval, and artificial intelligence. Colloquia and weekly research seminars contribute to the vibrant research atmosphere in the college.

Our curriculum encompasses both the breadth and depth needed for graduate school. Specialized, advanced courses for PhD students in computer science, information assurance, and personal health informatics are designed to prepare all students for research early in their doctoral education.

The MS curriculum in computer science combines the study of basic algorithms and theoretical computer science principles with advanced programming and software design methods. It offers students the opportunity to develop the analytical and problem-solving skills needed to pursue challenging professional careers.

In addition, we offer three interdisciplinary master’s degree programs: the Master of Science in Health Informatics program, which seeks to prepare graduates to use information technology to improve healthcare delivery and outcomes; the Master of Science in Information Assurance program, which focuses on information technology and incorporates the understanding of the social sciences, law, criminology, and management needed to prevent and combat cyber attacks; and the Master of Science in Data Science program, which is designed to give students a comprehensive framework for processing, modeling, analyzing, and reasoning about data.

Three student laboratories house a mix of Linux and Windows workstations and separate research lab facilities. In addition, the Information Assurance Laboratory provides students with hands-on experience in information assurance exercises in an isolated network environment.

Our college is a tightly knit community, and the faculty, staff, and students interact regularly through yearly town hall meetings, weekly teas, and seminars. A diverse, multicultural graduate student body and faculty members encourage rich extracurricular interaction. The student chapter of the Association for Computing Machinery organizes a number of social events to promote friendship and camaraderie within the CCIS community.

**Academic Policies and Procedures**

- Absenteeism (p. 81)
- Academic Integrity (p. 81)
- Transfer of Credit (p. 81)

**Absenteeism**

Students are expected to attend all classes and lab sections for their registered courses. Any student who anticipates missing a class due to illness or emergency situations is expected to contact their professor as soon as possible. That being said, we require all students to be present and on campus during the start of every semester. Students are welcome to travel over winter and summer breaks but should return to campus in a timely manner and be ready for the start of each semester. The Office of the Registrar posts current and future academic calendars (http://www.northeastern.edu/registrar/calendars.html) on their website.

**ACADEMIC INTEGRITY**

The college takes academic integrity violations very seriously. Students found participating in any of the following situations will be reported to the Office of Student Conduct and Conflict Resolution: cheating, fabrication, plagiarism, unauthorized collaboration. Please note that this applies to programming code as well as written assignments or exams. Additionally, students may be subject to receiving a reduced or failing grade for the assignment or the course, or, depending on the severity of the violation, students may be dismissed from the program. Visit the Office of Student Conduct and Conflict Resolution web page (http://www.northeastern.edu/osccr/academic-integrity-policy) for a full description of these policies and procedures.

**Transfer of Credit**

A maximum of 9 semester hours of credit obtained at another institution may be accepted toward the degree, provided the credits meet the following criteria:

- Work is completed at the graduate level for graduate credit
- Student received a grade of 3.000 or better
- Credits were earned at an accredited institution
- Credits have not been used toward any other degree

Transfer credit will be offered only for courses that match a course offered at Northeastern University and that have been approved by the graduate committee. However, no transfer credit will be given for courses listed as Interdisciplinary courses.

Students can submit a request for transfer of credit after they have begun taking courses in the College of Computer and Information Science (CCIS). Please see your academic advisor for the procedure to submit a request.
Computer Science

Our PhD in Computer Science program seeks to prepare students to conduct state-of-the-art computer science research in preparation for careers in government, industry, and academia. Similarly, our MS in Computer Science program offers students the opportunity to broadly expand their knowledge in the field while focusing on one of our curricular specialties:

- Artificial intelligence
- Computer science theory
- Database management
- Graphics and robotics
- Human/computer interaction
- Information security
- Networks
- Programming languages
- Software engineering
- Systems
- Game design

Graduate education in computer science also features the top-ranked Northeastern co-op program, enabling students to supplement their classroom education with real-world experience in the field. We have consistently placed more than 95 percent of our students in co-op positions. The college partners with several high-profile companies, including:

- Amazon
- Bloomberg
- EMC Corporation
- Fidelity Investments
- IBM Corporation
- Intuit
- Kronos
- MathWorks
- Microsoft
- Nokia
- Phase Forward
- SeaChange International
- Verizon Communications

Admission Requirements

Applicants must submit an official application, official transcripts from all colleges/universities attended, a personal statement, official scores of the GRE General Test, and three letters of recommendation. International students must also submit official scores of the TOEFL examination. Acceptance into the College of Computer and Information Science is granted upon recommendation of the college graduate committee after a review of the completed application.

Candidates must have completed the undergraduate material listed below:

- Experience in some high-level procedural language, e.g., C, C++, Java, Scheme, ML
- Data structures
- Computer organization
- One year of college calculus

- Discrete mathematics

Industrial experience in these areas may be an acceptable substitute for formal course work. Students may be accepted provisionally while completing these deficiencies and may take graduate courses concurrently as their preparation allows.

Computer Science, PhD

Academic Requirements for PhD in Computer Science

A minimum of 48 semester hours of course work beyond the BS/BA degree is required of all students.

Admission to Candidacy

All students must demonstrate sufficient knowledge in the fundamentals of computer science, as well as the ability to carry out research in an area of computer science.

The student must maintain a minimum GPA of 3.500 among the six core courses satisfying the above course requirements and receive a grade of B or better in each of these courses. Students who have taken equivalent courses in other institutions may petition to be exempted from the course(s) (subject to the approval of the PhD committee). Each student may repeat a course once for no more than three out of the six courses if they do not receive a B or better in the course. Students with an MS in Computer Science may petition to the PhD committee for an exemption from these courses. Petition forms are available on the college website.

The fields listed do not necessarily represent areas of specialization or separate tracks within the PhD program. Rather, they attempt to delineate areas on which the student must be examined in order to measure his or her ability to complete the degree. Therefore, they may be adjusted in the future to reflect changes in the discipline of computer science and in faculty interests within the College of Computer and Information Science. Similarly, these fields do not represent the only areas in which a student may write his or her dissertation. They are, however, intended to serve as a basis for performing fundamental research in computer science.

Research/Survey Paper

To demonstrate research ability, the student is required to submit to the PhD committee a research or a survey paper in an area of specialty under the supervision of a faculty advisor. Normally, the length of the paper should not exceed fifteen pages. A submitted paper from a student is considered to have fulfilled the paper requirement if:

1. The paper has been submitted to a selective conference.
2. The student has made a substantial contribution to the paper.
3. The advisor has endorsed the paper with a written statement indicating the student’s contribution.
4. The PhD committee has voted on a positive recommendation.

Upon completion of the course and the research paper requirements, the student is admitted to candidacy for the PhD degree. It is highly recommended that the student complete the candidacy requirement by the end of his or her second year but no later than the third year.

**Residency**

One year of continuous full-time study is required after admission to the PhD candidacy. It is expected that during this period the student will make substantial progress in preparing for the comprehensive examination.

**Comprehensive Examination**

The examination is taken after the student has achieved sufficient depth in a field of study in order to prepare a prospectus for the PhD dissertation. This process should take place no later than the end of the fifth year in residence. Prior to taking the comprehensive examination, the student prepares a thesis proposal for the examination, which describes the proposed research, including the relevant background materials from the literature. The thesis proposal should clearly specify the research problems to be attacked, the techniques to be used, and a schedule of milestones toward completion. Normally, the thesis proposal should not exceed fifteen pages, excluding appendices and bibliography.

The thesis proposal must be approved by the comprehensive committee. It is strongly recommended that the same members should serve on both the comprehensive and thesis committees. With the help of the advisor, a student selects the comprehensive committee, consisting of four members to be approved by the PhD committee. The four members must include the advisor, two other faculty members from the college, and an external examiner (optional for comprehensive committee).

To help the PhD committee to make an informed decision, a copy of the external examiner’s resumé should be submitted at the same time. Upon approval of the written proposal, the student has to present the proposed work orally in a public forum, followed by a closed-door oral examination from the comprehensive committee. The student may take the comprehensive examination twice, at most.

**Doctoral Dissertation**

Upon successful completion of solving the research proposed in the thesis proposal, the candidate has an opportunity to prepare the dissertation for approval by the doctoral committee. The dissertation must contain results of extensive research and make an original contribution to the field of computer science. The work should give evidence of the candidate’s ability to carry out independent research. It is expected that the dissertation should be of sufficient quality to merit publication in a reputable journal in computer science.

**DOCTORAL COMMITTEE**

If the thesis committee is the same as the comprehensive committee, no further approval is needed. If the thesis committee is changed in its composition, the approval process will follow that of the comprehensive committee.

**DISSERTATION DEFENSE**

The dissertation defense is held in accordance with the regulations of the University Graduate Council. It consists of a lecture given by the candidate on the subject matter of the dissertation. This is followed by questions from the doctoral committee and others in attendance concerning the results of the dissertation as well as any related matters. The examination is chaired by the PhD advisor.

**TIME AND TIME LIMITATION**

After the establishment of degree candidacy, a maximum of five years will be allowed for the completion of the degree requirements, unless an extension is granted by the college graduate committee.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Qualifying examination and area examination
Annual review

84 Computer Science, PhD
### Academic Requirements for Advanced-Entry PhD in Computer Science

A minimum of 16 semester hours of course work beyond the master's degree (excluding the six required core courses) is required of all students.

### Admission to Candidacy

Refer to the Computer Science, PhD, overview for Admission to Candidacy requirements.

### Research/Survey Paper

Refer to the Computer Science, PhD, overview for Research/Survey Paper requirements.

### Residency

Refer to the Computer Science, PhD, overview for Residency requirements.

### Comprehensive Examination

Refer to the Computer Science, PhD, overview for Comprehensive Examination requirements.

### Doctoral Dissertation

Refer to the Computer Science, PhD, overview for Doctoral Dissertation and completion requirements.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

---

### Milestones

- Qualifying examination and area examination
- Annual review
- Dissertation proposal
- Dissertation committee
- Dissertation defense

### General Requirements

Complete 16 semester hours of approved course work. Consult your faculty advisor for acceptable courses.

### Dissertation

Upon achieving PhD candidacy, complete the following two (repeatable) courses for two consecutive semesters:

- CS 9990  
  - Dissertation 
  - 2-4
- CS 8982  
  - Readings 
  - 1-8

For remaining semester(s), please complete:

- CS 9996  
  - Dissertation Continuation 
  - 0

### Program Credit/GPA Requirements

- 16 total semester hours required
- Students must maintain a minimum GPA of 3.500 as well as earn a grade of B or better in each course.
- Minimum overall 3.000 GPA required

---

### Data Science, MS

The College of Computer and Information Science (CCIS) and the Department of Electrical and Computer Engineering (ECE) jointly offer a new interdisciplinary Master of Science program in data science. This program is designed to give students a comprehensive framework for processing, modeling, analyzing, and reasoning about data. Students will engage in an extensive core intended to develop depth in computational modeling, data collection and integration, data storage and retrieval, data processing, modeling and analytics, and visualization. Students will also be given a variety of elective areas in the College of Computer and Information Science, the College of Engineering, and throughout the campus to explore key contextual areas or more complex technical applications. Successful program graduates will be well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

The Master of Science in Data Science is comprised of eight courses; five core courses and three electives. The core courses are designed and developed by the CCIS and ECE faculty. Elective courses consist of graduate courses offered in CCIS, the College of Engineering, and other partner colleges.

### Course Requirements

The MS in Data Science curriculum requires five core courses that represent the essential mathematical/statistical and technical knowledge for deep data analysis. These courses examine foundational programming concepts and languages, integration, collection, storage, retrieval, large-scale computing, mathematical concepts in statistics, linear algebra, and optimization, as well as visual and computational analysis, machine learning, and visualization. The courses are tailored toward technically or mathematically trained students.

The five core courses include:

- Two core courses in algorithms and data processing
_data science, MS

- Two core courses in machine learning and data mining
- One core course in information visualization

Three elective courses are drawn from a selection of courses across Northeastern.

Placement Exams
Each incoming masters student, regardless of his or her background, takes two placement exams administered one week prior to the beginning of the semester. The two exams cover fundamentals of computer science and programming skills and basic statistics, probability, and linear algebra. If the student does not get a B or above in a part of the placement exam, then the student must take the corresponding introductory course.

- (DS 5010) The introductory course on fundamentals of programming and data structures covers data structures (lists, arrays, trees, hash tables, etc.), program design, programming practices, testing, debugging, maintainability, data collection techniques, and data cleaning and preprocessing. This course will have a class project where the students will use the concepts they learn to collect data from the web, clean, and preprocess and ready for analysis.
- (DS 5020) The introductory course on basics of statistics, probability, and linear algebra covers random variables, frequency distributions, measures of central tendency, measures of dispersion, moments of a distribution, discrete and continuous probability distributions, chain rule, Bayes' rule, correlation theory, basic sampling, matrix operations, trace of a matrix, norms, linear independence and ranks, inverse of a matrix, orthogonal matrices, range and null space of a matrix, the determinant of a matrix, positive semidefinite matrices, eigenvalues and eigenvectors.

Note: Students that take 3-credit-hour elective courses (ie Bouvé, CSSH courses) will register for an accompanying data science project course (DS 8982). In order to earn this additional credit, students will be expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Program Credit/GPA Requirements
32 total semester hours required
Minimum 3.000 GPA required

Computer Science, MSCS

Northeastern University’s Master of Science in Computer Science is designed to prepare students for a variety of careers in computer science. The program combines both computing and important application domains—enabling you to increase your broad-based knowledge in the field while focusing on one curricular concentration selected from a range of options including artificial intelligence, computer human interface, graphics, programming languages, software engineering, database management, networks, theory, game design, systems, and information security.

Program Objectives

- Exhibit proficiency in the design and maintenance of large application software
- Develop the ability to maintain network infrastructure
- Build familiarity with basic algorithms and theoretical computer science principles
- Demonstrate ability in advanced programming and software design materials

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Core Courses

An average GPA of 3.000 or higher is required in the three core courses:

<table>
<thead>
<tr>
<th>Programming</th>
<th>Development</th>
<th>Algorithms</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 5010</td>
<td>CS 5500</td>
<td>CS 5800</td>
</tr>
<tr>
<td>Programming Design Paradigm</td>
<td>Managing Software Development</td>
<td>Algorithms</td>
</tr>
</tbody>
</table>

Electives

Complete 8 semester hours from one of the specialization areas lists below.

<table>
<thead>
<tr>
<th>8 semester hours</th>
<th>4 semester hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 5100 to 5850</td>
<td>CS 6110 to 6810</td>

Computer Science, MSCS—ALIGN Program

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Course Work

Fundamentals
CS 5001 Intensive Foundations of Computer Science and Recitation for CS 5001

Discrete Structures
CS 5002 Discrete and Data Structures

Object-Oriented Design
CS 5004 and CS 5005 Object-Oriented Design and Recitation for CS 5004

Other Foundation Courses
CS 5006 Algorithms
CS 5007 Computer Systems

Development
CS 5500 Managing Software Development (a grade of B or higher is required)
or CS 5600 Computer Systems

Algorithms
CS 5800 Algorithms (a grade of B or higher is required)

Electives
Complete 8 semester hours from one of the specialization areas lists below.
Complete 4 semester hours from the following:
CS 5100 to CS 5850
CS 6110 to CS 6810
CS 8674 Master’s Project
CS 8982 Readings

Specializations
Complete 8 semester hours from the following:

Artificial Intelligence
CS 5100 Foundations of Artificial Intelligence
CS 5335 Robotic Science and Systems
CS 6110 Knowledge-Based Systems
CS 6120 Natural Language Processing
CS 6140 Machine Learning
CS 7140 Advanced Machine Learning
CS 7170 Seminar in Artificial Intelligence
CS 7180 Special Topics in Artificial Intelligence

Computer-Human Interface
CS 5340 Computer/Human Interaction
CS 5350 Applied Geometric Representation and Computation
CS 6350 Empirical Research Methods
CS 7140 Advanced Machine Learning

Database Management
CS 5200 Database Management Systems
CS 6140 Machine Learning
CS 6200 Information Retrieval

Program Credit/GPA Requirements
32 total semester hours required
Minimum 3.000 GPA required

MSCS-ALIGN students come from a wide variety of backgrounds—with undergraduate majors ranging from math, biology, history, engineering, and classics. In this program, students have an opportunity to acquire both the knowledge needed to transition into a new career and the practical skills to build the next great app. In this program, students may learn to:

- Develop the ability to recognize and solve problems arising in modern computing
- Assimilate ideas and concepts from theoretical studies and hands-on design and programming
- Acquire skills in software and application design, network infrastructure, and other dynamic and emerging computer science areas

**Program Credit/GPA Requirements**

44 total semester hours required  
Minimum 3.000 GPA required

**Computer Science, Graduate Certificate**

The postbaccalaureate certificate is designed to give students a solid foundation in the mathematical and theoretical underpinnings of computer science, including the areas of discrete mathematics, basic programming, data structures, object-oriented programming, algorithms, and computer systems. The goal of the certificate is to provide foundational knowledge in computer science that is valuable in both the workplace for career advancement, as well as to those looking to move into graduate programs within the discipline.

The Postbaccalaureate Certificate in Computer Science will serve as the foundational premasters’ courses in the ALIGN program. Students that successfully complete the five certificate courses with a B in each course or better will be eligible to matriculate into the Master of Science in Computer Science program.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

Meet the demand for health informatics professionals

Professionals who understand the relationship between information technology, people, health, and the healthcare system are in short supply. With Northeastern University’s interdisciplinary graduate programs in health informatics, you have an opportunity to gain the knowledge and skills needed to use information technology to improve healthcare delivery and outcomes—and to advance your career in this growing field.

Northeastern’s health informatics master’s degree and certificate programs seek to provide:

- The expertise of both the College of Computer and Information Science (http://www.ccs.neu.edu/about) and Bouvé College of Health Sciences (http://www.northeastern.edu/bouve)
- Faculty (http://www.ccs.neu.edu/graduate/degree-programs/m-s-in-health-informatics/faculty) who are senior leaders in the field
- The ability to communicate effectively with clinicians, administrators, and IT professionals and to understand each of their needs and constraints
- Strong industry connections
- The opportunity to learn from students with backgrounds in healthcare or technology—nurses, pharmacists, physicians, programmers, project managers, analysts, and others
- Flexible course schedules and formats designed to meet the needs of both working professionals and full-time students
- Research opportunities and an academic lead-in to the PhD in Personal Health Informatics (http://phi.ccs.neu.edu)

Whether you want to take on new responsibilities in your current workplace or to launch a new career, Northeastern’s graduate degree and certificate programs in health informatics prepare you for leadership and specialist roles in a variety of health-related organizations. And you’re ready to make an immediate impact on healthcare.

Programs

Doctor of Philosophy (PhD)
- Personal Health Informatics (p. 90)

Master of Science (MS)
- Health Data Analytics (p. 92)
- Health informatics (p. 93)
- Health informatics—ALIGN Program (p. 94)

Graduate Certificate
- Health Informatics Management and Exchange (p. 253)
- Health Informatics Privacy and Security (p. 253)
- Health Informatics Software Engineering (p. 253)

Personal Health Informatics, PhD

Northeastern’s PhD in Personal Health Informatics (PHI) is a new transdisciplinary doctoral program focused on educating top researchers in the theoretical underpinnings, design, evaluation, and dissemination of consumer- and patient-focused health systems. Personal health technologies are those that non–health professionals interact with directly, both in and out of a clinical setting and in various life stages of illness and wellness.

Examples include:

- Assistive technologies that aid persons with disabilities
- Consumer wellness promotion technologies
- Patient education and counseling systems
- Interfaces for reviewing personal health records
- Advanced ambulatory monitoring for supporting health
- Automated elder care systems that monitor health and support independent living
- Social networking systems connecting families and their social and medical support networks

Developing personal health interface technologies requires that professionals have skills and experience designing systems for individual patients and consumers with a wide range of backgrounds in different contexts using a variety of media, while ensuring that fielded technologies are effective, reliable, and responsive to the needs of at-risk and patient populations. Critical skills and knowledge include needs assessment, theories of interface design and health behavior, rapid prototyping and implementation, experimental design with human subjects in challenging settings, and statistical data analysis and validation. Moreover, these skills must be deployed while working with, or leading, transdisciplinary teams.

The interdisciplinary nature of the program targets students who are interested in improving health and wellness using novel technologies that directly impact the lives of consumers and patients. This is a program for students who are not only technically strong but also socially conscious, design oriented, and interested in rigorously evaluating the technologies they imagine and build. The program provides a path for technical students to acquire more experience in the deployment and evaluation of health technologies in the field but also a path for students with health backgrounds to develop the technical skills needed to prototype and assess creative ideas they envision for improving care. The expected length of study is five years after the bachelor’s degree.

Admission Requirements

Students will be accepted with either of the following:

- A bachelor’s or higher degree in a technical discipline (e.g., computer science or information science, computer systems engineering) with either academic or work experience demonstrating a commitment to working in health.
- A bachelor’s or higher degree in a health science discipline (e.g., nursing, medicine, physical therapy, pharmacy, public health) with either some academic course work in technology, such as a course in programming or design, or work experience where the applicant participated in the development, adaptation, or evaluation of consumer- or patient-facing health technology. (Otherwise outstanding applicants without programming skills may be advised to take an introductory programming course prior to entry, and otherwise outstanding applicants without any formal experience working in health settings may be advised to spend some time volunteering in a medical or community health setting prior to entry.)

Applicants will be expected to have:

- A minimum 3.000 undergraduate GPA
Minimum Academic Standards and Requirements

RESIDENCY REQUIREMENT
The residency requirement will follow the University Graduate Council By-Law policy.

DISSERTATION ADVISING
Each student will have one primary advisor from the personal health informatics doctoral program faculty.

DISSERTATION COMMITTEE
The committee will consist of at least three members: the dissertation advisor, one additional personal health informatics doctoral program faculty member, and one member external to Northeastern who is an expert in the specific personal health informatics topic of research. The dissertation committee shall include experts with both health and technology backgrounds. The dissertation advisor must be a full-time member of the Northeastern University faculty.

QUALIFYING EXAMINATION
The qualifying examination consists of a three-part exam conducted by a committee of three personal health informatics doctoral program faculty members, each overseeing one part of the exam. The research core of the exam is fulfilled with submission of a high-quality paper to a strong peer-reviewed conference or journal. The health component of the exam is fulfilled when the student passes a written exam developed by a personal health informatics doctoral program faculty member with a health sciences background, and the technical component of the exam is fulfilled when the student passes an exam developed by a personal health informatics doctoral program faculty member with a technical background. The content of the written exams and the paper topic are developed in consultation with each faculty member.

DEGREE CANDIDACY
A student is considered a PhD degree candidate upon meeting these conditions:

• Completion of core courses with a minimum GPA of 3.00 overall on the core courses
• Completion of the qualifying examination

COMPREHENSIVE EXAM
A PhD student must submit a written dissertation proposal to the dissertation committee. The proposal should identify the research problem, the research plan, and its potential impact on the field. A presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee.

DISSERTATION DEFENSE
A PhD student must complete and defend a dissertation that involves original research in personal health informatics.

Curriculum Requirements

REQUIRED AND ELECTIVE COURSES
The curriculum is designed to provide all PhD students with a strong foundation in principles critical to the design and evaluation of personal health interfaces. All students take six core courses (24 semester hours) and the user-interface practicum (2 semester hours). All students must also fulfill the programming fundamentals requirement (4 semester hours) and the statistics fundamentals requirement (4 semester hours), where some flexibility in course selection allows tailoring based on background and experience. Two additional research electives (8 semester hours) are selected based on research interests from the personal health informatics electives list. Students are also expected to participate in the personal health informatics seminar series each semester.

Program Assessment

LEARNING OUTCOMES
This program seeks to produce graduates who are capable of leading and performing independent, new research projects related to personal health informatics and who are well prepared to enter into a number of potential career paths, including industrial research positions, government consultants, postdoctoral or junior faculty positions in academic institutions in either technology programs or schools of health science, public health, or medicine.

DEGREE OUTCOMES
The dissertation committee evaluates whether the student has produced a significant contribution to personal health informatics research. The process used by the dissertation committee is based on an assessment of the goals and objectives described in the written PhD proposal. Student success can also be measured in the number and quality of publications generated by the research.

IMPROVING EFFECTIVENESS
Publication venues will provide a means to assess the quality of the program, as well as the research projects. External research funding and incoming student quality will be used to measure program strength. In addition, graduates will be asked for feedback concerning their training and program preparation.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Milestones

• Qualifying examinations (3)
• Annual review
• Dissertation proposal
• Dissertation committee
• Dissertation defense

General Requirements

Foundations
HINF 5200 Theoretical Foundations in Personal Health Informatics 4

Program Design and Development
CS 5010 Programming Design Paradigm 4
CS 5340 Computer/Human Interaction 4
HINF 5300 Personal Health Interface Design and Development 4

Methods and Statistics
CS 6350 Empirical Research Methods 4
PHTH 5210 Biostatistics in Public Health 3

Evaluation
HINF 8982 Readings 1-8
HINF 5301 Personal Health Technologies: Field Deployment and System Evaluation 4

Electives
Complete 6 to 8 semester hours in the following subject areas: 6-8
Health Data Analytics, MS

The digitization of healthcare systems in clinical settings, in combination with the explosion of personal data collection devices, provides the opportunity of using data for revolutionizing approaches to care at all levels with a emphasis on precision medicine and person-centered care. The ability to take advantage of this “Big Data” opportunity, however requires expertise at the intersection of health informatics, data science, and computational modeling. The Master of Science in Health Data Analytics is designed to prepare students to succeed in this emerging field. This program offers a strong, competency-based curriculum that addresses data analytics ranging from data acquisition from traditional and emerging data streams, data aggregation methods, data mining algorithms, predictive computational modeling, and visualization techniques. Students can expect to amass a broad and deep understanding of the various methods, software tools, and topical expertise needed to discover meaningful patterns in health-related data and effectively communicate their implications to a number of diverse stakeholders. Successful graduates of the MS in Health Data Analytics will be effective practitioners and leaders in the rapidly developing domain of data analytics with a focus on health and healthcare.

The interdisciplinary MS in Health Data Analytics consists of twelve courses, drawn from the College of Computer and Information Science and the Bouvé College of Health Science, a capstone project, and an ongoing series of seminars on topics in health data analytics. Two tracks will be available to matriculating students: standard and research-based.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

General Requirements

Analytics/Modeling/Statistics

HINF 6400 Introduction to Health Data Analytics 3
DS 6020 4
DS 6030 4
PPUA 6301 Introduction to Computational Statistics 4
PPUA 6302 Information Design and Visual Analytics 4

Healthcare

HINF 5102 Data Management in Healthcare 3
HINF 5105 The American Healthcare System 3
HINF 5XXX Predictive Analytics and Modeling 3

Thesis/Capstone

Complete either Thesis or Capstone:

Thesis

HINF XXXX Health Data Analytics Thesis 3

Capstone

HINF 7701 Health Informatics Capstone Project

1 Please see college administrator for course information

Electives

At least one course must be chosen from the methods list.

Methods

Complete 3–6 semester hours from the following:

PHTH 5240 Evaluating Scientific Evidence
PHTH 6202 Intermediate Epidemiology
PHTH 6210 Applied Regression Analysis
PHTH 6440 Advanced Methods in Biostatistics
CS 6350 Empirical Research Methods
CAEP 7712 Intermediate Statistical Data Analysis Techniques

Program Credit/GPA Requirements

48 total semester hours required
Minimum 3.00 GPA required

Total Hours: 39-52

(Note: Please see faculty advisor for other acceptable elective courses.)

HINF Dissertations

Complete the following course twice:

CS 9990 Dissertation
Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A grade of B– or higher is required in each course.

Core Requirements
- HINF 5101 Introduction to Health Informatics and Health Information Systems 3
- HINF 5105 The American Healthcare System 3
- HINF 7701 Health Informatics Capstone Project 3

Business Management Core
Complete two courses from the following: 6
- HINF 6202 Business of Healthcare Informatics
- HINF 6215 Project Management
- HINF 6335 Management Issues in Healthcare Information Technology
- HINF 6240 Improving the Patient Experience through Informatics
- PHTH 5226 Strategic Management and Leadership in Healthcare

Health Informatics Core
Complete two courses from the following: 6
- HINF 5102 Data Management in Healthcare
- HINF 5110 Global Health Information Management
- HINF 5200 Theoretical Foundations in Personal Health Informatics
- HINF 6205 Creation and Application of Medical Knowledge
- HINF 6350 Public Health Surveillance and Informatics
- HINF 6404 Patient Engagement Informatics and Analytics
- HINF 6405 Quantifying the Value of Informatics
- PHTH 5232 Evaluating Healthcare Quality

Technical Core
Complete two courses from the following: 6
- HINF 6220 Database Design, Access, Modeling, and Security
- HINF 6230 Strategic Topics in Programming For Health Professionals
- HINF 6355 Key Standards in Health Informatics Systems
- PHTH 5210 Biostatistics in Public Health
- PHTH 5202 Epidemiology

One course from the following may count toward the technical core requirement:
- DS 6020
- DS 6030
- PPUA 6301 Introduction to Computational Statistics
- PPUA 6302 Information Design and Visual Analytics

Elective Core
Northeastern’s interdisciplinary Master of Science in Health Informatics was the first MS in the field. The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Successful students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, and information technology professionals.

With approval from the health informatics program director, selected students can substitute one course from the Graduate Certificate in Data Analytics for a technical core requirement in the MS in Health Informatics degree, and up to two more courses from the Graduate Certificate in Data Analytics can be counted as electives for the MS in Health Informatics degree.

Northeastern also offers graduate certificate programs in health informatics. Three certificate programs enable you to choose the one that addresses your specific goals. These programs are listed separately in this catalog under the Department of Health Sciences:

- Graduate Certificate in Health Informatics Management and Exchange
- Graduate Certificate in Health Informatics Privacy and Security
- Graduate Certificate in Health Informatics Software Engineering

Courses in the certificate program also apply toward master’s degree requirements. This gives you the flexibility to complete a certificate and be well on your way to earning a degree if you decide later to continue your education.

**Program Credit/GPA Requirements**

Minimum 33 total semester hours required
Minimum 3.000 GPA required

**Health Informatics, MS—ALIGN Program**

Our Master of Science in Health Informatics ALIGN program seeks to prepare students from diverse backgrounds to excel in the health informatics field. ALIGN's custom master's degree curricula are tailored to each student's professional and educational background, allowing successful students to transition into careers in high-demand industries. Learn more at the ALIGN web page (http://www.northeastern.edu/align).

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

A grade of B– or higher is required in each course.

**ALIGN Course Work**

Complete one or two courses from the following as assigned during admission:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HINF 0200</td>
<td>Health and Medicine for Nonclinicians</td>
<td>3</td>
</tr>
<tr>
<td>HINF 6230</td>
<td>Strategic Topics in Programming For Health Professionals</td>
<td>3</td>
</tr>
</tbody>
</table>

**Core Requirements**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HINF 5101</td>
<td>Introduction to Health Informatics and Health Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>HINF 5105</td>
<td>The American Healthcare System</td>
<td>3</td>
</tr>
<tr>
<td>HINF 7701</td>
<td>Health Informatics Capstone Project</td>
<td>3</td>
</tr>
</tbody>
</table>

**Business Management Core**

Complete two courses from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>HINF 6201</td>
<td>Organizational Behavior, Work Flow, Design, and Change Management</td>
</tr>
<tr>
<td>HINF 6202</td>
<td>Business of Healthcare Informatics</td>
</tr>
<tr>
<td>HINF 6215</td>
<td>Project Management</td>
</tr>
<tr>
<td>HINF 6335</td>
<td>Management Issues in Healthcare Information Technology</td>
</tr>
<tr>
<td>HINF 6240</td>
<td>Improving the Patient Experience through Informatics</td>
</tr>
<tr>
<td>PHTH 5226</td>
<td>Strategic Management and Leadership in Healthcare</td>

**Program Credit/GPA Requirements**

39 total semester hours required
Minimum 3.000 GPA required

**Information Assurance**

Students can apply for admission to two distinct degree programs:

**PhD in Information Assurance degree.** A research-based, interdisciplinary PhD in Information Assurance combines a strong security technical foundation with a security policy and social sciences perspective. It seeks to prepare graduates to advance the state-of-the-art of security in systems, networks and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes
it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

**Master of Science in Information Assurance and Cyber Security degree.** An industry-focused, interdisciplinary Master of Science in Information Assurance and Cyber Security combines knowledge of information security technology and cyber security tools with relevant knowledge from law, the social sciences, criminology, and management. The MS in Information Assurance and Cyber Security is designed for students focused on cyber security careers in companies or government agencies, thus applying their knowledge to their workplaces to assess security threats and manage information security risks and technical and policy controls.

**MSIA-ALIGN.** Students who have a strong desire to pursue a career in information assurance and cyber security but lack a technical background are advised to apply to MSIA-ALIGN. MSIA-ALIGN students enter the ALIGN program with backgrounds in social sciences, business, economics, sciences, and other disciplines. The MSIA-ALIGN courses prepare MSIA-ALIGN students to gain admission to the Master of Science in Information Assurance and Cyber Security.

Northeastern University designations by the National Security Agency (NSA) and the Department of Homeland Security (DHS):

- Center of Academic Excellence in Information Assurance/Cyber Defense Education, with focus area in Cyber Investigations
- Center of Academic Excellence in Information Assurance Research
- Center of Academic Excellence in Cyber Operations

**Programs**

**Doctor of Philosophy (PhD)**
- Information Assurance (p. 95)
- Information Assurance—Advanced Entry (p. 96)

**Master of Science in Information Assurance and Cyber Security (MSIA)**
- Information Assurance and Cyber Security (p. 97)
- Information Assurance and Cyber Security—ALIGN Program (p. 98)

**Information Assurance, PhD**

A research-based, interdisciplinary PhD in Information Assurance combines a strong security technical foundation with a security policy and social sciences perspective. It seeks to prepare graduates to advance the state-of-the-art of security in systems, networks and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

Students who choose the PhD in Information Assurance program have a strong desire to pursue academic research solving critical cyber security challenges facing today’s society. The PhD program is a natural path for students in the college’s Master of Science in Information Assurance and Cyber Security (http://www.ccs.neu.edu/graduate/degree-programs/ms-in-information-assurance) program who want to pursue research and students with bachelor’s degrees and an interest in research-focused careers. Students who pursue careers in advancing the state-of-the-art of cyber security have an opportunity to gain:

- A strong technical foundation in cyber security and an interdisciplinary perspective based on policy and social science
- A path to a research-focused career coupled with depth in information assurance research at a leading institution, one of the earliest designees by NSA/DHS as a National Center of Academic Excellence (http://www.nsa.gov/ia/academic_outreach/nat_cae/index.shtml) in Information Assurance Research, Information Assurance/Cyber Defense, and Cyber Operations
- The opportunity to work with and learn from faculty who are recognized internationally for their expertise and contributions in information assurance, from Northeastern’s College of Computer and Information Science, the Department of Electrical and Computer Engineering, and the College of Social Sciences and Humanities
- Access to research projects at Northeastern’s research centers focused on security:
  - The Institute of Information Assurance (IIA) an interdisciplinary research center overseen by both the College of Computer and Information Science and the Department of Electrical and Computer Engineering in the College of Engineering and the recipient of a National Science Foundation grant to train the country’s next generation cyber corps
  - The International Secure Systems Lab (http://www.iseclab.org), affiliated with Northeastern, a collaborative effort of European and U.S. researchers focused on web security, malware and vulnerability analysis, intrusion detection, and other computer security issues
  - The ALERT Center (http://www.northeastern.edu/alert), where Northeastern is the lead institution, a multiuniversity Department of Homeland Security Center of Excellence involved in research, education, and technology related to threats from explosives

The benefits of the Boston area:

- World renowned for academic and research excellence, the Boston area is also home to some of the nation’s largest Department of Defense contractors and government and independent labs such as MIT Lincoln Lab, MITRE, and Draper Lab

**Degree Requirements**

The PhD in Information Assurance degree requires completion of at least 48 semester credit hours beyond a bachelor’s degree. Students who enter with an undergraduate degree will typically need four to five years to complete the program, and they will be awarded a master’s degree en route to the PhD.

**Doctoral Degree Candidacy**

A student is considered a PhD degree candidate after completing the core courses with at least a 3.400 GPA and either publishing a paper in a strong conference or journal or passing an oral exam that is conducted by a committee of three information assurance faculty members and based on paper(s) written by the student.

**RESIDENCY**

One year of continuous full-time study is required after admission to the PhD candidacy. During this period, the student will be expected to make substantial progress in preparing for the comprehensive examination.
DISSENTATION ADVISING
The doctoral dissertation advising team for each student consists of two information assurance faculty members, one in a technical area. When appropriate, the second faculty advisor will be from the policy/social science area.

DISSENTATION COMMITTEE
A PhD student’s dissertation committee consists of the two members of the dissertation advising team plus two others: One is a member of the information assurance faculty, and the other is an external examiner who is knowledgeable about the student’s research topic.

COMPREHENSIVE EXAMINATION
A PhD student must submit a written dissertation proposal and present it to the dissertation committee. The proposal should identify the research problem, the research plan, and the potential impact of the research on the field. The presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee after the public presentation.

DISSENTATION DEFENSE
A PhD student must complete and defend a dissertation that involves original research in information assurance.

AWARDING OF MASTER’S DEGREES
Students who enter the PhD in Information Assurance program with a bachelor’s degree have the option of obtaining a master’s degree from one of the departments participating in the program. To do so, they must meet all of the department’s degree requirements.

Program Requirements
Bachelor’s Degree Entrance
Complete all courses and requirements listed below unless otherwise indicated.

Milestones
Qualifying exam and area exam
Annual review
Dissertation proposal
Dissertation committee
Dissertation defense

Complete 16 semester hours of approved course work. Consult your faculty advisor for acceptable courses.

Dissertation
Upon achieving PhD Candidacy, complete the following repeatable course for two semesters:
IA 9990  Dissertation 4
For remaining semester(s), complete the following repeatable course:
IA 9996  Dissertation Continuation 0

Program Credit/GPA Requirements
16 total semester hours required
Minimum 3.000 GPA required, 3.400 in core courses

Information Assurance and Cyber Security, MSIA
Our MS in Information Assurance and Cyber Security program combines an understanding of information technology with relevant knowledge from law, the social sciences, criminology, and management. This program is designed for working professionals and others who want knowledge they can apply in their workplaces to assess and manage information security risks effectively. The program provides a natural path to the PhD in Information Assurance program for students who want to pursue research in the field and careers involving research.

Admission Requirements
Admission to the Master of Science in Information Assurance and Cyber Security program requires:
• A bachelor’s degree
• Knowledge of basic information technology concepts, and mathematics
• Experience or courses taken in introductory computer systems and discrete mathematics. If students do not have this preparation, their advisors will assign the necessary prerequisite courses.

ADDITIONAL REQUIREMENTS FOR INTERNATIONAL STUDENTS
International students must submit official scores on the TOEFL examination.

APPLICATION PROCESS
All applicants must submit:
• A completed application form
• Three confidential letters of recommendation
Information Assurance and Cyber Security, MSIA—ALIGN Program

• The application fee
• Unofficial scanned copies of undergraduate/graduate transcripts to be uploaded to the online application (official transcripts from all colleges/universities attended indicating degree earned can be submitted at the time of admission)
• Official GRE score

The following items must accompany the application:

• A recent professional resume listing detailed responsibilities in each position
• A written statement of purpose, career orientation, and expected outcomes and benefits from the program

Admission is granted upon the recommendation of the program’s graduate committee after a review of complete application materials.

Program Requirements

General Requirements

Foundations
IA 5010 Foundations of Information Assurance 4

Technical Courses
Complete 8 semester hours from the following: 8
IA 5120 Applied Cryptography
IA 5130 Computer System Security
IA 5150 Network Security Practices
IA 6120 Software Security Practices

Contextual Courses
Complete 8 semester hours from the following: 8
IA 5200 Security Risk Management and Assessment
IA 5210 Information System Forensics
IA 5240 Cyberlaw: Privacy, Ethics, and Digital Rights
IA 5250 Decision Making for Critical Infrastructure

Capstone
IA 7900 Capstone Project/Seminar 4

Electives
Complete 8 semester hours from the following: 8
IA 5040 Introduction to Cyberspace Programming
IA 5050 Data Mining in Cyberspace
IA 5120 Applied Cryptography
IA 5130 Computer System Security
IA 5150 Network Security Practices
IA 5200 Security Risk Management and Assessment

PPUA 6507 Institutional Leadership and the Public Manager
PPUA 7341 Security and Resilience Policy

Program Credit/GPA Requirements
32 total semester hours required
Minimum 3.00 GPA required

1 This course can only be taken for credit if the student has NOT also taken IA 5150. These courses cannot both be taken for credit.

The innovative ALIGN bridge program to the interdisciplinary MS in Information Assurance and Cyber Security is designed for students with a BS/BA degree from all backgrounds. During the first semester of year 1, students are expected to take foundational courses in cyberspace technologies and discrete mathematics. Upon successful completion of the first semester, students are evaluated for admission to the MS program.

The MS in Information Assurance and Cyber Security combines computer systems and network security training with knowledge from the social sciences, law, criminology, and management, giving you an opportunity to obtain skills that are in high demand. Through this program, the successful student will learn to:

• Build core knowledge surrounding computer-system security and network practices, as well as relevant knowledge from the social sciences, law, criminology, and management
• Make strategic decisions about security issues and present recommendations to management
• Plan and implement security strategies to reduce risk and protect information assets and systems
• Understand the legal and ethical issues associated with information security, privacy, and digital rights

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

1 This course can only be taken for credit if the student has NOT also taken IA 5150. These courses cannot both be taken for credit.

---

### Interdisciplinary

The College of Computer and Information Science features two additional interdisciplinary programs. We partner with the College of Arts, Media and Design to offer the Master of Science in Game Science and Design. We also partner with the College of Social Sciences and Humanities to offer the Graduate Certificate in Data Analytics.

### Programs

**Master of Science**

- Game Science and Design (p. 51)

**Graduate Certificate**

- Data Analytics (p. 100)

---

### Game Science and Design, MS

The **Master of Science (MS) in Game Science and Design** is a program that seeks to give students a comprehensive understanding of how successful game products are created in a player-centric environment. Focusing on the science of game development, students have an opportunity to learn the design and technological skills needed to build a game and develop a deep understanding of playability and analytics that make products successful in an increasingly competitive marketplace.

The game industry has expanded to include social and mobile gaming; games in health, education, and training; and innovations in play psychology, middleware, graphics tools, game mechanics, game evaluation methods, and advanced artificial intelligence and narrative techniques. It has become an increasingly competitive space.

The selectiveness of the industry and the diversity of the skills required mean that students seeking entry need both broad and deep skills. As an emergent industry using diverse technology and collaborative practices, games needs professionals with interdisciplinary skill sets who can meld knowledge about development with knowledge about evaluation methods and players' behavior and psychology.

Jointly offered by Northeastern’s Colleges of Arts, Media and Design and Computer and Information Sciences (http://www.ccs.neu.edu), the **MS in Game Science and Design** is a one-of-a-kind interdisciplinary program that seeks to prepare students to meet this need by weaving together science and design. This is a two-year, 34-credit-hour program.

The degree offers three concentrations:

- Game analytics: focusing on data analysis of gameplay and other game data to make the game successful
• Game user research: focusing on gauging the user experience to enable designers to develop an enjoyable game experience
• Game design and development: focusing on the design or technical side of game development

Concentration Options
The game science and design master's degree requires a concentration. Complete one of the following:

**GAME ANALYTICS**
Complete three courses from the following: 12
- GSND 6350 Game Analytics
- DS 6020
- DS 6030
- PPUA 6302 Information Design and Visual Analytics

**GAME USER RESEARCH**
Complete three courses from the following: 12
- CS 5340 Computer/Human Interaction
- GSND 6320 Psychology of Play
- GSND 6330 Game User Research
- GSND 6340 Advanced Game User Research

**GAME DESIGN AND DEVELOPMENT**
Complete three courses from the following: 12
- CS 5150 Game Artificial Intelligence
- CS 5850 Building Game Engines
- GSND 6240 Exploratory Concept Design
- GSND 6250 Spatial and Temporal Design

Electives
*Note: In consultation with your faculty advisor, you may complete two other related courses offered by all concentrations.*
Complete two courses from the following list: 8
- CS 5150 Game Artificial Intelligence

Total Hours: 34

**Data Analytics, Graduate Certificate**
The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the College of Computer and Information Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policy-making processes. The program is designed to provide students with foundational knowledge in data science—including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.
For more information on the certificate, refer to the program’s website (http://www.northeastern.edu/datascience).

**Program Credit/GPA Requirements**
16 total semester hours required
Minimum 3.000 GPA required
The Graduate School of Engineering (GSE) offers research and professional degree programs designed to prepare students for technical and leadership positions in industrial organizations, government laboratories, research laboratories, and educational institutions. We offer traditional day and part-time evening Master of Science and doctoral degree programs as well as a number of graduate certificate programs. GSE offers a significant number of courses and degree programs in an online or hybrid format that are well suited for distance learners.

### Academic Policies and Procedures

- Learning Outcomes (p. 102)
- Admission Requirements (p. 102)
- Cooperative Education Policies (p. 102)
- Online and Video Streaming Examination Policy (p. 104)
- Course Registration and Withdrawal (p. 104)
- Academic Standards and Degree Requirements (p. 105)
- Administrative Procedures (p. 106)
- Petitions (p. 106)

### Learning Outcomes

**Doctor of Philosophy**
The PhD programs’ student learning outcomes are:

- Ability to use basic engineering concepts flexibly in a variety of contexts
- Ability to formulate a research plan
- Ability to communicate orally a research plan
- Ability to conduct independent research

**Master of Science**
The MS programs’ student learning outcome is:

- Ability to use basic engineering concepts flexibly in a variety of contexts

### Admission Requirements

To be minimally qualified to pursue admission, a candidate must have successfully completed or be in the process of completing an appropriate undergraduate bachelor’s degree from a regionally accredited U.S. college or university or its equivalent from a foreign college or university.

Application requirements:

- Online application.
- Statement of purpose.
- Professional résumé.
- Transcript(s) from any and all colleges or universities attended evidencing all courses, grades, and credits, as well as any diploma(s) or provisional certificate(s) evidencing that degree(s) have been conferred.
- Two letters of recommendation.
- GRE scores are required of most applicants. For complete information on this requirement, visit the Graduate Admissions website.
- TOEFL or IELTS scores are required of most applicants whose native language is not English. For complete information on this requirement, visit the Graduate Admissions website.

### Cooperative Education Policies

The College of Engineering Graduate Cooperative Education Program (co-op) is one option for experiential learning and is available to selected students. The goals of cooperative education are to:

- Apply knowledge and skills in new, authentic contexts
- Develop new knowledge and skills
- Integrate and use the deepened knowledge and skills in your academic programs
- Reflect on and articulate how you used your knowledge and skills, how you gained new knowledge and skills, and how “theory and practice” work together

Students who wish to participate in co-op must meet the eligibility requirements and follow the guidelines that follow. Co-op is not guaranteed for any student; students must compete and be selected for a limited number of co-op opportunities. These guidelines apply to all graduate students in the College of Engineering.

### Eligibility Requirements

1. Students must successfully complete Career Management for Engineers (ENCP 6000) or Introduction to Cooperative Education (ENCP 6100) or Introduction to Cooperative Education (EECE 6000) (depending on their major). Students MUST meet all co-op eligibility requirements to enroll in Career Management for Engineers (ENCP 6000) or Introduction to Cooperative Education (ENCP 6100). A complete list of requirements is found on the Graduate School of Engineering website.

2. To be eligible for co-op, College of Engineering graduate students must be:
   - Enrolled full-time at Northeastern University
• Meet the minimum GPA and minimum semester-hour requirements for their program described in the table below, as applicable
• Meet all English-language requirements described in the table below, as applicable
• Have no disciplinary or academic probation issues and no incomplete courses (i.e., no I grade in their records)
• Have at least one term left in their program after completing co-op (i.e., students must return to Northeastern to take courses for at least one term prior to graduating)
• Have a valid I-20 (for international students)

3. Co-op performance standards encourage professional and ethical behaviors throughout the co-op process and clarify procedures required for continued success of our students and the co-op program. The College of Engineering Co-op Performance Standards are communicated to all students in the Career Management for Engineers (ENCP 6000) / Introduction to Cooperative Education (ENCP 6100) / Introduction to Cooperative Education (EECE 6000) course as part of their preparation for the first co-op experience. The standards establish co-op professional expectations of the student throughout the co-op search process and during the co-op term and address co-op related issues that may involve performance. In the event that a situation arises that requires special consideration, the College of Engineering Co-op Standing Committee may be consulted.

4. Students who are dismissed from or resign from a co-op job for circumstances under their control will receive a U (unsatisfactory) grade for co-op work experience and be ineligible for other future co-op experiences.

5. Students must receive academic and co-op advisor approval prior to accepting a placement.

<table>
<thead>
<tr>
<th>Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. For the purposes of these guidelines, internships, practicums, clinicals, cooperative education, residencies, or similar programs, are all treated as a co-op and are not considered separate experiences in the Graduate School of Engineering. See below for a special note for international PhD student internships only (NOT part of the co-op program).</td>
</tr>
<tr>
<td>2. Students may not hold a graduate stipend assistantship at the university during the semesters planned for co-op.</td>
</tr>
<tr>
<td>3. Students may participate in co-op activities with a single company for a four-, six-, or eight-month period. The total duration of co-op cannot exceed eight months or be shorter than four months. Co-ops are aligned with academic terms (fall, spring, and full summer or summer 1 and summer 2). For purposes of determining the length of a co-op, it is based on the terms participated in—a co-op in any one term is a four-month co-op (full summer, fall, or spring); six-month co-ops are spring and summer 1 or summer 2 and fall; eight-month co-ops are two consecutive terms (spring and full summer or full summer and fall); fall and spring co-op is not allowed.</td>
</tr>
<tr>
<td>4. Students on four-month co-op assignments are allowed to have their co-op extended to a maximum of eight months (aligning with terms as stated above (fall and spring co-op is not allowed), provided they have approval from their academic and co-op advisor.</td>
</tr>
<tr>
<td>5. Co-ops are required to be full-time (35+ hours per week) and, thus, students are allowed to take at most one course during the fall and spring semesters while participating in co-op activities. Students participating in co-op during the full summer are only allowed to take a single course over the entire summer (i.e., a full summer, summer 1, or summer 2, not one in each period).</td>
</tr>
<tr>
<td>6. Students are permitted to participate in one co-op experience as a graduate student. A student who in the process of seeking a cooperative education experience and is disqualified because of violation of co-op performance standards described in guideline number 3 above is ineligible to seek a future cooperative education experience. In other words, the student forfeits the opportunity to participate in co-op.</td>
</tr>
<tr>
<td>7. Students who wish are allowed to create their own co-op placement outside the myNEU COOL but must meet all the requirements and follow all the guidelines.</td>
</tr>
</tbody>
</table>
8. Final decision regarding any exceptions to the above requirements needs to be approved by the co-op faculty of the appropriate program.

**International PhD Student Internships**

An internship at Northeastern is a special, and rare, case of experiential learning that applies only to international PhD students. Like co-op, it is classified as Curricular Practical Training (CPT) for F-1 visa holders or pre-Academic Training (pre-AT) for J-1 visa holders. An internship must be integral (read: essential, vital, fundamental) to a student’s research or dissertation. As such, the student’s research or dissertation would suffer greatly without this experience. Generally, because of the close relationship to the student’s research or dissertation, internships are arranged by the student’s faculty advisor. Further, it is incumbent upon the faculty advisor to sign and verify that this experience is integral to the student’s program, even if they do provide experience that would be beneficial to employment after graduation. The key is that any internship must be required to have their exams proctored. If a proctor is required, it is

**Internships, Co-op, and Pre-OPT**

A position that a student finds on their own in a field related to their program of study, to provide funding during the summer, or to supplement their income does not qualify for internship CPT authorization, though the position might qualify as a co-op or Pre-OPT experience provided the student meets all the qualifications for the relevant authorization. Like co-op, internships are not part of a jobs program, even if they do provide experience that would be beneficial to employment after graduation. The key is that any internship must have a very direct and strong relationship to the student’s research or dissertation.

---

**Online and Video Streaming Examination Policy**

**Exam Administration**

Students who are enrolled in online and video-streaming sections may be required to have their exams proctored. If a proctor is required, it is the student’s responsibility to find a proctor and then have the proctor approved by the Graduate School of Engineering. Students must make arrangements for an exam proctor following the proctor application guidelines. The Graduate School of Engineering reserves the right to reject any proctor application if the guidelines are not followed.

Video-streaming students living within thirty miles of their home campus (Boston, Charlotte, Silicon Valley, or Seattle) and who are enrolled in video-streamed sections may be strongly encouraged by the faculty to take exams at their home campus if there is a campus designee to provide proctoring services. In cases where a student is unable to travel to campus for exams, a proctor can be used.

For successful proctoring, the following responsibilities are delineated.

**Student Responsibilities**

Students must make arrangements for a proctor. Students are required to complete and submit a Proctor Application form to the Graduate School of Engineering office by the end of the third week of class.

**Proctor Responsibilities**

The proctor is responsible for administering exams to the students per the instructor’s directions and in accordance with the Academic Honesty and Integrity Policy in order to maintain the security and integrity of the exam process.

**Faculty Responsibilities**

To administer each exam, the instructor will make arrangements for the exchange of exam materials with the proctor. Once a proctor is approved, the faculty is in charge of coordinating and interacting with the proctor.

---

**Course Registration and Withdrawal**

**Overview**

Students must follow their program of study curriculum as published in this *University Graduate Catalog* (2012 and beyond), or the *Graduate School of Engineering Student Guide and Catalog* (prior to 2012), for the year in which they matriculate. Any change in the course work or program requirements must be approved by the student’s program advisor and/or the department. Additionally, students must complete any preparatory courses stipulated at the time of admission within the stated time frame.

Registration in classes is mandatory to maintain an active status with the university. Students must be registered in all courses for a given term prior to the university course add deadline. Students should not register for an excessive number of courses or for multiple sections of the same course with the intention of dropping half or more of the courses during the first week of classes.

Students must be registered in their last semester of study. Students finishing their requirements in the summer semester must be registered either in the full summer, summer 1, or summer 2 term.

Due to last-minute scheduling changes, the Graduate School of Engineering must occasionally substitute faculty or change class schedules after the registration period has begun. Any student registered for the original course will automatically be registered for the updated section should no major schedule conflicts be apparent. Otherwise, the graduate school or the department will contact all affected students for alternatives. Any student who is financially withdrawn by Student Accounts prior to the start of any given semester will not be permitted to register for that semester until he or she rectifies the outstanding financial obligation.

Northeastern University reserves the right to cancel, postpone, combine, or modify any class.

**Course Selection**

Full-time students (domestic and international) in the Graduate School of Engineering must register for classes on an ongoing basis and carry a minimum of 8 semester hours of course work per semester. Any student who holds a stipended graduate assistantship (SGA) is considered full-time if enrolled for a minimum of 6 semester hours.

All graduate students who are registered for Dissertation, Dissertation Continuation, Thesis Continuation, PhD Candidacy Preparation, PhD Exam Preparation, or a zero-semester-hour Research course are considered full-time. Registration in these courses is restricted to students who qualify for registration in these courses.

The graduate school does not require part-time students to be enrolled for a certain minimum number of semester hours in any term. However, part-time students who are not enrolled for more than one term (excluding summer terms) should take a leave of absence from the university to maintain active student status to keep their student account active.
The maximum number of semester hours approved for a student in each term varies by the degree program. However, a student can petition his or her program advisor to request permission to register for more than the allowed maximum number of semester hours for a given term.

Students should formulate a program of study in consultation with their assigned program advisor at the beginning of their program, during fall or spring orientation. Students should preselect courses whenever possible and plan to take them when offered, maintaining flexibility with alternate courses in mind. Courses other than the required courses are offered based on demand and are subject to faculty availability. Not all courses are offered every year; however, the graduate school will do everything possible to assure continuity of programs and permit students to make continuous progress toward earning their degrees.

Students who need assistance with course selection, course sequencing, waivers, and/or transfer credits should contact their academic advisor or Graduate Student Services in the Graduate School of Engineering.

MS Thesis and Thesis Continuation
Master’s degree students who are completing a thesis must register for a total of 8 semester hours of Thesis. Students who have not completed their thesis, but have already registered for the required number of thesis hours, and have no remaining course work to complete the degree, may register for Thesis Continuation in their last semester (including summer term) to maintain full-time status. There is a 1-semester-hour tuition charge for Thesis Continuation.

During graduation clearance, the Graduate School of Engineering will retroactively register students who fail to register for the correct sequence of Thesis Continuation. Once these retroactive registrations are posted on a student's record, Student Accounts will send a tuition bill to the student.

Dissertation and Dissertation Continuation
Once program requirements are met for the PhD candidacy, PhD candidates must register for two consecutive semesters (may include the summer term) of Dissertation. Candidates must then register for Dissertation Continuation in each subsequent semester (excluding the summer term) until the dissertation is complete and approved by the Graduate School of Engineering. Students completing their dissertation in the summer term must register for Dissertation Continuation in the summer term. There is a 1-semester-hour tuition charge for Dissertation Continuation.

During graduation clearance, the Graduate School of Engineering will retroactively register students who fail to register for the correct sequence of Dissertation and/or Dissertation Continuation. Once these retroactive registrations are posted on a student’s record, Student Accounts will send a tuition bill to the student.

Attendance Policy
In each term, continuing students are expected to be on campus by the first day of classes and online students are expected to log-in and stay attentive starting from the first class of each term. Course instructors are not expected to make accommodations for students who arrive after the first day of classes. Students who do not attend their class during the first week of a semester risk being dropped out of the course. Students should not expect that they will be added to the classes after the university course add deadline.

The Graduate School of Engineering allows students to repeat up to 8 semester hours of course work beyond stated minimum degree requirements in order to attain the required 3.000 GPA for graduation. In certain unusual circumstances students may petition to substitute one course for another course that they have already taken, as long as the subject matter of both courses is substantially similar. Substitution requests must be approved by the student’s program/department, Graduate School of Engineering, and the Office of the Registrar.

Within the above limitations for extra or repeated courses, a student must repeat any required core course in which he or she earns a grade below C. Individual programs may have additional requirements.

Students must obtain approval from their academic advisor and the Graduate School of Engineering prior to repeating a course.

Prerequisite Courses/Undergraduate Courses
Students are not awarded credit toward graduate degree requirements for prerequisite courses unless expressly stated by the student’s academic department. Students may occasionally be permitted by their advisor to take undergraduate courses. However, undergraduate courses do not count toward a graduate degree and may affect a student’s eligibility to receive federal financial aid. Undergraduate courses do not count toward the graduate-level course load requirement for full-time students.

Degree Conferral
A degree is awarded at the end of the term (fall, spring, or summer) in which the final requirement for the degree is satisfied.

Academic Probation

STUDENT’S ACADEMIC STANDING
Academic standing at Northeastern University is determined by a student’s cumulative GPA. All graduate students are expected to maintain a cumulative GPA of 3.000 or higher each term to remain in good academic standing and to progress toward graduation. Students falling below a cumulative GPA of 3.000 are placed on academic probation for each academic term in which the cumulative GPA is below 3.000. This will be noted on the student’s unofficial transcript.

ACADEMIC PROBATION POLICY
Academic probation is a period of time when a student must address and remediate academic deficiencies.

A student placed on academic probation will receive a written notification by the Graduate School of Engineering (hereafter referred to as the graduate school). The student’s academic advisor will also receive notification of the student’s probationary status. An Academic Probation Action Plan to clear the deficiency must be developed by the student and the student’s academic advisor. It is the student’s responsibility to
complete an action plan (with input from the advisor) that documents how the deficiency will be remediated. This action plan must be signed by the academic advisor and the student, and a copy must be submitted to the graduate school as soon as possible and no later than seven business days from the start of the next academic term. If the action plan is not received by this deadline, the graduate school will cancel the student’s course registration(s). Failure to file a complete and meaningful action plan may be cause for dismissal from the program. The graduate school reserves the right to reject or change the action plan.

DISMISSAL FROM PROGRAM
A student (part-time or full-time) placed on academic probation for a cumulative GPA of less than 3.000 will have one academic term to raise the cumulative GPA greater than or equal to 3.000. Students whose cumulative GPA is below 3.000 for two consecutive terms in which they took courses for credit (excluding Career Management for Engineers (ENC 6000), or Introduction to Cooperative Education (ENC 6100), if taken) will automatically be dismissed from their degree program at the end of the second term. Students in this situation may submit an Academic Dismissal Appeal Plan to the graduate school to request a final one-term extension. In this case, the student may submit an appeal to the associate dean of the graduate school as per the university appeals process.

Students being dismissed from their program will receive a written notification from the Graduate School of Engineering.

APPEALS PROCESS
A student may appeal a dismissal from his or her program of study due to failure to achieve academic standards set forth in this academic probation policy. To initiate an appeal, the student must send a written request to the associate dean of the graduate school detailing the reasons the student is appealing the dismissal. The written request must be signed by the student, and the appeal must be received by the Graduate School of Engineering within thirty business days from the day the student received written notification of dismissal. The graduate school will respond to the appeal within ten business days of the date of receipt.

Petitions
Overview
Petition procedures described below are required in all cases so that the Graduate School of Engineering may maintain a complete and accurate record for all students. All petitions, unless otherwise noted, must be formally made on a Graduate School of Engineering petition form and approved by a student’s academic advisor, department graduate director (if applicable), and by the Graduate School of Engineering. Other approvals may be required as stipulated by the graduate school upon petition review. Students should refer to the Graduate School of Engineering (http://www.coe.neu.edu/academics/graduate-school-engineering) website for additional instructions.

Elective Outside of the Approved Program Curriculum
Courses approved for each degree program are found in the Northeastern University Graduate Catalog. Students must follow the curriculum of their program of study published in the year in which they matriculate. If a student wishes to take a course that is not on the list of approved courses for his or her program, the student must request permission from the academic advisor to take the course prior to registering for that course. Failure to obtain permission to take a course that is not part of the approved curriculum, as listed in the catalog, may result in that course not counting toward the student’s graduate degree. The petition must be submitted to the Graduate School of Engineering for review. Final decision on all the requests made by a petition form rests with the Graduate School of Engineering.

Note: Students enrolled in a PhD program are not subject to this requirement. Final decision on all the requests made by a petition form rests with the Graduate School of Engineering.

Course Waiver
A student may petition to waive any core course (also known as a required course) when he or she has completed equivalent or similar course work elsewhere. The student must submit a completed petition form along with a course description and an official transcript from the institution where he or she completed the course.

Note: Course waivers do not decrease the number of required semester hours in any program of study. Submission of a waiver petition does not guarantee a waiver. All waiver petitions are subject to review by the academic advisor, department graduate director (in applicable cases), and the graduate school. The waived course must be replaced by an advisor-approved course.

Extension of Time Limit to Complete Program
All Northeastern University graduate course credits earned in a program of study, or accepted for transfer credit, are valid for a maximum of seven years. To request an extension, students may submit a petition to their academic advisor, including the reason(s) for the request, an intended course of action, and length of time needed to complete degree requirements.

In the case of the Doctor of Philosophy degree, after the establishment of degree candidacy, a maximum of five years is allowed for the completion of degree requirements. To request an extension, students may submit a petition to their academic advisor, including the reason(s) for the request, an intended course of action, and length of time needed to complete degree requirements.

Change in Status (Full-Time, Part-Time)
Students may petition to change their student status from full-time to part-time study within the same program by filing a petition form, signed by their program advisor, graduate program director (in some departments), and submitted to the Graduate School of Engineering. In all cases, students who hold an assistantship, or whose department requires full-time students to complete a project or thesis, must have departmental approval to change status.

Students who wish to change status from part-time to full-time study within the same program must have completed a minimum of 8 semester hours of course work with a minimum 3.000 grade-point average (GPA). Students in this case must submit a petition to change status to their advisor or departmental graduate officer for approval.

Students should discuss the financial implications of changing their student status with the Office of Student Financial Services.

International students are subject to the rules governing their immigration status and should consult with an advisor in the
Change in Degree Concentration
A student who wishes to change degree concentration within the same program must submit a completed Change of Degree Program/Concentration form to the program advisor of the new concentration—and, in some cases, to the chair of the graduate committee of their department—for approval. The form must then be forwarded to the Graduate School of Engineering for final review and processing. Students should refer to the Graduate School of Engineering (http://www.coe.neu.edu/academics/graduate-school-engineering) website for additional instructions.

Change in Degree Program
A student who wishes to change his or her degree program must apply for admission to the desired program. This means a new online application must be submitted. The application fee is waived. In addition, the student must submit a completed Change of Degree Program form to the advisor of the desired program. The form must then be forwarded to the Graduate School of Engineering for final review and processing. Students should refer to the Graduate School of Engineering (http://www.coe.neu.edu/academics/graduate-school-engineering) website for additional instructions.

Change in Degree Level
A student who wishes to change the degree level from MS to PhD must apply for admission to the PhD program. This means a new online application must be submitted. The application fee is waived. In addition, the student must submit a completed Graduate School of Engineering Change of Degree Level form to the director of the PhD program to which he or she is applying. The form must then be forwarded to the Graduate School of Engineering for final review and processing (if admitted). Students should refer to the Graduate School of Engineering (http://www.coe.neu.edu/academics/graduate-school-engineering) website for additional instructions.

A student who wishes to change the degree level from PhD to MS within the same degree program must submit a Change of Degree Level form to the academic advisor—and, in some departments, to the chair of the graduate committee—for approval. If approved, the Change of Degree Level form must then be submitted to the Graduate School of Engineering for final review and processing. Students should refer to the Graduate School of Engineering (http://www.coe.neu.edu/academics/graduate-school-engineering) website for additional instructions.

The Department of Bioengineering offers a Master of Science (MS) and a Doctor of Philosophy (PhD) in Bioengineering. The MS and PhD degree programs are only offered as full-time programs.

Candidates pursuing an MS or PhD are able to select thesis topics from a diverse range of faculty research. New graduate students may learn about ongoing research topics from individual faculty members, faculty websites, and bioengineering seminars.

Graduate Certificate Options
Students enrolled in a master's degree in Bioengineering have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION
Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Programs

Doctor of Philosophy (PhD)
• Bioengineering (p. 107)
• Bioengineering—Advanced Entry (p. 114)

Master of Science in Bioengineering (MSBioE)
• Bioengineering (p. 116)

Bioengineering, PhD

Our interdisciplinary Doctor of Philosophy (PhD) program in bioengineering draws on faculty across the university and reflects the significant strengths of bioengineering research in multiple areas. Students accepted to the bioengineering program will undertake a rigorous core curriculum in basic bioengineering science followed by an immersion track curriculum. There are currently eight tracks from which to choose:

• Track 1: Biomedical Imaging and Signal Processing
• Track 2: Biomechanics and Mechanobiology
• Track 3: BioMEMs/BioNANO
• Track 4: Biochemical and Bioenvironmental Engineering
• Track 5: Motor Control
• Track 6: Biocomputing
• Track 7: Cell and Tissue Engineering
• Track 8: General Bioengineering Studies

Biology can inspire engineering. Increasingly, discoveries in the life sciences reveal processes, complexity, and control without analogy in the limited world of traditional engineering. Current methods of producing nanoscale control over molecules cannot reproduce the organization found in even the simplest organisms. Energy capture, robust control, remediation, and self-assembly are all employed with efficiency unparalleled by anything in today's laboratories. At the same time, traditional engineering disciplines struggle to find new and complex challenges. The last fifty years of basic life science research have gradually peeled the layers of complexity from biological processes, unmasking the fundamental underpinnings on which biological systems are constructed. Bioinspired engineering has the potential to transform the technological landscape of the twenty-first century. Astonishingly, it represents merely one of the myriad opportunities presented at the interface of biology and engineering.
The field of bioengineering is broad and includes all research at the interface of engineering and biology—this includes bioprocesses, environmental microbiology, biomaterials and tissue engineering, bioelectricity, biomechanics, biomedical and biological imaging, nanotechnology in medicine and the environment, and engineering design for human interfacing. At Northeastern, bioengineering PhD students have an opportunity to be trained to appreciate advances in bioengineering across a wide range of disciplines while they perform highly focused and cutting-edge bioengineering research with one of our many core or affiliated faculty members.

**Degree Requirements**

Completion of the PhD degree requires students to successfully complete the following requirements:

- **Curriculum**: The curriculum comprises a strong fundamental, broad core of courses that is then coupled with one of a series of available tracks for depth in a particular field of study. The detailed course requirements are outlined below.

- **Qualifying exam (written and oral)**: To qualify to continue in the PhD program, students must pass the bioengineering comprehensive qualifying examination, which comprises the synthesis of knowledge derived from the core curriculum and current literature presented in the form of an R21 NIH-style proposal. Successful oral defense of the proposal is required to pass the exam as well as satisfactory research progress and satisfactory academic standing. Details of the formal qualification exam procedure and timing are available in the bioengineering office and may be requested electronically from the graduate director. The qualifying examinations (written and oral) must be successfully completed within three years of entry.

- **Qualifying examination committee**: The qualifying examination committee is composed of a minimum of three members, two of whom must be selected from the list of bioengineering-affiliated faculty. In addition, one of the two affiliated faculty must have a primary appointment in the College of Engineering. The student’s primary advisor may not sit on the qualifying exam committee.

- **Dissertation committee**: The dissertation committee is composed of a minimum of three members, two of whom must be selected from the list of bioengineering-affiliated faculty. In addition, one of the two affiliated faculty must have a primary appointment in the College of Engineering. The student’s primary advisor should be a member of and chair the dissertation committee.

- **Area exam (dissertation proposal)**: PhD students must submit a “dissertation proposal” to their dissertation committee in the form of an R-21 NIH-style research plan and successfully defend the research plan in the form of an open presentation to their dissertation committee. The area exam should be completed as soon as is practical after successful completion of course work and qualifying exams.

- **Dissertation**: PhD candidates must satisfactorily complete and defend a dissertation describing original research in bioengineering in an open presentation to their dissertation committee.

- **Dissertation Course Requirements**: After achieving PhD candidacy, the doctoral candidate, in consultation with his or her research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation (BIOE 9990). Upon completion of this sequence, the student must then register for Dissertation Continuation (BIOE 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student’s last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (BIOE 9996) until they fulfill the two-semester sequence of Dissertation (BIOE 9990).

To meet the full-time registration requirement for PhD students who have completed the majority of their course work and not yet reached PhD candidacy, a zero-credit course, Exam Preparation—Doctoral (BIOE 8960), can be taken if needed to fulfill the full-time course registration requirement. Exam Preparation—Doctoral (BIOE 8960) is an individual instruction course, billed at one semester hour, and graded S or U. Exam Preparation—Doctoral (BIOE 8960) does not have any course content, and students must register in a section for which their research advisor is listed as the “instructor.”

For students possessing a Baccalaureate in a suitable quantitative or technical field, the required course distribution is shown in the table below.

The core emphasizes the breadth of topics that our graduates must appreciate as internationally competitive bioengineers. It utilizes existing courses within the College of Engineering as well as introducing new/external courses that are necessary and will be developed.

**Track 1: Biomedical Imaging and Signal Processing**

**TRACK MANAGERS: DANA BROOKS AND DENIZ ERDOGMUS**

The biomedical imaging and signal processing track reflects Northeastern University’s outstanding research profile in various aspects of biological and biomedical imaging and image processing and signal processing. This is evidenced by the Gordon Center for Subsurface Sensing and Imaging Systems, the Center for Communications and Digital Signal Processing Research, and the strong externally funded active research groups and faculty whose interests lie at the intersection of imaging, signal processing technologies, and biological and medical applications.

The courses listed below concentrate largely on general mathematical methods for signal and image processing and image formation and on image acquisition modalities and applications. Research in this area takes place at the intersection of these technical streams, and students completing the track will have a sufficiently strong background in the component areas to be able to carry out high-quality research efforts. Bioengineering PhD candidates may complete this track by taking at least two of the restricted electives and sufficient unrestricted electives to meet course requirements as specified by their degree program in addition to their core bioengineering curriculum.

**Track 2: Biomechanics and Mechanobiology**

**TRACK MANAGERS: SINAN MUFTU AND JEFFREY RUBERTI**

Biomechanics and mechanobiology are linked by the biological response to applied forces and strains. To understand the overall effect of load on biological systems, it is important to consider not only the deformation and shear rates that result from force application but also the short- and long-term biological responses. The biomechanics and mechanobiology track reflects this understanding and leverages the strong faculty research at Northeastern, which is attempting to tie biomechanics to biological responses at multiple scales.

The biomechanics track is designed to capitalize on the substantial expertise in the mechanical and industrial engineering department, which has a strong fundamental research program in biomechanics. Faculty
in the department perform investigations that comprise theoretical, computational, and experimental investigations. Students who select this track must take all of the restricted electives in addition to the bioengineering core curriculum and sufficient unrestricted electives to meet course requirements as specified by their degree program.

**Track 3: BioMEMs/BioNANO**

**TRACK MANAGERS: EDGAR GOLUCH AND SHASHI MURTHY**
The BioMEMs/bioNANO track reflects Northeastern University’s strength as indicated by the NSF Center for High Rate Nanomanufacturing, the NSF/NCI Nanomedicine IGERT training grant, and the strong pharmaceutical sciences department. In addition, Northeastern also has a research presence in MEMs that, when combined with the bioengineering curriculum, presents significant interdisciplinary opportunities for students in the program. Students may choose to complete this track by taking three of the restricted electives in addition to their core bioengineering curriculum and sufficient unrestricted electives to meet course requirements of their degree program.

**Track 4: Biochemical and Bioenvironmental**

**TRACK MANAGERS: REBECCA CARRIER AND APRIL GU**
The track reflects strengths in biochemical engineering and bioenvironmental engineering by active research programs focused in pharmaceutical bioprocessing, biomaterials, tissue engineering, drug delivery, environmental microbiology, biotreatment/bioremediation, and environmental modeling. Students wishing to pursue this track should take two of the restricted electives listed below in addition to the bioengineering core curriculum and sufficient unrestricted electives to meet the course requirements of their degree program.

**Track 5: Motor Control**

**TRACK MANAGERS: RIFAT SIPAHI AND DAGMAR STERNAD**
The motor control track is designed to capitalize on the collective expertise of cross-disciplinary collaborations between existing Northeastern faculty whose research lies at the intersection of sensorimotor control systems, neuroscience, and dynamical systems. Insights into learning and coordination of functional motor behavior provide the basis for a better understanding of neurological diseases of motor function such as stroke, Parkinson’s disease, and cerebral palsy. Insights will be the foundation for designing better therapy and rehabilitation.

Students who select this track must take four out of five restricted electives in addition to the bioengineering core curriculum and unrestricted elective courses to meet requirements of the track program.

**Track 6: Biocomputing**

**TRACK MANAGERS: STEFANO BASAGNI AND MIRIAM LEESER**
The biocomputing track draws on strengths in computer engineering and computation applied to bioengineering applications. Bioengineering MS or PhD candidates may complete this track by taking both of the restricted electives and sufficient unrestricted electives to meet course requirements as specified by their degree program.

**Track 7: Cell and Tissue Engineering**

**TRACK MANAGERS: ANAND ASTHAGIRI AND ERIN CRAM**
Cell and tissue engineering is a major strength at Northeastern University with several research labs focused on understanding and engineering living cells and tissues. These labs are elucidating the quantitative principles that govern cell fate decisions and are developing design strategies to promote the assembly and patterning of multicellular systems into viable, functional tissues. Cells are remarkable physicochemical systems that sense, respond, and actively reshape their rich microenvironment. Parsing the dialogue between the microenvironment and cells and elucidating design strategies to engineer the dynamic cellular milieu has far-reaching implications for biomedicine, including applications such as tissue engineering and the development of novel therapeutic strategies.

This pioneering, multidisciplinary research is enabled by strengths at Northeastern in key foundational areas, such as biomolecular engineering, computational modeling, developmental biology, imaging, materials science, micro- and nanofluidics, mechanobiology, molecular cell biology, and systems biology.

Cell and tissue engineering is widely recognized as a core subfield of bioengineering. A formal track in this area offers our students a program of study that capitalizes on a major strength at Northeastern.

**Track 8: General Bioengineering Studies**

**TRACK MANAGER: JEFFREY RUBERTI**

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Annual review
Qualifying examination (within three years of entry)
Dissertation committee
Area examination (dissertation proposal)
Dissertation defense

Bioengineering, PhD—Advanced Entry

Our interdisciplinary Doctor of Philosophy program in bioengineering draws on faculty across the university and reflects the significant strengths of bioengineering research in multiple areas. Students accepted to the bioengineering program will undertake a rigorous core curriculum in basic bioengineering science followed by an immersion track curriculum. There are currently eight tracks from which to choose:

- Track 1: Biomedical Imaging and Signal Processing
- Track 2: Biomechanics and Mechanobiology
- Track 3: BioMEMs/BioNANO
- Track 4: Biochemical and Bioenvironmental Engineering
- Track 5: Motor Control
- Track 6: Biocomputing
- Track 7: Cell and Tissue Engineering
- Track 8: General Bioengineering Studies

Biology can inspire engineering. Increasingly, discoveries in the life sciences reveal processes, complexity, and control without analogy in the limited world of traditional engineering. Current methods of producing nanoscale control over molecules cannot reproduce the organization found in even the simplest organisms. Energy capture, robust control, remediation, and self-assembly are all employed with efficiency unparalleled by anything in today’s laboratories. At the same time, traditional engineering disciplines struggle to find new and complex challenges. The last fifty years of basic life science research have gradually peeled the layers of complexity from biological processes, unmasking the fundamental underpinnings on which biological systems are constructed. Bioinspired engineering has the potential to transform the technological landscape of the twenty-first century. Astonishingly, it represents merely one of the myriad opportunities presented at the interface of biology and engineering.

The field of bioengineering is broad and includes all research at the interface of engineering and biology—this includes bioprocesses, environmental microbiology, biomaterials and tissue engineering, bioelectricity, biomechanics, biomedical and biological imaging, nanotechnology in medicine and the environment, and engineering design for human interfacing. At Northeastern, bioengineering PhD students have an opportunity to be trained to appreciate advances in bioengineering across a wide range of disciplines while they perform highly focused and cutting-edge bioengineering research with one of our many core or affiliated faculty members.

**Degree Requirements**

Completion of the PhD degree requires students to successfully complete the following requirements:

- **Curriculum**: The curriculum comprises a strong fundamental, broad core of courses that is then coupled with one of a series of available tracks for depth in a particular field of study.
- **Qualifying examination (written and oral)**: To qualify to continue in the PhD program, students must pass the bioengineering comprehensive qualifying examination, which comprises the synthesis of knowledge derived from the core curriculum and current literature presented in the form of an R21 NIH-style proposal. Oral defense of the proposal is required to pass the exam as well as satisfactory research progress and satisfactory academic standing. Details of the formal qualification exam procedure and timing are available in the bioengineering office and may be requested electronically at any time from the graduate director. The qualifying

---

**Program Credit/GPA Requirements**

- **48 total semester hours required**
- **Minimum 3.000 GPA required**

</table>
examinations (written and oral) must be successfully completed within three years of entry.

- **Qualifying examination committee:** The qualifying examination committee is composed of a minimum of three members, two of whom must be selected from the list of bioengineering-affiliated faculty. In addition, one of the two affiliated faculty must have a primary appointment in the College of Engineering. The student’s primary advisor may not sit on the qualifying examination committee.

- **Dissertation committee:** The dissertation committee is composed of a minimum of three members, two of whom must be selected from the list of bioengineering-affiliated faculty. In addition, one of the two affiliated faculty must have a primary appointment in the College of Engineering.

- **Area exam:** PhD students must submit a "prospectus" to their dissertation committee in the form of an R21 NIH-style research plan and successfully defend the research plan in the form of an open presentation to their dissertation committee. The area exam should be completed as soon as is practical after successful completion of course work and qualifying exams.

- **Dissertation:** PhD candidates must satisfactorily complete and defend a dissertation describing original research in bioengineering in an open presentation to their dissertation committee.

- **Dissertation Course Requirements:** After achieving PhD candidacy, the doctoral candidate, in consultation with his or her research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation (BIOE 9990). Upon completion of this sequence, the student must then register for Dissertation Continuation (BIOE 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student’s last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (BIOE 9996) until they fulfill the two-semester sequence of Dissertation (BIOE 9990).

To meet the full-time registration requirement for PhD students who have completed the majority of their course work and not yet reached PhD candidacy, a zero-credit course, Exam Preparation—Doctoral (BIOE 8960), can be taken if needed to fulfill the full-time course registration requirement. Exam Preparation—Doctoral (BIOE 8960) is an individual instruction course, billed at 1 semester hour and graded S or U. Exam Preparation—Doctoral (BIOE 8960) does not have any course content, and students must register in a section for which their research advisor is listed as the "instructor."

The curriculum for PhD students with advanced standing will be selected from the available core and elective courses under the guidance of the program director and the student’s primary advisor. The advanced standing PhD degree requires a minimum of 16 semester hours of course work to be approved by the graduate director and a completed PhD dissertation. Advanced standing constitutes receipt of a relevant and accepted master’s degree at a qualified institution.

The core emphasizes the breadth of topics that our graduates must appreciate as internationally competitive bioengineers. It utilizes existing courses within the College of Engineering as well as introducing new external courses that are necessary and will be developed.

Track electives may be replaced with up to 12 semester hours of relevant independent studies Independent Study (BIOE 7978).

**Minimum semester hours required: 16 SH**

**TRACK 1: BIOMEDICAL IMAGING AND SIGNAL PROCESSING**  
**Track Managers:** Dana Brooks and Deniz Erdogmus

The biomedical imaging and signal processing track reflects Northeastern University’s outstanding research profile in various aspects of biological and biomedical imaging and image processing and signal processing. This is evidenced by the Gordon Center for Subsurface Sensing and Imaging Systems, the Center for Communications and Digital Signal Processing Research, and the strong externally funded active research groups and faculty whose interests lie at the intersection of imaging, signal processing technologies, and biological and medical applications.

The courses in this track concentrate largely on general mathematical methods for signal and image processing and image formation and on image acquisition modalities and applications. Research in this area takes place at the intersection of these technical streams, and students completing the track will have a sufficiently strong background in the component areas to be able to carry out high-quality research efforts.

**TRACK 2: BIOMECHANICS AND MECHANOBIOLOGY**  
**Track Managers:** Sinan Muftu and Jeffrey Ruberti

Biomechanics and mechanobiology are linked by the biological response to applied forces and strains. To understand the overall effect of load on biological systems, it is important to consider not only the deformation and shear rates that result from force application but also the short- and long-term biological responses. The biomechanics and mechanobiology track reflects this understanding and leverages the strong faculty research at Northeastern, which is attempting to tie biomechanics to biological responses at multiple scales.

The biomechanics track is designed to capitalize on the substantial expertise in the mechanical and industrial engineering department, which has a strong fundamental research program in biomechanics. Faculty in the department perform investigations that comprise theoretical, computational, and experimental investigations.

**TRACK 3: BIOMEMS/BIONANO**  
**Track Managers:** Edgar Goluch and Shashi Murthy

The bioMEMs/bioNANO track reflects Northeastern University’s strength as indicated by the NSF Center for High Rate Nanomanufacturing, the NSF/NCI Nanomedicine IGERT training grant, and the strong pharmaceutical sciences department. In addition, Northeastern also has a research presence in MEMs that, when combined with the bioengineering curriculum, presents significant interdisciplinary opportunities for students in the program.

**TRACK 4: BIOCHEMICAL AND BIOENVIRONMENTAL**  
**Track Managers:** Rebecca Carrier and April Gu

The track reflects strengths in biochemical engineering and bioenvironmental engineering by active research programs focused in pharmaceutical bioprocessing, biomaterials, tissue engineering, drug delivery, environmental microbiology, biotreatment/bioremediation, and environmental modeling.

**TRACK 5: MOTOR CONTROL**  
**Track Managers:** Rifat Sipahi and Dagmar Sternad

The motor control track is designed to capitalize on the collective expertise of cross-disciplinary collaborations between existing Northeastern faculty whose research lies at the intersection of sensorimotor control systems, neuroscience, and dynamical systems.
Insights into learning and coordination of functional motor behavior provide the basis for a better understanding of neurological diseases of motor function such as stroke, Parkinson’s disease, and cerebral palsy. Insights will be the foundation for designing better therapy and rehabilitation.

**TRACK 6: BIOCOMPUTING**  
**Track Managers:** Stefano Basagni and Miriam Leeser

The biocomputing track draws on strengths in computer engineering and computation applied to bioengineering applications.

**TRACK 7: CELL AND TISSUE ENGINEERING**  
**Track Managers:** Anand Asthagiri and Erin Cram

Cell and tissue engineering is a major strength at Northeastern University with several research labs focused on understanding and engineering living cells and tissues. These labs are elucidating the quantitative principles that govern cell fate decisions and are developing design strategies to promote the assembly and patterning of multicellular systems into viable, functional tissues. Cells are remarkable physicochemical systems that sense, respond, and actively reshape their rich microenvironment. Parsing the dialogue between the microenvironment and cells and elucidating design strategies to engineer the dynamic cellular milieu has far-reaching implications for biomedicine, including applications such as tissue engineering and the development of novel therapeutic strategies.

This pioneering, multidisciplinary research is enabled by strengths at Northeastern in key foundational areas, such as biomolecular engineering, computational modeling, developmental biology, imaging, materials science, micro- and nanofluidics, mechanobiology, molecular cell biology, and systems biology.

Cell and tissue engineering is widely recognized as a core subfield of bioengineering. A formal track in this area offers our students a program of study that capitalizes on a major strength at Northeastern.

**TRACK 8: GENERAL BIOENGINEERING STUDIES**  
**Track Manager:** Jeffrey Ruberti

**Program Requirements**  
Complete all courses and requirements listed below unless otherwise indicated.

**MILESTONES**  
- Qualifying examination and area examination
  - Annual review
  - Dissertation proposal
  - Dissertation committee
  - Dissertation defense

**GENERAL REQUIREMENTS**  
- Seminar: BIOE 7390, Seminar, 0 semester hours
  - Approved Course Work: Select courses in consultation with faculty advisor, 16 semester hours
  - Dissertation Courses: BIOE 9990, Dissertation (taken twice), 0 semester hours

**Program Credit/GPA Requirements**  
- 16 total semester hours required
- Minimum 3.000 GPA required

**Bioengineering, MSBioE**

Students accepted to the Master of Science in Bioengineering program have the option to carry out research or complete a course-only program of studies:

- Thesis option resulting in the preparation and defense of an MS thesis (BIOE 7990, Master’s Thesis, 8 semester hours of research)
- MS project option (BIOE 7890, Master’s Project, 4 semester hours of research)
- Course-only option
- Graduate certificate option

Students are required to complete a total of 33 semester hours of courses with a minimum cumulative GPA of 3.000 to graduate with an MS in Bioengineering. All MS students are required to take two core courses (BIOE 5100, Medical Physiology, and BIOE 6000, Principles of Bioengineering). Each student must select a concentration and complete two required courses specific to that concentration. In addition, each student needs to complete 12 semester hours of technical electives if they are completing the thesis option, 16 semester hours for the project option, or 20 semester hours for the course-only option. Courses are selected from an approved list of technical electives for their concentration. Enrollment in BIOE 7390, Seminar, is required each term.

Students have four concentrations from which to choose:

- Concentration 1: Bioimaging and Signal Processing
- Concentration 2: Cell and Tissue Engineering
- Concentration 3: Biomechanics
- Concentration 4: Biomedical Devices

**Concentrations**  
A concentration is required. Each concentration has two required courses and a list of technical electives from which the student should select three to five courses, depending on whether he or she selects the thesis option, project option, or course-only option.

**CONCENTRATION IN BIOIMAGING AND SIGNAL PROCESSING**  
This concentration is appropriate for students interested in biomedical imaging and processing of a wide array of signals from biological systems and biomedical instruments. Two courses (EECE 7200, Linear Systems Analysis, and EECE 7204, Applied Probability and Stochastic Processes) are required of all students choosing this option. Extensive additional options are available as approved technical electives.

**CONCENTRATION IN CELL AND TISSUE ENGINEERING**  
The cell and tissue engineering concentration is appropriate for students interested in molecular, cell, and tissue engineering. Two courses (BIOE 5410, Molecular Bioengineering, and BIOE 5380, Advanced Biomolecular Dynamics and Control) are required of all cell and tissue engineering students. There is an extensive list of approved technical electives to choose from to complete the degree.

**CONCENTRATION IN BIOMECHANICS**  
Students who join the biomechanics concentration will cover multiscale mechanics, including whole-body movement, mechanical properties of biomaterials, and fluid mechanics of physiological fluids. The two courses required of all biomechanics concentration students are ME 5665, Musculoskeletal Biomechanics, and ME 5650, Advanced Mechanics of Materials.
CONCENTRATION IN BIOMEDICAL DEVICES
The biomedical devices concentration is appropriate for students interested in the design and implementation of biological devices and implants. Two core courses, BIOE 5810, Design of Biomedical Instrumentation, and BIOE 5250, Design, Manufacture, and Evaluation of Medical Devices, are required for all students in this concentration.

Graduate Certificate Options
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

Chemical Engineering
• Process Safety Engineering (p. 123)

Computer Systems Engineering
• Computer Systems Engineering (p. 139)

Energy Systems
• Energy Systems (p. 161)
• Renewable Energy (p. 160)
• Energy Systems Management (p. 161)
• Sustainable Energy Systems (p. 161)

Engineering Management
• Engineering Business (p. 167)
• Engineering Management (p. 167)
• Technology Systems Management (p. 168)
• Engineering Economic Decision Making (p. 168)
• Supply Chain Engineering Management (p. 168)
• Lean Six Sigma (p. 169)

Industrial Engineering
• Data Mining Engineering (p. 177)

Telecommunication Systems Management
• IP Telephony Systems (p. 204)
• Broadband Wireless Systems (p. 204)

GORDON INSTITUTE OF ENGINEERING LEADERSHIP
Master's Degree in Bioengineering with Graduate Certificate in Engineering Leadership
Students may complete a master’s degree in Bioengineering in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 33 semester hour degree and certificate will require 16 hours of advisor-approved Bioengineering technical courses.

Engineering Leadership (p. 163)

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Note: This major requires a concentration: biomechanics, biomedical devices, bioimaging and signal processing, or cell and tissue engineering. Consult your college administrator.

General Requirements
Seminar
BIOE 7390 Seminar 0

Required Core
A grade of C or higher is required in each course:
BIOE 5100 Medical Physiology 4
BIOE 6000 Principles of Bioengineering 1

Concentrations
Complete one of the following four concentrations:
• Bioimaging and Signal Processing (p. 117)
• Cell and Tissue Engineering (p. 118)
• Biomechanics (p. 118)
• Biomedical Devices (p. 118)

BIOIMAGING AND SIGNAL PROCESSING
Required Course Work
EECE 7200 Linear Systems Analysis 4
EECE 7204 Applied Probability and Stochastic Processes 4

Course Work Option
Complete 20 semester hours from the course list. 20

Project Option
BIOE 7890 Master's Project 4

Electives
Complete 16 semester hours from the course list. 16

Thesis Option
BIOE 7990 Thesis (4SH, take twice) 8

Electives
Complete 12 semester hours from the course list. 12

Certificate Option
Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

Complete 16 semester hours of graduate certificate required course work. (p. 162)
Complete 4 semester hours from the course list: 4

Course List
BIOE 5320 Advanced Biomedical Measurements and Instrumentation 4
BIOE 5235 Biomedical Imaging 4
BIOE 7100 Special Topics in Biomedical Imaging and Signal Processing 4
BIOL 5581 Biological Imaging 4
EECE 5639 Computer Vision 4
EECE 5648 Biomedical Optics 4
EECE 7203 Complex Variable Theory and Differential Equations 4
EECE 7204  Applied Probability and Stochastic Processes  4
EECE 7314  Auditory Signal Processing  4

CELL AND TISSUE ENGINEERING

Required Course Work
BIOE 5410  Molecular Bioengineering  4
BIOE 5380  Advanced Biomolecular Dynamics and Control  4

Course Work Option
Complete 20 semester hours from the course list.  20

Project Option
BIOE 7890  Master’s Project  4

Electives
Complete 16 semester hours from the course list.  16

Thesis Option
BIOE 7990  Thesis (4SH, take twice)  8

Electives
Complete 12 semester hours from the course list.  12

Certificate Option
Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

Complete 16 semester hours of graduate certificate required course work. (p. 162)
Complete 4 semester hours from the course list:  4

Course List
BIOE 5630  Physiological Fluid Mechanics  4
BIOE 7001  Biomatierals  4
BIOE 7300  Special Topics in Biomechanics  4
BIOL 5553  Biology of Muscle: Molecules to Movements  4
BIOL 5601  Multidisciplinary Approaches in Motor Control  4
BIOL 7384  Topics in Integrative Biology  2
EECE 7200  Linear Systems Analysis  4
EECE 7203  Complex Variable Theory and Differential Equations  4
EECE 7367  Robotics and Automation Systems  4
ME 5650  Advanced Mechanics of Materials  4
ME 5655  Dynamics and Mechanical Vibration  4
ME 5657  Finite Element Method  4
ME 5659  Control Systems Engineering  4
ME 5667  Solid Mechanics of Cells and Tissues  4
ME 7210  Elasticity and Plasticity  4
ME 7238  Advanced Finite Element Method  4
ME 7240  Composite Materials  4
ME 7245  Fracture Mechanics and Failure Analysis  4
ME 7255  Continuum Mechanics  4

BIOMEDICAL DEVICES

Required Course Work
BIOE 5810  Design of Biomedical Instrumentation  4
BIOE 5250  Design, Manufacture, and Evaluation of Medical Devices  4

Course Work Option
Complete 20 semester hours from the course list.  20

Project Option
BIOE 7890  Master’s Project  4

Electives
Complete 16 semester hours from the course list.  16

Thesis Option
BIOE 7990  Thesis (4SH, take twice)  8

Electives
Complete 12 semester hours from the course list.  12

Certificate Option
Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

Complete 16 semester hours of graduate certificate required course work. (p. 162)
Complete 4 semester hours from the course list:  4

Course List
BIOE 5850  Design of Implants  4
BIOE 7001  Biomatierals  4
BIOE 7400  Special Topics in Biomedical Devices  4
CHEM 5500  Introduction to Regulatory Science  2
EECE 5606  Micro- and Nanofabrication  4
ME 5659  Control Systems Engineering  4
ME 5665  Musculoskeletal Biomechanics  4
Nanomanufacturing 1 4
ME 7262 Nanomanufacturing I 4
NNMD 5470 Nano- and Biomedical Commercialization: From Concept to Market 3
NNMD 5370 Nanomedicine Research Techniques 4

Thomas J. Webster, PhD, Professor and Chair, th.webster@northeastern.edu

The department offers a Master of Science and a Doctor of Philosophy in Chemical Engineering. The MS degree is offered as either a thesis or a non-thesis degree. Most courses are offered in the late afternoon or early evening to make them accessible to part-time students pursuing full-time industrial careers. A full-time MS student may apply for participation in the cooperative education plan. Master’s students pursuing the thesis option must first gain the consent of their advisor prior to participating in the cooperative education plan. The MS thesis and PhD degrees are only offered as a full-time program. Any deviations from the curriculum must be addressed by petition to the graduate committee and will be considered on a case-by-case basis.

Candidates pursuing a thesis MS or a PhD are able to select thesis topics from a diverse range of faculty research interests. New graduate students can learn about ongoing research topics from individual faculty members, faculty websites, and graduate student seminars. Graduate student seminars are held on a regular basis and provide an interactive forum for learning and exchanging research ideas.

Graduate Certificate Options
Students enrolled in a master’s degree in Chemical Engineering have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION
Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Programs
Doctor of Philosophy (PhD)
- Chemical Engineering (p. 119)
- Chemical Engineering—Advanced Entry (p. 120)

Master of Science in Chemical Engineering (MSCHE)
- Chemical Engineering (p. 122)

Graduate Certificate
- Process Safety Engineering (p. 123)

Chemical Engineering, PhD

Each student admitted to the PhD program in chemical engineering will initially be designated a doctoral student. Upon successful completion of the requirements for doctoral candidacy as described below, a student is reclassified as a doctoral candidate. After establishing candidacy, a student must complete a program of academic course work and a dissertation under the direction of a dissertation advisor. All doctoral candidates must also pass a final oral examination.

Qualifying for Doctoral Candidacy
To qualify for doctoral candidacy, the student must demonstrate mastery of the four core areas of chemical engineering (thermodynamics, kinetics, transport, and mathematics) through course performance. To become a doctoral candidate, students must have no grades below a B and must maintain a GPA of 3.500 or above, typically at the end of the first year, as an average considering all four core courses.

In addition, each student must also demonstrate critical thinking, analysis, and experimental planning skills related to their dissertation research topic through a written candidacy proposal and an oral defense of this proposal. The student must pass, as determined by the student’s dissertation committee, this oral candidacy proposal defense in order to advance to doctoral candidacy. The oral presentation will be open to students, faculty, and the student’s committee. The student earns the classification of doctoral candidate upon successful completion of these requirements.

Course Requirements
A minimum of 24 semester hours (SH) of academic course work, not including any independent study credits, beyond the bachelor’s degree is required. The 24 SH must include at least 16 SH of academic course work (exclusive of thesis or dissertation) taken at Northeastern University. All four of the core courses (see table below) must be included in the student’s academic graduate course work.

To meet the full-time registration requirement for PhD students who have completed the majority of their course work and not yet reached PhD candidacy, a 0-credit course, Candidacy Preparation—Doctoral (CHME 8960), can be taken if needed to fulfill full-time course registration. The course is an individual instruction course, billed at 1 SH, and graded S or U. There is no course content, and students must register in a section with their research or academic advisor as the “instructor.”

After reaching PhD candidacy, students are required to register for Dissertation (CHME 9990) for two consecutive semesters. This is then followed by registration for Dissertation Continuation (CHME 9996) in each semester thereafter until the dissertation has been completed and defended.

Note: No course credits are awarded for Dissertation (CHME 9990) or Dissertation Continuation (CHME 9996); however, a student is considered full-time if registered for either of these courses. All students pursuing a doctoral degree must enroll in the department’s seminar course for each semester they are matriculating toward their degree.

Students will be advised on their courses for the first semester by the associate chair of the chemical engineering department. After
the first semester, students will work with their advisor to determine appropriate courses and course schedule to meet their educational needs and aspirations. Upon consultation with the dissertation advisor, a student may take up to 44 SH of course credit without additional financial penalty. Students and advisors should keep in mind that the requirements for doctoral candidacy include all four core courses and the proposal defense and that the university residency requirement requires two semesters of academic studies after becoming a doctoral candidate.

**Language Requirement**

There is no foreign language requirement for the Doctor of Philosophy degree. However, each candidate must be proficient in technical writing and oral presentation in the English language. The graduate committee may require additional course work to improve language proficiency, if necessary.

**Residence Requirement**

A student satisfies the residence requirement by completing one academic year of full-time graduate studies during two consecutive academic semesters after qualifying for doctoral candidacy. Additional required course work (exclusive of seminars) may be completed during this period. Students are required to be continually enrolled while pursuing the completion of the dissertation.

**Dissertation**

After a student establishes doctoral candidacy, he or she must complete a dissertation that embodies the results of extended original research and includes material suitable for publication. The student is responsible for proposing a dissertation committee to be approved by the dissertation advisor at least one month prior to the dissertation defense. The committee must have a minimum of three members, in addition to the primary advisor. The primary dissertation advisor must be a faculty member in the Department of Chemical Engineering. Additionally, one of these committee members must be external to the Department of Chemical Engineering. Committee membership is not limited to faculty at Northeastern University, nor to engineering faculty. The student is encouraged to consider experts in the dissertation topic and to work with the dissertation advisor to create a meaningful and helpful committee. The dissertation committee will approve the dissertation in its final form. Required dissertation format is the same as for the MS thesis, and the graduate school requirements and electronic submittal instructions can be found on the College of Engineering’s web page (http://www.coe.neu.edu/student-services/dissertation/thesis-instructions). Students are responsible for contacting the Graduate School of Engineering for any updates to dissertation requirements and appropriate deadlines.

**Dissertation Defense and Final Oral Examination**

This comprehensive examination includes the public dissertation defense as well as a final oral examination to include the subject matter of the doctoral dissertation and significant developments in the field of the dissertation work. The oral presentation will be open to the public, including students, faculty, and the student’s committee.

**Departure Prior to Dissertation Completion**

Occasionally, students have left the Department of Chemical Engineering prior to completion of all degree requirements. In such instances, a student cannot submit a dissertation for credit beyond three years after he or she stops actively pursuing the research. Exceptions may be granted upon petition to the departmental graduate committee. Petitions must demonstrate extenuating circumstances and prove that the research is still of value to the profession.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Annual review
Dissertation proposal
Dissertation committee
Dissertation defense

**General Requirements**

A minimum of 24 semester hours of academic course work is required. Independent study credits do not apply to the 24 required semester hours.

**Core**

Requires the following four courses with a GPA of 3.500 or higher:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHME 7320</td>
<td>Chemical Engineering Mathematics</td>
<td>4</td>
</tr>
<tr>
<td>CHME 7330</td>
<td>Chemical Engineering Thermodynamics</td>
<td>4</td>

Complete all courses and requirements listed below unless otherwise indicated.

**MILESTONES**

| Annual review | Dissertation proposal | Dissertation committee | Dissertation defense |

**GENERAL REQUIREMENTS**

A minimum of 24 semester hours of academic course work is required. Independent study credits do not apply to the 24 required semester hours.

**Core**

Requires the following four courses with a GPA of 3.500 or higher:

| CHME 7320 | Chemical Engineering Mathematics | 4 |
| CHME 7330 | Chemical Engineering Thermodynamics | 4 |
| CHME 7340 | Chemical Engineering Kinetics | 4 |
| CHME 7350 | Transport Phenomena | 4 |

**Seminar**

Must be taken each semester:

| CHME 7390 | Seminar | 0 |

**Electives**

Requires 8 semester hours. Consult your faculty advisor for acceptable courses.

**Dissertation**
The Master of Science in Chemical Engineering is normally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields. Students wishing to pursue the master’s degree but with undergraduate educational backgrounds other than chemical engineering may be required to complete supplementary undergraduate course work. These courses are in addition to the minimum course requirements. Students enrolled in the program are encouraged to seek guidance from their instructors and advisor regarding additional course work that may supplement the graduate curriculum.

Students originally admitted to the master’s degree program who wish to switch to the PhD program must petition the associate chair for graduate studies and follow the procedure detailed under the Administrative Procedure Section (p. 106) for the College of Engineering. If admission is granted, then the student must satisfy all the requirements of the doctoral degree program, including the requirements for doctoral candidacy.

Course Requirements
A minimum of 32 semester hours of academic work is required to qualify for the Master of Science degree in chemical engineering.

If pursuing a thesis option, at least 8 semester hours of thesis credit must be included as part of these 32 semester hours of credits. In addition, each student pursuing a thesis option must enroll in the department’s seminar course for each semester they are matriculating toward their degree. Students enrolled in the department’s seminar course are encouraged to participate in the seminar by providing a research presentation regarding their research project under the guidance of their advisor. The faculty advisor and the student establish the sequence of courses that students take to pursue the Master of Science in Chemical Engineering. Full-time Master of Science degree students who complete the required 8 semester hours of thesis work (Thesis (CHME 7990)) are required to register for Thesis Continuation (CHME 7996) each semester until their thesis is completed. Note that although no credits are associated with Thesis Continuation (CHME 7996), a student registered for this course is considered full-time.

If pursuing a nonthesis option, students must complete a minimum of 32 semester hours of course work and no enrollment in the seminar course is required. See required core courses and example elective courses for all graduate students (p. 123).

Thesis Requirements
Students pursuing a Master of Science in Chemical Engineering with thesis must submit to the Graduate School of Engineering a written thesis that is approved by the thesis committee and department chair. See the graduate school requirements and electronic submittal instructions (http://www.coe.neu.edu/student-services/dissertation/thesis-instructions). MS with thesis students must also complete an oral master’s thesis defense in order to successfully complete the program. The student will be expected to form a master’s thesis committee, composed of a minimum of three members—one who is the advisor, one other faculty member from the chemical engineering department, and one member from outside the department. The oral presentation will be open to the public, including students, faculty, and the candidate’s committee.

Part-time Students
Part-time students may progress according to their plans and time constraints but within the seven-year time limit. A minimum of 32 semester hours of academic course work is required for part-time students. The thesis and seminar course are not required for part-time students pursuing a master’s degree.

Master of Science students wishing to change their status from part-time to full-time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

Departure Prior to Thesis Completion
Occasionally, students have left the chemical engineering department prior to completion of all degree requirements. In such instances, longtime intervals have often elapsed before thesis or manuscript submission. Accordingly, the department has adopted the guideline that a student cannot submit a thesis for credit beyond three years after the student stops actively pursuing the research. Exceptions may be granted upon petition to the departmental graduate committee. Petitions must demonstrate extenuating circumstances and prove that the research is still of value to the profession.

Graduate Certificate Options
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

Chemical Engineering
- Process Safety Engineering (p. 123)
- Computer Systems Engineering
- Computer Systems Engineering (p. 139)

Energy Systems
- Energy Systems (p. 161)
- Renewable Energy (p. 160)
- Energy Systems Management (p. 161)
CERTIFICATE OPTION
Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

Complete 16 semester hours of graduate certificate required 16 course work. (p. 162)

Process Safety Engineering, Graduate Certificate

The Graduate Certificate in Process Safety Engineering focuses on the integration of chemical engineering skills with the knowledge of process safety and regulation with specific attention on designing and developing solutions for industrial firms with the goal of creating environments that are safer and in compliance with regulatory rules and regulations.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of chemical engineering knowledge and skills to lead efforts within companies to plan and implement process safety designs that assist in meeting the regulatory requirements and confirming code compliance within an industrial firm in order to maintain the safety, health, and welfare of their employees and the public as well as making industrial firms safer and profitable.

Program Requirements

The Department of Civil and Environmental Engineering (CEE) offers graduate programs leading to the degrees of Master of Science in Civil Engineering, Master of Science (without specification), and Doctor of Philosophy in Civil Engineering. At the master's level, five areas of concentration are offered:

- Construction management
- Environmental and water systems engineering
- Geotechnical/geoenvironmental engineering
- Structural engineering
- Transportation engineering

Students may pursue the Master of Science degree program on either a full- or part-time basis. Students must pursue the PhD program on a basis consistent with the residence requirements for the degree as described in the curriculum requirements. The curriculum includes areas of concentration in construction management, environmental engineering, geotechnical/geoenvironmental engineering, structural engineering, and transportation engineering. Students in all master's degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.000.

There are detailed course and degree requirements for different concentration areas. Three types of courses fulfill the required semester hours, including required core courses, restricted electives, and other electives. Graduate courses that are not listed as another elective may also be considered as other electives, but these courses require a petition approved by the concentration advisor via the Graduate School of Engineering petition system. Links to the individual concentrations may be found under the Programs tab.

**Graduate Certificate Options**

Students enrolled in a master's degree in Civil Engineering have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

**GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION**

Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

**Programs**

**Doctor of Philosophy (PhD)**

- Civil Engineering (p. 124)
- Civil Engineering—Advanced Entry (p. 125)

**Master of Science (MS)**

- Engineering and Public Policy with Concentration in Energy and Environment (p. 133)
- Engineering and Public Policy with Concentration in Infrastructure Resilience (p. 134)

**Master of Science in Civil Engineering (MSCivE)**

- Civil Engineering with Concentration in Construction Management (p. 126)
- Civil Engineering with Concentration in Environmental and Water Systems (p. 128)
- Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering (p. 129)
- Civil Engineering with Concentration in Structural Engineering (p. 130)
- Civil Engineering with Concentration in Transportation Engineering (p. 132)

**Master of Science in Environmental Engineering (MSENVE)**

- Environmental Engineering (p. 136)

**Civil Engineering, PhD**

Award of the Doctor of Philosophy degree is based on exceptional performance in course work as well as evidence of ability to formulate and execute original research. The PhD program has two components:

1. An academic program of graduate-level courses that provides depth in a specific area of civil engineering (the major field) as well as other course work that provides additional exposure at an advanced level to one or more disciplines
2. The dissertation, an extended independent research effort on a relevant technical problem resulting in an original contribution to the field

Each student's mastery of subject matter is measured by a qualifying examination covering a subset of subjects selected from the major field. A doctoral dissertation committee periodically monitors research progress, and the candidate is required to present and defend his or her research results before an expanded group of faculty and research staff upon completion of the work.

The doctoral program is deliberately designed to be flexible with respect to subject area. Since the PhD is primarily a research degree, the program must be adaptable to changes in research needs.
Qualifying Examination and Degree Candidacy
The qualifying exam includes written and oral components. Its content depends upon the educational background and objectives of the student. In general, the written component covers subject matter at the master’s degree level selected from the major field and includes basic engineering and science disciplines, as well as civil engineering application areas. The oral component measures general comprehension and aptitude for research. If a student fails the exam, he or she may retake it one time with the permission of the qualifying examination committee.

Students must take the qualifying exam during the first eighteen months of their PhD program. PhD students who start their graduate program at Northeastern with a BS degree shall take the qualifying exam within the first thirty months after entering the program. Upon successful completion of the exam, the student is classified as a doctoral candidate.

Dissertation
Once degree candidacy is established, a doctoral candidate may proceed with his or her dissertation. The candidate must write a dissertation proposal and name a civil and environmental engineering faculty member as the dissertation advisor. A dissertation committee formed by the student and his or her dissertation advisor will monitor progress and approve the final document. The dissertation committee shall have no fewer than four members, at least two of whom must be full-time faculty from the Department of Civil and Environmental Engineering (CEE). Each doctoral candidate must defend his or her dissertation within seven years from the start of the PhD program.

Course Requirements
Each student, along with a faculty advisor, must jointly develop a proposal defining the content of the academic program, subject to review by the qualifying examination committee. Intellectual rigor, connectivity of subject matter, and compatibility with departmental interests are critical issues. The qualifying exam committee’s approval of the proposal represents a mutual agreement between the student and the committee. The CEE department encourages flexibility in program definition, especially in areas where complementary courses exist in other departments or where expertise resides outside the department and where the objective is to introduce new technology in civil engineering practice.

The academic program must include at least 52 semester hours of approved course work. Consult your faculty advisor for acceptable courses. Please note that a maximum of 4 semester hours of independent study (such as special project in civil engineering) toward the minimum course requirements in less time but should anticipate at least two years of full-time effort.

To meet the full-time registration requirement for PhD students who have completed the majority of their course work and not yet reached PhD candidacy, a zero-credit course, Exam Preparation—Doctoral (CIVE 8960), can be taken if needed to fulfill full-time course registration. The course is an individual instruction course, billed at 1 semester hour, and graded S or U. There is no course content, and students must register in a section with their research or academic advisor as the “instructor.”

Upon successful completion of the qualifying exam and the majority of required course work, each doctoral candidate must register in two consecutive semesters for Dissertation (CIVE 9990). Upon completion of this sequence, the candidate must register for Dissertation Continuation (CIVE 9996) in every semester until the dissertation is complete. Students may not register for Continuation until they fulfill the two-semester dissertation sequence.

Residence Requirement
After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residence. The total effort for a PhD program involves a minimum of three years of full-time work beyond the bachelor’s degree. Students who enter the doctoral program with a Master of Science degree may complete the requirements in less time but should anticipate at least two years of full-time effort.

Language Requirement
Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional course work in the case of any deficiency in these areas.

Comprehensive Examination
The comprehensive exam is a defense of the doctoral research work and an examination on subject matter related to the dissertation area.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

MILESTONES
Qualifying examination and comprehensive examination
Annual review
Dissertation proposal
Dissertation committee
Dissertation defense

GENERAL REQUIREMENTS
Complete 52 semester hours of approved course work. Consult your faculty advisor for acceptable courses. Please note that a maximum of 4 semester hours of Independent Study (CIVES 7978) will be accepted toward the 52-semester-hour requirement.

Program Credit/GPA Requirements
52 total semester hours required
Minimum 3.000 GPA required

Award of the Doctor of Philosophy degree is based on exceptional performance in course work as well as evidence of ability to formulate and execute original research. The PhD program has two components:

1. An academic program of graduate-level courses that provides depth in a specific area of civil engineering (the major field) as well as other course work that provides additional exposure at an advanced level to one or more disciplines
2. The dissertation, an extended independent research effort on a relevant technical problem resulting in an original contribution to the field

Each student’s mastery of subject matter is measured by a qualifying examination covering a subset of subjects selected from the major
field. A doctoral dissertation committee periodically monitors research progress, and the candidate is required to present and defend his or her research results before an expanded group of faculty and research staff upon completion of the work.

The doctoral program is deliberately designed to be flexible with respect to subject area. Since the PhD is primarily a research degree, the program must be adaptable to changes in research needs.

**Qualifying Examination and Degree Candidacy**

The qualifying exam includes written and oral components. Its content depends upon the educational background and objectives of the student. In general, the written component covers subject matter at the master’s degree level selected from the major field and includes basic engineering and science disciplines, as well as civil engineering application areas. The oral component measures general comprehension and aptitude for research. If a student fails the exam, he or she may retake it one time with the permission of the qualifying examination committee.

Students must take the qualifying exam during the first eighteen months of their PhD program. Upon successful completion of the exam, the student is classified as a doctoral candidate.

**Dissertation**

Once degree candidacy is established, a doctoral candidate may proceed with his or her dissertation. The candidate must write a dissertation proposal and name a civil and environmental engineering faculty member as the dissertation advisor. A dissertation committee formed by the student and his or her dissertation advisor will monitor progress and approve the final document. The dissertation committee shall have no fewer than four members, at least two of whom must be full-time faculty from the Department of Civil and Environmental Engineering (CEE). Each doctoral candidate must defend his or her dissertation within seven years from the start of the PhD program.

**Course Requirements**

Each student, along with a faculty advisor, must jointly develop a proposal defining the content of the academic program, subject to review by the qualifying examination committee. Intellectual rigor, connectivity of subject matter, and compatibility with departmental interests are critical issues. The qualifying exam committee's approval of the proposal represents a mutual agreement between the student and the committee. The CEE department encourages flexibility in program definition, especially in areas where complementary courses exist in other departments or where expertise resides outside the department and where the objective is to introduce new technology in civil engineering practice.

Students with a master’s degree in civil engineering must complete a minimum of 20 semester hours of course work at Northeastern University.

A student may count no more than 4 semester hours of independent study (such as special project in civil engineering) toward the minimum course requirements.

To meet the full-time registration requirement for PhD students who have completed the majority of their course work and not yet reached PhD candidacy, a zero-credit course, Exam Preparation—Doctoral (CIVE 8960), can be taken if needed to fulfill full-time course registration. The course is an individual instruction course, billed at 1 semester hour, and graded S or U. There is no course content, and students must register in a section with their research or academic advisor as the “instructor.”

Upon successful completion of the qualifying exam and the majority of required course work, each doctoral candidate must register in two consecutive semesters for Dissertation (CIVE 9990). Upon completion of this sequence, the candidate must register for Dissertation Continuation (CIVE 9996) in every semester until the dissertation is complete. Students may not register for Continuation until they fulfill the two-semester dissertation sequence.

**Residence Requirement**

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residence. Students who enter the doctoral program with a Master of Science degree may complete the requirements in less time but should anticipate at least two years of full-time effort.

**Language Requirement**

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional course work in the case of any deficiency in these areas.

**Comprehensive Examination**

The comprehensive exam is a defense of the doctoral research work and an examination on subject matter related to the dissertation area.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**MILESTONES**

- Qualifying examination and comprehensive examination
- Annual review
- Dissertation proposal
- Dissertation committee
- Dissertation defense

**GENERAL REQUIREMENTS**

Complete 20 semester hours of approved course work. Consult your faculty advisor for acceptable courses. Please note that a maximum of 4 semester hours of Independent Study (CIVE 7978) will be accepted toward the 20-semester-hour requirement.

**DISSERTATION COURSES**

CIVE 9990  Dissertation (repeat twice)  0

**PROGRAM CREDIT/GPA REQUIREMENTS**

20 total semester hours required
Minimum 3.00 GPA required

This program is intended for students interested in construction management and engineering or a closely related field. It includes required core courses primarily from the Department of Civil and Environmental Engineering, complemented by electives in civil and environmental engineering and other departments such as mechanical and industrial engineering and business administration. Based on proven proficiency in given areas, students may waive certain core courses and replace them with alternate elective courses.

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master’s Degree in Civil Engineering with a concentration in Construction Management with Graduate Certificate in Engineering Leadership

Students may complete a master’s degree in Civil Engineering with a concentration in Construction Management in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 34 semester hour degree and certificate will require 16 hours of advisor-approved Construction Management technical courses.

Civil Engineering with Concentration in Environmental and Water Systems, MSCIVE

This program integrates the study of infrastructure, hydrology, hydraulics, numerical modeling, remote sensing, spatial and temporal data analysis, and water quality to provide students with the knowledge and tools for developing and managing sustainable, resilient water resources and infrastructure. It includes required core courses from the Department of Civil and Environmental Engineering, complemented by electives in electrical and computer engineering, mechanical and industrial engineering, and earth and environmental sciences.

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Civil Engineering with a concentration in Environmental and Water Systems with Graduate Certificate in Engineering Leadership

Students may complete a master's degree in Civil Engineering with a concentration in Environmental and Water Systems in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 32 semester hour degree and certificate will require 16 hours of advisor-approved Environmental and Water Systems technical courses.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Core Courses

Complete two of the following: 8

- CIVE 7100 Applied Time Series and Spatial Statistics
- CIVE 7260 Hydrologic Modeling
- CIVE 7261 Surface Water Quality Modeling
- CIVE 7263 Groundwater Quality Modeling
- CIVE 7392 Special Topics in Environmental Engineering (Hydraulic Modeling)

Options

Complete one of the following options:

COURSE WORK OPTION

Complete 12 semester hours from the Restricted Elective List below. 12

Complete 12 semester hours from the Other Elective List below. 12

REPORT OPTION

CIVE 8674 Master's Report 4

Complete 12 semester hours from the Restricted Elective List below. 12

Complete 8 semester hours from the Other Elective List below. 8

THESIS OPTION

CIVE 7990 Thesis 8

Complete 12 semester hours from the Restricted Elective List below. 12
Complete 4 semester hours from the Other Elective List below.

**CERTIFICATE OPTION**

Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

**Required Course Work**

Complete 16 semester hours of graduate certificate course work (p. 162) 16

**Restricted Elective**

Complete 8 semester hours from the Restricted Elective List below. 8

**Course Lists**

**RESTRICTED ELECTIVE LIST**

Any required core course not used to meet the required core course requirement can be taken as a restricted elective.

- CIVE 5250 Organic Pollutants in the Environment 4
- CIVE 5270 Environmental Protection and Management 4
- CIVE 5275 Life Cycle Assessment of Materials, Products, and Infrastructure 4
- CIVE 5280

---

**Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering, MSCivE**

This program includes study in the areas of soil mechanics-foundations and geoenvironmental engineering. It includes studies of soil and related earth materials for problems related to the protection of human health and the environment. Related areas include soil mechanics, fate/transport in subsurfaces, subsurface remediation, and others. The degree requirements include core courses from the Department of Civil and Environmental Engineering, complemented by electives in civil and environmental engineering, as well as electives from other departments such as mechanical and industrial engineering.

Complete one of the following options:

COURSE WORK OPTION
Complete 12 semester hours from the Restricted Elective List below.
Complete 8 semester hours from the Other Elective List below.

REPORT OPTION
CIVE 8674 Master's Report 4
Complete 8 semester hours from the Restricted Elective List below.
Complete 8 semester hours from the Other Elective List below.

THESIS OPTION
CIVE 7990 Thesis 8

Chemical Engineering
- Process Safety Engineering (p. 123)

Computer Systems Engineering
- Computer Systems Engineering (p. 139)

Energy Systems
- Energy Systems (p. 161)
- Renewable Energy (p. 160)
- Energy Systems Management (p. 161)
- Sustainable Energy Systems (p. 161)
Complete 8 semester hours from the Restricted Elective List below.

Complete 4 semester hours from the Other Elective List below.

**CERTIFICATE OPTION**

Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

**Project**

Complete 16 semester hours of graduate certificate course work. (p. 162)

**Restricted Elective**

Complete 4 semester hours from the Restricted Elective list below.

**GORDON INSTITUTE OF ENGINEERING LEADERSHIP**

**Master's Degree in Engineering and Public Policy with a concentration in Energy and Environment with Graduate Certificate in Engineering Leadership**

Students may complete a master's degree in Engineering and Public Policy with a concentration in Energy and Environment in addition to...
earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 36 semester hour degree and certificate will require 16 hours of advisor-approved Energy and Environment technical courses.

Engineering Leadership (p. 163)

Kal Bugara, PhD
Program Director
130 Snell Engineering
617.373.4448
617.373.2501 (fax)
Kal Bugara, PhD, Program Director, kmb@coe.neu.edu

Our newly renovated computer systems engineering program takes a sociotechnical, engineering approach to software. This engineering foundation is designed to enable students to embrace real-world complexity as a golden opportunity, especially for the more technically advanced student. We are committed to shaping our students to be intuitive problem solvers, experienced engineering architects, and result leaders who will have a great impact at the exciting three-way intersection of computer science, engineering, and ethics.

Our program offers a multitude of courses in big-data engineering and analytics in addition to supplementary courses that are required to deliver
the data-analytics results in a meaningful way to management. We cover data management, advanced data management, business intelligence, column databases, data science, and big-data engineering. We offer advanced functional programming using the powerful Scala language and a course on advanced data science as well as cloud computing. Multi-thread concurrent computing is also offered as it is important for synchronizing a huge set of servers working in parallel to do large-scale analytics to make things run faster by a hundredfold increase in speed. Due to the high-level mathematical operations required to run these programs, only software engineers have the capacity to work in such complicated areas. Only they can make the necessary mathematical algorithms execute quickly enough to get the finest results.

Our engineers become fluent in data science for the sake of building the actual system. They study how to write machine-learning algorithms on top of statistical packages.

- Students study the fundamentals of logical computing formulation and program construction as well as the mathematical modeling and analysis of algorithms—an essential aspect of data science analytics.
- Students study clustering techniques, along with topic modeling and classification and logical regression techniques, as well as Bayesian statistics.
- Students study how to configure and operate a Hadoop environment (large clusters of commodity hardware) and in the process how to integrate data from diverse sources, to move and manage data through big-data platforms (in-house or in the cloud). Data ingestion, the filtering and firing of millions of operations to run over large clusters of commodity hardware, is a software-engineering technique that we teach our students how to perform through Scala, multi-threading, Spark programming, and “map-reduce” techniques.
- We show students how to make the business case for analytics projects and how to follow an execution road map that involves understanding the architectures underpinning such gigantic platforms as well as the resourcing and cost issues.

Graduate Certificate Options
Students enrolled in a master’s degree in Computer Systems Engineering have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION
Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Programs

Master of Science in Computer Systems Engineering (MSCSE)
- Computer Systems Engineering with Concentration in Software Design Engineering (p. 138)

Graduate Certificate
- Computer Systems Engineering (p. 139)

Degree Requirements
A minimum of 32 semester hours must be earned toward completion of the Master of Science in Computer Systems Engineering degree. A minimum grade-point average of 3.000 is required in all courses applied toward the degree.

The program does not accept any transfer credit. All 32 credits must be completed from the IS and CSYE program course work specified.

Graduate Certificate Options
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Students may complete a master’s degree in Computer Systems Engineering with a concentration in Software Design Engineering in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 32 semester hour degree and certificate will require 16 hours of advisor-approved Software Design Engineering technical courses.

Engineering Leadership (p. 163)
Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

General Requirements
Complete the following:

- CSYE 6200 Concepts of Object-Oriented Design 4
- CSYE 6220 Enterprise Software Design 4

Options
Complete one of the following options:

- **COURSE WORK OPTION**
  Complete 24 semester hours from the following subject areas:
  - INFO (INFO 6250 excluded), CSYE

- **THESIS OPTION**
  CSYE 7990 Thesis 8
  Complete 16 semester hours from the following subject areas:
  - INFO (except INFO 6250), CSYE

- **CERTIFICATE OPTION**
  Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

Required Course Work
Complete 16 semester hours of graduate certificate course work. (p. 162)

Elective
Complete 8 semester hours from the following subject areas:
- INFO (except INFO 6250), CSYE

Program Credit/GPA Requirements
16 total semester hours required
Minimum 3.000 GPA required

Electrical and Computer Engineering

Faith Crisley, Student Service Coordinator, f.crisley@northeastern.edu

The Department of Electrical and Computer Engineering offers the following graduate degree programs:

- Master of Science in Electrical and Computer Engineering (MSECE)
- Master of Science in Electrical and Computer Engineering Leadership (MSECEL)
- Doctor of Philosophy in Computer Engineering (PhD)
- Doctor of Philosophy in Electrical Engineering (PhD)

All degrees can be pursued on either a full- or part-time basis consistent with residency requirements for the PhD degrees. The master's curriculum includes areas of concentration in communications, control, and signal processing; computer networks and security; computer systems and software; computer vision, machine learning and algorithms; electromagnetics, plasma, and optics; microsystems, materials, and devices; and power systems, power electronics, and motion control.

MSECE students pursue their degree by selecting one of the two tracks—MSECE with thesis and course track (MS/T) or MSECE course-only track (MS/C). Students in all master's degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.000. Full- and part-time students should follow curriculum requirements.

Master of Science Degree Requirements
Students must complete a minimum of 32 semester hours of approved course work with a minimum GPA of 3.000. MS/T track students must complete an 8-semester-hour thesis as part of their program of study.

Students who select the MS/T track must form a thesis committee comprised of at least three members. The thesis committee must include the thesis advisor and at least two members must be tenured or tenure-track ECE faculty. The student shall present the thesis to this committee.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Note: MS in Computer Systems Engineering students are not eligible for this graduate certificate.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
Required Courses

Computer Systems Engineering, Graduate Certificate
The computer systems engineering graduate certificate program focuses on the sociotechnical approach to software engineering with attention on using engineering tools and considering real-world complexities to design and construct practical and viable software solutions.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to software development with attention on enterprise design and integration, secure systems design and creation, and data integration and architecture.

Note: MS in Computer Systems Engineering students are not eligible for this graduate certificate.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
Required Courses
and to the ECE department at-large in the form of a seminar before final approval of the thesis.

The ECE department requires the master’s degree students who hold research assistantships to register full-time.

**COURSE REQUIREMENTS FOR COURSE WORK ONLY STUDENTS**

The program requires 32 semester hours of graduate-level courses. At least five of these courses must be from the list of “depth” courses in the student’s concentration and at least two must be outside this list; these courses are known as “breadth” courses. None of these courses can be from the list of “excluded courses.” For all concentrations except computer engineering related concentrations at least 24 semester hours of the 32 required semester hours must be graduate-level ECE courses. For students in the computer engineering related concentrations, i.e., Computer Systems and Software, Computer Networks and Security, and Computer Vision, Machine Learning and Algorithms, at least 20 semester hours of the 32 required semester hours must be graduate-level ECE courses.

**Graduate Certificate Options**

- Students enrolled in an MS in Electrical and Computer Engineering degree may also pursue one of 14 engineering graduate certificate options in conjunction with an Engineering Graduate Certificate. The selected option may result in an increase in total hours beyond that required for the master’s degree only.
- Students should consult their faculty advisor regarding these options (p. 162).

**GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION**

Students have the opportunity to pursue the Master of Science in Electrical and Computer Engineering Leadership (MSECEL) (p. 157) along with the Graduate Certificate in Engineering Leadership.

**COURSE REQUIREMENTS FOR THESIS STUDENTS**

The program requires 24 semester hours of graduate-level courses. At least three of these courses must be from the list of “depth” courses in the student’s concentration and at least two must be outside this list; these courses are known as “breadth” courses. None of these courses can be from the list of “excluded courses.” At least 16 semester hours of the required 24 semester hours must be graduate-level ECE courses. In addition, the program requires 8 semester hours of EECE 7990 Thesis.

**Doctor of Philosophy Degree Requirements**

The ECE department offers doctoral degree programs both in electrical and in computer engineering.

**QUALIFYING EXAM AND DEGREE CANDIDACY**

The PhD qualifying exam is the examination for admissions to the doctoral programs in electrical engineering and in computer engineering. It is a written exam in the student’s major area, and some areas include an oral exam. The exam has the dual purposes of serving as an indicator of the student’s capability for successful completion of the PhD in Electrical Engineering or in Computer Engineering and of serving as a guide to the student’s advisor in developing a suitable plan of study, tailored to the individual needs of the student. Students are tested on graduate course material as specified by the faculty in the chosen area.

A student who has matriculated in the PhD program is considered a predoctoral student. Upon successful completion of the qualifying exam, the student is designated a PhD candidate. All predoctoral students who hold a master’s degree or its equivalent and who matriculate in a fall semester must take this exam in the spring semester of their first academic year of study. A student who fails the qualifying exam will be permitted to retake the exam only one more time.

**RESIDENCE REQUIREMENT**

After reaching PhD candidacy, one year of full-time graduate work or two consecutive years of part-time graduate work satisfy the university residence requirement. In the latter case, the student’s advisor must approve a detailed schedule in order to ensure that the student devotes at least half of the time to the requirements of the Graduate School of Engineering.

**DISSERTATION**

Within six months of passing the PhD qualifying exam, the PhD candidate must form a dissertation committee. A dissertation committee must have at least three members. At least two of the committee members must be tenured or tenure-track ECE faculty and the committee must include the student’s advisor. The chair of the committee must be a faculty member in the ECE department.

The dissertation committee must design an appropriate program of study that prepares the student to be a successful doctoral-level engineer as well as direct the candidate’s dissertation research. The dissertation committee will approve the dissertation in final form.

**DISSERTATION AND DISSERTATION CONTINUATION REGISTRATION**

Upon successful completion of the PhD qualifying exam and the majority of required course work, the PhD candidate must register in two consecutive semesters for Dissertation (EECE 9990). Upon completion of this sequence, the student must register for Dissertation Continuation (EECE 9996) in every semester until the dissertation is completed. A student may not register for Continuation until he or she fulfills the two-semester sequence of Dissertation.

**REGISTRATION REQUIREMENTS FOR PREDOCCTORAL AND PHD CANDIDATE GRADUATE ASSISTANTS**

The ECE department requires that predoctoral students and PhD candidates who hold research or teaching assistantships be registered full-time. Predoctoral PhD students may register for Research (EECE 9986) (zero credit, full-time equivalent) if needed to fulfill the registration requirement.

**PHD PROPOSAL REVIEW**

Within three years of the establishment of degree candidacy, each PhD candidate must demonstrate, by means of the proposal review, subject matter knowledge satisfactory for the award of the degree.

The proposal review is an oral presentation followed by a question-and-answer session administered by the student’s dissertation advisor/committee. The proposal review will be given at the time the student submits his or her dissertation proposal to the dissertation advisor/committee for approval. As part of this exam, the dissertation advisor/committee will review the student’s doctoral program and his or her performance in graduate courses, as well as examine the student on subject matter related to his or her graduate course work and dissertation subject area.

**FINAL DISSERTATION DEFENSE**

The final dissertation defense will include the subject matter of the dissertation and significant developments in the field of the dissertation work. Other related fields may be included if recommended by the examining faculty.

**Electrical and Computer Engineering PhD Course Requirements**

The student and his or her dissertation committee determine the program of study. A typical program comprises 24 semester hours of course work
beyond the Master of Science degree. However, as a minimum, the PhD program must include at least 16 semester hours of graduate course work beyond the Master of Science degree. At least 8 semester hours of the PhD course requirements must be graduate-level ECE courses. All students must achieve a minimum cumulative GPA of 3.000.

Programs

Doctor of Philosophy (PhD)

- Computer Engineering (p. 141)
- Computer Engineering—Advanced Entry (p. 141)
- Electrical Engineering (p. 141)
- Electrical Engineering—Advanced Entry (p. 142)

Master of Science in Electrical and Computer Engineering (MSECE)

- Electrical and Computer Engineering with Concentration in Communications, Control, and Signal Processing (p. 142)
- Electrical and Computer Engineering with Concentration in Computer Systems and Software (p. 144)
- Electrical and Computer Engineering with Concentration in Computer Networks and Security (p. 146)
- Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms (p. 149)
- Electrical and Computer Engineering with Concentration in Electromagnetics, Plasma, and Optics (p. 151)
- Electrical and Computer Engineering with Concentration in Microsystems, Materials, and Devices (p. 153)
- Electrical and Computer Engineering with Concentration in Power Systems (p. 155)

Master of Science in Electrical and Computer Engineering Leadership (MSECEL)

- Electrical and Computer Engineering Leadership (p. 157)

Computer Engineering, PhD

The PhD program in computer engineering offers students an opportunity for study in a broad range of areas in computer engineering.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual Department of Electrical and Computer Engineering review (each fall semester after you are in the program for at least one year)
Qualifying examination
Dissertation committee
Proposal stage review
Dissertation defense

General Requirements

Complete 32 semester hours of approved course work—equivalent of MSECE degree. Then complete 16 semester hours, of which 8 must be graduate-level EECE courses. Consult faculty research advisor for acceptable courses.

Dissertation

Complete the following (repeatable) course twice:

<table>

**Electrical and Computer Engineering with Concentration in Communications, Control, and Signal Processing, MSECE**
The master's degree program in electrical and computer engineering offers in-depth course work within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

**Graduate Certificate Options**
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply. Note: the selected option may result in an increase in total hours beyond that required for the master's degree only.

**Chemical Engineering**

- Process Safety Engineering (p. 123)

**Computer Systems Engineering**

- Computer Systems Engineering (p. 139)

**Energy Systems**

- Energy Systems (p. 161)
- Renewable Energy (p. 160)
- Energy Systems Management (p. 161)
- Sustainable Energy Systems (p. 161)

**Engineering Management**

- Engineering Business (p. 167)
- Engineering Management (p. 167)

- Supply Chain Engineering Management (p. 168)
- Lean Six Sigma (p. 169)

**Industrial Engineering**

- Data Mining Engineering (p. 177)

**Telecommunication Systems Management**

- IP Telephony Systems (p. 204)
- Broadband Wireless Systems (p. 204)

**GORDON INSTITUTE OF ENGINEERING LEADERSHIP**
Master's Degree in Electrical and Computer Engineering with a concentration in Communications, Control, and Signal Processing with Graduate Certificate in Engineering Leadership

Students may complete a master's degree in Electrical and Computer Engineering with a concentration in Communications, Control, and Signal Processing in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 48 semester hour degree and certificate will require 16 hours of advisor-approved Communications, Control, and Signal Processing technical courses.

**Engineering Leadership**

(p. 163)

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Options**
Complete one of the following options:

**COURSE WORK OPTION**

**Depth Courses**
Complete 20 semester hours from the depth course list below.

**Breadth Courses**
Complete 8 semester hours from the breadth course list below.

Note: Depth courses cannot be taken for breadth.

**Elective**
Complete 4 additional semester hours from either the depth or breadth course lists below.

**THESIS OPTION**

Thesis

EECE 7990 Thesis 8

**Depth Courses**

Complete 12 semester hours from the depth course list below.

**Breadth Courses**

Complete 8 semester hours from the breadth course list below.

Note: Depth courses cannot be taken for breadth.

**Elective**

Complete 4 additional semester hours from either the depth or breadth course lists below.

**CERTIFICATE OPTION**

Students completing this option receive a Graduate Certificate in addition to the master's degree. Students should consult their faculty advisor regarding the certificate options. The selected option may result in an increase in total hours beyond that required for the master's degree only.

Complete 16 semester hours of graduate certificate coursework.

GORDON INSTITUTE OF ENGINEERING LEADERSHIP
Master's Degree in Electrical and Computer Engineering with a concentration in Computer Systems and Software with Graduate Certificate in Engineering Leadership
Students may complete a master's degree in Electrical and Computer Engineering with a concentration in Computer Systems and Software in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 48 semester hour degree and certificate will require 16 hours of advisor-approved Computer Systems and Software technical courses.

Engineering Leadership (p. 163)
Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Options
Complete one of the following options:

COURSE WORK OPTION
Depth Courses
Complete 20 semester hours from the depth course list below.
Breadth Courses
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor.
Note: Depth courses cannot be taken for breadth.
Elective
Complete 4 semester hours of either depth or breadth courses.

THESIS OPTION
Depth Courses
Complete 12 semester hours from the depth course list below.
Breadth Courses
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor.
Note: Depth courses cannot be taken for breadth.
Elective
Complete 4 additional semester hours from either depth or breadth courses.

Thesis
EECE 7990 Thesis 8

CERTIFICATE OPTION
Students completing this option receive a Graduate Certificate in addition to the master's degree. Students should consult their faculty advisor regarding the certificate options. The selected option may result in an increase in total hours beyond that required for the master's degree only.

Complete 16 semester hours of graduate certificate course work. (p. 162)

- Minimum 3.000 GPA required

---

**Electrical and Computer Engineering with Concentration in Computer Networks and Security, MSECE**

The master's degree program in electrical and computer engineering offers in-depth course work within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

**Graduate Certificate Options**

Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply. Note: the selected option may result in an increase in total hours beyond that required for the master's degree only.

**Chemical Engineering**
- Process Safety Engineering (p. 123)

**Computer Systems Engineering**
- Computer Systems Engineering (p. 139)

**Energy Systems**
- Energy Systems (p. 161)
- Renewable Energy (p. 160)
Northeastern University

• Energy Systems Management (p. 161)
• Sustainable Energy Systems (p. 161)

Engineering Management
• Engineering Business (p. 167)
• Engineering Management (p. 167)
• Technology Systems Management (p. 168)
• Engineering Economic Decision Making (p. 168)
• Supply Chain Engineering Management (p. 168)
• Lean Six Sigma (p. 169)

Industrial Engineering
• Data Mining Engineering (p. 177)

Telecommunication Systems Management
• IP Telephony Systems (p. 204)
• Broadband Wireless Systems (p. 204)

GORDON INSTITUTE OF ENGINEERING LEADERSHIP
Master's Degree in Electrical and Computer Engineering with a concentration in Computer Networks and Security with Graduate Certificate in Engineering Leadership

Students may complete a master's degree in Electrical and Computer Engineering with a concentration in Computer Networks and Security in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 48 semester hour degree and certificate will require 16 hours of advisor-approved Computer Networks and Security technical courses.

Program Leadership (p. 163)

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Options
Complete one of the following options:

COURSE WORK OPTION
Depth Courses
Complete 20 semester hours from the depth course list below.

Breadth Courses
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor.

Note: Depth courses cannot be taken for breadth.

Elective
Complete 4 semester hours of either depth or breadth courses.

THESIS OPTION
Depth Courses
Complete 12 semester hours from the depth course list below.

Breadth Courses
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor.

Note: Depth courses cannot be taken for breadth.

Elective
Complete 4 additional semester hours of either depth or breadth courses.

Thesis
EECE 7990 Thesis 8

CERTIFICATE OPTION
Students completing this option receive a Graduate Certificate in addition to the master's degree. Students should consult their faculty advisor regarding the certificate options. The selected option may result in an increase in total hours beyond that required for the master's degree only.

Complete 16 semester hours of graduate certificate course work. (p. 162)

GORDON INSTITUTE OF ENGINEERING LEADERSHIP
Master's Degree in Electrical and Computer Engineering with a concentration in Computer Vision and Machine Learning with Graduate Certificate in Engineering Leadership

Students may complete a master's degree in Electrical and Computer Engineering with a concentration in Computer Vision and Machine Learning in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 48 semester hour degree and certificate will require 16 hours of advisor-approved Computer Vision and Machine Learning technical courses.

Engineering Leadership (p. 163)

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Options
Complete one of the following options:

COURSE WORK OPTION
Depth Courses
Complete 20 semester hours from the depth course list below.

Breadth Courses
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor.

Elective
Complete 4 semester hours of either depth or breadth courses.

THESIS OPTION
Depth Courses
Complete 12 semester hours from the depth course list below.

Breadth Courses
Complete 8 semester hours from the breadth course list below or other EECE courses chosen in consultation with a faculty advisor.

Elective
Complete 4 additional semester hours from either depth or breadth courses.

Thesis
EECE 7990 Thesis 8

CERTIFICATE OPTION
Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options. The selected option may result in an increase in total hours beyond that required for the master’s degree only.
Complete 16 semester hours of graduate certificate coursework. (p. 162)

The master's degree program in electrical and computer engineering offers in-depth course work within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

Graduate Certificate Options

Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

Note: the selected option may result in an increase in total hours beyond that required for the master's degree only.

Chemical Engineering

• Process Safety Engineering (p. 123)

Computer Systems Engineering

• Computer Systems Engineering (p. 139)

Energy Systems

• Energy Systems (p. 161)
• Renewable Energy (p. 160)
• Energy Systems Management (p. 161)
• Sustainable Energy Systems (p. 161)

Engineering Management

• Engineering Business (p. 167)
• Engineering Management (p. 167)
• Technology Systems Management (p. 168)
• Engineering Economic Decision Making (p. 168)
• Supply Chain Engineering Management (p. 168)
• Lean Six Sigma (p. 169)

Industrial Engineering

• Data Mining Engineering (p. 177)

Telecommunication Systems Management

• IP Telephony Systems (p. 204)
• Broadband Wireless Systems (p. 204)

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Electrical and Computer Engineering with a concentration in Electromagnetics, Plasma, and Optics with Graduate Certificate in Engineering Leadership

Students may complete a master's degree in Electrical and Computer Engineering with a concentration in Electromagnetics, Plasma, and Optics in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 48 semester hour degree and certificate will require 16 hours
of advisor-approved Electromagnetics, Plasma, and Optics technical courses.

Engineering Leadership (p. 163)

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Options
Complete one of the following options:

COURSE WORK OPTION
Depth Courses
Complete 20 semester hours from the depth course list below.

Breadth Courses
Note: Depth courses cannot be taken for breadth.
Complete 8 semester hours from the breadth course list below.

Elective
Complete 4 additional semester hours from either depth or breadth courses.

THESIS OPTION
Depth Courses
Complete 12 semester hours from the depth course list below.

Breadth Courses
Note: Depth courses cannot be taken for breadth.
Complete 8 semester hours from the breadth course list below.

Elective
Complete 4 additional semester hours from either depth or breadth courses.

Thesis
EECE 7990 Thesis

CERTIFICATE OPTION
Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options. The selected option may result in an increase in total hours beyond that required for the master’s degree only.

Complete 16 semester hours of graduate certificate course work (p. 162)

---

**Electrical and Computer Engineering Leadership, MSECEL**

The Gordon Engineering Leadership Program is a transformational, technical, and challenging graduate-level learning experience targeted for engineering professionals.

The Gordon Institute, in collaboration with the College of Engineering, offers the Master of Science in Electrical and Computer Engineering
Leadership (MSECEL) along with the Graduate Certificate in Engineering Leadership as formal recognition of the combined focus in electrical and computer engineering technical skills and midlevel engineers’ leadership acumen and broadened cross-functional capabilities.

Pursuing the MSECEL and the graduate certificate allows participants to:

- Enhance technical knowledge in electrical and computer engineering
- Take part in a hands-on curriculum (http://www.northeastern.edu/gordonleadership/about-the-institute/courriculum) taught by industry-experienced professors
- Work with peers from across engineering fields on leadership skills development
- Receive one-on-one mentoring from industry experts and faculty

The Gordon Engineering Leadership Program anchors around an intense, market-worthy challenge project based on your organization’s strategic needs. This is a unique opportunity to apply your classroom experience to a professional setting, potentially further accelerating your career.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

General Requirements
Leadership
ENLR 5121 Engineering Leadership 1 2
ENLR 5122 Engineering Leadership 2 2

Foundations
ENLR 5131 Scientific Foundations of Engineering 1 2
ENLR 5132 Scientific Foundations of Engineering 2 2

Project
ENLR 7440 Engineering Leadership Challenge Project 1 4
ENLR 7442 Engineering Leadership Challenge Project 2 4

Concentration Courses
Complete 16 semester hours from the approved depth/breadth course lists within the seven EECE concentrations.

Program Credit/GPA Requirements
32 total semester hours required
Minimum 3.000 GPA required

Mission Statement
The program’s mission is to educate students in current and future energy systems technologies, to integrate energy-related technologies with the economics and financial considerations required to implement them, and to develop leadership and decision-making skills to implement energy systems in either the private or public sectors of the global market. The program will expose students to a combination of academic and corporate experience in energy systems.

Admission Criteria
Applicants to the program are expected to have either an undergraduate degree from an accredited engineering school or have a quantitative business or finance degree. Applicants are expected to have adequate computer skills and college-level calculus. Foundational coursework in these fields is available to students to bridge any gap in their technical backgrounds. However, credit for such courses will not count toward the degree. The successful applicant should have an undergraduate grade-point average (GPA) of 3.000/4.000 or higher from an accredited U.S. school. International applicants, in addition to the minimum 3.000/4.000 GPA requirement, should submit GRE and TOEFL scores with a minimum 151 (650) (Quantitative) and 550 (paper-based).
213 (computer-based), or 80 (internet-based), respectively. The applicant will also submit:

- An application to the Graduate School of Engineering.
- A one-page description of their interest and expectations of the program, focusing on their career path. This essay should be placed in the application under the heading “PhD Applicants, Area of Interest.”

Graduate Certificate Options
Students enrolled in a master’s degree in Energy Systems have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION
Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Programs
Master of Science in Energy Systems (MSENES)
- Energy Systems (p. 159)

Graduate Certificates
- Energy Systems (p. 161)
- Renewable Energy (p. 160)
- Energy Systems Management (p. 161)
- Sustainable Energy Systems (p. 161)

This program includes an online/hybrid delivery option. Course work for this option is offered online. Students enrolled at a regional campus may enroll in specific hybrid delivery sections of these courses. Hybrid courses have periodic face-to-face regional campus meetings.

Graduate Certificate Options
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

Chemical Engineering
- Process Safety Engineering (p. 123)

Computer Systems Engineering
- Computer Systems Engineering (p. 139)

Energy Systems
- Energy Systems (p. 161)
- Renewable Energy (p. 160)
- Energy Systems Management (p. 161)
- Sustainable Energy Systems (p. 161)

Engineering Management
- Engineering Business (p. 167)
- Engineering Management (p. 167)
- Technology Systems Management (p. 168)
- Engineering Economic Decision Making (p. 168)
- Supply Chain Engineering Management (p. 168)
- Lean Six Sigma (p. 169)

Industrial Engineering
- Data Mining Engineering (p. 177)

Telecommunication Systems Management
- IP Telephony Systems (p. 204)
- Broadband Wireless Systems (p. 204)

GORDON INSTITUTE OF ENGINEERING LEADERSHIP
Master’s Degree in Energy Systems with Graduate Certificate in Engineering Leadership
Students may complete a master’s degree in Energy Systems in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 39.5 semester hour degree and certificate will require 16 hours of advisor-approved Energy Systems technical courses.

Energy Systems Graduate Certificates

- Renewable Energy (p. 160)
- Energy Systems (p. 161)
- Energy Systems Management (p. 161)
- Sustainable Energy Systems (p. 161)

Renewable Energy, Graduate Certificate

The Graduate Certificate in Renewable Energy focuses on the combination of analysis and integration of energy systems engineering technology with key renewable engineering technology, including solar and wind generation, with environmental protection and manufacturing considerations.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems with a specific focus on renewable energy technologies along with EPA regulatory structure, including the
LEED certification program, as well as industrial ecology, including life-cycle analysis and technical cost modeling.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

</tr>
</tbody>
</table>

Program Credit/GPA Requirements
16 total semester hours required
Minimum 3.000 GPA required

Energy Systems Management, Graduate Certificate

The energy systems management graduate certificate program focuses on the combination of analysis and integration of energy systems engineering technology with a focus on the art and the science of planning, organizing, allocating, directing, and controlling the activities and resources of organizations engaged in engineering activities and technology development.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills in a management setting to analyze energy systems and to propose effective and efficient technology solutions based on data-driven and economic-based decisions.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Program Credit/GPA Requirements
16 total semester hours required
Minimum 3.000 GPA required

Sustainable Energy Systems, Graduate Certificate

The Graduate Certificate in Sustainable Energy Systems focuses on the integration of energy systems engineering technology with sustainable building systems, including the design and operation of buildings with minimal energy and environmental impact.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems as they relate to sustainable engineering building design with a focus on renewable energy with LEED certification or with a focus on industrial ecology, including life-cycle analysis and technical cost modeling.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

or gordonleadership@northeastern.edu

The Gordon Engineering Leadership Program (GEL) offered by the Gordon Institute of Engineering Leadership is a transformational graduate program designed to build a future corps of engineering leadership professionals. GEL seeks to accelerate leadership development capability in an engineering context through a concentrated curriculum that inculcates both the psychological skills and capabilities needed to lead engineers in parallel with technical skills to successfully engineer products to customers and markets. The program teaches relevant leadership theory followed by practice in leadership laboratories. Technical product development and scientific principles courses are followed by the completion of a market-worthy challenge project. This learning framework is supplemented with three-way mentoring from industry, faculty, and program mentors. Graduates of the program, known as Gordon Fellows, have an opportunity to gain the knowledge, skills, and attitudes required to successfully lead engineering teams. They stand out from their peers in their ability to invent, innovate, and implement engineering projects from concept to market success. Participation in GEL accelerates Gordon Fellows’ careers, making them more valuable to their company.

The Challenge
When relatively unseasoned engineers run teams or projects, most fail to satisfy all of the project’s critical requirements—missing the mark in functionality, performance, quality, time-to-market, cost, or other key objectives.

This shortfall exists because engineers enter the workforce without critical skills related to:
- Competitiveness
- Taking responsibility to prevent failure
- Market and customer focus
- Influencing and motivating skills
- Interdisciplinary decision-making and teamwork capability
- Simultaneous optimization of all elements of performance, quality, cost, and timing
- Front-loading the engineering process
- Financial acumen
- Big-picture engineering
- Leadership abilities and organizational social awareness
- Enterprise understanding
- Program management tools and processes
- Designing to avoid failure modes
- Designing for lean manufacture
The Mission
GEL’s mission is to create an elite cadre of engineering leaders who stand out from their peers in their ability to invent, innovate, and implement engineering projects from concept to market success.

These leaders will demonstrate an exceptional ability to lead engineering teams by providing purpose, direction, and motivation to influence others to achieve their collective goals.

The Method
To close the gaps and realize its mission, GEL concentrates on the knowledge, skills, and abilities that reside at the intersection of engineering and leadership.

At the end of the program, Gordon Fellows emerge with the awareness, confidence, vision, and technical dexterity to drive positive change within their organizations and society.

Admissions
GEL candidates must apply for and be admitted to both the Northeastern Graduate School of Engineering and the Gordon Engineering Leadership Program.

Students pursue GEL as part of a Master of Science degree in the engineering discipline of their choice or as a stand-alone graduate certificate. Upon completion of a Master of Science degree, students earn both the Master of Science degree in the discipline of choice and a Graduate Certificate in Engineering Leadership. Students who already hold a graduate degree in engineering or have greater than three years’ engineering work experience can complete the program to earn a Graduate Certificate in Engineering Leadership. The core GEL curriculum takes place during one calendar year (September—July), and additional course work required for the Master of Science degree can be pursued before, after, or in parallel with GEL.

Programs
Graduate Certificate: Stand-Alone or Combined with Existing MS Degree
The Engineering Leadership Graduate Certificate can be pursued as a stand-alone certificate, or the certificate can be earned in conjunction with existing Master of Science degrees offered by the College of Engineering.

Departments across the College of Engineering have developed graduation requirements that enable students to earn both the MS degree and the engineering leadership graduate certificate. Please contact your faculty mentor for details.

Requirements
Complete all courses and requirements listed below unless otherwise indicated.

ENLR 5121 Engineering Leadership 1 2
ENLR 5122 Engineering Leadership 2 2
ENLR 5131 Scientific Foundations of Engineering 1 2
ENLR 5132 Scientific Foundations of Engineering 2 2
ENLR 7440 Engineering Leadership Challenge Project 1 4
ENLR 7442 Engineering Leadership Challenge Project 2 4

Program Credit/GPA Requirements
16 total semester hours required
Minimum 3.000 GPA required

The following MS programs can be taken in conjunction with the Engineering Leadership Graduate Certificate
- Master of Science in Bioengineering
- Master of Science in Chemical Engineering
- Master of Science in Civil Engineering—Select Master of Science concentration
- Master of Science in Computer Systems Engineering
- Master of Science in Electrical and Computer Engineering—Select Master of Science concentration
- Master of Science in Engineering Management
- Master of Science in Industrial Engineering
- Master of Science in Information Systems
- Master of Science in Mechanical Engineering—Select Master of Science concentration
- Master of Science in Operations Research
- Master of Science in Sustainable Building Systems
- Master of Science in Telecommunication Systems Management

For Engineering Leadership Certificate and MS combined course requirements please refer to the Certificate and Degree Options (http://www.northeastern.edu/gordonleadership/prospective-students/degree-options) found on the Gordon Institute of Engineering Leadership website.

The Gordon Engineering Leadership Program anchors around an intense, market-worthy challenge project based on your organization’s strategic needs. This is a unique opportunity to apply your classroom experience to a professional setting, potentially further accelerating your career.

How to Earn a Graduate Certificate in Engineering Leadership
If you already have a Master of Science, then you can complete the one-year program to earn a Graduate Certificate in Engineering Leadership.

If you do not have a Master of Science, then you can still be considered for the Graduate Certificate in Engineering Leadership if you have at least three years of engineering work experience.

Additional Information can be found on the Gordon Engineering Leadership Program website. (http://www.northeastern.edu/gordonleadership)
Beyond a Graduate Certificate

Most candidates pursue the Gordon Engineering Leadership Program as part of a Master of Science degree in the engineering discipline of their choice. Upon completion, they earn both the Master of Science degree and a Graduate Certificate in Engineering Leadership.

Additional Information on Master of Science degrees in conjunction with a Graduate Certificate in Engineering Leadership can be found here (p. 163).

- Master of Science in Energy Systems
- Master of Science in Engineering Management
- Master of Science in Industrial Engineering
- Master of Science in Information Systems
- Master of Science in Mechanical Engineering—Select Master of Science concentration
- Master of Science in Operations Research
- Master of Science in Sustainable Building Systems
- Master of Science in Telecommunication Systems Management

For Engineering Leadership Certificate and MS combined course requirements please refer to the Certificate and Degree Options (http://www.northeastern.edu/gordonleadership/prospective-students/degree-options) found on the Gordon Institute of Engineering Leadership website.

Program Credit/GPA Requirements

16 total semester hours required
Minimum 3.000 GPA required

The Master of Science in Engineering Management offers graduate students an opportunity to develop both technical expertise and business competence that is in high demand among prospective technology-based employers. Industry leaders are seeking qualified and talented individuals who are not only able to guide research and design teams but also able to direct and supervise development and production processes. The combination of technical proficiency and business skills fostered in the engineering management program is designed to provide a competitive edge for graduates seeking a wide range of positions in technology-based product or service industries, as well as in comparable local, state, and federal programs.

The program was designed by experienced high-level managers and academic leaders as an option for engineers and scientists to broaden their skill sets to include management tools and techniques that are applicable to technology-based industries. Graduates of the engineering management program work as product managers or leaders of teams in technical industries. Upon completion of the program, students find that their acquired skills are applicable to a wide range of industries, primarily those focused upon the development of technical products and the management of technical projects.

Graduates may assist companies in bringing a product from an idea through its development phases to its introduction to the marketplace. They may also be involved in forming and managing teams for assessing cost-effectiveness, formulating strategies to improve production, or analyzing a company’s supply chain. Most of these projects cannot be successfully completed without the skills of those possessing a background in management decision making and engineering expertise; therefore, the engineering management graduate is often a technical liaison to management. As a result, many of these assignments have actually proven to be a gateway to upper-level management positions.

The current program of study can be taken on a part-time or full-time basis on-ground or online. There are four core courses required of all students, which have been formulated to satisfy the foundation requirements of economic decision making, decision-making mathematics, and project management. In addition to these required courses, the curriculum consists of electives that allow students to choose either a broad-based program of study or one centered on a particular concentration. Some students may elect to refresh or enhance their technical skills in engineering-based subjects such as information systems, computer systems engineering, or graduate courses from the traditional engineering disciplines. Other students may prefer to broaden their knowledge base by selecting course work in management subjects such as engineering organizational psychology, financial management, logistics and warehousing, supply chain engineering, or lean systems design. Additionally, students may also elect to complete the Gordon Engineering Leadership Program as part of their engineering management degree.

One recent graduate has observed that "Northeastern’s MSEM is like an MBA for engineers, with high-quality, dedicated professors who are proficient in their field yet are able to convey information in a way that’s easy to understand." This graduate also noted, "My courses in project management have been key to understanding the subtleties that affect Project Managers while technical courses provide a strong background in
fundamentals as well as specialty topics. My experience with co-op has been outstanding and has truly helped me further my career.”

**Graduate Certificate Options**

Students enrolled in a master’s degree in Engineering Management have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

**GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION**

Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

**Programs**

**Master of Science in Engineering Management (MSEM)**

- Engineering Management (p. 165)

**Graduate Certificates**

- Engineering Business (p. 167)
- Engineering Management (p. 167)
- Technology Systems Management (p. 168)
- Engineering Economic Decision Making (p. 168)
- Supply Chain Engineering Management (p. 168)
- Lean Six Sigma (p. 169)

**Engineering Management, MSEM**

A minimum of 32 semester hours must be earned toward the completion of the Master of Science in Engineering Management and a minimum grade-point average of 3.000 is required over all the courses applied toward the degree. Students can earn their master’s degree by pursuing one of the following tracks:

- **Course Work Option**: When pursuing this track, a student needs to complete four core courses (also known as required courses) and four elective courses.

- **Project Option**: This track requires a student to complete a 4-semester-hour master’s project in addition to completing four core courses, and three electives. The student works with a faculty advisor to develop a master’s project. The project is intended to allow a student to demonstrate the ability to identify a problem, apply his or her engineering skill set to solve that problem, and write an engineering report.

- **Thesis Option**: A student pursuing this track needs to complete an 8-semester-hour thesis, four core courses, and two electives. In addition, the student will work with a faculty advisor to formulate a research area that will lead to the discovery of new tools and techniques for solving engineering problems. The criterion for acceptability of a thesis is whether a cutting-edge and innovative technology is developed.

- **Online Option**: Students pursuing this track complete their degree requirements by taking online courses.

**Graduate Certificate Options**

Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

**Chemical Engineering**

- Process Safety Engineering (p. 123)

**Computer Systems Engineering**

- Computer Systems Engineering (p. 139)

**Energy Systems**

- Energy Systems (p. 161)
- Renewable Energy (p. 160)
- Energy Systems Management (p. 161)
- Sustainable Energy Systems (p. 161)

**Engineering Management**

- Engineering Business (p. 167)
- Engineering Management (p. 167)
- Technology Systems Management (p. 168)
- Engineering Economic Decision Making (p. 168)
- Supply Chain Engineering Management (p. 168)
- Lean Six Sigma (p. 169)

**Industrial Engineering**

- Data Mining Engineering (p. 177)

**Telecommunication Systems Management**

- IP Telephony Systems (p. 204)
- Broadband Wireless Systems (p. 204)

**GORDON INSTITUTE OF ENGINEERING LEADERSHIP**

**Master’s Degree in Engineering Management with Graduate Certificate in Engineering Leadership**

Students may complete a master’s degree in Engineering Management in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 32 semester hour degree and certificate will require 16 hours of advisor-approved Engineering Management technical courses.

**Engineering Leadership (p. 163)**

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.
General Requirements
OR 6205 Deterministic Operations Research 4
EMGT 5220 Engineering Project Management 4
EMGT 6225 Economic Decision Making 4
IE 6200 Engineering Probability and Statistics 4

Options
Complete one of the following options:

COURSE WORK OPTION
Complete 16 semester hours from the course list of approved electives below.
Note: Other approved courses may be chosen in consultation with an academic advisor.

PROJECT OPTION
EMGT 7945 Master’s Project 4
Complete 12 semester hours from the course list of approved electives below.
Note: Other approved courses may be chosen in consultation with an academic advisor.

THESIS OPTION
EMGT 7990 Thesis 4
Complete 8 semester hours from the course list of approved electives below.
Note: Other approved courses may be chosen in consultation with an academic advisor.

ONLINE OPTION
Complete 16 semester hours from the following list of online courses:
CIVE 5270 Environmental Protection and Management
EMGT 5300 Engineering/Organizational Psychology
EMGT 6305 Financial Management for Engineers
ENSY 5000 Fundamentals of Energy System Integration
IE 5620 Mass Customization
IE 5640 Data Mining for Engineering Applications
IE 6300 Manufacturing Methods and Processes
IE 7200 Supply Chain Engineering
IE 7215 Simulation Analysis
IE 7280 Statistical Methods in Engineering
IE 7285 Statistical Quality Control
IE 7290 Reliability Analysis and Risk Assessment
IE 7315 Human Factors Engineering
INFO 6210 Data Management and Database Design
INFO 6215 Business Analysis and Information Engineering
INFO 6245 Planning and Managing Information Systems Development
INFO 7245 Agile Software Development
INFO 7365 Enterprise Architecture Planning and Management

INFO 7275 Advanced Database Management Systems
ME 5645 Environmental Issues in Manufacturing and Product Use
ME 6200 Mathematical Methods for Mechanical Engineers 1
OR 7230 Probabilistic Operation Research
OR 7240 Integer and Nonlinear Optimization
OR 7310 Logistics, Warehousing, and Scheduling

CERTIFICATE OPTION
Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.
Complete 16 semester hours of graduate certificate required course work. (p. 162)

**Program Credit/GPA Requirements**

32 total semester hours required  
Minimum 3.000 GPA required

**Engineering Management Graduate Certificates**

- Engineering Business (p. 167)
- Engineering Management (p. 167)
- Technology Systems Management (p. 168)
- Engineering Economic Decision Making (p. 168)
- Supply Chain Engineering Management (p. 168)
- Lean Six Sigma (p. 169)

**Engineering Business, Graduate Certificate**

The engineering business graduate certificate program involves eight courses with academic and participation elements. The program offers students opportunities to apply the technical aspects of an engineering skill foundation in corporate settings. This equips them to manage projects, lead people, make data-driven and market-based decisions, and advance economically sound initiatives.

To earn the engineering business certificate, students must have completed in good standing a BS(Engineering)/MS(Engineering Management) program at Northeastern or an MS(Engineering Management) with a BS(Engineering) also from Northeastern; have been accepted through application and committee admission to the Galante Engineering Business Program; participated in the Galante Engineering Business Program cocurricular elements; and taken four specified business-skill courses in the College of Engineering graduate school as listed under the Program Requirements tab in addition to the four required core engineering management courses.

Refer to the Galante Engineering Business Program web page (http://www.coe.neu.edu/galante) for additional details and description.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Course Requirements**

**Technological Entrepreneurship**

Complete 4 semester hours from the following:

- GE 5100 Product Development for Engineers 4
- GE 5010 Customer-Driven Technical Innovation for Engineers 4

**Managing People and Organizations**

- EMGT 5300 Engineering/Organizational Psychology 4

**Financial Analysis**

- EMGT 6305 Financial Management for Engineers 4

**Information Analysis**

- IE 5640 Data Mining for Engineering Applications 4

**Program Credit/GPA Requirements**

16 total semester hours required  
Minimum 3.400 GPA required

**Engineering Management, Graduate Certificate**

The engineering management graduate certificate program focuses on bridging the gaps between the fields of engineering, technology, and business with a focus on the art and the science of planning, organizing,
allocating, directing, and controlling the activities and resources of organizations engaged in engineering activities and technology development.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills in a management setting to build decision-making models and make data-driven and/or economic-based decisions.

**Note:** Students enrolled in the master’s in engineering management program are not eligible for this graduate certificate.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

**Required Courses**
- EMGT 5220 Engineering Project Management 4
- EMGT 6225 Economic Decision Making 4
- IE 6200 Engineering Probability and Statistics 4

**Elective**
Complete one of the following:
- EMGT 5300 Engineering/Organizational Psychology 4
- EMGT 6305 Financial Management for Engineers 4
- OR 6205 Deterministic Operations Research

**Program Credit/GPA Requirements**
- 16 total semester hours required
- Minimum 3.000 GPA required

The engineering economic decision-making graduate certificate program focuses on developing economic decision-making skills in the context of engineering operations and projects with attention to decision-making models, causes of risk and uncertainty, decisions under uncertainty, and ways to change and influence the degree of risk and uncertainty.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills in a management setting to build decision-making models and to make data-driven, financial-based, and economic-based decisions.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

**Required Courses**
- EMGT 6225 Economic Decision Making 4
- EMGT 6305 Financial Management for Engineers 4

**Electives**
Complete two of the following:
- IE 6200 Engineering Probability and Statistics
- OR 6205 Deterministic Operations Research
- OR 7250 Multi-Criteria Decision Making

**Program Credit/GPA Requirements**
- 16 total semester hours required
- Minimum 3.000 GPA required

The Graduate Certificate in Supply Chain focuses on acquiring and applying the knowledge and skills associated with designing, analyzing, managing, and improving supply chains within technology companies with attention on optimizing parts of a supply chain for effective and efficient functioning.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to supply chains using deterministic and probabilistic decision-making models, lean concepts, mass customization principles, and methods of manufacturing including logistics, warehousing, and scheduling.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

**Required Courses**
- IE 5617 Lean Concepts and Applications 4
- IE 7200 Supply Chain Engineering 4

**Electives**
Complete two of the following:
- IE 5620 Mass Customization
- IE 6300 Manufacturing Methods and Processes
- OR 7310 Logistics, Warehousing, and Scheduling

**Program Credit/GPA Requirements**
- 16 total semester hours required
- Minimum 3.000 GPA required

The Graduate Certificate in Technology Systems Management focuses on bridging the fields of technology, engineering, and business with a focus on the art and the science of managing organizational activities, including project and human resources engaged in engineering and technology development.

This four-course graduate certificate seeks to provide students with opportunities to apply technological knowledge and skills in a management setting to make data-driven, financial-based, and economic-based decisions.

**Note:** This certificate is for nonengineers and nongraduate engineering students. Graduate engineering students are not eligible for this graduate certificate.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

EMGT 5220 Engineering Project Management 4
EMGT 5300 Engineering/Organizational Psychology 4
EMGT 6225 Economic Decision Making 4
EMGT 6305 Financial Management for Engineers 4

**Program Credit/GPA Requirements**
- 16 total semester hours required
- Minimum 3.000 GPA required
Program Credit/GPA Requirements
16 total semester hours required
Minimum 3.000 GPA required

Lean Six Sigma Graduate Certificate
The Graduate Certificate in Lean Six Sigma focuses on enhancing engineering knowledge and skills with the fundamentals of lean manufacturing thinking and six sigma concepts to improve business processes through optimizing flow, eliminating waste, and emphasizing quality.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of lean six sigma concepts across an enterprise to contribute to an organization’s continuous improvement initiatives by identifying and employing lean and quality tools and techniques, along with utilizing statistical methods to achieve quality control.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
IE 5617 Lean Concepts and Applications 4
IE 6200 Engineering Probability and Statistics 4
IE 7280 Statistical Methods in Engineering 4
IE 7285 Statistical Quality Control 4

Program Credit/GPA Requirements
16 total semester hours required
Minimum 3.000 GPA required

The Department of Mechanical and Industrial Engineering (MIE) offers comprehensive research and educational programs for both Master of Science (MS) and Doctor of Philosophy (PhD) students in both traditional mechanical and industrial engineering disciplines, as well as applied programs. Our cutting-edge and vibrant doctoral programs include industrial engineering and interdisciplinary PhD programs; while our master’s degree programs consist of both master’s degrees in industrial engineering and operations research. These extensive programs and concentrations allow for the selection of a degree that meets a wide variety of personal and professional goals.

Master of Science Degree
To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master’s degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.000 (see table below). Students may pursue any master’s program either on a full-time or part-time basis; however, certain restrictions may apply.

Graduate Certificate Options
Students enrolled in a master’s degree in Industrial Engineering have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION
Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Doctor of Philosophy Degree
The MIE department admits applicants to the PhD program in industrial engineering either directly after earning a suitable bachelor’s degree (Direct Entry) or after earning a master’s degree (Advanced Entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying examinations (both written and oral area exams) and all the required course work. The PhD is awarded to students who demonstrate high academic achievement and research competence in the fields of mechanical or industrial engineering. The MIE department expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

Programs
Doctor of Philosophy (PhD)
- Industrial Engineering (p. 170)
- Industrial Engineering—Advanced Entry (p. 172)

Master of Science in Industrial Engineering (MSIE)
- Industrial Engineering (p. 175)

Graduate Certificate
- Data Mining Engineering (p. 177)
**Industrial Engineering, PhD**

**Requirements**
The PhD is awarded to students who demonstrate high academic achievement and research competence in the field of industrial engineering. To earn a PhD, a student must complete approved and advanced course work and submit and defend an original dissertation of independent research. The Department of Mechanical and Industrial Engineering (MIE) expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

The MIE department admits applicants to the PhD program either directly after earning a suitable bachelor’s degree (i.e., Direct Entry) or after earning a master’s degree (i.e., Advanced Entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying examinations (both written and oral area exams) as well as all the required course work.

**Academic and Research Advisors**
PhD students must find a research advisor within their first year of study. The research advisor must be a full-time or jointly appointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. If the research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Students are advised by the academic advisor of their discipline before they select their research advisor(s).

**Course Requirements and Plan of Study**
A typical program of study includes at least 48 semester hours of course work beyond a bachelor’s degree. Students who choose to get a master’s degree along the way to PhD, must complete a total of 56 semester hours (32 semester hours to earn a master’s degree and an additional 24 semester hours in order to earn a PhD). The 32 semester hours of course work that apply toward the master’s degree may include up to 8 semester hours of thesis or 4 semester hours of project or approved independent study course work.

All MIE PhD students must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850), preferably during their first year of full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one of these courses. The outcome of this online session will be filed with the student’s records.

Each doctoral student, together with his or her research advisor, should develop an initial program during the first semester of study. The final program is also subject to the approval of the area examining committee, who will add the program of study to the student’s record upon admission to doctoral candidacy.

Students may petition the MIE graduate affairs committee to substitute up to 4 semester hours of Independent Study (IE 7978) as part of their required course work. An independent study must be approved by the research advisor.

**PhD Candidacy**
To qualify as a doctoral candidate, a doctoral student must successfully complete the doctoral qualifying examinations (both a written comprehensive exam and an oral area exam) as well as all the required course work.

**Doctoral Qualifying Examinations**
**Background and Motivation:** To demonstrate breadth and depth in each of the subject exams, crossover and merging exams are necessary in an effort to provide students with an opportunity to master the core disciplines in mechanical or industrial engineering (at both undergraduate and graduate levels) along with a focus area of importance to their specialization. These exams also provide an assessment as to whether students have adequate knowledge to pursue advanced study and possess attributes of a doctoral candidate by demonstrating understanding of and the ability to apply fundamental principles. Also, an oral exam tied to the written exams is necessary in an effort to evaluate student’s potential to perform independent research in the chosen field of specialization for the doctoral program.

**Doctoral Qualifying Examinations Framework:** The doctoral qualifying examinations consist of the following two parts:

1. Two written comprehensive exams, which are respectively referred to as exam A and exam B.
2. An oral area exam equivalently referred to as area exam. This exam can be administered at any time after passing the written comprehensive exams but no later than the end of the semester in which the written exams are taken and passed.

**Written Comprehensive Examinations**
All doctoral students admitted directly with a bachelor’s degree must take the written comprehensive exams no later than the first time that it is offered after their first two years of study. The written comprehensive exams include two exams, exam A and exam B, and are given on Thursday and Friday of the first week of classes during regular semesters. A complete list of these exams along with topical coverage and details are provided on the MIE department graduate website (http://www.mie.neu.edu/mie/degrees-programs/graduate-studies). Students should also consult extensively with their research advisor regarding all aspects of the qualifying exams.

**Written Comprehensive Exams Rules**
Exam A, about four to six hours in length, should be selected from the list of major exams based on the student’s concentration (i.e., industrial engineering—IND), see below. No deviation from this rule will be permitted. As listed below, exam B, about one to two hours in length, should be selected from the list of exams B for PhD degree program in industrial engineering (see below). Only one exam from this list should be selected. All students are required to have their research advisor’s approval on selection of exam B prior to registering to take the written comprehensive exams. Note that exam B cannot be similar or close to one of the topics covered in exam A.

**List of exams A and B based on student’s research concentration:**

**Exams A for Industrial Engineering PhD Students:**
- Industrial Engineering (IND): Probability (IND1), Statistics (IND2), and Deterministic OR (IND3)

**Exams B for Industrial Engineering PhD Students (select one Exam B):**
- Data Mining (DMN)
- Human-Machine Systems (HMS)
Oral Area Examination

The objective of the oral exam, also referred to as area exam, is to assess a student's potential to perform independent research in the chosen field of specialization. This exam can be administered at any time after passing the written comprehensive exams but no later than the end of the semester in which the written exams are taken and passed. The exam shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate.

Oral area examination procedure: The student’s research advisor convenes and chairs an oral examination committee comprised of a minimum of three faculty or affiliated faculty members of the MIE department deemed appropriate to the student’s research field. This committee provides a set of technical papers pertinent to the student’s research area. The oral examination committee will then conduct the area exam that comprises the following two parts (both completed in a one-hour session):

1. A thirty-minute oral presentation on a selected number of papers out of the assigned technical papers
2. A thirty-minute oral exam by committee members’ questions and evaluation of the student covering topics specifically related to the student’s research area

Grading Procedure

Grading Procedure and Results of the Written Comprehensive Examination: The MIE graduate affairs committee (GAC) will review all students’ performance in the written comprehensive exams. Depending on the results of both major and minor exams and in consultation with the student’s research advisor, the GAC will recommend one of the following three possible options:

1. No invitation to oral area exam: The student will be dismissed from the program. He or she may be granted a master’s degree if the requirements are already met; otherwise, the student may continue to fulfill the requirements for a master’s degree in industrial engineering (IE), mechanical engineering (ME), or operations research (OR)
2. No invitation to oral area exam yet: The student will be asked to retake the written exam(s) again in the next offering; and/or take additional courses
3. Student is invited to oral area exam

Grading Procedure and Results of the Oral Area Examination: If the student’s performance in the oral area exam is not satisfactory, the student will be dismissed from the program. He or she may be granted a master’s degree if the requirements are met; otherwise, the student may continue to fulfill the requirements for a master’s degree in industrial engineering (IE), mechanical engineering (ME), or operations research (OR)

Upon successfully passing the oral exam, the student continues in the PhD program and upon passing all the required coursework, he or she will become a PhD candidate. The results of written and oral exams and any recommended course work will become part of the student’s record.

Appeal Procedure

The preliminary qualifying examination process provides means for reevaluation for students who fail one or more exams on their first attempt. Only the student’s research advisor may request the MIE graduate affairs committee to reevaluate the student’s failed exams using the appeal form found at the link (http://www.coe.neu.edu/sites/default/files/pdfs/coe/gse/miepetitionform.pdf).

PhD Students Changing Their Program

PhD students who, for any reason, decide to change their program (i.e., from PhD in ME to PhD in IE or vice versa) must take (or retake) the doctoral qualifying examinations (both written comprehensive exams and oral area exam) based on the student’s new major research area (i.e., industrial engineering, materials, mechanics, mechatronics, or thermofluids).

Interdisciplinary PhD Students with MIE as the Home Department

Students pursuing the COE interdisciplinary PhD program with the MIE department as their home department must take one of the major written comprehensive exams (exam A) of the MIE doctoral qualifying examinations. The minor exam (exam B) can be substituted with appropriate exam(s) from other department(s) involved with the student’s Interdisciplinary PhD program.

Dissertation Proposal Preparation and Presentation Timing

Students must present their dissertation proposal no more than twelve months after successfully completing the oral exam, referred to as area exam. In addition, the presentation of the dissertation proposal and the actual dissertation defense (see below) shall be no less than six months apart. The student’s dissertation committee will invite any additional faculty deemed appropriate to that field; this dissertation committee will then conduct the dissertation proposal session. Each student’s dissertation committee must be comprised of at least three members, including the research advisor. At least two of those three members must be full-time MIE faculty members.

Dissertation Course Requirements

Upon successful completion of the doctoral qualifying examinations (both written preliminary and oral area exams) as well as all the required coursework, the doctoral candidate, in consultation with his or her research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation (IE 9990). Upon completion of this sequence, the student must then register for Dissertation Continuation (IE 9996) in every semester (in each fall and spring semester and also in the summer term if summer is the student’s last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (IE 9996) until they complete the two-semester registration sequence for Dissertation (IE 9990).

To meet the full-time registration requirement for PhD students who have completed the majority of their coursework and not yet reached PhD candidacy, a zero-credit course, Candidacy Preparation—Doctoral (IE 8960), can be taken if needed to meet the full-time course registration requirement. Candidacy Preparation—Doctoral (IE 8960) is an individual instruction course, billed at 1 semester hour, and graded as S or U. This course does not have any course content, and students must register in a section for which their research or academic advisor is listed as the “instructor” in the online registration system.

Final Oral (Dissertation Defense) Examination

All doctoral candidates must pass a final oral exam. This exam will be scheduled once the dissertation committee agrees that the candidate’s research has reached a stage where it is appropriate for a formal presentation and after completion of all other requirements for the PhD, including all coursework approved in the final program of study. The objective of the exam is for the candidate to present and defend the results of the dissertation research and to demonstrate depth of
knowledge and significant expertise in the area of that research under questioning from the dissertation committee and other attendees.

The exam shall be publicly advertised at least one week in advance and all faculty members may attend and participate. At the conclusion of presentation and subsequent questions period, the dissertation committee will convene to determine the outcome. The committee may recommend that the candidate be awarded the PhD or may require additional research and/or modifications of the dissertation. In some cases, candidates may be asked to present an additional final oral dissertation defense.

**Residency Requirement**
After achieving PhD candidacy, the university residency requirement is satisfied by two semesters of full-time graduate registration or four semesters of part-time graduate registration. Students must be continually enrolled during the pursuit of their dissertation.

**Program Requirements**

**Bachelor’s Degree Entrance**
Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**
- **Doctoral qualifying exams (both written comprehensive and oral area exams)**
  (must be taken no later than the first time that it is offered after first two years of study)
- **Annual review**
- **Dissertation committee formation**
  (no more than twelve months after successfully completing the oral area exam)
- **Dissertation proposal**
  (must be presented no more than twelve months after successfully completing the oral area exam)
- **Dissertation defense**
  (shall be no less than months from Dissertation proposal presentation)

**General Requirements**

**Seminars**
- MEIE 6800 Technical Writing 0
- MEIE 6850 Research Seminar in Mechanical and Industrial Engineering 0

**Approved Course Work**
Requires 48 semester hours including up to 4 semester hours of Independent Study (IE 7978). Students who choose to get a master’s degree along the way to PhD must complete a total of 56 semester hours (32 semester hours) toward the sough master’s degree and 24 semester hours beyond the earned master’s degree. The 32 semester hours applied toward the master’s degree may include to 8 semester hours of MS Thesis or 4 semester hours of MS Project or approved independent study course work. Please consult your faculty advisor for acceptable courses.

**Dissertation Courses**
Complete the following (repeatable) course twice:

<table>
<thead>
<tr>
<th>ME 9990</th>
<th>Dissertation</th>
<th>0</th>
</tr>
</thead>
<tbody>
<tr>
<td>Must register in two consecutive semesters (may include full summer term).</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Program Credit/GPA Requirements**
48 total semester hours required
Minimum 3.00 GPA required

**Industrial Engineering, PhD—Advanced Entry**

**Requirements**
The PhD is awarded to students who demonstrate high academic achievement and research competence in the field of industrial engineering. To earn a PhD, a student must complete approved and advanced course work and submit and defend an original dissertation of independent research. The Department of Mechanical and Industrial Engineering (MIE) expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

The MIE department admits applicants to the PhD program either directly after earning a suitable bachelor’s degree (i.e., Direct Entry) or after earning a master’s degree (i.e., Advanced Entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying examinations (both written and oral area exams) and all the required course work.

**Academic and Research Advisors**
PhD students must find a research advisor within their first year of study. The research advisor must be a full-time or jointly appointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. If the research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Students are advised by the academic advisor of their discipline before they select their research advisor(s).

**Course Requirements and Plan of Study**
A typical program of study includes at least 24 semester hours of course work beyond a master’s degree. All MIE PhD students must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850), preferably during their first year of full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one of these courses. The outcome of online session will be filed with the student’s records.

Each doctoral student, together with his or her research advisor, should develop an initial program during the first semester of study. The final program is also subject to approval of the area examining committee that will add the program of study to the student’s record upon admission to doctoral candidacy.

Students may petition the MIE graduate affairs committee to substitute up to 4 semester hours of Independent Study (IE 7978) as part of their
required course work. An independent study must be approved by the research advisor.

**PhD Candidacy**
To qualify as a doctoral candidate, a doctoral student must successfully complete the doctoral qualifying examinations (both a written comprehensive exam and an oral area exam) as well as all the required course work.

**Doctoral Qualifying Examinations**

**Background and Motivation:** To demonstrate breadth and depth in each of the subject exams, crossover and merging exams are necessary in an effort to provide students with an opportunity to master the core disciplines in mechanical or industrial engineering (at both undergraduate and graduate levels) along with a focus area important to their specialization. These exams also provide an assessment as to whether students have adequate knowledge to pursue advanced study and possess attributes of a doctoral candidate by demonstrating understanding of and the ability to apply fundamental principles. Also, an oral exam tied to the written exams is necessary in an effort to evaluate student’s potential to perform independent research in the chosen field of specialization for the doctoral program.

**Doctoral Qualifying Examinations Framework:** The doctoral qualifying examinations consist of the following two parts:

1. Two written comprehensive exams, which are respectively referred to as exam A and exam B
2. An oral area exam also referred to as area exam. This exam can be administered at any time after passing the written comprehensive exams but no later than the end of the semester in which the written exams are taken and passed

**Written Comprehensive Examinations**
All doctoral students who hold a master’s degree must take the written comprehensive exams no later than the first time that it is offered after their first academic year of study. The written comprehensive exams include exam A and exam B and are given on Thursday and Friday of the first week of classes during regular semesters. A complete list of these exams along with topical coverage and details are provided on the MIE department graduate website (http://www.mie.neu.edu/mie/degrees-programs/graduate-studies). Students should also consult extensively with their research advisor regarding all aspects of the qualifying exams.

**Written Comprehensive Exams Rules:** Exam A, about four to six hours in length, should be selected from the list of major exams based on the student’s concentration (i.e., industrial engineering—IND), see below. No deviation from this rule will be permitted. As listed below, exam B, about one to two hours in length, should be selected from the list of exams B for PhD degree program in industrial engineering (see below). Only one exam from this list should be selected. All students are required to have their research advisor’s approval on selection of exam B prior to registering to take the written comprehensive exams. Note that exam B cannot be similar or close to one of the topics covered in exam A.

**List of Exams A and B based on Student’s Research Concentration:**

**Exams A for Industrial Engineering PhD Students:**

- Industrial Engineering (IND): Probability (IND1), Statistics (IND2), and Deterministic OR (IND3)

**Exams B for Industrial Engineering PhD Students (select one Exam B):**

- Data Mining (DMN)

- Human Machine Systems (HMS)
- Manufacturing Systems (MFS)
- Networks and Advanced Optimization (NAO)
- Reliability and Quality Assurance (RQA)
- Supply Chain Engineering (SCE)

**Oral Area Examination**
The objective of the oral exam, also referred to as the area exam, is to assess a student’s potential to perform independent research in the chosen field of specialization. This exam can be administered at any time after passing the written comprehensive exams but no later than the end of the semester in which the written exams are taken and passed. The exam shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate.

**Oral Area Examination Procedure:** The student’s research advisor convenes and chairs an oral examination committee comprised of a minimum of three faculty or affiliated faculty members of the MIE department deemed appropriate to the student’s research field. This committee provides a set of technical papers pertinent to the student’s research area. The oral examination Committee will then conduct the area exam that comprises the following two parts (both completed in a one-hour session):

1. A thirty-minute oral presentation on a selected number of papers out of the assigned technical papers
2. A thirty-minute oral exam consisting of committee members’ questions and evaluation of the student covering topics specifically related to the student’s research area

**Grading Procedure**

**Grading Procedure and Results of the Written Comprehensive Examination:** The MIE graduate affairs committee (GAC) will review all students’ performance in the written comprehensive exams. Depending on the results of both major and minor exams and in consultation with the student’s research advisor, the GAC will recommend one of following three possible options:

1. No invitation to oral area exam: The student will be dismissed from the program. He or she may be granted master’s degree if the requirements are already met; otherwise, the student may continue to fulfill the requirements for a master's degree in industrial engineering (IE), mechanical engineering (ME), or operations research (OR)
2. No invitation to oral area exam yet: The student will be asked to retake the written exam(s) again in the next offering; and/or take additional courses
3. Student is invited to oral area exam

**Grading Procedure and Results of the Oral Area Examination:** If the performance of the student in the oral area exam is not satisfactory, the student will be dismissed from the program. He or she may be granted a master’s degree if the requirements are met; otherwise, the student may continue to fulfill the requirements for a master’s degree in industrial engineering (IE), mechanical engineering (ME), or operations research (OR).

Upon successfully passing the oral exam, the student continues in the PhD program and upon passing all the required course work, he or she will become a PhD candidate. The results of the written and oral exams and any recommended course work become part of the student’s record.

**Appeal Procedure**
The preliminary qualifying examination process provides means for reevaluation for students who fail one or more exams on their first attempt. Only the student’s research advisor may request the MIE
graduate affairs committee to reevaluate the student’s failed exams using the appeal form found at the link (http://www.coe.neu.edu/sites/default/files/pdfs/coe/gse/miepetitionform.pdf).

PhD Students Changing Their Program

PhD students who, for any reason, decide to change their program (i.e., from PhD in ME to PhD in IE or vice versa) must take (or retake) the doctoral qualifying examinations (both written comprehensive exams and oral area exam) based on the student’s new major research area (i.e., industrial engineering, materials, mechanics, mechatronics, or thermofluids).

Interdisciplinary PhD Students with MIE as the Home Department

Students pursuing the COE interdisciplinary PhD program with the MIE department as their home department, must take one of the major written comprehensive exams (exam A) of the MIE doctoral qualifying examinations. The minor exam (exam B) can be substituted with appropriate exam(s) from other department(s) involved with the student’s interdisciplinary PhD program.

Dissertation Proposal Preparation and Presentation Timing

Students must present their dissertation proposal no more than 12 months after successfully completing the oral exam, referred to as area exam. In addition, the presentation of the dissertation proposal and the actual dissertation defense (see below) shall be no less than six months apart. The student’s dissertation committee will invite any additional faculty deemed appropriate to that field; this dissertation committee will then conduct the dissertation proposal session. Each student’s dissertation committee must be comprised of at least three members, including the research advisor. At least two of those three members must be full-time MIE faculty members.

Dissertation Course Requirements

Upon successful completion of the doctoral qualifying examinations (both written preliminary and oral area exams) as well as all the required course work, the doctoral candidate, in consultation with his or her research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation (IE 9990). Upon completion of this sequence, the student must then register for Dissertation Continuation (IE 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student’s last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (IE 9996) until they fulfill the two-semester registration sequence for Dissertation (IE 9990)

To meet the full-time registration requirement for PhD students who have completed the majority of their course work and not yet reached PhD candidacy, a zero-credit course, Candidacy Preparation—Doctoral (IE 8960), can be taken if needed to fulfill the full-time course registration requirement. Candidacy Preparation—Doctoral (IE 8960) is an individual instruction course, billed at 1 semester hour, and graded as S or U. Candidacy Preparation—Doctoral (IE 8960) does not have any course content, and students must register in a section for which their research or academic advisor is listed as the “instructor” in the online course registration system.

Final Oral (Dissertation Defense) Examination

All doctoral candidates must pass a final oral exam. This exam will be scheduled once the dissertation committee agrees that the candidate’s research has reached a stage where it is appropriate for a formal presentation and after completion of all other requirements for the PhD, including all course work approved in the final program of study.

The objective of the exam is for the candidate to present and defend the results of the dissertation research and to demonstrate depth of knowledge and significant expertise in the area of that research under questioning from the dissertation committee and other attendees.

The exam shall be publicly advertised at least one week in advance and all faculty members may attend and participate. At the conclusion of the presentation and subsequent questions period, the dissertation committee will convene to determine the outcome. The committee may recommend that the candidate be awarded the PhD or may require additional research and/or modifications of the dissertation. In some cases, candidates may be asked to present an additional final oral dissertation defense.

Residency Requirement

After achieving PhD candidacy, the university residency requirement is satisfied by two semesters of full-time graduate registration or four semesters of part-time graduate registration. Students must be continually enrolled during the pursuit of their dissertation.

Program Requirements

Master’s Degree Entrance

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

• Doctoral qualifying exams (both written comprehensive and oral area exams)

  (must be taken no later than the first time that it is offered after first year of study)

• Annual review

• Dissertation committee formation

  (no more than twelve months after successfully completing the oral area exam)

• Dissertation proposal

  (must be presented no more than twelve months after successfully completing the oral area exam)

• Dissertation defense

  (shall be no less than six months from dissertation proposal presentation)

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form helps the students manage their course work as well as helps the department to plan for requested course offerings. The PS can be modified at any time as students progress in their degree programs. However, requests for changes in the PS must be processed before the requested change actually takes place. A revised PS form must also be approved and signed.

Each student’s academic advisor must approve all courses prior to registration. Students may only use courses taken with the approval of the academic advisor toward the 32-semester-hour minimum requirement. However, students may petition the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students pursuing study or research under the guidance of a faculty member can elect the project option by taking Master’s Project (IE 7945). An MS project must be petitioned to the MIE graduate affairs committee and approved by both faculty member (instructor) and the academic (concentration) advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students doing the course work option may petition the MIE graduate affairs committee to substitute up to a 4-semester-hour Independent Study (IE 7978). An independent study must be approved by the academic advisor. The petition must clearly state the reason for taking the course; a brief description of goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study.

Graduate Certificate Options

Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

Chemical Engineering

- Process Safety Engineering (p. 123)

Computer Systems Engineering

- Computer Systems Engineering (p. 139)

Energy Systems

- Energy Systems (p. 161)
- Renewable Energy (p. 160)
- Energy Systems Management (p. 161)
- Sustainable Energy Systems (p. 161)

Engineering Management

- Engineering Business (p. 167)
• Engineering Management (p. 167)
• Technology Systems Management (p. 168)
• Engineering Economic Decision Making (p. 168)
• Supply Chain Engineering Management (p. 168)
• Lean Six Sigma (p. 169)

Industrial Engineering
• Data Mining Engineering (p. 177)

Telecommunication Systems Management
• IP Telephony Systems (p. 204)
• Broadband Wireless Systems (p. 204)

GORDON INSTITUTE OF ENGINEERING LEADERSHIP
Master’s Degree in Industrial Engineering with Graduate Certificate in Engineering Leadership

Students may complete a master’s degree in Industrial Engineering in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32 semester hour degree and certificate will require 16 hours of advisor-approved Industrial Engineering technical courses.

Engineering Leadership (p. 163)

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

General Requirements
IE 6200 Engineering Probability and Statistics 4
OR 6205 Deterministic Operations Research 4
Complete 8 semester hours from the following: 8
IE 5400 Healthcare Systems Modeling and Analysis
IE 7200 Supply Chain Engineering
IE 7215 Simulation Analysis
IE 7315 Human Factors Engineering
IE 7275 Data Mining in Engineering

Options
Complete one of the following options:

COURSE WORK OPTION
Complete 16 semester hours from the course list below. 16
Note: Other approved courses may be chosen in consultation with a faculty advisor.

PROJECT OPTION
IE 7945 Master’s Project 4
MEIE 6800 Technical Writing 0
MEIE 6850 Research Seminar in Mechanical and Industrial Engineering 0
Complete 12 semester hours from the course list below. 12
Note: Other approved courses may be chosen in consultation with a faculty advisor.

THESIS OPTION
IE 7990 Thesis (required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship) 8
MEIE 6800 Technical Writing 0
MEIE 6850 Research Seminar in Mechanical and Industrial Engineering 0
Complete 8 semester hours from the course list below. 8
Note: Other approved courses may be chosen in consultation with a faculty advisor.

CERTIFICATE OPTION
Students completing this option will receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

Complete 16 semester hours of graduate certificate required course work. (p. 162)

Course List
CSYE 6200 Concepts of Object-Oriented Design 4
CSYE 6205 Concepts of Object-Oriented Design with C++ 4
CSYE 6210 Component Software Development 4
CSYE 6220 Enterprise Software Design 4
CSYE 7230 Software Engineering 4
CSYE 7270 Building Virtual Environments 4
CSYE 7280 User Experience Design and Testing 4
EMGT 5220 Engineering Project Management 4
EMGT 5300 Engineering/Organizational Psychology 4
EMGT 6225 Economic Decision Making 4
EMGT 6305 Financial Management for Engineers 4

Data Mining Engineering, Graduate Certificate

The data mining engineering graduate certificate program focuses on the creation of statistical and predictive models and algorithms to analyze large data sets with attention on extracting information from data sets and transforming data into structures for further analysis.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to data warehousing, data management, data pre- and postprocessing, development of statistical models, structures discovery, and data visualization.

Information Assurance
Website (http://www.ccis.northeastern.edu/program/information-assurance-phd)

202 West Village H
617.373.2462
Bryan Lackaye, Assistant Dean of Graduate Programs, College of Computer Science, phd-ia@lists.ccs.neu.edu

Please see the College of Computer and Information Sciences Information Assurance (p. 94) programs page for curriculum information.

The College of Computer and Information Science offers a Doctor of Philosophy in Information Assurance in conjunction with the College of Engineering and the College of Social Sciences and Humanities. The PhD in Information Assurance program is designed for both students with a strong background in a technical field and those with nontechnical backgrounds and a strong desire to pursue interdisciplinary work in areas related to information assurance. Applicants are expected to have a minimum 3.000 undergraduate GPA.

Students who do not have the necessary technical background may be required to take prerequisite courses to prepare for the program.

The PhD in Information Assurance degree requires completion of at least 48 semester credit hours beyond a bachelor’s degree. Students who enter with an undergraduate degree will typically need four to five years to complete the program and have the option of obtaining a master's degree from one of the departments participating in the program. To do so, they must meet all of the department’s degree requirements.

Students who enter the program with a master’s degree will be required to complete 16 semester credit hours beyond the master’s degree. They also must complete the required core courses.

Graduate Certificate Options
Students enrolled in a master’s degree in Information Systems have the opportunity to also pursue one of 14 engineering graduate certificate
options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION
Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Programs
Master of Science in Information Systems (MSIS)
  • Information Systems (p. 178)

Information Systems, MSIS

Degree Requirements
A minimum of 32 semester hours must be earned toward completion of the MSIS degree. A minimum grade-point average of 3.000 is required over all courses applied toward the degree.

Students may not register for more than 9 semester hours in the fall and spring terms and 4 semester hours in each of the three summer terms. Any exception must be approved by the program director.

The IS program does not accept any transfer credit. All 32 credits must be completed from the IS and CSYE program course work specified.

Seattle Campus
Students can complete this degree at our Seattle campus. Students progress through their course work in a cohort, taking two classes each fall and spring. Summer options will also be available at the discretion of the program director.

Graduate Certificate Options
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

Chemical Engineering
  • Process Safety Engineering (p. 123)

CERTIFICATE OPTION
Students completing this option will receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

Required Course Work
Complete 16 semester hours of graduate certificate course work. (p. 162)

Electives

Complete 12 semester hours from the following subject areas:

- INFO, CSYE (except CSYE 6220)

Program Credit/GPA Requirements
32 total semester hours required
Minimum 3.000 GPA required

Interdisciplinary Engineering PhD Program
Website (https://www.coe.neu.edu/degrees/interdisciplinary-engineering-phd)
Sara Wadia-Fascetti, PhD
Associate Dean for Graduate Education
130 Snell Engineering Center
617.373.2711

The Graduate School of Engineering offers an interdisciplinary Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. Those interested in this program of study must submit a detailed proposal of the areas of inquiry and research with their application for admission. Interdisciplinary study requires favorable recommendation by a sponsoring doctoral-degree-granting department and approval by authorized representatives of the graduate committees of the departments appropriate to the disciplines covered under the applicant’s proposal. The sponsoring department serves as the student’s registration department.

Formation of Interdisciplinary Committee
Students admitted for interdisciplinary study must obtain the consent of a faculty advisor who will direct his or her doctoral dissertation. This advisor, who may or may not be a member of the registration department, will chair the student’s interdisciplinary committee. The chair of the registration department, or his or her designee, will then appoint a second member to the committee. These two members will invite one or more additional members or request that the director of the Graduate School of Engineering do so. The committee must represent at least two academic departments or programs, and a majority of the committee members must represent doctoral-degree-granting departments. The chair of the registration department, or his or her designee, will notify the director of the Graduate School of Engineering of the membership of the committee as soon as arrangements are finalized.

Duties of Interdisciplinary Committee
A member of the interdisciplinary committee who is also a member of the registration department will serve as the registration officer to approve course registration for the student. The registration officer will file a copy of the approved course registration with the other committee members and with the graduate committee of the registration department. The interdisciplinary committee is responsible for overseeing the completion of all requirements. The committee must also certify to the registration department and to the Graduate School of Engineering the completion of all requirements for the award of the doctoral degree.

The interdisciplinary committee must assure that the student’s program represents standards comparable to those of the registration department and that the program is not so broad that it has inadequate depth in any area. The director of the Graduate School of Engineering may review a student’s interdisciplinary program at any time to verify that the student meets program objectives.

The Department of Mechanical and Industrial Engineering (MIE) offers comprehensive research and educational programs for both MS and PhD students in both traditional mechanical and industrial engineering disciplines, as well as applied programs. Our cutting-edge and vibrant doctoral programs include PhD in Mechanical Engineering and Interdisciplinary PhD; while our master’s degree programs consist of mechanical engineering with concentrations in material science, mechanics and design, mechatronics, thermofluids, and general mechanical engineering. These extensive programs and concentrations allow for the selection of a degree that meets a wide variety of personal and professional goals.

Master of Science Degree
To be eligible for admission to any of the Master of Science (MS) degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master’s degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.000 (see table below). Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

The MIE department offers a master’s degree in mechanical engineering with one of the following concentrations:

- General mechanical engineering
- Material science
- Mechanics and design
- Mechatronics
Graduate Certificate Options
Students enrolled in a master's degree in Mechanical Engineering have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION
Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Doctor of Philosophy (PhD) Degree
The MIE department admits applicants to the PhD program either directly after earning a suitable bachelor's degree (Direct Entry) or after earning a master's degree (Advanced Entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying examinations (both written and oral area exams) and all the required course work. The PhD is awarded to students who demonstrate high academic achievement and research competence in the fields of mechanical or industrial engineering. The MIE department expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

Programs
Doctor of Philosophy (PhD)
- Mechanical Engineering (p. 180)
- Mechanical Engineering—Advanced Entry (p. 183)

Master of Science (MS)
- Data Analytics Engineering (p. 185)

Master of Science in Mechanical Engineering (MSME)
- Mechanical Engineering with Concentration in General Mechanical Engineering (p. 188)
- Mechanical Engineering with Concentration in Material Science (p. 191)
- Mechanical Engineering with Concentration in Mechanics (p. 190)
- Mechanical Engineering with Concentration in Mechatronics (p. 193)
- Mechanical Engineering with Concentration in Thermofluids (p. 195)

Mechanical Engineering, PhD

Requirements
The PhD is awarded to students who demonstrate high academic achievement and research competence in the fields of mechanical or industrial engineering. To earn a PhD, a student must complete an approved, rigorous program of advanced course work and submit and defend an original dissertation of independent research. The Department of Mechanical and Industrial Engineering (MIE) expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

The MIE department admits applicants to the PhD program either directly after earning a suitable bachelor's degree (i.e., Direct Entry) or after earning a master's degree (i.e., Advanced Entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying examinations (both written and oral area exams) as well as all the required course work.

Academic and Research Advisors
PhD students must find a research advisor within their first year of study. The research advisor must be a full-time or jointly appointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. If the research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Students are advised by the academic advisor of their discipline before they select their research advisor(s).

Course Requirements and Plan of Study
A typical program of study includes at least 48 semester hours of course work beyond a bachelor's degree. Those students who choose to get an MS degree along the way to PhD, must complete a total of 56 semester hours (32 semester hours to earn an MS degree and 24 semester hours beyond the earned MS). The 32 semester hours if course work applied toward the master's degree may include up to 8 semester hours of MS thesis or 4 semester hours of project or approved independent study.

All MIE PhD students must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850), preferably during their first year of full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one of these courses. Outcome of the online session will be filed with the student’s records.

Each doctoral student, together with his or her research advisor, should develop an initial program during the first semester of study. The final program is also subject to the approval of the area examining committee, who will add the program of study to the student's record upon admission to doctoral candidacy.

Students may petition the MIE graduate affairs committee to substitute up to a 4-semester-hour Independent Study (ME 7978) as part of their required course work. An independent study must be approved by the research advisor.

PhD Candidacy
To qualify as a doctoral candidate, a doctoral student must successfully complete the doctoral qualifying examinations (both a written comprehensive exam and an oral area exam—see below) as well as all the required course work.

Doctoral Qualifying Examinations
Background and Motivation: To demonstrate breadth and depth in each of the subject exams, crossover and merging exams are necessary in an effort to provide students with an opportunity to master the core disciplines in mechanical or industrial engineering (at both undergraduate and graduate levels) along with a focus area of importance to their specialization. These exams also provide an assessment as to whether students have adequate knowledge to pursue advanced study, and possess attributes of a doctoral candidate by demonstrating understanding of and the ability to apply fundamental principles. Also, an oral exam tied to the written exams is necessary in an effort to evaluate student’s potential to perform independent research in the chosen field of specialization for the doctoral program.
Doctoral Qualifying Examinations Framework: The doctoral qualifying examinations consist of the following two parts:

1. Two written comprehensive exams, which are respectively referred to as exam A and exam B.
2. An oral area exam equivalently referred to as area exam. This exam can be administered at any time after passing the written comprehensive exams but no later than the end of the semester in which the written exams are taken and passed.

**WRITTEN COMPREHENSIVE EXAMINATIONS**
All doctoral students admitted directly with a bachelor’s degree must take the written comprehensive exams no later than the first time that it is offered after their first two years of study. Written comprehensive exams include exam A and exam B and are given on Thursday and Friday of the first week of classes during regular semesters. A complete list of these exams along with topical coverage and details are provided on the MIE department graduate website (http://www.mie.neu.edu/mie/degrees-programs/graduate-studies). Students should also consult extensively with their research advisor regarding all aspects of the qualifying exams.

Written Comprehensive Exams Rules: Exam A, about four to six hours in length, should be selected from the list of major exams based on the student’s concentration (i.e., materials, mechanics, mechatronics, or thermofluids), see below. No deviation from this rule will be permitted. As listed below, exam B, about one to two hours in length, should be selected from the list of exams B for PhD degree program in mechanical engineering (see below). Only one exam from this list should be selected. All students are required to have their research advisor’s approval on selection of exam B prior to registering to take the written comprehensive exams. Note that exam B cannot be similar or close to one of the topics covered in exam A.

List of Exams A and B based on Student’s Research Concentration:

**Exams A for Mechanical Engineering PhD Students (select one Exam A):**
- Materials Science Engineering (MSE): Kinetics of Materials (MSE1), Thermodynamics of Materials (MSE2), and Process, Structure, Property, and Performance of Materials (MSE3)
- Mechanics (MEC): Mechanics of Deformable Media (MEC1), Dynamics and Vibration (MEC2), and Finite Element Method (MEC3)
- Dynamic Systems and Control (DSC): Dynamic Systems (DSC1), Mechanical Vibrations (DSC2), and Control Systems (DSC3)
- Thermofluids Science (TFS): Thermodynamics (TFS1), Fluid Mechanics (TFS2), and Heat Transfer (TFS3)

**Exams B for Mechanical Engineering PhD Students (select one Exam B):**
- Control Systems (DSC3)
- Dynamic Systems (DSC1)
- Dynamics and Vibration (MEC2)
- Engineering Mathematics (MTH)
- Finite Element Method (MEC3)
- Fluid Mechanics (TFS2)
- Heat Transfer (TFS3)
- Kinetics of Materials (MSE1)
- Mechanics of Deformable Media (MEC1)
- Process, Structure, Property, and Performance of Materials (MSE3)
- Thermodynamics (TFS1)
- Thermodynamics of Materials (MSE2)

**ORAL AREA EXAMINATION**
The objective of the oral exam, also referred to as the area exam, is to assess a student’s potential to perform independent research in the chosen field of specialization. This exam can be administered at any time after passing the written comprehensive exams but no later than the end of the semester in which the written exams are taken and passed. The exam shall be publicly advertised at least one week in advance and all faculty members, and students may attend and participate.

**Oral Area Examination Procedure:** The student’s research advisor convenes and chairs an oral examination committee comprised of a minimum of three faculty or affiliated faculty members of the MIE department deemed appropriate to the student’s research field. This committee provides a set of technical papers pertinent to the student’s research area. The oral examination committee will then conduct the area exam that comprises the following two parts (both to be completed in a one-hour session):

1. A thirty-minute oral presentation on a select number of papers out of the assigned technical papers
2. A thirty-minute oral exam consisting of committee members’ questions and evaluation of the student covering topics specifically related to the student’s research area

**GRADING PROCEDURE**
Grading Procedure and Results of the Written Comprehensive Examination: The MIE graduate affairs committee (GAC) will review all students’ performance in the written comprehensive exams. Depending on the results of both major and minor exams and in consultation with the student’s research advisor, the GAC will recommend one of the following three possible options:

1. **No invitation to oral area exam:** The student will be dismissed from the program. He or she may be granted an MS degree if the requirements are already met; otherwise, the student may continue to fulfill the requirements for a master’s degree in industrial engineering (IE), mechanical engineering (ME), or operations research (OR).
2. **No invitation to oral area exam yet:** The student will be asked to retake the written exam(s) again in the next offering; and/or take additional courses.
3. **Student is invited to oral area exam.**

Grading Procedure and Results of the Oral Area Examination: If a student’s performance in the oral area exam is not satisfactory, the student will be dismissed from the program. He or she may be granted an MS degree if the requirements are met; otherwise, the student may continue to fulfill the requirements for a master’s degree in industrial engineering (IE), mechanical engineering (ME), or operations research (OR).

Upon successfully passing the oral exam, the student continues in the PhD program and upon passing all the required course work, he or she will become a PhD candidate. The results of the written and oral exams and any recommended course work become part of the student’s record.

**APPEAL PROCEDURE**
The preliminary qualifying examination process provides means for reevaluation for students who fail one or more exams on their first attempt. Only the student’s research advisor may request the MIE graduate affairs committee to reevaluate the student’s failed exams using the appeal form found at the link (http://www.coe.neu.edu/sites/default/files/pdfs/coe/gse/miepetitionform.pdf).
**PhD Students Changing Their Program**

PhD students who, for any reason, decide to change their degree program (i.e., from PhD in ME to PhD in IE or vice versa) must take (or retake) the doctoral qualifying examinations (both written comprehensive exams and oral area exam) based on the student’s new major research area (i.e., industrial engineering, materials, mechanics, mechatronics, or thermofluids).

**Interdisciplinary PhD Students with MIE as the Home Department**

Students pursuing a College of Engineering interdisciplinary PhD program with the MIE department as their home department must take one of the major written comprehensive exams (exam A) of the MIE doctoral qualifying examinations. The minor exam (exam B) can be substituted with appropriate exam(s) from other department(s) involved with the student’s interdisciplinary PhD program.

**Dissertation Proposal Preparation and Presentation Timing**

Students must present their dissertation proposal no more than twelve months after successfully completing the oral exam, referred to as area exam. In addition, the presentation of the dissertation proposal and the actual dissertation defense (see below) shall be no less than six months apart. The student’s dissertation committee will invite any additional faculty deemed appropriate to that field; this dissertation committee will then conduct the dissertation proposal session. Each student’s dissertation committee must be comprised of at least three members, including the research advisor(s). At least two of those three members must be full-time MIE faculty members.

**Dissertation Course Requirements**

Upon successful completion of the doctoral qualifying examinations (both written preliminary and oral area exams) as well as all the required course work, the doctoral candidate, in consultation with his or her research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation (ME 9990). Upon completion of this sequence, the student must then register for Dissertation Continuation (ME 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student’s last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (ME 9996) until they fulfill the two-semester sequence of Dissertation (ME 9990).

To meet the full-time registration requirement for PhD students who have completed the majority of their course work and not yet reached PhD candidacy, a zero-credit course, Candidacy Preparation—Doctoral (ME 8960), can be taken if needed to fulfill the full-time course registration requirement. Candidacy Preparation—Doctoral (ME 8960) is an individual instruction course, billed at 1 semester hour, and graded S or U. Candidacy Preparation—Doctoral (ME 8960) does not have any course content, and students must register in a section for which their research or academic advisor is listed as the “instructor”.

**Final Oral (Dissertation Defense) Examination**

All doctoral candidates must pass a final oral exam. This exam will be scheduled once the dissertation committee agrees that the candidate’s research is at a stage where it is appropriate for formal presentation and after completion of all other PhD requirements, including all the course work approved in the final program of study. The objective of the exam is for the candidate to present and defend the results of the dissertation research and to demonstrate depth of knowledge and significant expertise in the area of that research under questioning from the dissertation committee and other attendees.

The exam shall be publicly advertised at least one week in advance and all faculty members may attend and participate. At the conclusion of the presentation and subsequent questions period, the dissertation committee will convene to determine the outcome. The committee may recommend that the candidate be awarded the PhD or may require additional research and/or modifications of the dissertation. In some cases, candidates may be asked to present an additional final oral dissertation defense.

**Residency Requirement**

After achieving PhD candidacy, the university residency requirement is satisfied by two semesters of full-time graduate registration or four semesters of part-time graduate registration. Students must be continually enrolled during the pursuit of dissertation.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

- **Doctoral qualifying exams (both written comprehensive and oral area exams)**
  
  (must be taken no later than the first time that it is offered after first two years of study)

- **Annual review**

- **Dissertation committee formation**

  (no more than twelve months after successfully completing the oral area exam)

- **Dissertation proposal**

  (must be presented no more than twelve months after successfully completing the oral area exam)

- **Dissertation defense**

  (shall be no less than six months from dissertation proposal presentation)

**General Requirements**

PhD Candidacy
To qualify as a doctoral candidate, a doctoral student must successfully complete the doctoral qualifying examinations (both a written comprehensive exam and an oral area exam—see below) as well as all the required course work.

Doctoral Qualifying Examinations
Background and Motivation: To demonstrate breadth and depth in each of the subject exams, crossover and merging exams are necessary in an effort to provide students with an opportunity to master the core disciplines in mechanical or industrial engineering (at both undergraduate and graduate levels) along with a focus area of importance to their specialization. These exams also provide an assessment as to whether students have adequate knowledge to pursue advanced study and possess attributes of a doctoral candidate by demonstrating understanding of and the ability to apply fundamental principles. Also, an oral exam tied to the written exams is necessary in an effort to evaluate student’s potential to perform independent research in the chosen field of specialization for the doctoral program.

Doctoral Qualifying Examinations Framework: The doctoral qualifying examinations consist of the following two parts:

1. Two written comprehensive exams, which are respectively referred to as eExam A and exam B.
2. An oral exam equivalently referred to as area exam. This exam can be administered at any time after passing the written comprehensive exams but no later than the end of the semester in which the written exams are taken and passed.

WRITTEN COMPREHENSIVE EXAMINATIONS
All doctoral students who hold a master’s degree must take the written comprehensive exams no later than the first time that it is offered after their first academic year of study. The written comprehensive exams consist of two parts: (1) Written area exams (two exams, area A and area B) and (2) Written disciplinary exams. The written area exams and written disciplinary exams are taken in the same semester and at the same time. The written area exams include two exams, Exam A and Exam B, and are given on Tuesday and Thursday of the first week of classes during regular semesters. A complete list of these exams along with topical coverage and details are provided on the MIE department graduate website (http://www.mie.neu.edu/mie/degrees-programs/graduate-studies). Students should also consult extensively with their research advisor regarding all aspects of the qualifying exams.

Written Comprehensive Exams Rules: Exam A, about four to six hours in length, should be selected from the list of major exams based on the student’s concentration (i.e., materials, mechanics, mechatronics, or thermofluids), see below. No deviation from this rule will be permitted. As listed below, exam B, about one to two hours in length, should be selected from the list of exams B for the PhD degree program in mechanical engineering (see below). Only one exam from this list should be selected. All students are required to have their research advisor’s approval on selection of exam B prior to registering to take written comprehensive exams. Note that exam B cannot be similar or close to one of the topics covered in exam A.

List of Exams A and B Based on Student’s Research Concentration:

Exams A for Mechanical Engineering PhD Students (select one Exam A):
- Materials Science Engineering (MSE): Kinetics of Materials (MSE1), Thermodynamics of Materials (MSE2); and Process, Structure, Property, and Performance of Materials (MSE3)
- Mechanics (MEC): Mechanics of Deformable Media (MEC1), Dynamics and Vibration (MEC2), and Finite Element Method (MEC3)
Grading Procedure and Results of the Oral Area Examination: If the student’s performance in oral area exam is not satisfactory, the student will be dismissed from the program. He or she may be granted an MS degree if the requirements are met; otherwise, the student may continue to fulfill the requirements for a master’s degree in industrial engineering (IE), mechanical engineering (ME), or operations research (OR).

Upon successfully passing the oral exam, the student continues in the PhD program and upon passing all the required course work, he or she will become a PhD candidate. The results of the written and oral exams and any recommended course work become part of the student’s record.

APPEAL PROCEDURE
The preliminary qualifying examination process provides means for reevaluation for students who fail one or more exams on their first attempt. Only the student’s research advisor may request the MIE graduate affairs committee to reevaluate the student’s failed exams using the appeal form found at the link (http://www.coe.neu.edu/sites/default/files/pdfs/coe/gse/miepetitionform.pdf).

PhD Students Changing Their Program
PhD students who, for any reason, decide to change their program (i.e., from PhD in ME to PhD in IE or vice versa) must take (or retake) the doctoral qualifying examinations (both written comprehensive exams and oral area exam) based on the student’s new major research area (i.e., industrial engineering, materials, mechanics, mechatronics, or thermofluids).

Interdisciplinary PhD Students with MIE as the Home Department
Students pursuing a College of Engineering interdisciplinary PhD program with the MIE department as their home department, must take one of the major written comprehensive exams (exam A) of the MIE doctoral qualifying examinations. The minor exam (exam B) can be substituted with appropriate exam(s) from other department(s) involved with the student’s interdisciplinary PhD program.

Dissertation Proposal Preparation and Presentation Timing
Students must present their dissertation proposal no more than twelve months after successfully completing the oral exam, referred to as the area exam. In addition, the presentation of the dissertation proposal and the actual dissertation defense (see below) shall be no less than six months apart. The student’s dissertation committee will invite any additional faculty deemed appropriate to that field; this dissertation committee will then conduct the dissertation proposal session. Each student’s dissertation committee must be comprised of at least three members, including the research advisor. At least two of those three members must be full-time MIE faculty members.

Dissertation Course Requirements
Upon successful completion of the doctoral qualifying examinations (both written preliminary and oral area exams) as well as all the required course work, the doctoral candidate, in consultation with his or her research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation (ME 9990). Upon completion of this sequence, the student must then register for Dissertation Continuation (ME 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student’s last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (ME 9996) until they fulfill the two-semester Dissertation (ME 9990) registration sequence.

To meet the full-time registration requirement for PhD students who have completed the majority of their course work and not yet reached

Exams B for Mechanical Engineering PhD Students (select one Exam B):

- Control Systems (DSC3)
- Dynamic Systems (DSC1)
- Dynamics and Vibration (MEC2)
- Engineering Mathematics (MTH)
- Finite Element Method (MEC3)
- Fluid Mechanics (TFS2)
- Heat Transfer (TFS3)
- Kinetics of Materials (MSE1)
- Mechanics of Deformable Media (MEC1)
- Process, Structure, Property, and Performance of Materials (MSE3)
- Thermodynamics (TFS1)
- Thermodynamics of Materials (MSE2)

ORAL AREA EXAMINATION
The objective of the oral exam, also referred to as the area exam, is to assess the student’s potential to perform independent research in the chosen field of specialization. This exam can be administered at any time after passing the written comprehensive exams but no later than the end of the semester in which the written exams are taken and passed. The exam shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate.

Oral Area Examination Procedure: The student’s research advisor convenes and chairs an oral examination committee comprised of a minimum of three faculty or affiliated faculty members of the MIE department deemed appropriate to the student’s research field. This committee provides a set of technical papers pertinent to the student’s research area. The oral examination committee will then conduct the area exam that comprises the following two parts (both to be completed in a one-hour session):

1. A thirty-minute oral presentation on a selected number of papers out of the assigned technical papers
2. A thirty-minute oral exam consisting of committee members’ questions and evaluation of the student covering topics specifically related to the student’s research area

GRADING PROCEDURE
Grading Procedure and Results of the Written Comprehensive Examination: The MIE graduate affairs committee (GAC) will review all students’ performance in the written comprehensive exams. Depending on the results of both major and minor exams and in consultation with the student’s research advisor, the GAC will recommend one of the following three possible options:

1. No invitation to oral area exam: The student will be dismissed from the program. He or she may be granted an MS degree if the requirements are already met; otherwise, the student may continue to fulfill the requirements for a master’s degree in industrial engineering (IE), mechanical engineering (ME), or operations research (OR).
2. No invitation to oral area exam yet: The student will be asked to retake the written exam(s) again in the next offering; and/or take additional courses.
3. Student is invited to oral area exam.
PhD candidacy, a zero-credit course, Candidacy Preparation—Doctoral (ME 8960), can be taken if needed to meet full-time course registration requirements. This course is an individual instruction course, billed at 1 semester hour, and graded as S or U. Candidacy Preparation—Doctoral (ME 8960) does not have any course content, and students must register in a section for which their research or academic advisor is listed as the “instructor” in the online course registration system.

**Final Oral (Dissertation Defense) Examination**
All doctoral candidates must pass a final oral exam. This exam will be scheduled once the dissertation committee agrees that the candidate’s research is at a stage where it is appropriate for formal presentation and after completion of all other requirements for the PhD, including all course work approved in the final program of study. The objective of the exam is for the candidate to present and defend the results of the dissertation research and to demonstrate depth of knowledge and significant expertise in the area of that research under questioning from the dissertation committee and other attendees.

The exam shall be publicly advertised at least one week in advance and all faculty members may attend and participate. At the conclusion of the presentation and subsequent questions period, the dissertation committee will convene to determine the outcome. The committee may recommend that the candidate be awarded the PhD or may require additional research and/or modifications of the dissertation. In some cases, candidates may be asked to present an additional final oral dissertation defense.

**Residency Requirement**
After achieving PhD candidacy, the university residency requirement is satisfied by two semesters of full-time graduate registration or four semesters of part-time graduate registration. Students must be continually enrolled during the pursuit of their dissertation.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

**Data Analytics Engineering, MS**

**Master of Science (MS) Degree in Data Analytics Engineering**

The Department of Mechanical and Industrial Engineering (MIE) offers Master of Science (MS) in Data Analytics Engineering in order to meet the current and projected demand for a workforce trained in analytics. This degree program offers students an opportunity to train for industry jobs or to acquire rigorous analytical skills and research experience to prepare for a doctoral program in health, security, and sustainability at Northeastern University. While the core courses for this program are offered by the College of Engineering, elective courses can be chosen from diverse disciplines spread across various colleges at Northeastern. The MS degree in data analytics engineering is designed to enable the graduating students to address the growing need for professionals who are trained in advanced data analytics and can transform large streams of data into understandable and actionable information for the purpose of making decisions. The key sectors that require analytics professionals include healthcare, smart manufacturing, supply chain and logistics, national security, defense, banking, finance, marketing, and human resources.

The MS in Data Analytics Engineering is designed to help students acquire knowledge and skills to:

- Discover opportunities to improve systems, processes, and enterprises through data analytics
- Apply optimization, statistical, and machine-learning methods to solve complex problems involving large data from multiple sources
- Collect and store data from a variety of sources, including Internet of Things (IoT), an integrated network of devices and sensors, customer touch points, processes, social media, and people
- Work with technology teams to design and build large and complex SQL databases
- Use tools and methods for data mining, big-data algorithms, and data visualization to generate reports for analysis and decision making
- Create integrated views of data collected from multiple sources of an enterprise
- Understand and explain results of data analytics to decision makers
- Design and develop analytics projects

This degree program seeks to prepare students for a comprehensive list of tasks including collecting, storing, processing and analyzing data,
reporting statistics and patterns, drawing conclusions and insights, and making actionable recommendations.

**General Degree Requirements**

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.00. Students may pursue any master's program either on a full-time or part-time basis; however, certain restrictions may apply.

Students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete an 8-semester-hour thesis. Other students may choose to complete their master's degree by pursuing a thesis, project, or course work option. Students who complete the thesis option must make a presentation of their thesis before approval by the department.

**Specific Degree Requirements**

Core courses for the MS in Data Analytics Engineering provide students with a foundation in operations research, statistics, data and knowledge engineering, and visualization. Students can select electives from a wide range of fields including business, engineering, healthcare, manufacturing, and urban communities/cities. These courses are designed to provide students with a strong understanding of probability and statistics, optimization methods, data mining, database design, and visualization. Elective courses provide students with the knowledge and understanding of descriptive, prescriptive, diagnostics, and predictive analytics as applied to a specific field of interest such as business, healthcare, manufacturing, and urban communities/cities. Alternatively, students can select their electives so that they can prepare for a doctoral program by taking advanced courses in mathematics, statistics, machine learning, and pattern recognition.

**Special Course Requirements**

All MIE MS students doing thesis or project options (excluding MS students in engineering management and Gordon Engineering Leadership programs) must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850), preferably during the first year of their full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements. Students in combined BS/MS programs must take Research Seminar in Mechanical and Industrial Engineering (MEIE 6850) as part of their course work requirement, while Research Seminar in Mechanical and Industrial Engineering (MEIE 6850) is optional for these students.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one of these courses. Outcome of the online session will be filed with the student's records.

**Academic and Research Advisors**

All nonthesis students are advised by the academic advisor designated for their respective concentration or program. Students doing thesis option must find a research advisor within their first year of study and may have thesis reader(s) at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. If the research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Thesis option students are advised by the academic advisor of their concentration before they select their research advisor(s).

**Plan of Study and Course Selection**

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form helps the students manage their course work as well as helps the department to plan for requested course offerings. Plan of Study may be modified at any time as students progress in their degree programs. However, requests for changes in PS must be processed before the requested change actually takes place. A revised PS form must also be approved and signed.

Each student’s academic advisor must approve all courses prior to registration. Students may only use courses taken with the approval of the academic advisor toward the 32-semester-hour minimum requirement. However, students may petition the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students pursuing study or research under the guidance of a faculty member can choose Project Option by taking Master’s Project (ME 7945). An MS project must be petitioned to the MIE graduate affairs committee and approved by both faculty member (instructor) and the academic (concentration) advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study.

**Graduate Certificate Options**

Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

**Chemical Engineering**

- Renewable Energy (p. 160)
- Energy Systems Management (p. 161)
- Sustainable Energy Systems (p. 161)
GORDON INSTITUTE OF ENGINEERING LEADERSHIP
Master's Degree in Data Analytics Engineering with Graduate Certificate in Engineering Leadership

Students may complete a master’s degree in Data Analytics Engineering in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 40 semester hour degree and certificate will require 16 hours of advisor-approved Data Analytics technical courses.

Program Credit/GPA Requirements
32 total semester hours required
Minimum 3.00 GPA required

1 A thesis is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship. The thesis topic should cover one or more of the areas from statistics, mathematics, optimization, data mining, machine learning, database design, big data, visualization tools, or forecasting methods. The thesis should train students for research in data and operations analytics and/or prepare them for a doctoral program.

Plan of Study and Course Selection
It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form helps the students manage their course work as well as helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs. However, requests for changes in PS must be processed before the requested change actually takes place. A revised PS form must also be approved and signed.

Each student’s academic advisor must approve all courses prior to registration. Students may only use courses taken with the approval of their academic advisor toward the 32-semester-hour minimum requirement. However, students may petition the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master’s Project (ME 7945). An MS project must be petitioned to the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students doing course work option may petition the MIE graduate affairs committee to substitute up to a 4-semester-hour Independent Study (ME 7978). An independent study must be approved by the academic advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study.

Graduate Certificate Options
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. CERTIFICATE OPTION

Students completing this option receive a Graduate Certificate in addition to the master’s degree. Students should consult their faculty advisor regarding the certificate options.

Complete 16 semester hours of graduate certificate course work. (p. 162)

Program Credit/GPA Requirements
32 total semester hours required
Minimum 3.000 GPA required
Mechanical Engineering with Concentration in Mechanics and Design, MSME

While pursuing a Master of Science (MS) in Mechanical Engineering, students may choose mechanics and design as a concentration. Advances in mechanics enable key engineering innovations. Using complementary computational, experimental, and design tools, the area of mechanics is addressing challenges from nanoscale actuators and human health to energy systems and bridges. For example, our biomechanics research is creating robotic rehabilitation aids and a new understanding of cellular biomechanics and the assembly and degradation of biomaterials. At the tiniest length scales, we are creating a new understanding of nanomechanics, contact mechanics, tribology, MEMS, and the application of nanomaterials for energy storage systems. Our research goals also include understanding, design, and creation of piezoeactive sensors and actuators as well as the stability assessment and control of dynamical systems. Our research and teaching together are designed to prepare students to understand and exploit mechanics to enable their future engineering innovations.

General Degree Requirements
To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science in engineering, science, mathematics, or an equivalent field. Students in all master’s degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.000. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete an 8-semester-hour thesis. Other students may choose to complete their degree by pursuing a thesis, project, or course work option. Students who complete thesis option must make a presentation of their thesis before approval by the department.

Special Course Requirements
All MIE MS students in thesis or project options (excluding students doing MS in Engineering Management and Gordon Engineering Leadership programs) must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850), preferably during the first year of their full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements. Students in combined BS/MS programs must take Research Seminar in Mechanical and Industrial Engineering (MEIE 6850) as part of their course work requirement, while Technical Writing (MEIE 6800) is optional for these students.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one of these courses. Outcome of the online session will be filed with the student’s records.

Academic and Research Advisors
All nonthesis students (students doing course work or project options) are advised by the academic advisor designated for their respective concentration or program. MS students doing a thesis option must find a research advisor within their first year of study and may have thesis reader(s) at the discretion of their research advisor. The research advisor must be a full-time or jointlyappointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. If the research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Thesis option students are advised by the academic advisor of their concentration before they select their research advisor(s).

Plan of Study and Course Selection
It is recommended that all new students attend orientation sessions held by the MIE Department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form helps the students manage their coursework as well as helps the department to plan for requested course offerings. Plan of Study may be modified at any time as students progress in their degree programs. However, requests for changes in PS must be processed before the requested change actually takes place. A revised PS form must also be approved and signed.

Each student’s academic advisor must approve all courses prior to registration. Students may only use courses taken with the approval of the academic advisor toward the 32-semester-hour minimum requirement. However, students may petition the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students pursuing study or research under the guidance of a faculty member can elect for the Project Option by taking Master’s Project (ME 7945). An MS Project must be petitioned to the MIE graduate affairs committee and approved by both faculty member (instructor) and the academic (concentration) advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students doing course work option may petition the MIE graduate affairs committee to substitute up to a 4-semester-hour Independent Study (ME 7978). An independent study must be approved by the academic advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study.

Graduate Certificate Options

32 total semester hours required
Minimum 3.000 GPA required

1 Required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship

**MECHANICAL ENGINEERING WITH CONCENTRATION IN MATERIAL SCIENCE, MSME**

While pursuing a Master of Science (MS) in Mechanical Engineering, students may choose material science as a concentration. Material science has been the key enabler in virtually all engineering breakthroughs that have occurred from early metal ages to the present nano age. In step with the scientific development and discovery of materials, members of the MIE faculty are involved in interdisciplinary research to further materials processing, synthesis and design. Research areas are aligned with Northeastern University’s broad initiatives of sustainability, security, and health, as well as national initiatives in manufacturing and nanotechnology. Investigations in the areas of metals/alloys, polymers, biomaterials (including bio-mimetics), and composites incorporating nanoscale materials make use of experimental, theoretical, and computational techniques to tailor structure-processing-property relationships in materials for specific applications. Current areas of research include controlling synthesis and assembly processes to produce well-defined atomic structures; defect engineering; manipulating atomic/microstructures and the chemistry of materials to optimize properties for next-generation structural, electronic, and energy applications; solidification and deformation processing; and life-cycle assessments for nano-composites/materials. Northeastern faculty and students are committed to creative thinking and engineering innovation to propel materials development to the forefront of scientific research.
General Degree Requirements
To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master’s degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.00. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete an 8-semester-hour thesis. Other students may choose to complete a master’s degree by pursuing a thesis, project, or course work option. Students who complete thesis option must make a presentation of their thesis before approval by the department.

Special Course Requirements
All MIE MS students in thesis or project options (excluding students doing MS in Engineering Management and Gordon Engineering Leadership programs) must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850), preferably during the first year of their full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements. Students in combined BS/MS programs must take Research Seminar in Mechanical and Industrial Engineering (MEIE 6850) as part of their course work requirement, while Technical Writing (MEIE 6800) is optional for these students.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one of these courses. Outcome of the online session will be filed with the student’s records.

Academic and Research Advisors
All nonthesis students (students doing project or course work options) are advised by the academic advisor designated for their respective concentration or program. MS students doing a thesis option must find a research advisor within their first year of study and may have thesis reader(s) at the discretion of their research advisor. The research advisor must be a full-time or jointly-appointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. The research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Thesis option students are advised by the academic advisor of their concentration before they select their research advisor(s).

Plan of Study and Course Selection
It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form helps the students manage their course work as well as helps the department to plan for requested course offerings. The PS may be modified at any time as students progress in their degree programs. However, requests for changes in PS must be processed before the requested change actually takes place. A revised PS form must also be approved and signed.

Each student’s academic advisor must approve all courses prior to registration. Students may only use courses taken with the approval of their academic advisor toward the 32-semester-hour minimum requirement. However, students may petition the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students pursuing study or research under the guidance of a faculty member can elect for project option by taking Master’s Project (MATL 7945). An MS project must be petitioned to the MIE graduate affairs committee and approved by both faculty member (instructor) and the academic (concentration) advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students doing course work option may petition the MIE graduate affairs committee to substitute up to a 4-semester-hour Independent Study (MATL 7978). An independent study must be approved by the academic advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e. thesis or project) are not eligible to take independent study.

Graduate Certificate Options
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

Chemical Engineering

• Process Safety Engineering (p. 123)

Computer Systems Engineering

• Computer Systems Engineering (p. 139)

Gordon Institute of Engineering Leadership

Master's Degree in Mechanical Engineering with a concentration in Material Science with Graduate Certificate in Engineering Leadership

Students may complete a master's degree in Mechanical Engineering with a concentration in Material Science in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 32 semester hour degree and certificate will require 16 hours of advisor-approved Material Science technical courses.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

General Requirements

Complete 16 semester hours from the following: 16

Options

Complete one of the following options:

COURSE WORK OPTION

Electives

Complete 16 semester hours from the following subject areas: 16

- ME, MATL, or other graduate engineering courses

PROJECT OPTION

MATL 7945 Master's Project 4
MEIE 6800 Technical Writing 0
MEIE 6850 Research Seminar in Mechanical and Industrial Engineering 0

Electives

Complete 12 semester hours from the following subject areas: 12

- ME, MATL, or other graduate engineering courses

THESIS OPTION

ME 7990 Thesis 1 8
MEIE 6800 Technical Writing 0
MEIE 6850 Research Seminar in Mechanical and Industrial Engineering 0

Electives

Complete 8 semester hours from the following subject areas: 8

- ME, MATL, or other graduate engineering courses

CERTIFICATE OPTION

Students completing this option receive a Graduate Certificate in addition to the master's degree. Students should consult their faculty advisor regarding the certificate options.

Program Credit/GPA Requirements

32 total semester hours required
Minimum 3.000 GPA required

1 Required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship

Mechanical Engineering with Concentration in Mechatronics, MSME

While pursuing a Master of Science in Mechanical Engineering, students may choose mechatronics as a concentration. The term mechatronics stems from the combination of words mechanical and electronics. Mechatronics is a multidisciplinary approach to product design and development, merging the principles of electrical, mechanical, computer, material, chemical, and industrial engineering. Mechatronic systems are typically composed of traditional mechanical and electrical components but are referred to as "intelligent" devices due to the incorporation of sensors, actuators, and computer control systems. Mechatronics can be viewed as a "modern engineering process" that deals with the design and manufacturing of intelligent products or systems involving hybrid mechanical and electronic functions. Our primary focus in mechatronic systems is on intelligent and integrated systems and machines along with their practical applications ranging from manufacturing systems and robotic platforms to biological systems. Our research and teaching together are designed to prepare students to understand and exploit mechatronics to enable their future engineering innovations.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science in engineering, science, mathematics, or an equivalent field. Students in all master’s degree programs must take completed courses or project options (excluding MS students in engineering management and Gordon Engineering Leadership programs) must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850), preferably during the first year of their full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements. Students in combined BS/MS programs must take Research Seminar in Mechanical and Industrial Engineering (MEIE 6850) as part of their course work requirement, while Technical Writing (MEIE 6800) is optional for these students.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one
of these courses. Outcome of the online session will be filed with the student’s records

**Academic and Research Advisors**

All nonthesis students are advised by the academic advisor designated for their respective concentration or program. Students doing thesis option must find a research advisor within their first year of study and may have thesis reader(s) at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. If the research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Thesis-option students are advised by the academic advisor of their concentration before they select their research advisor(s).

**Plan of Study and Course Selection**

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form helps the students manage their course work as well as helps the department to plan for requested course offerings. The PS may be modified at any time as students progress in their degree programs. However, requests for changes in the PS must be processed before the requested change actually takes place. A revised PS form must also be approved and signed.

Each student’s academic advisor must approve all courses prior to registration. Students may only use courses taken with the approval of the academic advisor toward the 32-semester-hour minimum requirement. However, students may petition the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students pursuing study or research under the guidance of a faculty member can choose the project option by taking Master’s Project (ME 7945). An MS project must be petitioned to the MIE graduate affairs committee and approved by both faculty member (instructor) and the academic (concentration) advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Students doing the course work option may petition the MIE graduate affairs committee to substitute up to a 4-semester-hour Independent Study (ME 7978). An independent study must be approved by the academic advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e. thesis or project) are not eligible to take independent study.

**Graduate Certificate Options**

Minimum 3.000 GPA required

1 Required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship

Mechanical Engineering with Concentration in Thermofluids, MSME

While pursuing a Master of Science in Mechanical Engineering, students may choose thermofluids as a concentration. Some of the representative research areas under this concentration may include thermodynamics, fluid dynamics, kinetic theory of gases, thermophoresis of aerosols; microscale heat transfer phenomena and its effects on laser beam propagation; fundamentals of combustion such as burning speed and onset of auto-ignition measurement and flame stability analysis; development of chemistry reduction such as rate-controlled constrained-equilibrium method; nonequilibrium thermodynamics; energy and gas turbine cooling technology, turbine blade cooling; and energy-related and calorimeter studies related to pharmaceutical developments. Our research and teaching together seek to prepare students to understand and exploit thermofluids to enable their future engineering innovations.

General Degree Requirements
To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science in engineering, science, mathematics, or an equivalent field. Students in all master’s degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.000. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete an 8-semester-hour thesis. Other students may choose to complete their degree by pursuing a thesis, project, or course work option. Students who complete thesis option must make a presentation of their thesis before approval by the department.

SPECIAL COURSE REQUIREMENTS
All MIE MS students in thesis or project options (excluding MS students in engineering management and Gordon Engineering Leadership programs) must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850), preferably during the first year of their full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements. Students in combined BS/MS programs must take Research Seminar in Mechanical and Industrial Engineering (MEIE 6850) as part of their course work requirement, while Technical Writing (MEIE 6800) is optional for these students.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one of these courses. Outcome of the online session will be filed with the student’s records

Academic and Research Advisors
All nonthesis students are advised by the academic advisor designated for their respective concentration or program. Students doing thesis option must find a research advisor within their first year of study and may have thesis reader(s) at the discretion of their research advisor.
The research advisor must be a full-time or jointly appointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. If the research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Thesis option students are advised by the academic advisor of their concentration before they select their research advisor(s).

**Plan of Study and Course Selection**

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form helps the students manage their course work as well as helps the department to plan for requested course offerings. The PS may be modified at any time as students progress in their degree programs. However, requests for changes in PS must be processed before the requested change actually takes place. A revised PS form must also be approved and signed.

Each student’s academic advisor must approve all courses prior to registration. Students may only use courses taken with the approval of the academic advisor toward the 32-semester-hour minimum requirement. However, students may petition the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master’s Project (ME 7945). An MS project must be petitioned to the MIE graduate affairs committee and approved by both faculty member (instructor) and the academic (concentration) advisor. The petition must clearly state the reason for taking the course, a brief description of the goals, as well as the expected outcomes, deliverables, and grading scheme.

Students doing course work option may petition the MIE graduate affairs committee to substitute up to a 4-semester-hour Independent Study (ME 7978). An independent study must be approved by the academic advisor. The petition must clearly state the reason for the course, a brief description of the goals, as well as the expected outcomes, deliverables, and grading scheme. Students in other options (i.e. thesis or project) are not eligible to take independent study.

**Graduate Certificate Options**

Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

The Department of Mechanical and Industrial Engineering (MIE) offers comprehensive research and educational programs for Master of Science (MS) students in operations research (OR). The field of OR deals with the application of scientific methods to decision making. Students have an opportunity to learn how to develop and solve mathematical and computer models of systems using optimization and statistical methods. OR graduates work in a wide variety of fields such as transportation, supply chain operations, communications and computer operations, manufacturing, finance, and healthcare. The OR program is offered jointly by MIE and the Department of Mathematics, thus achieving a unique balance of theory and application.

**Master of Science Degree**
To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master’s degree programs must complete a minimum of 32 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.000 (see table below). Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Graduate Certificate Options

Students enrolled in a master’s degree in Operations Research have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Programs

Master of Science in Operations Research (MSOR)

- Operations Research (p. 198)

The Department of Mechanical and Industrial Engineering (MIE) offers comprehensive research and educational programs for students pursuing Master of Science (MS) degrees in operations research (OR). These extensive programs and course work allow for the selection of a degree that meets a wide range of personal and professional goals.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master’s degree programs must complete a minimum of 36 semester hours of approved course work (exclusive of any preparatory courses) with a minimum GPA of 3.000. Students can complete a master’s degree by pursuing any of one of the three tracks: course work option, project option, and thesis option. There are specific degree requirements for each of these tracks—see details (p. 199). Also, students can complete their master’s degree either on a full-time or part-time basis; however, certain restrictions may apply.

Students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete an 8-semester-hour thesis. Other students may choose to complete their degree by pursuing a thesis, project, or course work option. Students pursuing thesis option must make a presentation at a thesis defense before approval by the department.

Special Course Requirements

All MIE MS students pursuing thesis or project options (excluding MS students in engineering management and Gordon Engineering Leadership programs) must complete Technical Writing (MEIE 6800) and Research Seminar in Mechanical and Industrial Engineering (MEIE 6850) preferably during the first year of full-time study. If appropriate, part-time students may petition the graduate affairs committee to waive these requirements. Students in combined BS/MS programs must take Research Seminar in Mechanical and Industrial Engineering (MEIE 6850) as part of their course work requirement, while Technical Writing (MEIE 6800) is optional for these students.

All MIE graduate students are also required to complete a brief online session on Responsible Conduct of Research and Plagiarism in one of these courses. The outcome of the online session will be filed with the student’s records.

Academic and Research Advisors

All nonthesis students (students doing course work or project options) are advised by the academic advisor designated for their respective concentration or program. Students doing an MS thesis must find a research advisor within the first year of their study and may have thesis reader(s) at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty or affiliated member of the MIE department; otherwise, a petition must be filed and approved by the MIE graduate affairs committee. If the research advisor is outside the MIE department, a faculty member with 50 percent or more appointments in the MIE department must be chosen as co-advisor. Thesis option students are advised by the academic advisor of their concentration before they select their research advisor(s).

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the course work requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their course work needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form helps students manage their course work as well as helps the department to plan for requested course offerings. The PS may be modified at any time as the students progress in their degree programs. However, requests for changes in PS must be processed before the requested change actually takes place. A revised PS form must also be approved and signed by the student’s academic advisor.

OR students must select all the required course work from the list found on the program requirements page (p. 199). Each student’s academic advisor must approve all courses prior to registration. Students may only use courses taken with the approval of their academic advisor toward the 32-semester-hour requirement. However, students may petition the MIE graduate affairs committee to substitute graduate-level courses from outside the approved list of electives.

Students pursuing study or research under the guidance of a faculty member can elect for project option by taking Master’s Project (OR 7945). An MS project must be petitioned to the MIE graduate affairs committee and approved by both faculty member (instructor) and the academic (concentration) advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as expected outcomes, deliverables, and grading scheme.

Students doing course work option may petition the MIE graduate affairs committee to substitute up to a 4-semester-hour Independent Study (OR 7978). An independent study must be approved by the academic advisor. The petition must clearly state the reason for taking the course; a brief description of the goals; as well as expected outcomes, deliverables, and grading scheme. Students in other options (i.e., thesis or project) are not eligible to take independent study.
Graduate Certificate Options

Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

Chemical Engineering

• Process Safety Engineering (p. 123)

Computer Systems Engineering

• Computer Systems Engineering (p. 139)

Energy Systems

• Energy Systems (p. 161)
• Renewable Energy (p. 160)
• Energy Systems Management (p. 161)
• Sustainable Energy Systems (p. 161)

Engineering Management

• Engineering Business (p. 167)
• Engineering Management (p. 167)
• Technology Systems Management (p. 168)
• Engineering Economic Decision Making (p. 168)
• Supply Chain Engineering Management (p. 168)
• Lean Six Sigma (p. 169)

Industrial Engineering

• Data Mining Engineering (p. 177)

Telecommunication Systems Management

• IP Telephony Systems (p. 204)
• Broadband Wireless Systems (p. 204)

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Operations Research with Graduate Certificate in Engineering Leadership

Students may complete a master's degree in Operations Research in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour-curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry based challenge project with multiple mentors. The integrated 32 semester hour degree and certificate will require 16 hours of advisor-approved Operations Research technical courses.

Engineering Leadership (p. 163)

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Total Hours: 32

The program is flexible to accommodate full-time students—who wish to proceed over a period of two to four semesters—and part-time students—who can complete the program requirements by taking one to two courses per semester, finishing the program in approximately four years.

Graduate Certificate Options

Students enrolled in a master’s degree in Sustainable Building Systems have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Graduate Certificate in Sustainable Energy Systems

The Sustainable Energy Systems Graduate Certificate (p. 161) program focuses on the integration of energy systems engineering technology with sustainable building systems including the design and operation of buildings with minimal energy and environmental impact.

This four-course graduate certificate seeks to provide students opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems as they relate to sustainable engineering building design with a focus on renewable energy with LEED certification or with a focus on industrial ecology including life cycle analysis and technical cost modeling. The program requires 16 semester hours of course work from your choice of courses—see details (p. 162).

Programs

Master of Science in Sustainable Building Systems (MSSBS)

- Sustainable Building Systems (p. 200)

Graduate Certificate

- Sustainable Energy Systems (p. 161)

The Master of Science in Sustainable Building Systems integrates elements of an architectural engineering program with construction management while embracing the concepts of engineering sustainability.
as related to energy and materials usage and the effect on the environment.

617.373.2501 (fax)
p.o’reilly@northeastern.edu (p.oreilly@northeastern.edu)

The Master of Science in Telecommunications Systems Management degree is designed for professionals currently in the telecommunications or networking field who either wish to enhance their technical skills and credentials or who wish to make a transition to the business side of telecommunications or networking. We also welcome applications from prospective students with limited industry experience. This program, which may be pursued on a full- or part-time basis, is one of only a very few master’s programs in telecommunications and networking in the United States that is truly multidisciplinary, giving students the flexibility to tailor the curriculum to their specific interests, backgrounds, and career goals.

Graduate Certificate Options
Students enrolled in a master’s degree in Telecommunications Systems Management have the opportunity to also pursue one of 14 engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 162).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION
Students have the opportunity to pursue the Gordon Engineering leadership program (p. 162) in combination with the MS degree.

Programs
Master of Science in Telecommunications Systems Management (MSTSM)
  • Telecommunications Systems Management (p. 202)

Graduate Certificates
  • IP Telephony Systems (p. 204)
  • Broadband Wireless Systems (p. 204)

Telecommunications Systems Management, MSTSM

General Degree Requirements
A minimum of 32 semester hours must be earned toward completion of the MSTSM degree. A minimum grade-point average (GPA) of 3.000 is required over all courses applied toward the degree.

To qualify for any degree from the Graduate School of Engineering, a student must attain a GPA of 3.000 or higher with no more than 8 semester hours below the grade of B– in all courses applied toward that degree, exclusive of any prerequisite courses. However, prerequisite courses are calculated into GPA. The committee on graduate study in engineering allows students to take 8 semester hours of credit beyond stated minimum degree requirements for the purpose of repeating failed required courses or substituting for elective courses in order to attain the required 3.000 GPA for the completion of degree requirements. Within the above limitations for extra or repeated courses, a student must repeat any required course in which he or she earns a grade of C+ or less and earn a grade of B– or better.

The MSTSM degree has two options for completion; the Course Work Option and the Gordon Engineering Leadership Option:

DEGREE REQUIREMENTS FOR COURSE WORK OPTION
The program requires that a mix of core required courses and elective courses be taken. Although there are some dependencies among the core courses, the program may be started in either the fall or spring semester.

<table>
<thead>
<tr>
<th>Degree Requirements</th>
<th>Full-Time Study</th>
<th>Part-Time Study</th>
</tr>
</thead>
<tbody>
<tr>
<td>Required core courses</td>

</tr>
<tr>
<td>Approved business and technical elective courses</td>
<td>16 SH</td>
<td>16 SH</td>
</tr>
<tr>
<td>Minimum Semester Hours Required</td>
<td>32 SH</td>
<td>32 SH</td>
</tr>
</tbody>
</table>

There are four core courses and a wide range of technical and business electives available. The core courses each carry 4 semester hours of credit. Students must receive a grade of at least a B– in each of the core courses, otherwise they will need to repeat the course. A maximum of two of the core courses may be waived if a student has taken similar course material at another university with a satisfactory grade or passes a competency test before the start of their first semester at Northeastern. If a technical core course is waived, it must be replaced with a technical elective. Similarly, if the business core course is waived, it must be replaced with a business elective.

At least one of the electives must be a business elective and at least one must be a technical elective. The technical electives include courses on network and communications technology and on the development of software systems and applications. The list of business electives is focused on engineering management and entrepreneurship. Electives come from an approved list of courses supplied by the colleges of engineering, business administration, and computer and information science. All students must take at least one technical elective and one business elective. These electives must be courses of at least 3 semester hours. Students may take elective course work outside this list only with the prior approval of the program director.

It is expected that students beginning this program will have an adequate background in the following areas: C, C++, or Java programming languages; probability and statistics; and differential and integral calculus.

Students may not register for more than 10 semester hours in the fall and spring terms and 4 semester hours in each of the three summer terms. Any exceptions must be approved by the program director.

Special topics courses, as well as other courses from outside the program, may be used as electives with prior approval of the program director. Participants may elect Master’s Project (TELE 6945) in place of one of the electives with approval of the program director.

All transfer credits must be approved by petition before course enrollment.
Independent Study (TELE 5978), usually for 1 or 2 semester hours, is sometimes available for students. Independent study must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for independent study need to be submitted at least one month before the start of the semester.

Directed Study (TELE 5976), also for 1 or 2 semester hours, is sometimes available for students. On directed study projects, a student follows a prescribed curriculum, usually with some form of an exam at the end of the semester.

Graduate Certificate Options
Students who are officially accepted into a graduate degree program in the College of Engineering may apply to pursue one of the following graduate engineering certificates in addition to the MS or PhD. Please visit the links below for additional information about each graduate engineering certificate program, related requirements, and how to apply.

IP Telephony Systems, Graduate Certificate

The Graduate Certificate in IP Telephony Systems focuses on the fundamental knowledge in communications, IP networks and protocols, media transport, and signaling as preparation to developing expertise into ongoing developments in VoIP networks and services, the IP Multimedia Subsystem (IMS), unified communications, and video networks.

The four-course graduate certificate requires that three TSM core technical courses be taken along with a specified fourth course. With the approval of the certificate director, one of the core courses may be waived with another technical course taken in its place. IP Telephony (TELE 6350) may not be waived under any circumstances.

Note: MS in Telecommunication Systems Management students are not eligible for this graduate certificate.

Program Credit/GPA Requirements
Minimum of 32 total semester hours required
Minimum 3.000 GPA required

Broadband Wireless Systems, Graduate Certificate

The broadband wireless systems graduate certificate program focuses on the fundamentals of wireless communications, IP networks and protocols, and telecommunications infrastructure as preparation for developing expertise in ongoing developments in mobile networking, broadband wireless communications, and mobile apps.

The four-course graduate certificate requires that three TSM core technical courses be taken along with a specified fourth course. With the approval of the certificate director, one of the core courses may be waived with another technical course taken in its place. Mobile Wireless Communications and Networking (TELE 6100) may not be waived under any circumstances.

Note: MS in Telecommunication Systems Management students are not eligible for this graduate certificate.

Minimum 3.00 GPA required
professional achievement. The result: At Northeastern, you have an opportunity to acquire the professional practice.

The Bouvé College of Health Sciences (BCHS) strongly supports the mission of Northeastern University as a practice-oriented, student-centered, urban research institution. The college is committed to the goals of the institution, which include excellence in education, research, scholarship, access to educational opportunity, and a strong professional orientation. Each of the programs within the college supports these aims both individually and collectively.

Graduate programs in the Schools of Nursing, Pharmacy (PharmD), and the health professions (audiology, applied psychology, exercise sciences, physical therapy, physician assistant, public health, speech-language pathology, population health, occupational ergonomics and health) and the interdisciplinary programs of biotechnology, health informatics, data analytics, and personal health informatics incorporate experience in the related field of study. Students have an opportunity to interact with faculty contributing to research advances, as well as with Boston’s world-class healthcare and educational institutions, and study in a comprehensive health-sciences college, where interdisciplinary approaches to complex issues reflect professional practice.

The result: At Northeastern, you have an opportunity to acquire the knowledge and capability needed for a lifetime of social contribution and professional achievement.

**Health Certification**

All new students must complete the University Health Report form following acceptance to the university. These forms may be obtained at the University Health and Counseling Services (UHCS) located at 135 Forsyth Building or downloaded from the UHCS website. Graduate students may additionally be expected to provide UHCS with proof of a physical exam or statement of good health prior to registration; this may vary among programs.

As a condition of matriculation at Northeastern University, all students are required to submit the completed University Health Report form to UHCS. Graduate students must return the form no later than one month prior to entering the university. The health center will block the registration of those who do not file correct forms. All documentation must be signed by a medical doctor, nurse practitioner, or physician assistant.

The Commonwealth of Massachusetts requires all university students to provide documentation of immunity to the following:

- Hepatitis B (series of three immunizations or one positive titre)
- Measles (two immunizations or positive antibody titre)
- Mumps (one immunization or positive antibody titre)
- Rubella (one immunization or positive antibody titre)
- Meningitis (optional; students may decline immunization)
- Tetanus/Diphtheria (immunization within last ten years)

Graduate students in the Bouvé College of Health Sciences are additionally required to provide documentation of immunity to the following:

- Varicella/chicken pox
- Tuberculin skin test (PPD): within six months of registration

Refer to page two of the University Health Report for further clarification. The University Health Report is to be completed once prior to students beginning their graduate studies; however, some programs in the Bouvé College of Health Sciences may require that students provide proof of physical examination annually. Similarly, some programs may require proof of additional immunities. Consult your program handbook or your program advisor for more information. Medical documentation and health certification are maintained by UHCS. Additional clinical clearance may be required by some programs prior to your presence in any clinical setting.

**Academic Policies and Procedures**

- Health Certification (p. 206)
- Practicum/Internship Policies (p. 206)
- Background Checks (p. 207)
- Liability Insurance (p. 207)
- Grading (p. 207)
- Transfer of Credit (p. 207)
- Course Waiver (p. 207)
- Academic Progression (p. 208)
- Student’s Academic Standing (p. 208)
- Academic Probation Policy (p. 208)

**Practicum/Internship Policies**

Students taking practicum courses or doing internships in their field of study may be required to submit certification of health status to each of their clinical placement coordinators. Each program has its own regulations for practicum health clearance. Students should consult their program handbooks or clinical placement coordinator for these requirements. Students who do not present the appropriate health certification will be blocked from registering for, or attending, practicum until satisfactory evidence is provided. An annual update of the student’s
Background Checks

An increasing number of clinical sites require background checks for employees as well as students who come to their facilities. Northeastern University students will need to have background checks done only if their assigned clinical agency requires it. The most common background check required is the Massachusetts Criminal Offender Record Information (CORI), although some clinical sites require other types of checks, such as drug testing.

Bouvé College contracts with a national company, CastleBranch (https://www.castlebranch.com), to perform these checks. The company provides this service for universities nationwide. Log onto their website to learn more about them.

CastleBranch (https://www.castlebranch.com) charges fees to conduct background checks. The fee varies depending on the type of background check needed. All fees will be paid by the student directly to CastleBranch (https://www.castlebranch.com).

All background check information is confidential. Results are sent to the designated clearance officer for Bouvé College, who is the only person who has access to the results. A student will be contacted by the clearance officer only if there is a question about the results. Neither the student nor the clearance officer is required to reveal the actual results of a background check to an on-campus clinical coordinator/clinical placement office, a clinical site, or anyone else at the university.

If an assigned clinical site requires students to have a background check, the on-campus clinical coordinator/clinical placement officer will inform the student of the requirements and provide the student with instructions and a deadline for completing the check. It is crucial that the student complete the check by the deadline given to assure adequate processing time prior to the start of a clinical experience. Failure to complete the check in a timely manner could jeopardize the student’s progression in the program.

Liability Insurance

All students on practicum/internship must register each semester while on practicum/internship to be covered by liability insurance. As long as they are registered, all Northeastern University matriculated students in fields of study requiring malpractice insurance are covered under a professional liability insurance for which they pay a yearly fee. This insurance covers injury to third parties by students doing work or professional studies outside Northeastern University premises that are clearly part of their duties. It does not cover willful misconduct. Students or the clinical placement coordinator can request that the institutional audit, compliance, and risk services office send evidence-confirming coverage to their field site. Students should consult their practicum placement officer, program coordinator, and specialization policies for information about further requirements for liability insurance. If you are not sure if your program is covered under this policy, coverage can be verified through the Office of Institutional Audit, Compliance and Risk Services (http://www.northeastern.edu/risk_services) at extension x5997.

Grading

Only letter grades are included in the grade-point average (GPA) of the program. Grades listed as S/U, I, and IP are not included in the GPA.

A course retaken due to failure is included in the GPA if it is passable. The failure grade remains on the Northeastern University transcript but is excluded from the GPA.

Although credit can be transferred, grades transferred from another institution are not calculated in the GPA on the Northeastern University transcript. Therefore, courses repeated due to failure must be completed at Northeastern.

Transfer of Credit

A maximum of 9 semester/12 quarter hours of credit obtained at another institution may be accepted toward the degree, provided the credits consist of work taken at the graduate level for graduate credit, carry grades of 3.000 or better, have been earned at an accredited institution, have not been used toward any other degree, and are completed prior to the last semester of graduate study. These courses must have been taken within five years prior to the transfer and cannot be taken in the last semester prior to graduation.

The exact requirements for fulfillment of a degree in the Bouvé College of Health Sciences graduate school vary by program. Students must consult their individual academic program catalogs and policies, as well as program directors, if applicable, for specific credit and noncredit requirements necessary to achieve a specific degree.

If the course had been taken prior to matriculation at Bouvé, the student must submit to his or her academic advisor a petition requesting transfer along with the official transcript indicating successful completion of the course to be transferred. Upon obtaining the advisor’s approval, the student submits the documentation to the Graduate Office of Student Services on the appropriate petition form. A student may petition to transfer credit only after matriculation in Bouvé. The Graduate Petition to Transfer Credit form can be found on the Office of the Registrar’s website (http://www.northeastern.edu/registrar/form-gs-xfer-cred.pdf).

Courses that have not been taken but will be taken for transfer from another institution must receive preapproval from the student’s academic advisor. Students should submit the petition with the course description attached to their advisor for approval and then submit the completed petition to the Bouvé graduate school office.

Graduate courses at the Northeastern University College of Professional Studies (CPS) can be considered for transfer only with prior approval of the academic advisor. Courses taken in the CPS cannot be considered to fulfill full-time requirements for international students. For consideration of financial aid for CPS courses, check with your financial aid officer.

Students may not transfer courses required for the completion of their program in the last semester of their program.

Course Waiver

A student must obtain approval from their academic advisor to waive a course that was taken for credit toward a prior degree. To obtain approval by the academic advisor, the student must provide an official transcript and a syllabus of the content of the course to the program director, in order to verify equivalency with the course to be waived. The student...
must submit the signed appropriate petition form to the Bouvé graduate office. If approved to waive the course, the student must take another course in its place for equivalent credit.

### Academic Progression

All students should register by the first week of the semester for course work or continuation credit each semester of the academic year (fall, spring, and, where indicated, summer) once they are matriculated as full- or part-time students. All physician assistant students must register all three semesters. If a student does not register for two consecutive semesters, the student’s file will be placed in the “inactive” archives and kept there for no longer than five years. Therefore, if a student plans on being absent more than one semester, he or she must notify the Bouvé graduate student office and request a leave of absence via the myNEU web portal.

For information about withdrawal and refund policies, refer to the Student Financial Services website (http://www.neu.edu/financialaid/policies).

All degree requirements must be completed within a maximum of seven years of matriculation, although individual academic programs may require completion in a shorter time frame. Each student is responsible for reviewing the requirements for his or her particular program with his or her advisor. A student’s failure or inability to register does not extend the amount of time allowed to complete the program. Course credits earned in programs of graduate study are valid for a maximum of seven years unless an extension is granted by the Bouvé associate dean of academic affairs. After establishment of candidacy for the PhD degree, a maximum of five years will be allowed for completion of the degree requirements, unless an extension is granted. In order to progress in clinical courses that are sequenced, students must receive a passing grade in all prior courses in the sequence. In the event that a student fails a clinical course that is not part of a sequence, progression is at the discretion of the student’s academic advisor and/or the program director. When a student fails a clinical course that is part of a sequence of courses, the course instructor must notify the Bouvé College graduate office. Course material related to the student’s failure (examination reports, clinical reports) must be made available to the student for review.

### Student’s Academic Standing

Academic standing in the Bouvé College of Health Sciences (BCHS) is determined by the student’s grade-point average (GPA) and performance in academic and clinical courses that are required by his or her program. All BCHS students are expected to maintain a cumulative GPA of 3.000 each semester to remain in good academic standing and to progress toward graduation. Students who do not maintain a cumulative GPA of 3.000 each semester will be placed on probation. Additionally, some programs require students to earn a grade of B (3.000) or better in each specified course. (See “Deficiency Information,” below). Students must also earn a grade of B (3.000) or better in graduate courses taken at another institution that are subject to transfer credit.

### Deficiency Information by Program

- Audiology: 3.000 GPA and B lowest grade approved
- Applied Psychology: 3.000 GPA and B– lowest grade approved
- Biotechnology: 3.000 GPA and C– lowest grade approved
- Exercise science: 3.000 GPA and B lowest grade approved
- Health Informatics: 3.000 GPA and B– lowest grade approved
- Nursing: 3.000 GPA and B lowest grade approved (Direct Entry has exceptions for undergraduate courses taken during the program)
- Physical therapy: 3.000 GPA and C lowest grade approved
- Physician assistant: 3.000 GPA and C lowest grade approved
- Public health: 3.000 GPA and B– lowest grade approved
- Pharmaceutical sciences: 3.000 GPA and C– lowest grade approved
- Speech: 3.000 GPA and B lowest grade approved

### Academic Probation Policy

Academic probation is a period of time when a student must address and remediate academic deficiencies. An action plan to clear the deficiency must be developed by the student, the student’s academic advisor, and the specific program graduate committee (if applicable). A student placed on probation will receive written notification by the Office of Graduate Student Services. The student’s program advisor will also receive notification of probationary status. It is the student’s responsibility to write an action plan with his or her advisor. The plan should document how the deficiency will be remediated. This action plan must be signed by the advisor and the student and placed in the student’s file in the graduate office within one month from the date of the written notification of probation. The student’s failure to file an action plan may be cause for dismissal from the program. The action plan must specify the date by which the deficiency will be cleared. The Academic Probation Contract/Plan form will be sent to the student with the probationary letter, but it can be picked up in the Office of Graduate Student Services. Students will be placed on probation for the following deficiencies:

- A cumulative grade-point average (GPA) below 3.000. If the student remains on academic probation for two semesters, he or she may be terminated from the graduate program.
- In some programs, a grade of B– or below in a specified course.
- Unsatisfactory final grade in a clinical course, practicum, internship, or research course, etc.

A Bouvé College of Health Sciences (BCHS) graduate student may repeat a course only once to achieve a passing grade and may only repeat two courses during his or her entire program of study. A student may be on probation for only one semester, or until the course is offered again, unless the advisor approves an action plan that specifies a longer, but definite, period. A student may only be placed on probation twice during enrollment in BCHS and must correct all deficiencies, as specified, in each respective action plan during the applicable probationary period. Failure to remediate the deficiency within the agreed-upon time may result in dismissal from the program. During the period of probation, the student must earn a GPA of 3.000 or better each semester, or he or she is subject to dismissal from BCHS. Note that individual graduate programs may have additional requirements that must be included in the probation action plan.

Once the student has regained a GPA of 3.000, earned a grade of B or better in a repeated course, and/or demonstrated satisfactory performance in a clinical course, he or she will be removed from probation.

### Applied Psychology

Website (http://www.neu.edu/bouve/ap)

Karin Lifter, PhD
Graduate programs in the Department of Applied Psychology reflect Northeastern University’s tradition of practice-oriented education with an ecological and multicultural focus. Faculty and students come from diverse ethnic and cultural backgrounds, providing an enriching learning experience. The department is a scientist-practitioner-based unit that generates new psychological knowledge through research, and the translation of research, to applications that:

1. Optimize development and learning
2. Promote mental and physical health from birth through the life span

The Bouvé College of Health Sciences emphasizes experiential and field-based learning, interdisciplinary and global knowledge, and integration of science and practice. The Department of Applied Psychology seeks to produce students who are well prepared to become counseling and psychology professionals in a variety of educational, government, community, organizational, and private settings. Our doctoral programs provide excellent educational opportunities for those interested in professional psychology with specialized training for future careers in academic or practice positions as licensed psychologists. As a Bouvé student, you have an opportunity to acquire knowledge and competency needed for a lifetime of personal fulfillment and professional achievement.

**Programs**

**Doctor of Philosophy (PhD)**
- Counseling Psychology (p. 209)
- School Psychology (p. 210)

**Certificate of Advanced Graduate Studies (CAGS)**
- Applied Behavior Analysis (p. 211)
- Counseling Psychology (p. 212)
- School Psychology (p. 214)

**Master of Science (MS)**
- Applied Behavior Analysis (p. 212)
- College Student Development and Counseling (p. 213)
- School Psychology (p. 214)

**Master of Science in Counseling Psychology (MSCP)**
- Counseling Psychology (p. 213)

**Graduate Certificate**
- Applied Behavior Analysis (p. 215)
- Early Intervention (p. 215)

**Counseling Psychology, PhD**

The Doctor of Philosophy in Counseling Psychology program is accredited by the American Psychological Association (APA). It is designed to train the next generation of mental health professionals. The program offers doctoral education and training in psychology and seeks to prepare students for entry-level practice in counseling psychology. Doctoral-level counseling psychologists conduct research, teach at the university level, supervise students and professionals, consult with community agencies, and provide clinical services to people across the developmental life span. Counseling psychologists also enhance the science of health promotion and health psychology and emphasize community-based interventions. It is the mission of the PhD in Counseling Psychology program to train multiculturally competent counseling psychologists who are clinically adept in multiple settings with a variety of psychological and health-related issues and who are able to conceptualize, conduct, and evaluate research across biological, cultural, and relational systems in numerous social contexts, such as families, schools, neighborhoods, and communities.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**
- Four qualifying examinations—research, ethics, assessment, and intervention
- Annual review
- Research team
- Dissertation proposal
- Dissertation defense

**Requirements**

A grade of B– or higher is required in all course work.

**Basic Core**
- CAEP 6390 History and Systems of Psychology 3
- CAEP 6394 Advanced Multicultural Psychology 3
- CAEP 7750 Biological Bases of Behavior 3
- CAEP 7755 Cognitive and Affective Bases of Behavior 3
- CAEP 7756 Social Psychology in an Organizational and Ecological Context 3

**Fieldwork**
- Complete 8 semester hours from the following: 8
  - CAEP 7741 Advanced Fieldwork 1
  - CAEP 7742 Advanced Fieldwork 2
  - CAEP 7743 Advanced Fieldwork 3
  - CAEP 7744 Advanced Fieldwork 4

**Clinical Core**
- CAEP 6350 Introduction to Cognitive Assessment 3
- CAEP 6352 Personality Assessment 3
- CAEP 7710 Advanced Clinical Assessment 3
- CAEP 7720 Advanced Clinical Interventions 3
- CAEP 7758 Doctoral Seminar in Contemporary Theories of Psychotherapy 3
- CAEP 7778 Doctoral Seminar: Leadership, Consultation, and Supervision 3

**Elective Core**
- Complete 3 semester hours from the following: 3
  - CAEP 5200 Motivational Interviewing in a Healthcare Setting
  - CAEP 7751 Advanced Clinical Neuropsychology
  - CAEP 7723 Rorschach
  - CAEP 7771 Research Team Experience 1
  - CAEP 7772 Research Team Experience 2
  - CAEP 7773 Research Team Experience 3
Northeastern University’s Doctor of Philosophy in School Psychology program is accredited by the American Psychological Association (APA) and the National Association of School Psychologists (NASP). The program is designed to prepare the next generation of leaders in school psychology. The ecological perspective and scientist-practitioner training model provide the foundation for the program’s educational goals. Students have an opportunity to learn how to conduct research, to use research to inform practice, and to contribute to the scientific foundation of professional practice.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated. Students who enter with a master’s degree develop an individualized program of study with their advisor, which requires a minimum of 50 semester hours of credit.

**Milestones**

- Comprehensive examination
- Annual review
- Mentored research project
- Dissertation committee
- Dissertation proposal
- Dissertation defense

**Requirements**

A grade of B or higher is required in all course work.

**Program Credit/GPA Requirements**

62 total semester hours required
Minimum 3.000 GPA required
Applied Behavior Analysis, CAGS

The Certificate of Advanced Graduate Study (CAGS) program seeks to prepare graduates to assume supervisory behavior analyst roles in service agencies and in private and public school settings and to serve as independent consultants. Additionally, it seeks to give graduates expertise in a specific clinical area within applied behavior analysis. The six-course sequence that seeks to prepare students to take the BACB exam is followed by four additional courses in behavior analysis. These courses, which are related, explore the particular clinical issue in-depth.

Four standard programs of study are offered; students may take one or two courses each academic term and choose from a number of summer enrollment options. These options include taking one or two courses or not enrolling at all.

A representative program in which the student takes two courses during the academic year and one course in the summer follows. “Behavior Assessment” and “Research and Design Methods” must be taken first as they are prerequisites for enrolling in the remaining four courses. Specialization courses are indicated only generally; specific courses are determined by the area chosen.

Professional Portfolio

The capstone for the program is the Professional Portfolio. This portfolio, which is compiled electronically, documents the student’s acquisition of critical behavioral procedures and competency in critical clinical skills. These skills, each of which is associated with a specific project, include:

- Intake assessment
- Preference assessment
- Reinforcer assessment
- Functional analysis
- Antecedent intervention
- Consequence intervention
- Task analysis
- Discrimination training
- Literature review

Course assignments are designed to assist the student in designing and executing the projects associated with the skills and in preparing the documentation required for their inclusion in the Professional Portfolio.

A faculty member reviews and signs each project in the Professional Portfolio. The signature indicates that the student has achieved the faculty-established standards for the project. Graduates are encouraged to use their Professional Portfolios when applying for employment.

Although a thesis is not required for graduation from either the Master of Science or CAGS program in Applied Behavior Analysis, students interested in research may combine two or three of the Professional Portfolio items into a research project. For example, the student may complete a literature search on stereotypical behavior, then conduct a functional analysis and intervention with a participant who exhibits that behavior. The research project is then prepared in journal format for inclusion in the Professional Portfolio.

Projects may be submitted for inclusion in the Professional Portfolio at any time during the graduate program. When the student has completed all Professional Portfolio requirements, the program director should be notified so that a final review may take place. A complete Professional Portfolio is required for graduation.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Professional Portfolio

Preference assessment
Reinforcer assessment
Functional analysis
Task analysis
Antecedent intervention
Consequence intervention
Discrimination training
Literature review

### Counseling Psychology, CAGS

The Certificate of Advanced Graduate Study (CAGS) in Counseling Psychology is for students with a highly related master’s degree that does not meet licensed mental health counselor (LMHC) licensure requirements in Massachusetts. It is a 30-semester-hour course of study—including eight didactic courses and two internship courses, which include 600 hours of supervised clinical experience in a mental health setting. Students who have not completed a formal practicum placement also will be required to do a 150-hour practicum placement. This program is individually tailored to fulfill a student’s professional and licensing goals.

#### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

A grade of B– or higher is required in all course work.

**Core Courses**

Complete 24 semester hours of core courses to be chosen in consultation with your faculty advisor.

### Applied Behavior Analysis, MS

The Master of Science in Applied Behavior Analysis (ABA) program seeks to prepare graduates to assume supervisory behavior analyst roles in service agencies and in private and public school settings and to serve as independent consultants. The six-course sequence that seeks to prepare students to take the Behavior Analysis Certification Board (BACB) exam is followed by four additional courses in behavior analysis. These courses explore the principles and procedures of applied behavior analysis in more depth and address its philosophical underpinnings.

Four standard programs of study are offered; students may take one or two courses each academic term and choose from a number of summer enrollment options. These options include taking one or two courses or not enrolling at all.

A representative program in which the student takes two courses during the academic year and one course in the summer follows. “Behavior Assessment” and “Research and Design Methods” must be taken first as they are prerequisites for enrolling in the remaining four courses. Similarly, CAEP 6336, Systematic Inquiry 1 must be taken before CAEP 6337, Systematic Inquiry 2.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**College Student Development and Counseling, MS**

The College Student Development and Counseling program (CSDC) at Northeastern University aims to create mindful, action-oriented leaders, specifically in the fields of higher education and student affairs. The program focuses on counseling, college student development, the history and philosophy of the student affairs profession, and the organization and administration of the field. The program offers emerging professionals the opportunity to obtain the academic and experiential background that enables them to design, create, and administer student personnel programs that teach leadership, foster development, value diversity, and complement the academic experience of college students.

**Counseling Psychology, MSCP**

The Master of Science in Counseling Psychology (MSCP) program at Northeastern is committed to the development of competent Licensed Mental Health Counselors (LMHC) through the disciplinary studies and contemporary professional practice of counseling psychology and complies with licensing regulations for mental health counselors in the Commonwealth of Massachusetts. The program is unique in that within the general Master of Science program we offer students a choice of specific specializations in which students have an opportunity to gain additional depth in selected areas.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

A grade of B– or higher is required in all course work.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### MS Requirements

A grade of B− or higher is required in all course work.

**Clinical/Applied**

- CAEP 6201 Introduction to Assessment 3
- CAEP 6347 Behavior Management 3
- CAEP 6350 Introduction to Cognitive Assessment 3
- CAEP 6400 Practicum in School Psychology 1

**Foundations**

- CAEP 6203 Understanding Culture and Diversity 3
- CAEP 6206 Learning Principles 3
- CAEP 6218 Infant, Child, and Adolescent Development 3
- CAEP 6247 Child and Adolescent Psychopathology 3
- CAEP 7750 Biological Bases of Behavior 3
- CAEP 6365 Seminar in School Psychology 3

#### MS Options

Complete one of the following options:

**OPTION WITHOUT SPECIALIZATION**

- CAEP 6202 Research, Evaluation, and Data Analysis 3

**APPLIED BEHAVIOR ANALYSIS OPTION**

- CAEP 6327 Behavior Assessment 3
- CAEP 6328 Research and Design Methods 3

**EARLY INTERVENTION OPTION**

- CAEP 5150 Early Intervention: Family Systems 3
- CAEP 8425 Early Intervention Practicum 1 2
- SLPA 6335 Early Intervention: Assessment and Intervention 3

- CAEP 8426 Early Intervention Practicum 2 2
- CAEP 6202 Research, Evaluation, and Data Analysis 3

#### MS Program Credit/GPA Requirements

31 total semester hours required

Minimum 3.000 GPA required

---

### Electives

Complete 9 semester hours from the following. Other electives or alternatives may be chosen in consultation with faculty advisor:

- CAEP 6215 Groups: Dynamics and Leadership
- CAEP 6218 Infant, Child, and Adolescent Development
- CAEP 6222 Human Sexuality
- CAEP 6230 Health Issues in Counseling
- CAEP 6268 Family Counseling Interventions
- CAEP 6275 Counseling Strategies for Children and Adolescents
- CAEP 6283 Brief Therapies
- CAEP 6290 Reality Therapy
- CAEP 6370 Seminar in Health Psychology
- CAEP 6390 History and Systems of Psychology
- CAEP 6394 Advanced Multicultural Psychology
- CAEP 7758 Doctoral Seminar in Contemporary Theories of Psychotherapy
- PHTH 6320 Qualitative Methods in Health and Illness

### Program Credit/GPA Requirements

60 total semester hours required

Minimum 3.000 GPA required

---

**School Psychology, MS/CAGS**

Northeastern University’s Master of Science/Certificate of Advanced Graduate Study (CAGS) in School Psychology is approved by the National Association of School Psychologists (NASP) and the Massachusetts Department of Elementary and Secondary Education. The overarching purpose of the program is to develop highly competent school psychologists. Some students also choose to specialize in either early intervention or applied behavior analysis. The early intervention training option is designed to prepare school psychologists to work with infants and toddlers and their families in community and related agencies, on interdisciplinary teams, and on the transition to school. The applied behavior analysis training option is designed to prepare school psychologists to address the learning and behavioral needs of children and adolescents with challenging behaviors in school, home, and community settings, including children with autism spectrum disorders.
CAGS Optional Specializations

Note: A specialization is optional. Consult your faculty advisor for more information.

EARLY INTERVENTION SPECIALIZATION

APPLIED BEHAVIOR ANALYSIS SPECIALIZATION

CAEP 6327 Behavior Assessment 3
CAEP 6328 Research and Design Methods 3
CAEP 6331 Advanced Learning Seminar 1 3
CAEP 6334 Applied Programming Seminar 1 3
CAEP 6336 Systematic Inquiry 1 3

EARLY INTERVENTION, GRADUATE CERTIFICATE

The Graduate Certificate in Applied Behavior Analysis program seeks to provide students with the knowledge base necessary for eligibility to take the Behavior Analysis Certification Board (BACB) exam. The curriculum, which is based on the BACB Fourth Edition Task List, includes six courses, all of which are offered online. Four standard programs of study are available; students may take one or two courses each term and may elect not to enroll at all during the summer, regardless of course load chosen. Special programs of study may also be arranged.

A representative program in which students take two courses during the academic year and the summer off follows. Behavior Assessment (CAEP 6327) and Research and Design Methods (CAEP 6328) are taken first as they are prerequisites for enrolling in the remaining four courses.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Requirements

A grade of B– or higher is required in each course.

Basic Core

CAEP 6327 Behavior Assessment 3
CAEP 6328 Research and Design Methods 3
CAEP 6329 Service Administration 3
CAEP 6331 Advanced Learning Seminar 1 3
CAEP 6334 Applied Programming Seminar 1 3
CAEP 6336 Systematic Inquiry 1 3

Intensive Practicum

Note: The intensive practicum is optional. Consult your faculty advisor.

CAEP 8417 Intensive Practicum in Applied Behavior Analysis 1 2
CAEP 8418 Intensive Practicum in Applied Behavior Analysis 2 2

We are a learning community in which faculty and students support each other’s learning across the life span. Our department mission is to educate students to the highest levels of professionalism, consistent with American Speech-Language-Hearing Association (ASHA) and Northeastern University accreditation standards and Massachusetts licensure requirements; to provide them with an interprofessional and practice-oriented education in our urban university environment; to provide them with research experiences based on the highest standards of scientific knowledge; to provide them with clinical experiences with clients, patients, and families from a diverse population base using an evidence-informed practice approach; to evaluate their progress using both formative and summative assessment measures.

Our faculty engage in continuous learning both inside and outside the department to be current in recent research and to contribute to that knowledge base. They use, develop, and address in their teaching technology that improves the hearing, communication, respiration, and swallowing skills of individuals at a variety of age and skill levels.

Programs

Doctor of Audiology (AuD)
• Doctor of Audiology (p. 216)

Master of Science (MS)
• Speech-Language Pathology (p. 217)

Audiology, AuD

Audiologists specialize in the prevention, identification, assessment, and rehabilitation of hearing and balance disorders and serve those with congenital and acquired hearing losses. They prescribe and dispense hearing aids and instruct patients in using amplification and provide aural rehabilitation and speech reading services to those with hearing aids or cochlear implants. Additionally, audiologists provide vestibular rehabilitation or balance retraining exercises for some balance disorders. Upon graduation, students are employed in a variety of settings that reflect the diverse populations served by audiologists. Some graduates are self-employed in private practice clinics that provide speech, language, and hearing services. Others function as members of interdisciplinary teams in healthcare settings or educational settings or in research laboratories.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements
A grade of B or higher is required in each course.

Diagnostic
SLPA 5100 Diagnostic Audiometry 3
SLPA 5104 Differential Diagnosis in Audiology 3
SLPA 5105 Auditory Pathologies 3
SLPA 5110 Language Disorders across the Life Span (or elective) 3-4
SLPA 6722 Evaluation and Treatment of Central Pathologies 3
SLPA 6728 Assessment of Vestibular Disorders 3
SLPA 6737 Advanced Evoked Potential Measures 3

Physiology
SLPA 5109 Neurology of Communication 3
SLPA 5111 Anatomy and Physiology of the Auditory System 3
SLPA 6741 Pharmacology for Audiologists 2

Treatment
SLPA 5108 Rehabilitation Audiology 3
SLPA 6210 Psychosocial Aspects of Communication Disorders 3
SLPA 6715 Amplification 1 3
SLPA 6716 Amplification 2 3
SLPA 6729 Management of Vestibular Disorders 3
SLPA 6747 Implantable Hearing Devices 3

Practice
SLPA 6211 Research and Evidence-Based Practice 3
SLPA 6215 Pediatric Audiology 3
SLPA 6314 Professional Practice 2
SLPA 6420 Practical Statistics for Speech-Language Pathology and Audiology 3
SLPA 6711 Scope of Practice in Audiology 2
SLPA 6773 Topics Seminar 3

Hearing Science
SLPA 6217 Noise and Hearing 3
SLPA 6221 Hearing Science 3
SLPA 6224 Psychoacoustics and Electroacoustics 3

Elective
Complete one elective course. 3

Clinic and Internship
A grade of B or higher is required in each course.

Speech-Language Pathology, MS

Adhering to the highest professional standards, the speech-language pathology (SLP) graduate program seeks to prepare future speech-language pathologists for the rigors of clinical practice in educational and healthcare settings. Graduates of the program will influence society in profound ways—for example, enabling children with autism to communicate effectively, relieving adolescents' fears of speaking dysfluently in the classroom, and helping stroke survivors resume activities in which they had previously participated. The comprehensive program of study emphasizes teamwork and interdisciplinary approaches to complex service delivery issues. SLP graduate students acquire the knowledge and skills needed for a lifetime of professional achievement and social contribution.

Program Requirements

The Department of Health Sciences at the Bouvé College of Health Sciences at Northeastern University provides a unique, transdisciplinary setting that incorporates academics, research, and practice and seeks to prepare students for a wide range of career paths. We offer an engaging undergraduate academic program in health sciences as well as graduate degree programs, including the Master of Public Health, focusing in urban health, and Master of Science in Exercise Science with Concentration in Physical Activity and Public Health.

Our diverse faculty has expertise in the fields of population health, health disparities, nutritional epidemiology, social epidemiology, exercise science, medical sociology, public policy, personal health technologies, neurodevelopmental disorders, and mental health. Students have the opportunity to work side by side with faculty in conducting cutting-edge research in these fields. We also have research staff highly skilled in providing unique, specialized dietary assessment services.

In line with Northeastern’s commitment to interdisciplinary research and urban engagement, we teach and work closely with many other schools, centers, and departments in the university, including the Institute on Urban Health Research (IUHR), the Center for Community Health Education Research and Service (CCHERS), and our National Institutes of Health- (NIH) funded Center for Population Health and Health Disparities (CPHHD), as well as community agencies and neighborhood health centers in the local Boston area.

Certificates in Health Informatics
Northeastern’s graduate certificate programs provide high-quality, specialized training in health informatics and the opportunity to acquire and apply your knowledge quickly. In eight months, you can prepare for a key role in areas of the field offering ample career opportunities.
Three certificate programs enable you to choose the one that addresses your specific goals:

- Graduate Certificate in Health Informatics Management and Exchange
- Graduate Certificate in Health Informatics Privacy and Security
- Graduate Certificate in Health Informatics Software Engineering

Courses in the certificate program also apply toward master’s degree requirements. This gives you the flexibility to complete a certificate and be well on your way to earning a degree if you decide later to continue your education.

Programs

**Doctor of Philosophy (PhD)**
- Population Health (p. 218)

**Master of Science (MS)**
- Exercise Science with Concentration in Physical Activity and Public Health (p. 220)
- Health Informatics (p. 221)

**Master of Public Health (MPH)**
- Master of Public Health (p. 219)
- Health Data Analytics (p. 92)

**Graduate Certificates**
- Health Informatics Management and Exchange (p. 222)
- Health Informatics Privacy and Security (p. 222)
- Health Informatics Software Engineering (p. 222)

**Dual Degree**
- Pharmacy and Public Health, PharmD/MPH (p. 221)

---

### Population Health, PhD

**Helen H. Suh, ScD**

Director of the Population Health Program

This program seeks to train students to become public health leaders through simultaneous examination of multiple determinations of health, including social, environmental, nutritional, and behavioral risk factors. Our students investigate the underlying causes of adverse health, including disease, disparities, and disability, through training in core population health disciplines—biostatistics, epidemiology, and health services—together with individual-specific and specialized training in topics related to student research. Importantly, our students are mentored by Northeastern’s distinguished faculty, who individually and together conduct innovative, solution-focused research in critical population health topics.

Our population health doctoral students have an opportunity to learn to conduct research that addresses five key health determinants:

1. Social and community context
2. Environment and neighborhoods
3. Health and healthcare delivery
4. Education
5. Economic stability

Our diverse faculty has expertise in numerous population health disciplines, including health services research, health disparities, environmental and social epidemiology, biostatistics, exercise science, medical sociology, public policy, personal health technologies, and mental health. Students have the opportunity to work side by side with faculty in conducting cutting-edge, transdisciplinary research in these fields.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**
- Qualifying examination
- Annual review
- Dissertation committee
- Dissertation proposal
- Dissertation defense

**Requirements**

**Health Services**
- PHTH 5232 Evaluating Healthcare Quality 3
- or PHTH 5234 Economic Perspectives on Health Policy 3

**Population Health**
- PHTH 6400 Principles of Population Health 1 3
- PHTH 6410 Principles of Population Health 2 3

**Epidemiology**
- PHTH 5202 Epidemiology 3,4
- PHTH 6202 Intermediate Epidemiology 3

**Research Ethics**
- BIOL 6381 Ethics in Biological Research 2
- or PHSC 6212 Research Skills and Ethics

**Research and Analysis**
- PHTH 5210 Biostatistics in Public Health 3
- PHTH 6210 Applied Regression Analysis 3

**Options**
Complete one of the following options:

**SOCIAL AND ENVIRONMENTAL DETERMINANTS OF HEALTH OPTION**
- PHTH 5224 Social Epidemiology 3
- PHTH 6440 Advanced Methods in Biostatistics 3

Complete 5 semester hours from the elective list below. 5

**HEALTH SERVICES AND POLICY OPTION**
- ECON 5110 Microeconomic Theory 4
- PHTH 5234 Economic Perspectives on Health Policy 3

Complete 4 semester hours from the elective list below. 4

**Electives**
- CIVE 7388 Special Topics in Civil Engineering 2,4
- ECON 5110 Microeconomic Theory 4
- ECON 5140 Applied Econometrics 4
- ECON 7200 Topics in Applied Economics 4
- EXSC 5200 Cardiopulmonary Physiology 3
- EXSC 5220 Advanced Exercise Physiology 3

Minimum 3.00 GPA required

Public Health, MPH

Shan Mohammed, MD, MPH

Program Director

The Master of Public Health program at Northeastern University seeks to provide society with knowledgeable, professionally educated, racially and ethnically diverse individuals who promote and protect the health of urban communities through innovation in practice-oriented education, research, and service.

In order to help prepare the next generation of urban public health leaders and professionals, the MPH offers our diverse graduate students an opportunity to:

• Complete your degree 100 percent online, on-ground, or in a hybrid format (combination of both)
• Participate in learning options that meet the needs of the working professional:
  • On-ground courses are offered in the evening (most classes meet once a week from 5:00 to 7:30 p.m.)

• Enroll as either a full-time or part-time student
• Take elective courses on a wide range of public health topics, including cross-departmental offerings from Northeastern’s other colleges (law, business, social sciences, and more)
• Enjoy a supportive learning environment that includes outstanding student mentoring

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A grade of B– or higher is required in each required course.

The Department of Health Sciences currently offers a Master of Science in Exercise Science with a public health emphasis. The concentration in physical activity and public health recognizes that inactivity is a major public health problem and represents a significant risk factor for many chronic diseases, including heart disease, stroke, hypertension, metabolic syndrome, obesity, type 2 diabetes, and some types of cancer. Moreover, this concentration integrates key competencies for a degree in exercise science recommended by the American College of Sports Medicine (ACSM), including knowledge of exercise physiology and the assessment and development of physical activity and exercise programs for the general and clinical populations. Graduate students seeking this degree are members of the Bouvé College of Health Sciences—a leading national model for education and research in the health, psychosocial, and biomedical sciences, which supports the university’s mission of educating students for a life of fulfillment and accomplishment and creating and translating knowledge to meet global and societal needs through interdisciplinary research, urban engagement, experiential learning, and the integration of classroom learning with real-world experience. Faculty in the department are exploring a range of research topics, including acute/chronic effects of exercise, community-based exercise and nutrition interventions, nutrition epidemiology, health disparities, urban public health, and application of technology for measuring and motivating behavior change.

Two unique features of the program are:

- The program offers three pathways of study based on student interests: research, public health, and practice-based pathways. Students take two electives to enhance their knowledge in their selected pathway. These pathways are designed to train students to pursue a terminal degree in exercise science/opportunities in a research setting, federal/private/nonprofit institutions, and clinical setting.
- We offer students internship, practicum, and research opportunities at both on- and off-campus sites. Experiential education is a key component of the program because application of classroom knowledge provides valuable preparation for a career in exercise science.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Exercise Science with Concentration in Physical Activity and Public Health, MS

Chair: Carmen Castaneda Sceppa, MD, PhD
Director: Professor Rui Li, PhD

The digitization of healthcare systems in clinical settings, in combination with the explosion of personal data collection devices, provides the opportunity of using data for revolutionizing approaches to care at all levels with a emphasis on precision medicine and person-centered care. The ability to take advantage of this “Big Data” opportunity, however requires expertise at the intersection of health informatics, data science, and computational modeling. The Master of Science in Health Data Analytics is designed to prepare students to succeed in this emerging field. This program offers a strong, competency-based curriculum that addresses data analytics ranging from data acquisition from traditional and emerging data streams, data aggregation methods, data mining algorithms, predictive computational modeling, and visualization techniques. Students can expect to amass a broad and deep understanding of the various methods, software tools, and topical expertise needed to discover meaningful patterns in health-related data and effectively communicate their implications to a number of diverse stakeholders. Successful graduates of the MS in Health Data Analytics will be effective practitioners and leaders in the rapidly developing domain of data analytics with a focus on health and healthcare.

The interdisciplinary MS in Health Data Analytics consists of twelve courses, drawn from the College of Computer and Information Science and the Bouvé College of Health Science, a capstone project, and an
ongoing series of seminars on topics in health data analytics. Two tracks will be available to matriculating students: standard and research-based.

**Program Requirements**

**Pharmacy and Public Health, PharmD/MPH**
The School of Pharmacy and the Department of Health Sciences offer a combined Doctor of Pharmacy (PharmD) and Master in Public Health (MPH) program.

The combined PharmD-MPH program recognizes and reinforces the importance of public health in pharmacy practice. Central to addressing urban public health concerns, and in particular those associated with racial and ethnic health disparities, the program is committed to building a strong, diverse, and activist public health workforce. The goal of the program is to graduate professionals who are well educated in the complex issues associated with disparate health status and healthcare access. The combined PharmD-MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their PharmD.

Susan McDonald, Administrative Coordinator, Academic Programs, s.mcdonald@northeastern.edu

This is an exciting time in healthcare and nursing in particular. According to a recent Gallup Poll, the public ranks nursing as the “most ethical” profession. In the newly enacted healthcare legislation passed by Congress, nurses are considered the critical backbone and life force of the delivery system. What does that mean for those considering nursing as a profession? It means that as a nurse you will carry an awesome responsibility—to improve the health outcomes of patients and their families. It also means that you must be among the best prepared of health professionals. Excellent preparation is just what we seek to offer.

If you are coming to the School of Nursing to earn a master’s, PhD, or DNP, your learning will be guided by our senior faculty, nursing leaders who are expert advance practice nurses in their respective specialty areas. Our affiliation with over 100 institutions means that you and the faculty can select the best place for your clinical rotations. U.S. News & World Report ranked our nurse anesthesia graduate program in the top ten in the United States.

You want to change career pathways? We have the Certificate of Advanced Graduate Study (CAGS) that facilitates attainment of a specialty track if you already have an advanced nursing degree. You want research? We have excellent nurse researchers who are working to improve patient care and advance nursing knowledge. Come join nursing at its finest. Northeastern University is a school on the move.

Further information about the specializations can be found under the program name.
Admission Requirement
Admissions requirements (http://www.northeastern.edu/bouve/grad/chart.html) are specific to the program.

Programs
Doctor of Philosophy (PhD)
- Nursing (p. 223)
- Nursing—Advanced Entry (p. 224)

Doctor of Nursing Practice (DNP)
- Doctor of Nursing Practice (p. 224)
- Doctor of Nursing Practice with Concentration in Nurse Anesthesia (p. 225)

Certificate of Advanced Graduate Study (CAGS)
- Adult-Gerontology Nurse Practitioner, Acute Care (p. 225)
- Family Psychiatric Nurse Practitioner (p. 226)
- Neonatal Nurse Practitioner (p. 226)
- Nurse Anesthesia (p. 227)
- Pediatric Nurse Practitioner, Acute Care (p. 227)
- Pediatric Nurse Practitioner, Acute and Primary Care (p. 227)
- Pediatric Nurse Practitioner, Primary Care (p. 228)
- Adult-Gerontology Nurse Practitioner, Primary Care (p. 226)

Master of Science (MS)
- Nursing—Adult-Gerontology Nurse Practitioner, Acute Care (p. 228)
- Nursing—Family Psychiatric Nurse Practitioner (p. 229)
- Nursing—Neonatal Nurse Practitioner (p. 230)
- Nursing—Pediatric Nurse Practitioner, Acute and Primary Care (p. 230)
- Nursing—Pediatric Nurse Practitioner, Primary Care (p. 231)
- Nursing—Adult-Gerontology Nurse Practitioner, Primary Care (p. 229)
- Nursing—Family Nurse Practitioner, Primary Care (p. 230)
- Nursing—Direct Entry (p. 231)
- Nursing Administration (p. 232)
- Nursing Anesthesia (p. 232)

Dual Degree
- Nursing and Business Administration, MS/MBA (p. 233)

Overview
Research
The PhD in Nursing program seeks to prepare scholars to be research scientists, educators, and leaders who improve health across the life span with a concentration on urban, vulnerable, and underserved populations. Graduates are expected to lead interdisciplinary research initiatives that advance nursing science through knowledge development and scholarly inquiry.

Students will study with nursing faculty whose research programs address questions that extend across the broad health spectrum, from illness and self-management through health promotion. Collectively, the faculty have expertise in a variety of research interests, such as health issues of women, children, and families; HIV; cancer; mental health; depression; substance abuse; and perinatal injury.

In addition, students will have an opportunity to study with faculty from other Northeastern departments. Our close collaborations with the university’s Institute on Urban Health Research, School of Public Policy and Urban Affairs, as well as with several Boston area academic health centers, provide opportunities to work across disciplines and to access populations and sites essential for completing a dissertation. Visit the Northeastern University Faculty Research site (http://www.northeastern.edu/research/faculty-research) for more information.

Cognate Courses
1 Cognates are graduate-level courses that are taken outside the School of Nursing. These courses should provide depth and breadth to the student’s dissertation research.

Electives may be taken in nursing or in an area related to the student’s dissertation research, including appropriate methodology and statistics courses.

Nursing, PhD—Advanced Entry

The Doctor of Nursing Practice (DNP) is a practice-oriented degree designed to prepare advanced nurses at the highest level of scholarly practice. Keeping pace with the demands of today’s changing healthcare environment requires clinical experts who have the knowledge and skills to be effective change agents. Graduates of our DNP program assume clinical and leadership positions as advanced nurses in a variety of roles including clinical experts, nurse executives, community leaders, and professional organization leadership.

The Northeastern University DNP program includes advanced course work in leadership, research translation, population health, informatics, and health policy. Our goal is to prepare the next generation of nurse leaders with a greater breadth of expertise so they can collaborate more effectively with interprofessional partners and provide leadership to enhance quality and safety. The DNP program curriculum is delivered online in a hybrid format.

If you are a registered nurse with at least two years of advanced nursing experience, you may enter the DNP program after completing a master’s degree in nursing or, in some cases, a related health field. Applicants who do not hold national certification in one other of the four advanced practice registered nurse (APRN) roles must provide evidence of the equivalent of 500 practicum hours in a previous master’s program.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A grade of B or higher is required in each course.

Nursing—Adult-Gerontology Nurse Practitioner, Primary Care, CAGS

This specialization offers nurse practitioners with certification in a different specialty the opportunity to prepare for practice providing high-quality adult primary care services as an adult-gerontology nurse practitioner. Adult-gerontology NPs provide services to individuals across most of the life span in clinics, private practices, home care, long-term care, and day programs. Upon completion of the primary care program, graduates are eligible to sit for the adult-gerontology certification exam.

Program Requirements
Requirements
A grade of B or higher is required in each course.

Adult-Gerontology Core
NRSG 6249  Health Promotion of Adult/Older Adult  3

Minimum 3.000 GPA required

Nursing—Family Psychiatric Nurse Practitioner, CAGS

We offer specialized and flexible program options in psychiatric mental health nursing for nurse practitioners (NPs) with certification in another specialty. Classes are offered during the late afternoon and early evening hours to accommodate the multiple responsibilities of adult learners. This is a 24-semester-hour program of study. Upon completion of the psychiatric mental health advanced practice Certificate of Advanced

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Prerequisites
NRSG 5117  Advanced Pharmacology  2
NRSG 5126  Pathophysiology for Advanced Practice  3

Requirements
A grade of B or higher is required in all course work.

Clinical Core
NRSG 6116  Advanced Health Assessment of the Neonate and Infant  3
NRSG 6230  Nursing Management: Critically Ill Neonatal 1  3
NRSG 6231  Nursing Management: Critically Ill Neonatal 2  3
NRSG 6232  Neonatal Pharmacology  2

Neonatal Practicum
NRSG 6430 Neonatal Clinical Practicum 1 4
NRSG 6431 Neonatal Clinical Practicum 2 4
NRSG 6432 Neonatal Clinical Practicum 3 2

Elective(s)

Nurse Anesthesia, CAGS

If you have already earned a master’s degree and seek further preparation in a specialization to qualify for national certification, the Certificate of Advanced Graduate Study is designed to meet your goal. The program is available in all of the specializations and areas of concentration offered within the nursing master’s program: neonatal nurse practitioner; acute-care nurse practitioner; primary care (pediatric, adult, family); psychiatric/mental health (adult, pediatric); nursing administration; and nurse anesthesia.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Prerequisites
A grade of B or higher is required in each course.
NRSG 5117 Advanced Pharmacology 2
NRSG 5126 Pathophysiology for Advanced Practice 3
NRSG 6115 Health Assessment 3

Requirements
A grade of B or higher is required in each course.

Anesthesia Didactic Courses
NRSG 6320 Role/Practice Issues in Nurse Anesthesia 3
NRSG 6321 Conceptual Basis of Nurse Anesthesia Practice 1 3
NRSG 6322 Conceptual Basis of Nurse Anesthesia Practice 2 3
NRSG 6324 Chemistry and Physics in Anesthesia 3
NRSG 6325 Pharmacotherapeutics in Anesthesia and Critical Care Nursing 2
NRSG 6333 Conceptual Basis of Nurse Anesthesia Practice 3 3
NRSG 6336 Advanced Concepts in Nurse Anesthesia Practice 3

Nurse Anesthesia Clinical Courses
NRSG 6530 Nurse Anesthesia Practicum 1 2
NRSG 6534 Nurse Anesthesia Practicum 2 4
NRSG 6535 Nurse Anesthesia Practicum 3 4
NRSG 6540 Advanced Clinical Experiences in Nurse Anesthesia 1 1
NRSG 6541 Advanced Clinical Experiences in Nurse Anesthesia 2 1
NRSG 6542 Advanced Clinical Experiences in Nurse Anesthesia 3 1

Program Credit/GPA Requirements
33 total semester hours required
Minimum 3.000 GPA required

Nursing—Pediatric Nurse Practitioner, Acute Care, CAGS

The pediatric acute-care Certificate of Advanced Graduate Study (CAGS) is available for pediatric or family nurse practitioners who wish to be prepared for practice in the pediatric acute-care role. Applicants must have a minimum of one year of work experience in an acute-care setting working with the pediatric population. The program requires 24 credits of study.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A grade of B or higher is required in all course work.

Acute-Care Core
CAEP 5151 Early Intervention: Infant and Toddler Development, Risk, and Disability 3
NRSG 6262 Pediatric Pharmacology 2
NRSG 6267 Care of the Critically Ill Child 4
NRSG 6265 Care of Child/Adolescent Health Problems 4

Acute-Care Practicum
NRSG 6461 Child/Adolescent Health Problems Practicum 4
NRSG 6463 Care of the Critically Ill Child Practicum 4
Elective
Complete 3 semester hours from the following subject area: 3
NRSG

Program Credit/GPA Requirements
24 total semester hours required
Minimum 3.000 GPA required

Nursing—Pediatric Nurse Practitioner, Acute and Primary Care, CAGS

This specialization is designed to prepare nurse practitioners (NPs) prepared in different specialties with the skills needed to care for children who are at risk across the continuum of care. For nearly two decades, our pediatric nurse practitioner (PNP) program has prepared primary care PNPs to provide community-based, culturally sensitive care. More recently, building on our foundation in evidence-based, interdisciplinary, urban healthcare, we expanded the PNP program into acute care. Students may study either full-time or part-time.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.
**Nursing—Pediatric Nurse Practitioner, Primary Care, CAGS**

**Requirements**
A grade of B or higher is required in each course.

Nursing—Adult-Gerontology Nurse Practitioner, Primary Care, MS

This specialization offers registered nurses with a bachelor's degree the opportunity to prepare for a career providing high-quality adult primary care services as an adult-gerontologic nurse practitioner (NP). Adult-gerontology NPs provide services to individuals across most of the life span in clinics, private practices, home care, long-term care, and day programs. Upon completion of the primary care program, graduates are eligible to sit for the adult-gerontology certification exam.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A grade of B or higher is required in each course.

Professional Core
NRSG 5118 Healthcare System and Professional Role Development 3
NRSG 5121 Epidemiology and Population Health 3

Primary Adult-Gerontology Nurse Core
NRSG 6249 Health Promotion of Adult/Older Adult 3
NRSG 6253 Primary Care of Adult/Older Adult Health Problems 4
NRSG 6254 Primary Care of Adult/Older Adult Complex Patients 4

Clinical Core
NRSG 5117 Advanced Pharmacology 2
NRSG 5126 Pathophysiology for Advanced Practice 3
NRSG 6115 Health Assessment 3
NRSG 6222 Pharmacology of Adults and Older Adults 2

Adult-Gerontology Nurse Practicum
NRSG 6449 Health Promotion of Adult/Older Adult Practicum 1

Program Credit/GPA Requirements
43 total semester hours required
Minimum 3.000 GPA required

Nursing—Family Psychiatric Nurse Practitioner, MS

We offer specialized and flexible program options in psychiatric mental health nursing. Part-time and full-time programs are available.

Classes are offered during the late afternoon and early evening hours to accommodate the multiple responsibilities of adult learners.

- For nurses who have a baccalaureate degree in nursing, the Master of Science (MS) option is a 43-semester-hour program.
- For nurses with master's preparation in other nursing specialties, the Certificate of Advanced Graduate Study (CAGS) option is a 24-semester-hour program.
- For nurses with a diploma or associate degree from a nursing program, there is a 67-semester-hour BSN/MSN option.
- For those who wish to pursue a career in nursing and possess a baccalaureate degree or higher in a related (non-nursing) field, a direct-entry program is available.

Upon completion of the psychiatric mental health advanced practice nursing graduate program curriculum, graduates are eligible to sit for available national certification exams in their area of practice.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A grade of B or higher is required in each course.

Professional Core
NRSG 5118 Healthcare System and Professional Role Development 3
NRSG 5121 Epidemiology and Population Health 3

Family Psychiatric Core
NRSG 6281 Dimensions of Clinical Practice 3

(60 clinical hours/1 semester credit) Minimum 3.000 GPA required

---

We require applicants to have at least two years of neonatal intensive care unit (NICU) experience before entering our program, and most have more than that. As a registered nurse, you already have a significant base of nursing knowledge. The neonatal nurse practitioner (NNP) program focuses on advanced nursing knowledge and clinical practice. You will have an opportunity to:

- Learn advanced diagnostic reasoning
- Carry out independent management of patients and their families
- Develop the expertise necessary to care for high-risk neonates and their families
- Become proficient at delivery room management of high-risk neonates

Successful graduates are prepared to make independent decisions in level 2 and level 3 NICUs, drawing on their experience and diagnostic abilities to affect lives every day.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

A grade of B or higher is required in each course.

- NRSG 6463 Care of the Critically Ill Child Practicum 4

**Research Core**
- NRSG 7105 Translating Research Evidence into Practice 3
- NRSG 7110 Evidence-Based Practice Research Application 2

**Program Credit/GPA Requirements**
- 41 total semester hours required
- Minimum 3.000 GPA required

**Nursing—Direct Entry, MS**

**Part I: Prelicensure**
The direct-entry nursing student enters the accelerated master’s program as a graduate student. The first sixteen months (four semesters) of the program consist of intensive, sequential classes and clinical with combined undergraduate- and graduate-level courses. Students are then prepared to take the National Council Licensure Exam (NCLEX-RN) upon completion of 64 program semester hours. Students earn a Bachelor of Science in Nursing (BSN) after this part of the program. Financial aid will be granted on an undergraduate basis during the prelicensure phase of the program.

**RN WORK EXPERIENCE**
Once a student becomes licensed as an RN, the student acquires full-time RN work experience. This part of the program (two semesters) requires at least six to nine months of work experience as an RN before resuming classes (including one year of experience in pediatrics and two years of experience in adult acute care and neonatal). Finding RN employment is the responsibility of the student as it is professional nursing experience. Northeastern will help support the student in preparation for the job search. A leave of absence (LOA) may be granted on an individual basis to gain more nursing experience before returning to the master’s portion of the program.
Part II: Return to Master's Specialty Tracks
In the master's specialty track, students are required to take professional and research core classes, clinical core, and specialty clinical courses. Full or part-time academic study is available to students. Most students return to the master's segment of the program, taking course work as a part-time student while continuing to work and increase the amount of RN professional experience. Full-time study, however, is also an option. Completion of the MSN can take four to six semesters depending on the student's pace and specialty track. Upon completion of the required specialty area credits, the student receives a Master of Science degree and is eligible to take the national certification exam in their area of advanced specialty nursing practice. Financial aid is awarded on a graduate basis during this portion of the program.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A B or better in the BSN clinical courses is highly recommended for progression into the MSN portion of the program. Progression is at the graduate specialty director's discretion.
A B or better is required in graduate-level courses: Advanced Pharmacology (NRSG 5117), Pathophysiology for Advanced Practice (NRSG 5126), and Health Informatics (NRSG 6306).

Core Courses
- NRSG 2210 Influences on Health and Illness: A Nursing Perspective 3
- NRSG 2220 and NRSG 2221 Nursing Interventions, Assessment, and Community Care and Lab for NRSG 2220 5
- NRSG 3302 and NRSG 3303 Nursing with Women and Families and Clinical for NRSG 3302 5
- NRSG 3320 and NRSG 3321 Nursing Care of Adults 1 and Clinical for NRSG 3320 6
- NRSG 3323 and NRSG 3324 Intermediate Interventions and Assessment and Lab for NRSG 3323 2
- NRSG 3400 and NRSG 3401 Nursing and the Promotion of Mental Health and Clinical for NRSG 3400 5
- NRSG 3420 and NRSG 3421 Nursing Care of Adults 2 and Clinical for NRSG 3420 6
- NRSG 4502 and NRSG 4503 Nursing Care of the Child and Clinical for NRSG 4502 6
- NRSG 4604 and NRSG 4605 Public Health Community Nursing and Clinical for NRSG 4604 5
- NRSG 4610 Managing and Leading in Healthcare 4
- NRSG 5117 Advanced Pharmacology 2
- NRSG 5126 Pathophysiology for Advanced Practice 3
- NRSG 6306 Health Informatics 3

Research and Practicum
- HLTH 5450 Healthcare Research 4
- NRSG 4995 Comprehensive Nursing Practicum 5

Program Credit/GPA Requirements
64 total semester hours required
Minimum 3.000 GPA required
Students graduate in May each year and are eligible to sit for the national certification examination for nurse anesthetists, administered by the Council on Certification of Nurse Anesthetists.

The Bouvé program received funding from the Department of Health and Human Services to increase its size and diversity. As a result, many of our students receive stipends, grants, and tuition assistance.

Northeastern University is accredited by the New England Association of Schools and Colleges, Inc. The School of Nursing is accredited by the Commission on Collegiate Nursing Education (CCNE). The nurse anesthesia program is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (COA) for the maximum allowable ten years, through May 2024 (Council on Accreditation of Nurse Anesthesia Educational Programs, 222 South Prospect Avenue, Park Ridge, IL 60068-4001).

- Pass rate for first-time test takers on the National Certification Exam (NCE) offered through the National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA) for the graduating class in 2015 was 80 percent and 100 percent with second-time takers.
- Graduates in 2015 obtained employment within three months of graduation.
- The attrition rate for the graduating class in 2015 was 13.6 percent.

**Nursing and Business Administration, MS/MBA**

To earn the degree, you must complete twelve courses in nursing and twelve in business administration. The nursing curriculum integrates a two-semester practicum with the theory and knowledge base appropriate to advanced roles of the nurse manager; the business courses cover the full complement of functional courses delivered in four years of part-time study, although you can take up to seven years to complete the program. All courses are offered late in the day or evening at the Boston campus.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Business Administration Requirements**

**Business Theory Courses**

| ACCT 6272 | Financial Statement Preparation and Analysis | 2.25 |
| ACCT 6273 | Identifying Strategic Implications in Accounting Data | 2.25 |
| ENTR 6200 | Enterprise Growth and Innovation | 3 |
| FINA 6200 | Value Creation through Financial Decision Making | 3 |
| INTB 6200 | Managing the Global Enterprise | 3 |
| MECN 6200 | Global Competition and Market Dominance | 3 |
| MGSC 6200 | Information Analysis | 3 |
| MGSC 6206 | Management of Service and Manufacturing Operations | 3 |

PharmDadmissions@northeastern.edu

The School of Pharmacy is dedicated to excellence in pharmacy-related education, research, and service, including the provision of patient care. We seek to prepare students with knowledge, skills, and values for careers in pharmacy practice and the pharmaceutical sciences. Our programs promote intellectual growth, professionalism, and lifelong learning. Through the generation and dissemination of new knowledge and through scholarship and community service, the school contributes to improved individual and population health.

**Pharmaceutical Science**

Pharmaceutical science is a problem-solving discipline concerned with the discovery, design, and use of drugs. Pharmaceutical scientists find new targets for drug development; research how drugs work at a molecular level; and determine how drugs’ properties, dosages, and delivery systems affect their performance. Northeastern has a well-deserved reputation among students, researchers, and other universities. Our department has five interlinked Centers of Research Excellence that pursue specific areas of pharmaceutical and chemical research: the Center for Drug Discovery, the New England Inflammation and Tissue Protection Institute, the Center for Pharmaceutical Biotechnology and Nanomedicine, the Center for Translational Imaging, and the Environmental Cancer Research Program. Northeastern offers many of its classes in the evening to accommodate the needs of the working community. Many students in the pharmaceutical science MS program complete their degree on a part-time basis. For those interested in discovery, problem solving, and cutting-edge research in one of the world’s foremost scientific and medical environments, Northeastern University’s School of Pharmacy in the Bouvé College of Health Sciences is the place to study pharmaceutical science.

Pharmaceutical science is inherently interdisciplinary, and this is reflected in the availability of several options at both the MS and PhD levels. The main options are pharmaceutics and drug delivery, pharmacology, and medicinal chemistry. The curriculum for each of these options allows a degree of flexibility in terms of specific courses taken, and the examples below are not absolute but reflect students’ most common choices made with the advice of faculty members. Even more flexibility is possible with the MS in Pharmaceutical Sciences (interdisciplinary concentration).

**Programs**

**Doctor of Philosophy (PhD)**

- Biomedical Sciences (p. 235)
- Medicinal Chemistry (p. 235)
- Pharmaceutical Sciences (p. 236)
- Pharmacology (p. 236)

**Doctor of Pharmacy (PharmD)**

- Doctor of Pharmacy (p. 237)
- Doctor of Pharmacy—Direct Entry (p. 237)

**Master of Science (MS)**

- Biomedical Nanotechnology (p. 240)
- Biomedical Sciences (p. 240)
- Medicinal Chemistry (p. 241)
- Pharmaceutical Sciences (p. 241)
- Pharmacology (p. 241)

**Dual Degree**

- Pharmacy and Public Health, PharmD/MPH (p. 221)
Biomedical Sciences, PhD

Medicinal Chemistry, PhD

This specialization offered by the Center for Drug Discovery (CDD) trains students in the design and synthesis of novel biologically active compounds and in the study of their mechanisms of action using biochemical, biophysical, and pharmacological approaches. Concentrations are available in synthetic, biochemical/pharmacological, and biophysical medicinal chemistry. These will be targeted to treat drug abuse; addiction; and other indications such as neuropathic pain, obesity, neuropsychiatric disorders (psychoses, ADHD, depression, anxiety, eating disorders); and neurodegenerative disorders.

Program Credit/GPA Requirements
45 total semester hours required
Minimum 3.000 GPA required

Pharmaceutics and Drug Delivery Systems
Students studying pharmaceutics and drug delivery will be thoroughly exposed to the fundamentals of physical pharmacy and pharmaceutics in addition to being trained in several more specialized areas such as:

- Novel drug delivery systems
- Nanomedical technologies
- Physical pharmacy
- Biopharmaceutics and pharmacokinetics

With exposure to these various facets of pharmaceutics, successful graduates are poised to understand and assimilate the field of modern pharmaceutics. A PhD degree in pharmaceutics is a research degree. While course work plays an important role, students become a real participant in the science of pharmaceutics in the laboratory. Faculty research covers a broad range of scientific interests, including pharmacokinetic toxicodynamics of anticancer agents, use of biomaterials and synthetic polymeric systems in design of drug delivery systems, passive and active targeting of therapeutic agents, cardiovascular targeting of drugs, novel delivery systems for proteins and peptides, and mathematical modeling of endogenous compounds.

Interdisciplinary Option
The interdisciplinary option is intended to meet the needs of students interested in combining courses and skills from two areas of specialization. At least one of the specialization areas must come from within the college. The second area may come from a department in another college at Northeastern University, such as biology, chemistry, or engineering. Students electing the interdisciplinary option must fulfill the same requirements as all other PhD candidates.

Pharmacology, PhD

The PhD in Pharmacology specialization allows a student to specialize in the study of the actions of drugs. In addition to developing a sound knowledge base through course work and seminars, the program is designed to strengthen the student's ability to comprehend and to evaluate critically the current literature, allowing the conduct of significant independent research. Recent graduates with a PhD in Pharmacology have found employment in academic or industrial research positions.

</tr>
</tbody>
</table>

Direct entry into the first professional year of the PharmD program offers students a four-year graduate course of study that fully integrates campus-based learning with experiential learning, including the university’s signature cooperative education (co-op) program, to provide students with the skills and abilities necessary to succeed in the pharmacy profession. Our students promote and ensure the safe and effective use of drugs and provide medication therapy management services. In addition to preparing and dispensing prescribed medications, our students provide information to patients about medications and their uses; advise physicians, other prescribers, and other healthcare practitioners on medication selection, dosages, interactions, and adverse effects; and monitor patient responses to drug therapy.

Our students are well equipped to provide patient care services in a variety of settings. Most of our graduates work in community pharmacies or in healthcare facilities such as hospitals and ambulatory clinics. Additional practice opportunities exist in health maintenance...
organizations, private practice groups, long-term-care facilities, home healthcare, the Public Health Service, the armed services, and law enforcement agencies such as the Federal Drug Enforcement Administration. Graduates may also find employment in drug development, marketing and research within the pharmaceutical industry, colleges of pharmacy, and professional association management. In addition, many of our graduates go on to pharmacy practice residencies, fellowships, and leading graduate programs.

Doctor of Pharmacy students are admitted with the expectation that by working with faculty, staff, and each other, they will develop the knowledge, skills, and attitudes necessary for academic and professional success. Students follow academic progression plans for their respective years of graduation. Any deviation from the prescribed curriculum will require faculty/staff permission and an approved plan of study from the School of Pharmacy (SOP) academic affairs committee.

The pharmacy curriculum includes introductory (cooperative education) and advanced pharmacy practice experiences. These pharmacy practice experiences are provided primarily under the direct supervision of qualified pharmacist preceptors and occasionally with other qualified healthcare professionals. The school is affiliated with many world-class practice sites throughout the United States, providing students with access to experienced clinicians and scholars. Although every effort is made to accommodate individual circumstances and requests, students should be prepared to travel outside the Boston area to complete some of their pharmacy practice experiences. Availability of a car may be required, as some sites are not accessible by public transportation. All expenses associated with pharmacy practice experiences, including travel and housing, are the responsibility of the student.

Introductory pharmacy practice experiences (IPPEs) are competitive placements that are based on job availability in a geographic region. The placements are facilitated by SOP cooperative education coordinators. Students are required to complete one IPPE in a community setting and one IPPE in an institutional/hospital practice setting.

Advanced pharmacy practice experience (APPE) placements are provided based on site/preceptor availability and the final approval of the SOP Office of Experiential Education (OEE). Students may be able to petition the OEE for out-of-system APPEs; however, availability for such requests is limited.

To be eligible for a Doctor of Pharmacy degree (PharmD), a student must successfully complete all courses in the curriculum including the introductory (co-op) and advanced pharmacy practice experiences; meet the academic progression standards of the program; meet the technical standards of the program; and satisfy all other requirements as stated in the Bouvé College of Health Sciences Graduate Policies and Regulations. The pharmacy program, which is fully accredited by the Accreditation Council for Pharmacy Education (info@acpe-accredit.org), subscribes to the standards established by ACPE and the American Association of Colleges of Pharmacy.

Pharmacy graduates must meet specific requirements to qualify for professional licensure in the state where they plan to practice as a registered pharmacist. These requirements include graduating from an accredited school of pharmacy, passing national and state board examinations, and completing internship hours. The internship is a period of practical experience conducted under the supervision of a registered pharmacist. Massachusetts requires 1,740 internship hours, all of which are satisfied through the introductory (co-op) and APPEs.

Requirements for APPEs

1. Successful completion of all required and elective didactic course work in the pharmacy curriculum.
2. Successful completion of the APPE preparatory courses Advanced Pharmacy Practice Experience Preparatory Seminar 1 (PHMD 5438) and Advanced Pharmacy Practice Experience Preparatory Seminar 2 (PHMD 5439)
3. Evidence of health clearance from University Health and Counseling Services before placements at any APPE site.
4. Satisfactory completion of any additional site-specific requirements including, but not limited to, criminal record information (CORI) and verification of immunization status. All fees associated with these requirements are the responsibility of the student.
5. Adherence to the university’s code of conduct policies while off-campus.
6. Successful completion of six, six-week APPEs: four required APPEs (i.e., ambulatory care, community, internal/general medicine, and one health system experience); and two electives that may be patient-care or non-patient-care focused.
7. Maintenance of sufficient knowledge of site-specific requirements (via site descriptions) and completion of site requests within specified deadlines. Failure to complete these requirements as directed will likely result in delay of graduation.
8. Maintenance of an APPE portfolio throughout the APPE year and completion of all portfolio submission requirements within specified deadlines.
9. Attendance at scheduled on-campus APPE meetings during the APPE year:
   a. Fall semester: midpoint APPE meeting;
   b. Spring semester: exit meeting.

Technical Standards

The Doctor of Pharmacy program at Northeastern University is a rigorous and challenging academic program that requires students to possess specific characteristics and abilities within the cognitive, affective, and psychomotor domains, referred to here as technical standards. To successfully progress in and ultimately complete the didactic, laboratory, and experiential components of the Doctor of Pharmacy program, students must meet the standards described below.

INTELLECTUAL ABILITIES
Students must have well-developed problem-solving and critical-thinking skills. Cognitive function must be appropriate to integrate, evaluate, and apply information gained through measurement, analysis, calculation, and reasoning. Students must have the capacity to learn efficiently in classroom, laboratory, small group, and experiential settings and through independent study. Students are required to demonstrate the ability to integrate course content knowledge with clinical practice applications to optimize medication therapy management.

COMMUNICATION SKILLS
Students must be able to communicate effectively with colleagues, professors, patients, families, and healthcare providers. This includes efficiently comprehending, speaking, reading, and writing in English. Students must be able to process and use appropriate nonverbal cues and be proficient in the use of electronic communication media.

BEHAVIORAL AND SOCIAL ATTRIBUTES
Students must demonstrate maturity, integrity, honesty, compassion, and respect when relating to others. Students must have sufficient mental and emotional health to complete work and responsibilities using good judgment. Students must be able to tolerate and adapt to stressful
workloads and situations and modify behavior based on constructive criticism. Students must be able to function in accordance with the legal and ethical standards of practice.

**Observation and Motor Skills**

Students must have functional use of visual, auditory, and tactile senses. Students must be able to observe and perform experiments, physical assessments, patient interviews, and medication order processing. Students must be able to distinguish physical characteristics of medications by inspection. Students must have coordination of gross and fine muscular movements sufficient to perform pharmacy-related tasks including compounding and dispensing medications, administering medications, and using computers and other technology necessary for learning and professional practice.

**College Academic Standards—Professional Courses**

PharmD students must receive a grade of C or better in professional courses.

- **Professional courses are those** required courses taught within the major/college as identified by course subject code: PHMD, PHSC.
- **Courses in the above-listed subjects** that are taken as electives are exempt from the C or better rule, and the university’s minimum satisfactory grade will be accepted.
- For PharmD students, failure to earn a satisfactory grade (S) in a co-op will be counted as a professional course failure.

**Progression Within Bouvé**

The requirements for any graduate degree or certificate of advanced study must yield a cumulative grade-point average of 3.000 or higher as stated in the university’s Graduate Catalog.

- To progress into the subsequent year of professional courses, students must have completed all professional prerequisites with the required minimum passing grade.
- To progress into the subsequent semester of professional courses, students must have completed all professional courses with a grade of C or better.
- Students who incur an incomplete grade in a prerequisite course must obtain approval from their academic advisor, upon consultation with the department faculty, prior to progression into the subsequent course(s).

**Academic Dismissal from Major**

PharmD students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Failure to earn a grade of C or better in three professional courses, regardless of remediation. Lecture and clinical/lab components for the same class are considered as one professional course failure. Within the PharmD program, each specific professional course (with separate registration number) will be counted as a separate failure even if content is related.
- Failure to earn the minimum required grade in the same course twice.
- For PharmD students, the expected graduation date may not be changed more than twice.
- The PharmD program monitors and promotes the development of professional behaviors in its students in order to ensure appropriate professionalism in the classroom, local and global communities, and clinical settings. Breach of adherence to these standards may result in dismissal from the program.

**Academic Appeals**

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Refer to the Bouvé Graduate Student Policies and Regulations Manual, which details the Bouvé College of Health Sciences Appeals Process, and the University Graduate Student Academic Appeals Procedures (p. 30).

This Master of Science program in biomedical nanotechnology incorporates aspects of the pharmaceutical sciences curriculum with courses in nanotechnology, entrepreneurship, and law. The combination of these fields results in a unique curriculum that offers students an opportunity to obtain skills not only in the relevant science but also in leadership, business, and intellectual property law. Furthermore, the program directly addresses a core mission of the university: the provision of practice-oriented educational programs in major scientific disciplines.

Program Requirements
Prerequisites: calculus, organic chemistry, biochemistry, and physiology.

Complete all courses and requirements listed below unless otherwise indicated.

Requirements
Pharmaceutical
CHME 5699 Special Topics in Chemical Engineering 4
or PMST 6252 Pharmacokinetics and Drug Metabolism 4
PHSC 5100 Concepts in Pharmaceutical Science 2
PHSC 5300 Pharmaceutical Biochemistry 2
PHSC 5305 Professional Development for Pharmaceutical Sciences 1
PHSC 6212 Research Skills and Ethics 1

or BIOL 6381 Ethics in Biological Research

PHSC 5100 Concepts in Pharmaceutical Science 1
PHSC 7010 Pharmaceutical Sciences Laboratory 4
PMST 6254 Advanced Drug Delivery System 3

Nanomedicine
NNMD 5270 Introduction to Nanomedicine Science and Technology 3
NNMD 5470 Nano- and Biomedical Commercialization: From Concept to Market 3

Business and Enterprise
ENTR 6200 Enterprise Growth and Innovation 3
ENTR 6212 Business Planning for New Ventures 3
LS 6101 Introduction to Legal Studies 1: Law and Legal Reasoning 3

Research and Internship
Complete 2 semester hours from the following repeatable courses:
PHSC 5976 Directed Study
PHSC 6401 Pharmaceutical Science Internship
PHSC 6984 Pharmaceutical Science Research

Program Credit/GPA Requirements
132 total semester hours required
Minimum 3.000 GPA required

Biomedical Sciences, MS

Complete all courses and requirements listed below unless otherwise indicated.

Requirements
Required Core
Complete 13–18 semester hours from the following:
PHSC 5100 Concepts in Pharmaceutical Science
PHSC 5300 Pharmaceutical Biochemistry or PHSC 7010 Pharmaceutical Sciences Laboratory
PHSC 5310 Cellular Physiology
PHSC 6210 Drug Design, Evaluation, and Development
PHSC 6214 Experimental Design and Biostatistics
PHSC 6216 Human Physiology and Pathophysiology
PHSC 6212 Research Skills and Ethics or BIOL 6381 Ethics in Biological Research

Pharmaceutics Core
PMST 6252 Pharmacokinetics and Drug Metabolism 3
PMST 6250 Advanced Physical Pharmacy 2
PMST 6254 Advanced Drug Delivery System 3

Electives
Complete 7–12 semester hours from the following subject areas:
PHSC, PMCL, PMST, BIOL, CHEM, NNMD, BIOT
Program Credit/GPA Requirements
33 total semester hours required
Minimum 3.000 GPA required

Medicinal Chemistry, MS
This Master of Science program integrates aspects of contemporary medicinal chemistry and pharmacology, emphasizing topics most relevant to therapeutics design, discovery, and action. The core curriculum is an interdisciplinary combination of synthetic organic chemistry, bioorganic chemistry, analytical chemistry, and pharmaceutical sciences courses. In-depth electives are available in these areas. The program offers students the opportunity to develop knowledge of medicinal chemistry that can be applied to a practice-oriented career in the pharmaceutical industry.

Undergraduate prerequisites are general chemistry, organic chemistry, biochemistry, or cell/molecular biology.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
Core Courses
PHSC 5100 Concepts in Pharmaceutical Science 2
PHSC 6210 Drug Design, Evaluation, and Development 2
BIOL 6381 Ethics in Biological Research 2
or PHSC 6212 Research Skills and Ethics

Chemistry
CHEM 5612 Principles of Mass Spectrometry 3
CHEM 5626 Organic Synthesis 1 3
CHEM 5628 Principles of Spectroscopy of Organic Compounds 3
CHEM 5672 Organic Synthesis 2 3
CHEM 5676 Bioorganic Chemistry 3
PHSC 6222 The Chemistry and Biology of Drugs of Abuse 2

Electives
Complete 6–7 semester hours from the following subject areas:
BIOL, BIOT, CHEM, NNMD, PHSC, PMCL, PMST

Program Credit/GPA Requirements
33 total semester hours required
Minimum 3.000 GPA required

Pharmaceutical Sciences, MS
Just as cars are useless without roads, drugs are useless without an effective delivery system. This is especially important in contemporary pharmaceutical research as new chemical entities are either too hydrophobic (e.g., many anticancer drugs) or hydrophilic and highly labile (e.g., nucleic acids). The Bouvé College of Health Sciences’ pharmaceutics faculty and students are developing the pathways that bring small-molecule drugs and biological therapies directly to the target cells.

Our comprehensive program in pharmaceutics has specialists in drug development and delivery who use and deliver treatments. Their goal is to better understand how the chemical and physical properties of drugs and their dosage forms affect many approaches to create drug performance in healthy and diseased systems. Graduate students may elect a program concentrating in:

- Novel drug delivery systems
- Biopharmaceutics and pharmacokinetics
- Physical pharmacy and polymeric dosage form development
- Drug metabolism

With a strong focus on nanotechnology-based advanced delivery systems that address contemporary needs, this concentration also gives you the opportunity to study with some of the world’s top researchers. Pharmaceutics students have the option of performing industrial internships during the summer in some of the most prestigious pharmaceutical and biotechnology companies in the area.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
Required Core
Complete 13–18 semester hours from the following:

Required Core
PHSC 5100 Concepts in Pharmaceutical Science 2
PHSC 6210 Drug Design, Evaluation, and Development 2
PHSC 6214 Experimental Design and Biostatistics 2
PHSC 6216 Human Physiology and Pathophysiology 2
PHSC 6212 Research Skills and Ethics 1
or BIOL 6381 Ethics in Biological Research
PHSC 5300 Pharmaceutical Biochemistry 2
or PHSC 7010 Pharmaceutical Sciences Laboratory

Electives
Complete 7–12 semester hours from the following subject areas:

Electives
PMST 6252 Pharmacokinetics and Drug Metabolism 3
PMST 6250 Advanced Physical Pharmacy 2
PMST 6254 Advanced Drug Delivery System 3

Program Credit/GPA Requirements
33 total semester hours required
Minimum 3.000 GPA required

Pharmacology, MS
Graduate education in pharmacology embodies the principles and mechanisms of drug action on biological systems. Through course work, seminars, and conferences, students gain exposure to both classical and
recent approaches that have led to the development of current theories of drug action. Pharmacology should not be confused with pharmacy, which is a professional degree allowing a licensed individual to dispense drugs.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

The School of Pharmacy and the Department of Health Sciences offer a combined Doctor of Pharmacy (PharmD) and Master in Public Health (MPH) program.

The combined PharmD-MPH program recognizes and reinforces the importance of public health in pharmacy practice. Central to addressing urban public health concerns, and in particular those associated with racial and ethnic health disparities, the program is committed to building a strong, diverse, and activist public health workforce. The goal of the program is to graduate professionals who are well educated in the complex issues associated with disparate health status and healthcare access. The combined PharmD-MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their PharmD.

**Graduate Program Directors**

- **Nancy Sharby, PT, DPT, MS**  
  Assistant Clinical Professor, Disability Studies Program

- **Sonya Larrieux, PT, MA, C/NDT**  
  Director Post Baccalaureate DPT Program

- **Diane Fitzpatrick, PT, DPT, MS, GCS, CEEAA**  
  Associate Director Post Baccalaureate DPT Program

Our programs build on the university’s core values of interdisciplinary education, urban engagement, international knowledge, and cutting-edge research. Our exceptional faculty are dedicated to promoting excellence in practice, education, scholarship, and community service. Faculty are engaged in active clinical research and practice. A hallmark of our program is the integration of experiential learning and didactic education whether through use of standardized patients, communication and interaction with community consultants, participation in service-learning projects, or engagement in research with our faculty.

The Department of Physical Therapy, Movement, and Rehabilitation Sciences graduates are innovative, global leaders who excel in clinical practice, research, worker wellness, ergonomics, and community service. With one of the longest-accredited physical therapy programs in the United States, and the only program with cooperative education, Northeastern University seeks to graduate students with exceptional clinical decision-making skills and experience in the field of physical therapy. Our Master in Occupational Ergonomics and Health program, open to individuals with various backgrounds, is a unique program combining health promotion and disease prevention. We also offer Certificates of Advanced Graduate Studies (CAGS) for licensed practicing physical therapists (PTs) and a sports residency program for PTs. Our degree programs incorporate cooperative experiential learning, a hallmark of Northeastern University.

### Unique Program Features

#### INTERPROFESSIONAL OPPORTUNITIES

The Bouvé van provides community access to healthcare offered in conjunction with the nursing, pharmacy, speech-language pathology, and public health programs. The Arnold S. Goldstein Laboratory Suite is the keystone of our interprofessional simulation-learning program. Simulations are uniquely designed to engage Bouvé students from more than eight different health professions to learn about, from, and with each other to improve health outcomes. Labs can be set up as a variety of practice environments, including hospital rooms, operating rooms, exam rooms, office space, conference rooms, home care settings, or even a dorm room.

#### GLOBAL

Beyond the traditional semester abroad, we offer multiple global academic and service-oriented experiences such as international cooperative education and clinical experience, PT academic exchange programs, and global service PT programs to Mexico and Ecuador.

### RESEARCH OPPORTUNITIES

The Department of Physical Therapy, Movement and Rehabilitation Sciences’ research mission is to build the evidence for best practices to maintain and improve the health and well-being of the local, national, and global community members. Students have the opportunity to work with faculty to conduct ongoing research in one of the twelve Department of Physical Therapy, Movement, and Rehabilitation Science’s labs and centers; including:

- Neuromotor Systems Laboratory
- Laboratory for Locomotion Research
- Cancer Survivorship Center
- The ReGameVR Laboratory
- Movement Neuroscience Laboratory
- Rehabilitation and Epidemiology Trainee Program
- Occupational Biomechanics and Ergonomics Laboratory
- Neuropsychology Laboratory
- Teaching and Learning Innovation Laboratory
- Musculoskeletal Epidemiology and Biomechanics Laboratory
- Cadaver Lab
- Neuroscience Wet Lab

#### Programs

- **Doctor of Physical Therapy (DPT)**
  - Physical Therapy (p. 245)
  - Physical Therapy—Direct Entry (p. 245)
  - Transitional Doctor of Physical Therapy (p. 267)

- **Master of Science (MS)**
  - Occupational Ergonomics and Health (p. 244)

#### Graduate Certificate

- Early Intervention (p. 215)
- Advanced Study in Orthopedic Physical Therapy (p. 301)
People with disabilities constitute the largest minority group living in the United States today. They face the same discrimination, marginalization, and bias that affect individuals from other minority groups. These factors create a social climate where people with disabilities are unable to fully integrate and participate in activities that are important for all individuals and to make contributions to their communities. This occurs because people with disabilities are often disadvantaged in the receipt of education, social services, healthcare, and opportunities for employment.

Disability studies allows for a broad range of disciplines—including the social sciences, education, healthcare, the sciences, law, and public policy—to work together to create equity and social justice for the diverse group of people with disabilities. A key focus of disability studies is to remove barriers to the participation and inclusion of people in society. These goals can be accomplished through research, public policy and educational initiatives, advocacy, and by enhancing the capacity of the medical profession to provide high-quality care.

The purpose of this certificate is to educate an interdisciplinary cohort of professionals to become leaders that are able to work collaboratively to create changes in the social, economic, political, educational, medical, and physical environments. Successful graduates are able to create changes that support people with disabilities to live satisfying lives of inclusion and integration within the community at large.

Program Description
The Graduate Certificate in Disability Studies program (http://www.northeastern.edu/bouve/physical-therapy/programs/disability-studies) requires 16 semester hours of course work. The four required courses are offered exclusively online.

An optional directed study on advocacy is available to students in place of PT 5730, Global Perspectives in Disability and Health. It will occur under the auspices of an agency or organization that is currently filling a need for people with disabilities in the community. This directed study will be developed collaboratively by the student, community agency, and faculty.

Progression in the Program
To progress in the program, students must maintain acceptable standards of scholarship and academic performance as stated in the academic requirements section of this catalog. Students must develop professional behaviors and emotional maturity.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Physical Therapy, DPT—Direct Entry

Our postbaccalaureate Doctor of Physical Therapy (DPT) program (http://www.northeastern.edu/bouve/pt/programs/pbdpt.html) is designed for individuals who hold a minimum of a baccalaureate degree in any major other than physical therapy and have satisfied the prerequisite requirements. Over the course of three and one-half years, this rigorous curriculum provides didactic and experiential learning experiences, the cornerstone of our program. These experiences include cooperative education, simulated patient interactions, engagement with consumer clients, service-learning, clinical research, and clinical education experiences.

Emphasis on Experiential Learning

COOPERATIVE EDUCATION

Our DPT program provides students with six months of full-time experiential learning in addition to the required clinical affiliations necessary for licensure. Through cooperative education, the hallmark of Northeastern University, students are able to integrate semesters of academic study with semesters of cooperative education experiences in hospitals and clinics throughout the country and around the globe. Students may be employed as physical therapy co-ops with increasing responsibilities commensurate with their academic studies or perform other health-related duties.
**CLINICAL EDUCATION**

The curriculum also includes three rotations for a total of thirty-six weeks of clinical education under the direct supervision of a licensed physical therapist. We are affiliated with world-class medical centers and clinical sites throughout the United States, providing students with access to master clinicians and clinical scholars. Every effort is made to accommodate individual circumstances, but students should be prepared to travel out of state for two of the three clinical placements. Availability of a car may be required, as most sites are not accessible by public transportation. All expenses associated with clinical education, including travel and housing, are the responsibility of the student.

**GLOBAL OUTREACH**

Students may participate in short cultural immersion experiences abroad whereby they engage in community service projects under the direction of a physical therapy faculty member or on physical therapy academic exchanges with partner academic institutions.

**SERVICE-LEARNING**

During the curriculum, students participate in service-learning opportunities in the local community that offer them an opportunity to learn and apply skills and knowledge related to program objectives. These opportunities start during the first academic year and continue throughout the program in a variety of settings.

**ABILITY TO CONCENTRATE**

Once in the program, students may have the ability to acquire additional information in two areas of concentration. The Certificate in Early Intervention (p. 215) is an interprofessional program that meets the state and national requirements for personnel to work with families, infants and toddlers with disabilities, or those who are at risk for developmental delays. The Sports Strength and Conditioning Concentration seeks to prepare the physical therapy student to confidently pursue a sports physical therapy position working with athletes of all ages in a variety of settings. In both areas, students take additional course work and conduct focused research and clinical rotations that expand upon the entry-level physical therapy curriculum.

**STUDENT RESEARCH**

Physical therapy students participate in research that is integrated into the curriculum. Students have the opportunity to work with faculty to conduct ongoing research in world-renowned medical centers, in one of the twelve Department of Physical Therapy, Movement, and Rehabilitation Science’s labs and centers (e.g., Neuromotor Systems Lab, Lab for Locomotion Research, Cancer Survivorship Center, The ReGameVR Lab, Movement Neuroscience Lab, Rehabilitation and Epidemiology Trainee Program, Occupational Biomechanics and Ergonomics Lab, Neuropsychology Lab, Teaching and Learning Innovation Lab, Musculoskeletal Epidemiology and Biomechanics Lab, Cadaver Lab, and Neuroscience Wet Lab). The successful outcome is the ability to conduct and present quality research at local and/or national-level conferences.

Physician Assistant

Website (http://www.northeastern.edu/bouve/pa)

Trenton Honda, MMS, PA-C
Program Director and Assistant Clinical Professor

202 Robinson Hall
617.373.3195
617.373.3338 (fax)
paprogram@northeastern.edu

Established in 1971, the physician assistant (PA) program has a long-standing history of, and expertise in, the education and training of physician assistants. The PA program is located in close proximity to Boston’s major academic medical centers and was the first generalist PA training program in the nation to offer a master’s degree in 1985.

This rigorous, highly integrated curriculum offers our students the opportunity to obtain broad generalist training that prepares them for successful employment in all fields of clinical practice. Our instructional faculty members are practicing clinicians from throughout New England, and most have been teaching with the program for many years. The clinical year is designed to provide students with experience in diverse healthcare settings in our well-established network of clinical rotation sites.

Northeastern’s PA program graduates are employed in positions across the United States, and some have worked internationally. In addition to clinical practice, our graduates are employed in research, administration, and education.

Programs

Master of Science (MS)

- Physician Assistant Studies (p. 247)

Dual Degree (MS/MPH)

- Physician Assistant Studies and Masters of Public Health (p. 248)
The Northeastern University physician assistant (PA) program and Department of Health Sciences offer a combined Master of Science in Physician Assistant Studies (MS)—Master in Public Health Program (MPH) program. The combined PA-MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their MS in Physician Assistant Studies.

Since its inception in 2007, the Northeastern MPH program has distinguished itself from other MPH programs in the area through its unique focus on urban public health. The program’s overarching goal is to address urban public health concerns, particularly those associated with racial and ethnic health disparities, in order to build a diverse and activist-oriented public health workforce. The MPH program has a strong commitment to providing a flexible course of study for working professionals. This flexibility allows for easy incorporation into a dual-degree program.

The combined degree that incorporates both programs is designed to help diversify the public health workforce and improve graduates’ ability to approach clinical situations with cultural sensitivity and awareness. Successful graduates of the program benefit from having a greater understanding of public health issues in clinical practice, including the racial and ethnic health disparities prevalent in the United States’ healthcare system, as well as a strong grounding in epidemiology, quantitative and qualitative research methods, and the use of scientific evidence, skills critical to many fields of healthcare practice.

This dual degree takes a total of three years to complete (as opposed to four, if each degree were pursued separately), and a total number of 12 credits would be shared between both degrees.

**Program Requirements**

Students in Northeastern University’s graduate biotechnology program attain a common core knowledge of biotechnology with particular emphasis on the ability to integrate knowledge across disciplinary boundaries. Track objectives are to provide students with didactic and practical knowledge in protein analytical approaches and methodologies for activities and functions of biopharmaceuticals (biopharmaceutical analytical sciences); in formulation development and drug product manufacturing of biopharmaceuticals (pharmaceutical technologies); and in development and optimization of drug substance manufacturing of biopharmaceuticals (process sciences).

With Northeastern University’s interdisciplinary graduate programs in health informatics, you have an opportunity to gain the knowledge and skills needed to use information technology to improve healthcare delivery and outcomes—and to advance your career in a growing field. We seek to educate the leaders who use technology to improve healthcare for the future.

Programs

Doctor of Philosophy (PhD)
- Personal Health Informatics (p. 249)

Master of Science (MS)
- Biotechnology (p. 249)
- Health Informatics (p. 93)
- Health Informatics—ALIGN (p. 94)

Graduate Certificate
- Aging (p. 252)
- Biopharmaceutical Analytical Sciences (p. 252)
- Early Intervention (p. 215)

- Health Informatics Management and Exchange (p. 253)
- Health Informatics Privacy and Security (p. 253)
- Health Informatics Software Engineering (p. 253)

Dual Degree
- Law and Urban Public Health, JD/MPH (p. 254)

Personal Health Informatics, PhD

Northeastern University’s interdisciplinary doctoral program in personal health informatics seeks to prepare researchers to design and evaluate technologies that improve health and wellness with the potential to transform healthcare. The joint degree program combines a strong curriculum in human-computer interface technology and experimental design in health sciences. Read additional information (p. 90).

Biotechnology, MS

Overview
The MS in Biotechnology is a Professional Master of Science (PSM) degree, an innovative graduate degree designed to allow students to pursue advanced training and excel in science while simultaneously developing highly valued business skills without acquiring a PhD or MBA. PSM programs are characterized by instruction in advanced science or mathematics, business courses, and a graduate co-op providing a real-world work experience. Graduates are referred to as “T-shaped” professionals with both deep knowledge of a specific discipline and broad knowledge of the communications and relational skills necessary to excel in any business and adapt to a changing workplace. The PSM is a nonthesis degree.

Biopharmaceutical Analytical Sciences Concentration
The biopharmaceutical analytical sciences concentration focuses on structures and activities of biological molecules and their variants formed during the production of biopharmaceuticals. Students discover the diversity of molecular forms derived from the biological products through various biological and chemical mechanisms and the impact of these structural changes on the safety and efficacy of these biopharmaceuticals. The students are exposed to the science and practice applied in the biotechnology industry to analyze and characterize these molecular forms. This is accomplished through both lecture courses of the analytical sciences and project-driven laboratory experience that utilizes analytical techniques such as mass spectrometry and molecular separations.

Biotechnology Enterprise Concentration
The biotechnology enterprise concentration integrates business and management skills with the science of biotechnology. Students are offered an opportunity to learn the fundamental concepts of leadership, entrepreneurship and innovation, financial decision making, and marketing. In the process, the concentration seeks to encourage students to gain teamwork, management, and business development skills and graduate prepared to become scientist-managers.

Pharmaceutical Technologies Concentration
The pharmaceutical technologies concentration focuses on the conversion of purified proteins to biopharmaceutical drug products that are compatible for clinical use. This concentration addresses the design of the product formulation and the development and implementation of the drug product manufacturing processes. Students study the sciences of the interactions of the biologic molecules in the process conditions and the relevant process technology, such as aseptic operations.
Health Informatics, MS

and freeze-drying, needed for drug product manufacturing. This is accomplished through both lecture courses and project-driven laboratory experience that offers hands-on learning of formulation design and drug product process development.

**Process Sciences Concentration**
The process sciences concentration focuses on the production of drug substance of biopharmaceuticals from cell culture process to purification of the biologic molecules. The students study the principles of development and implementation of biological manufacturing processes through the integration of concepts and fundamentals of engineering and life sciences. The concentration addresses biochemical engineering, mammalian cell culture process development, and protein purification. Both lecture courses and project-driven laboratory experience offer hands-on study of cell culture and protein separation.

**Program Credit/GPA Requirements**
34 total semester hours required
Minimum 3.000 GPA required

Northeastern’s interdisciplinary Master of Science in Health Informatics was the first MS in the field. The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Successful students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, and information technology professionals.

With approval from the health informatics program director, selected students can substitute one course from the Graduate Certificate in Data Analytics for a technical core requirement in the MS in Health Informatics degree, and up to two more courses from the Graduate Certificate in Data Analytics can be counted as electives for the MS in Health Informatics degree.

Northeastern also offers graduate certificate programs in health informatics. Three certificate programs enable you to choose the one that addresses your specific goals. These programs are listed separately in this catalog under the Department of Health Sciences:

- Graduate Certificate in Health Informatics Management and Exchange
- Graduate Certificate in Health Informatics Privacy and Security
- Graduate Certificate in Health Informatics Software Engineering

Courses in the certificate program also apply toward master’s degree requirements. This gives you the flexibility to complete a certificate and be well on your way to earning a degree if you decide later to continue your education.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.
Requirements
A grade of B– or higher is required in each course.

Core Requirements
HINF 5101 Introduction to Health Informatics and Health Information Systems 3
HINF 5105 The American Healthcare System 3
HINF 7701 Health Informatics Capstone Project 3

Business Management Core
Complete two courses from the following: 6
HINF 6202 Business of Healthcare Informatics
HINF 6215 Project Management
HINF 6335 Management Issues in Healthcare Information Technology
HINF 6240 Improving the Patient Experience through Informatics
PHTH 5226 Strategic Management and Leadership in Healthcare

Health Informatics Core
Complete two courses from the following: 6
HINF 5102 Data Management in Healthcare
HINF 5110 Global Health Information Management
HINF 5200 Theoretical Foundations in Personal Health Informatics
HINF 6205 Creation and Application of Medical Knowledge
HINF 6350 Public Health Surveillance and Informatics
HINF 6404 Patient Engagement Informatics and Analytics
HINF 6405 Quantifying the Value of Informatics
PHTH 5232 Evaluating Healthcare Quality

Technical Core
Complete two courses from the following: 6
HINF 6220 Database Design, Access, Modeling, and Security
HINF 6230 Strategic Topics in Programming For Health Professionals
HINF 6355 Key Standards in Health Informatics Systems
PHTH 5210 Biostatistics in Public Health
PHTH 5202 Epidemiology
One course from the following may count toward the technical core requirement:
DS 6020
DS 6030
PPUA 6301 Introduction to Computational Statistics
PPUA 6302 Information Design and Visual Analytics

Elective Core
Complete two courses from the following: 6
HINF 6325 Legal and Social Issues in Health Informatics
HINF 6330 Emerging Technologies in Healthcare
HINF 6345 Design for Usability in Healthcare
DS 6020
DS 6030
PPUA 6301 Introduction to Computational Statistics
PPUA 6302 Information Design and Visual Analytics

Program Credit/GPA Requirements
Minimum 33 total semester hours required
Minimum 3.000 GPA required

Health Informatics, MS—ALIGN Program
Our Master of Science in Health Informatics ALIGN program seeks to prepare students from diverse backgrounds to excel in the health informatics field. ALIGN’s custom master’s degree curricula are tailored to each student’s professional and educational background, allowing successful students to transition into careers in high-demand industries. Learn more at the ALIGN web page (http://www.northeastern.edu/align).

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A grade of B– or higher is required in each course.

ALIGN Course Work
Complete one or two courses from the following as assigned during admission:
HINF 0200 Health and Medicine for Nonclinicians 3
HINF 6230 Strategic Topics in Programming For Health Professionals 3

Core Requirements
HINF 5101 Introduction to Health Informatics and Health Information Systems 3
HINF 5105 The American Healthcare System 3
HINF 7701 Health Informatics Capstone Project 3

Business Management Core
Complete two courses from the following: 6
HINF 6202 Business of Healthcare Informatics
HINF 6215 Project Management
HINF 6335 Management Issues in Healthcare Information Technology
HINF 6240 Improving the Patient Experience through Informatics
PHTH 5226 Strategic Management and Leadership in Healthcare

Health Informatics Core
Complete two courses from the following: 6
HINF 5102 Data Management in Healthcare
HINF 5110 Global Health Information Management
HINF 5200 Theoretical Foundations in Personal Health Informatics
Aging, Graduate Certificate

The purpose of this program is to provide interprofessional education to meet the specific healthcare needs of older adults. The interprofessional aging certificate program will consist of four graduate courses. As an interactive online program, the interprofessional certificate program in healthy aging is designed for the twenty-first-century professional requiring the flexibility that online education allows.

Biopharmaceutical Analytical Science, Graduate Certificate

The Graduate Certificate in Biopharmaceutical Analytical Science has been designed in response to a need in the biotechnology industry for individuals with an advanced knowledge of the principles and practices of state-of-the-art analyses of protein with focus on the characterization of innovator and biosimilars. The certificate offers an opportunity for individuals, particularly those who are working in the various sectors of biotechnology—including basic research of biological systems, discovery, development, and manufacturing of biopharmaceuticals—to enhance their competency and practical skills, enabling them to increase productivity and further contribute to their professions. In addition, the certificate was designed for both individuals with and without experience in biopharmaceuticals and their analysis.

Program Credit/GPA Requirements
12 total semester hours required
Minimum 3.000 GPA required

Early Intervention, Graduate Certificate

Northeastern University’s Graduate Certificate in Early Intervention program is an interdisciplinary, preservice training program that is designed to fulfill requirements for certification as an early intervention specialist, at the advanced provisional level, as set forth by the Massachusetts Department of Public Health (DPH). The interdisciplinary nature of the program is facilitated by the interaction of students from school psychology, counseling psychology, physical therapy, speech and language pathology, human services, psychology, and other disciplines who participate in the program.

The goals for the early intervention certificate program are:

- To prepare personnel to provide services to infants and toddlers with disabilities, and their families, from linguistically and culturally diverse backgrounds in urban environments
• To prepare personnel who have attained all competencies relative to early intervention, specified by the Massachusetts DPH, and that are consistent with best practice and research
• To prepare personnel in an interdisciplinary manner, drawing from Northeastern University’s multidisciplinary resources
• To prepare personnel to function effectively across teams (individualized family service plan teams, community teams, interagency teams) and to understand the roles of their interdisciplinary teammates

The program is delivered in a hybrid format: Classes meet on campus one day each month, and additional course content is delivered through online distance education. The program can be taken alone or integrated with bachelor’s, master’s, or clinical doctoral degree programs. Personnel who are working in the field may use their work site for field training. Degree-bearing programs incorporate the courses in alternative arrangements (e.g., Master of Science/Certificate of Advanced Graduate Study in School Psychology, MS in Speech-Language Pathology, MS in Counseling Psychology).

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Requirements
A grade of B– or higher is required in all courses.

Early Intervention
CAEP 5150 Early Intervention: Family Systems 3
CAEP 5151 Early Intervention: Infant and Toddler Development, Risk, and Disability 3
CAEP 5152 Early Intervention: Planning and Evaluating Services 3
SLPA 6335 Early Intervention: Assessment and Intervention 3

Practicum

Law and Urban Public Health, JD/MPH

Northeastern University’s School of Law and Bouvé College of Health Sciences offer a dual-degree JD/MPH in urban health. Given the worldwide trend toward urbanization, the Master of Public Health (MPH) in Urban Public Health recognizes the growing need for professionals trained to respond to unique public health challenges and opportunities facing urban populations. The MPH program brings together interdisciplinary faculty (from the School of Law, D’Amore-McKim School of Business, College of Social Sciences and Humanities, College of Computer and Information Science, and the Bouvé College of Health Sciences) with expertise in collaborating with diverse urban populations to offer students an opportunity to obtain practice-based knowledge, skills, and experience needed to address urban public health problems.

See Bouvé College Masters of Public Health program (p. 219) for more information.
This degree is designed for professionals who want general exposure to law and legal concepts. Such professionals may be found in nonprofit organizations, foundations, financial services firms, pharmaceutical companies, insurance firms, compliance departments, or a host of other commercial and noncommercial settings. Examples of the professionals who would be interested in this degree are human resource professionals, claims representatives for insurance companies, professionals in healthcare organizations, bank loan officers, real estate brokers, risk managers, government affairs officers, management consultants advising organizations, development officers working on planned giving, and software entrepreneurs. They desire to know more about the law and to be able to deal more effectively with the lawyers with whom they interact during their professional lives. The degree will include concentrations in human resources law, business law, and health law.

Program Plan
Students will take one 3-semester-hour course per term. A term will be approximately eight weeks, and there will be two terms in each of three semesters (fall, spring, and summer). The semesters will be broken into two parts: A/B. The course work will be spread over ten terms or five semesters. Every student in their first semester will take two introduction to legal studies foundation courses. (These two courses are the only prerequisites.) Students then take four out of five core courses, plus three or four elective courses from any of three concentrations. Students choosing not to concentrate may take courses from any concentration.

Program Features

TOTAL DEGREE CREDIT REQUIRED
The program requires 30 semester hours.

COURSE ORGANIZATION
The program comprises ten courses:
- Two foundation courses
- Four or five core courses
- Three or four elective courses

CONCENTRATIONS
The program includes three concentrations plus a general track. The concentrations are:
- Business law
- Health law
- Human resources law

ACADEMIC STRUCTURE
- Six eight-week sessions per calendar year:
  - Spring A
  - Spring B
  - Summer A
  - Summer B
  - Fall A
  - Fall B
- Two eight-week courses (3 semester hours each) back-to-back in each sixteen-week semester
- Total of ten courses needed to graduate

TIME TO DEGREE COMPLETION
Normal completion time is twenty months (five semesters) of part-time study.

ADMISSION CYCLES
- Fall 1 session
- Spring 1 session

ADMISSION REQUIREMENTS
- Bachelor’s degree from regionally accredited institution
- Online application
- Application fee—none
- Personal statement with designated questions to be answered
- Two letters of recommendation
- TOEFL for international students

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

- Personal Information (p. 264)
- Graduate Campus (p. 264)

Master’s Degree Admission Requirements

Note that all master’s degrees offered through the College of Professional Studies (CPS) have the following admission requirements:

- Online application
- Statement of purpose (500–1,000 words)
- Professional resumé
- Official undergraduate transcript(s) noting conferral of a bachelor’s degree
- Two letters of recommendation

Transfer Credit Policies

All graduate transfer credit awards are made on a case-by-case basis. Transfer credit awards are made for eligible courses successfully completed at regionally and programmatically accredited institutions. The Council for Higher Education Accreditation provides information about the organizations responsible for these two forms of accreditation. Official transcripts from all institutions should be sent directly to the College of Professional Studies Office of Admissions at the time of application.

Students seeking transfer credits earned at institutions outside the United States should submit an official English evaluation completed by an approved credential evaluator. Course descriptions and/or syllabi also should be translated into English and submitted to the College of Professional Studies Office of Admissions.

A maximum of 8 quarter hours or two courses obtained at another institution may be accepted as transfer toward the degree, provided the credits consist of work taken at the graduate level for graduate credit, carry minimum grades of B (or 3.000 on a 4.000 scale), have been earned at an accredited institution or equivalent, and have not been used toward any baccalaureate or advanced degree or certificate of advanced graduate study at another institution.

Transfer credits must be no more than five academic years old at the time the student is admitted to graduate study. Courses older than five years will be accepted only in rare circumstances.

Graduate Certificate Transfer Credit Policies

- A maximum of 4 quarter hours (one course) of transfer credit

Master Degree Transfer Credit Policies

- A maximum of 8 quarter hours of transfer credit

Doctoral Degree Transfer Credit Policies

- A maximum of 9 quarter hours of transfer credit for Doctor of Education students
- A maximum of 8 quarter hours of transfer credit for Transitional Doctor of Physical Therapy students
- No transfer credit is awarded for students in the Doctor of Law and Policy program

Special Student Status

Graduate applicants to the College of Professional Studies may be eligible to take up to two graduate (nondoctoral) courses toward their program while completing the formal application process by seeking special student status (http://www.cps.neu.edu/admissions/graduate/special-students.php).
Personal Professional Enrichment (PPE)

Students interested in taking graduate-level (nondothorals) courses for personal or professional enrichment (PPE) need to complete an online application (http://www.cps.neu.edu/admissions/graduate) as a PPE student. Once approved, students will be able to register through their myNEU account.

- Students taking courses under special student status are expected to satisfy applicable course prerequisites before enrolling in a course.
- Students taking courses under special student status are not eligible for financial aid.
- Special student status does not guarantee acceptance.
- The maximum number of courses students may take under special student status is two. After completing two courses, students will be blocked from further course registration until they have been officially accepted into a program.

The following programs are not available for special student status: Master of Arts in Teaching (MAT); Master of Education, Special Education Concentration; Master of Science in Applied Nutrition; Doctor of Education; Doctor of Law and Policy.

Special student status is not an option for students seeking an F-1 visa.

New Student Orientation (On-Ground and Online)

All newly accepted College of Professional Studies students are required to attend the on-ground orientation or participate in online orientation. The purpose of New Student Orientation is to provide information and tools for each student’s success from the point of program entry to degree completion.

Students are encouraged to use the online orientation, accessed via NU Online, as a resource throughout their career at the College of Professional Studies.

For additional information, visit the College of Professional Studies web page (http://www.cps.neu.edu/student-resources/orientation.php).

Academic Resources

Interactive Academic Integrity Checklist (IAIC)

The Interactive Academic Integrity Checklist (IAIC) is a Flash-based tool students can use before they turn in every assignment to ensure that they have not accidentally committed any of the most common violations of the academic integrity policy. Additionally, the IAIC contains links to examples of APA- and MLA-style formatting. See the version for desktop internet browsers (http://nuonline.adobeconnect.com/academicintegritychecklist) or the version for mobile devices (http://nuonline.adobeconnect.com/academicintegritychecklist_mobile).

Global Student Success

10 Belvedere
617.373.2455
globals@neu.edu
www.cps.neu.edu/gss (http://www.cps.neu.edu/gss)

Global Student Success is committed to supporting the success of international students at Northeastern University through cross-cultural, linguistic, and academic support services. We also partner with faculty, staff, and administrators to integrate global dimensions and cross-cultural understanding into the Northeastern experience.

International Tutoring Center

Basement of Snell Library
617.373.2455
globals@neu.edu
www.cps.neu.edu/gss (http://www.cps.neu.edu/gss)

Tutors provide high-quality ESL writing instruction and tutoring for international students who need assistance with papers, assignments, TOEFL writing, and research projects. Students can meet one-on-one with an ESL tutor for 50-minute appointments. This is a free service for Northeastern international students.

Smarthinking

Smarthinking is a free online tutoring service accessed through the student’s NU Online account for College of Professional Studies students.

Online tutoring sessions can be synchronous or asynchronous. Many different subjects such as writing, reading, basic math through multivariate calculus, business, biology, chemistry, and physics are available.

Attendance Requirements

Class participation is essential to success no matter the course format or its delivery.

Attendance requirements vary. It is the student’s responsibility to ascertain what each instructor requires. If a student will be absent for any reason (e.g., illness, religious beliefs, or jury duty), it is his or her responsibility to inform the instructor and to abide by the attendance requirements as explained in the course syllabus. Unexplained absence from class or failure to meet a course deadline may seriously affect the student’s academic progress and may result in a final grade of F.

"I Am Here" (IAH) Process

After course registration, students are required to verify their intent to enroll in College of Professional Studies class(es) through their myNEU account during the first week of each class start. This verification process is called "I Am Here" (IAH). Students who fail to complete this process on time will be dropped from the class(es), which may impact their financial aid or international student visa eligibility.

Students are responsible for ensuring completion of the IAH process, which requires that they do not log out of the system early. Students who do not receive a "Successful Completion" message have not reached the end of the procedure and must start again. Sometimes it may take 24 hours before students can restart the procedure.
Students registering for the first time after the start of classes will be considered “Here” for the semester.

Students who experience difficulty with the process or have questions should email the Office of the Registrar (registrar@northeastern.edu).

Nonattendance
Nonattendance does not constitute official course dropping or withdrawal, which means the student is fully responsible for the academic and financial consequences.

A student who registers for a course and completes the IAH process but does not officially drop the course by the deadline, regardless of his or her level of participation or attendance/nonattendance, is responsible for paying 100 percent of the tuition charges and applicable fees and the final earned grade. A student in this situation may earn an F grade that will be part of his or her permanent academic record.

Like all grades for courses attempted and/or completed, a grade earned due to nonattendance impacts a student’s academic progression, an international student’s visa eligibility, and a federal financial aid recipient’s aid eligibility and award.

Reentry to Program
Application for reentry into any academic program is required of students whose studies are interrupted voluntarily for a period of one to three years. Students who are dismissed academically must wait at least one year before applying for reinstatement.

Students are expected to meet the requirements of the program curriculum current at the time of the approved reentry. If a student does not enroll in the term in which he or she was approved for reentry, he or she must follow the curriculum requirements for the term in which he or she resumes course work with approval. If a student waits for more than one year to resume his or her studies after being approved for reentry, he or she will have to apply for reentry again.

If the program into which the student is seeking reentry is no longer offered, the student may choose to enroll in another program if he or she meets the admissions requirements for that program. Contact the Office of Academic Advising (http://www.cps.neu.edu/student-resources/OAA.php) for assistance and to complete the appropriate form.

Readmission to Program
A new admission application is required of students whose studies are interrupted voluntarily for more than three years.

Students are expected to meet the requirements of the program curriculum current at the time of the approved readmission. If the program into which the student is seeking readmission is no longer offered, the student may apply to another program and must meet the admissions requirements for that program. Contact the Office of Admissions (http://www.cps.neu.edu/admissions) for assistance and to complete the admission application.

If readmitted, transfer credits that a student was previously awarded will be reevaluated following the transfer credit award rules current at the time of readmission. It is at the discretion of the academic program to determine applicability of courses previously completed.

Full-Time Status
A graduate (nondoctoral) student is considered a full-time student if he or she is enrolled in 9 quarter hours of graduate credit for the quarter. An exception is made for students matriculated in master’s degree programs that only require 4-credit courses, in which case full-time student status is attained with enrollment in 8 quarter hours of graduate credit for the quarter.

A doctoral student’s full-time status is determined by the structure of the program.

Note that full-time status may be defined differently for federal loan purposes. International students have other considerations/requirements to maintain their visa eligibility.

Course Load
Federal financial aid recipients must be enrolled in and successfully complete a minimum number of credits each term to maintain eligibility. For more information, contact your financial aid counselor.

Course Overload
A maximum course load (different from full-time status) for a graduate (nondoctoral) student is 16 credits taken across a twelve-week term, with no more than 8 credits per six-week session. To be eligible for a course overload (greater than 16 credits per twelve-week term or greater than 8 credits per six-week session), a graduate (nondoctoral) student must:

- Have a record of successful study with 12 or more credits a term at Northeastern University
- Have a minimum cumulative grade-point average of 3.500
- Provide a rationale to support the request

Students need to complete the appropriate form (http://cps.neu.edu/student-resources/academic-forms.php) and return it to their student success specialist (http://cps.neu.edu/student-resources/OAA-Staff.php). Course overload is approved per term.

Each doctoral program has its own enrollment and course load requirements. Doctoral students who wish to seek a course overload must consult with the program director or designee.

International Student Enrollment Requirements
In order to maintain lawful student status in the United States, international students must be mindful of the rules and regulations that govern their nonimmigrant visa classification. Numerous U.S. federal regulations make it especially important for students in the “F” (student) and “J” (exchange visitor) categories to consult regularly with an international student advisor at the International Student and Scholar Institute (ISSI) before taking any action that might impact their immigration status and educational endeavors in the United States.

All international students in F or J status must register before each quarter starts. It is strongly recommended that international students register for an appropriate full-time course load at least two weeks before the quarter starts. Any exceptions from full-time registration requirements must be preapproved by the ISSI in accordance with specified regulations.

In the College of Professional Studies, there are four quarters that make up each academic year. Each twelve-week quarter (term) in fall, winter, and spring is made up of Parts of Term (courses that are scheduled
Active-Duty Military Personnel

As a member of the Service Member Opportunity Colleges, the College of Professional Studies’ academic residency requirement is different for active-duty service members. Active-duty service members are required to complete 30 percent of the graduate certificate/degree program at the College of Professional Studies.

Registration and Taking Courses

Course Registration

For course registration information, visit the College of Professional Studies web page (http://www.cps.neu.edu/class-registration).

Course registration procedures are as follows:

- Newly accepted and returning students add or drop courses through their myNEU account any time during the registration period.
- Certificate- and degree-seeking students whose studies have been interrupted voluntarily for one to three years or more need to first apply for reentry through the Office of Academic and Student Support Services before registering for course(s).
- Global program students should consult with their program to determine if they need to register on their own or if the program will register them.

All students need to be mindful of the college’s course add/drop policies and deadlines to register as early as possible with the intent to secure a spot in the preferred course and to avoid being charged in full for missing the course drop/withdrawal deadline.

Auditing a Course

Graduate (nondoctoral) students are permitted to audit graduate (nondoctoral) courses, but they must complete the usual registration process and pay regular tuition fees. There is no reduction in fees for auditing.

An auditor may participate in class discussions, complete papers and projects, and take tests and examinations for informal evaluation. Regardless of the amount or quality of work completed, however, no academic credit will be granted at any time for audited courses. In addition, audited courses may not be used in the determination of enrollment status for financial aid purposes and does not count toward program completion.

The student’s decision to audit a course must be communicated in writing to the Office of the University Registrar before the fourth class meeting for twelve-week courses. For four-, six-, and eight-week courses, requests must be received by the second class meeting. No exception to this procedure may be approved without the authorization of the college’s academic standing committee.

If approved, the student should inform the instructor of his or her status as auditor of the course.

Course Selection and Planning

Students should refer to their degree audits for program curriculum information, to select courses, and to monitor their progress toward degree completion. Students should access their degree audits through their myNEU account or request an audit from their student success specialist. Degree audits are unofficial records of academic progress.
Students are encouraged to consult with their student success specialist about their academic planning.

Course Prerequisites
Course prerequisites are courses that are required to have been completed prior to enrolling in another course. Before registering for a course through their myNEU account, students, regardless of matriculation status, should read the course description to determine whether they have satisfied the course prerequisites.

Course Corequisites
Course corequisites are courses that are required to be taken concurrently. Before registering for a course through their myNEU account, students, regardless of matriculation status, should read the course description to determine if there is a corequisite requirement and register for both courses.

Repeating a Course
If a student wishes to improve his or her cumulative grade-point average (GPA) by repeating a course, he or she may do so. A student may take the same course up to three times to earn a better grade. Only the grade earned in the last attempt is used to compute the GPA while all grades remain part of the student’s permanent academic record. A student is required to pay the normal tuition charges for all repeated courses. A student may not repeat more than two courses or 8 quarter hours of credit, whichever is greater, to satisfy the requirements of the degree.

Financial aid recipients must be mindful that repeating a course could impact their aid eligibility. Students with questions about this possible impact should contact their financial aid counselor.

Course Waiver
A course waiver may be awarded to a student who has completed the equivalent course at an accredited institution other than the College of Professional Studies in the past five years. The waiver will exempt the student from completing the required course. The student will complete another course, as approved by the program, to satisfy the number of credits required for the program.

Doctoral students must consult with their academic program to determine if course waivers are permitted.

Course Formats and Credits
Visit the College of Professional Studies web page (http://www.cps.neu.edu/class-registration/course-formats.php) for information on course formats.

The College of Professional Studies operates on a quarter credit system and offers courses in a variety of formats.

One quarter credit is equivalent to 0.75 semester credits.

Duration of Courses
Each full fall, winter, and spring term runs for twelve weeks. Each full summer term runs for eight weeks.

Course durations are as follows:

- During the fall, winter, and spring terms, courses are scheduled for either six or twelve weeks.
- During the summer term, courses are scheduled for four, six, or eight weeks.

Course Add/Drop Policy
Refer to the academic calendar (http://www.northeastern.edu/registrar/calendars.html) for specific dates.

Students may add a four-week or six-week course within the first week of the course. For eight-and twelve-week courses, students may add a course within the first two weeks of the course.

Students who drop a course before the deadline will not be charged for the course and will not have a W (withdrawal) on their transcript. Thereafter, students are responsible for 100 percent of the tuition charges and applicable fees and the earned grade will be on the students’ permanent academic record. All such dates are specified in the academic calendar.

Students must add/drop courses using their myNEU account.

A reduction in a student’s course load could affect a student’s international student visa status or financial aid eligibility.

Students who experience difficulty adding or dropping a course should promptly email (registrar@northeastern.edu) the Office of the University Registrar. If it is determined that there is an issue with the student’s myNEU account or access, he or she needs to contact the Service Desk at 617.373.4357 (HELP); help@northeastern.edu.

Students with holds (e.g., financial, judicial), may have restricted access to add, drop, or withdraw from a course. In such instances, students are responsible for resolving the hold immediately and to meet the established course registration deadlines.

Course Withdrawal Policy
Refer to the academic calendar (http://www.northeastern.edu/registrar/calendars.html) for specific dates.

Students who withdraw from a course after the add/drop deadline and before the last day to withdraw will receive a W grade and will be responsible for 100 percent of the tuition charges and applicable fees. The W grade does not affect the calculation of the GPA but it does impact a student’s academic progression, which may result in the student being placed on academic probation or dismissal.

Students must withdraw from courses using their myNEU account.

A reduction in a student’s course load could affect a student’s international student visa status or financial aid eligibility.

Students who experience difficulty withdrawing from a course should promptly contact the Service Desk at 617.373.4357 (HELP); help@northeastern.edu.

Students who fail to withdraw from a course by the deadline, regardless of their level of class participation or attendance, are financially and academically responsible. A student’s lack of participation/attendance will likely result in a final grade of F.

All students are encouraged to consult with their academic advisor prior to withdrawing from a course. Withdrawals may impact a student’s time to degree completion.

Student Evaluation of Courses (EvaluationKit)

Students play a critical role in the university’s commitment to quality teaching and academic excellence when they participate in the evaluation of courses through EvaluationKIT, an online survey students complete anonymously at the completion of a course. Students are expected to
participate in EvaluationKIT with constructive feedback that is relevant to teaching and course content.

Students may access EvaluationKIT summary results from previous terms via their myNEU web portal (http://www.myneu.neu.edu). Courses with a response rate of less than 20 percent of enrolled students will be excluded from the results. Courses with three or fewer students enrolled are not surveyed.

### Academic Progress/Standing

A graduate or doctoral student must maintain a minimum cumulative grade-point average (GPA) of 3.000 on a 4.000 scale to be in good academic standing. Nonmatriculated students are required to be in good academic standing to be allowed to register for any subsequent classes.

Students are responsible for reviewing their grades and academic standing at the end of each term through their myNEU account. If there are any discrepancies, students should immediately contact the instructor(s) directly. Students who want to appeal a grade have twenty working days from the date the grade is posted to do so.

### Academic Probation and Dismissal

Notation of academic probation appears on a student’s internal record but not on his or her permanent transcript.

**Graduate (Nondocoral) Students**

With exception as specified by the program, a graduate (nondocoral) student is placed on academic warning for low academic performance if his or her cumulative GPA is below 3.000 after he or she attempts 6 to 11 credits. At this point, the student is strongly encouraged to consult with his or her student success specialist or academic program designee to develop an action plan to improve his or her academic standing. Attempted credits include all credits/courses for which the student registered and did not drop.

A student is placed on academic probation if his or her cumulative GPA is below 3.000 after he or she attempts 12 to 17 credits. The student is required to consult with his or her student success specialist or academic program designee to develop an individualized education plan to improve his or her academic standing. Otherwise, a registration hold may be placed on the student’s account.

A student whose cumulative GPA remains below 3.000 after attempting 18 or more credits will be academically dismissed. A student who has been academically dismissed from the college is automatically dismissed from the college if he or she can provide documented evidence supporting an appeal. The application must be made in writing by submitting the appropriate form and providing supporting documentation to the Office of Academic Advising (http://www.cps.neu.edu/student-resources/OAA.php).

If reinstatement to the college is approved, a student is expected to meet the most current requirements for program admissions and curriculum.

A student approved for reinstatement but who does not meet the admissions requirements for the intended program of study, or if the intended program of study is no longer available, may apply to another program.

Students reinstated must achieve good academic standing in the first term of reinstatement.

### Completing Degree Requirements

**Graduate and Doctoral Degree Programs**

To earn a graduate or doctoral degree, students must complete all courses as prescribed in the curriculum; the required number of credits as per the curriculum; applicable thesis or dissertation; the residency requirement; and maintain a minimum cumulative grade-point average (GPA) of 3.000 or as outlined by the specific program.

**Graduate Certificate Programs**

To earn a graduate certificate, students must complete all courses as prescribed in the curriculum; the required number of credits as per the curriculum; the residency requirement; and maintain a minimum cumulative GPA of 3.000 or as outlined by the specific program.

**Time Limit on Courses**

Graduate course credits earned in the academic program or accepted by transfer are valid for a maximum of seven years.

**Time Limit on Program Completion**

- Graduate certificate students have up to three full years from the time of the first term of enrollment to complete the program.
- Master’s degree students have up to seven full years from the time of the first term of enrollment to complete the program.
• Doctoral degree students, with the exception of the Transitional Doctor of Physical Therapy, have up to seven full years from the time of the first term of enrollment to complete the program.
• Transitional Doctor of Physical Therapy students who begin their program in the fall 2014 term or thereafter have up to four full years from the time of the first term of enrollment to complete the program.

Note: The College of Professional Studies makes adjustments to its academic program offerings and curricula to stay current and to be able to offer students the most relevant courses and knowledge in the field. Examples of such changes include adding new programs, adding/adjusting course requirements, adding/adjusting courses, and adding/adjusting curriculum requirements.

When there is a change to a curriculum or program requirement, students already matriculated and actively enrolled in the program may continue to follow the program requirements at the time of matriculation or to follow the new curriculum/program requirements, unless it is otherwise specified by the academic program at the time of the announcement of said changes.

Degrees, Majors, and Concentrations

Change of Major/Program of Study
A graduate (nondoctoral) student matriculated in a certificate/degree program who would like to enroll in a different graduate program, after consulting with their academic advisor, must apply to the intended program by submitting the following:

1. New personal statement
2. Updated résumé, if applicable
3. At least one letter of reference (for degree applicants only)

Previously awarded transfer credit awards are subject to change as a result of a program change. Students on financial aid or an international student visa are responsible for understanding the impact that results from a program change.

Doctoral students must consult with their program director or designee.

Declare a Concentration
Graduate and doctoral students matriculated in a degree program that offers concentrations must declare one concentration. This can be done at the time of application to the program as part of the admissions process. Students also may complete the appropriate form in consultation with their student success specialist or academic program designee. Students who wish to pursue a customized specialization must seek prior approval from the academic program director.

Only university-approved concentrations are noted on students’ official academic records. If a student pursues a customized specialization, no concentration will be noted on his or her official academic transcript.

Students must declare a concentration by the beginning of their last term of enrollment for degree completion.

Academic Internship and Cooperative Education
An academic internship or cooperative education placement is an opportunity for students to engage in a short-term workplace experience that is relevant to their academic course of study. The College of Professional Studies’ Department of Cooperative Education (http://www.cps.neu.edu/coop) makes every effort to work with students to identify experiential learning opportunities of three to six months to facilitate career exploration and transition. This program is an optional component of most degree programs. Students must qualify to participate. Review the website (http://www.cps.neu.edu/coop) for guidelines, academic requirements, and opportunities.

Seeking more than One Certificate or Degree
A graduate (nondoctoral) student can be enrolled in only one graduate program at a time.

Graduate (nondoctoral) students seeking more than one certificate or degree after having completed a program should note that graduate credits earned toward:

1. A degree at any institution may not be used to satisfy the requirements of another graduate program.
2. A degree earned at the College of Professional Studies may be used to satisfy the requirements of a graduate certificate with a cap of 50 percent of the required credits of a graduate certificate, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the certificate.
   a. If the same course is required in the degree and certificate programs and the student has exceeded the maximum number of credits that can be applied in the certificate program, he or she may request a course waiver to be permitted to take another course instead of repeating the course. See Course Waiver section.

3. With specified exception, a certificate earned at the College of Professional Studies may be used to satisfy the requirements of a graduate degree, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the degree.
4. A certificate earned at the College of Professional Studies may be used to satisfy the requirements of a second certificate with a cap of one course of no more than 4 credits, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the certificate.
   a. If the same course is required in both certificate programs and the student has exceeded the maximum number of credits that can be applied in the second certificate program, he or she will request a course waiver to be permitted to take another course instead of repeating the course. See Course Waiver section.

5. A certificate earned at another accredited institution may be accepted as transfer credits to satisfy the requirements of a graduate degree with a cap of two courses (no more than 8 credits), if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the degree.

A graduate (nondoctoral) degree student who wishes to pursue a graduate certificate concurrently may seek admission in the certificate program by the end of his or her first term of matriculation in the degree program. Courses that satisfy requirements for both the degree and certificate will count for each.

• When the certificate is identical to a concentration in a degree program, only the certificate credential will be earned. The student’s transcript will not indicate completion of a concentration.

A doctoral student can be enrolled in only one program at a time and may not seek an additional certificate or degree.
Graduation Requirements

Graduation Procedures

The following information is for degree-seeking students only. Certificate students should refer to the “Certificate” section, below.

Only students who complete the graduation application process by specified deadlines will be considered for graduation and included in the graduation ceremony program. All qualified students must submit a graduation application in order to receive their diploma, regardless of whether they plan to attend the graduation ceremony.

Note important definitions: “Degree conferral date” and “graduation ceremony date” do not mean the same thing. Degree conferral date refers to the date of the university’s official recognition of degree completion. For the purposes of the graduation application, that is accessed via a student’s myNEU account. The “expected graduation date” (EGD) is the same as the degree conferral date. Northeastern University confers degrees three times each academic year: winter, spring, and fall. The graduation ceremony date is the date that the college hosts the annual graduation ceremony.

To qualify for winter degree conferral, a student must satisfy all degree requirements by the end of the previous fall quarter. To qualify for spring degree conferral, a student must satisfy all degree requirements by the end of the previous winter quarter. To qualify for fall degree conferral, a student must satisfy all degree requirements by the end of the previous summer quarter.

Doctoral candidates must be mindful of additional deadlines to complete their dissertation/thesis in time to be eligible for degree conferral and participation in a doctoral hooding and a graduation ceremony.

Each fall, the Office of the Registrar sends an email notification to students who may be eligible to graduate that academic year about applying to graduate. Eligibility is based on the number of earned credits at the beginning of the fall term. This email notification informs and instructs students to complete the “Apply to Graduate” process, accessed via their myNEU account. Students are prompted to verify and provide critical information, e.g., spelling of the student’s name on the diploma, intent to participate in the graduation ceremony, and mailing address.

An accurate EGD is required to gain access to the graduation application. The EGD is also used by clearinghouses to determine loan deferment schedules. If your EGD is not correct, contact your designated student success specialist.

For more information, visit the College of Professional Studies Graduation web page (http://www.cps.neu.edu/student-resources/graduation).

Diploma

The following rules apply to the diploma.

- Information that will be printed on diplomas:
  - Major for only nonspecified degrees (Master of Arts, Master of Science).
  - Changes made to a student’s name after the diploma has been printed may be subject to a $50 fee and take more than one month to reprint.
  - Changes made to a student’s degree information and name submitted after the program deadline will not be noted in the graduation ceremony program. If a diploma was previously printed, it will need to be reprinted and can take more than one month.

Certificate

The College of Professional Studies confers graduate certificates the same time degrees are conferred each year: winter, spring, and fall. Students must submit the appropriate form to their student success specialist in order to have their academic record audited to receive their certificate. Deadlines apply. All certificates will be mailed to the address provided on the form.

Global Partnership Programs

Students enrolled in a College of Professional Studies’ global partnership or a dual-degree program are required to abide by the policies and procedures of both institutions or as specified in their program.

Accommodations for Students with Disabilities

Northeastern University and the Disability Resource Center (DRC) are committed to providing disability services that enable students who qualify under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act Amendments Act (ADAAA) to participate fully in the activities of the university. To receive accommodations through the DRC, students must provide appropriate documentation that demonstrates a current substantially limiting disability. Accommodations are provided based on an evaluation of the information provided by students and their clinicians, on a case-by-case basis. Students should provide documentation to the DRC at their earliest convenience to allow for sufficient time for review. After the documentation has been reviewed, a disability specialist will contact the student regarding appropriate next steps. Visit the DRC website (http://www.northeastern.edu/drc) for additional information or contact staff at 617.373.2675.

Personal Information

Change of Name

Report all name changes to the Office of the Registrar immediately. This is especially important when students marry and wish to use a new name on university records. Official documentation of the name change is required.

Change of Address

Report all address changes via the myNEU web portal (http://myneu.neu.edu) or in person at the Office of the Registrar or Office of Student Accounts. Both the permanent home address and the local address are required. International students must also report any changes of address to the International Student and Scholar Institute within ten days in order to ensure compliance with SEVIS requirements.

Graduate Campus

Students enrolled in a Northeastern University graduate (regional) campus are also required to abide by the policies and procedures specific to that campus.
Doctoral Degree Programs

Guided by industry leading faculty, our innovative doctoral programs combine cutting-edge course work with professionally relevant research projects. These programs will provide you with the opportunity to earn the policy, research, and administrative foundation necessary to advance to the top of your career.

Programs

Doctor of Education (EDD)
- Education (p. 265)

Doctor of Law and Policy (DLP)
- Law and Policy (p. 267)

Transitional Doctor of Physical Therapy (DPT)
- Physical Therapy (p. 267)
- Physical Therapy—Direct Entry (p. 268)

Education, EDD

The Doctor of Education (EdD) program offers a rich, dynamic learning experience—one that blends critical engagement with theory, practice, and research.

Offering innovative and engaging opportunities, our EdD seeks to further cultivate the skills and knowledge necessary to effect meaningful change in your organization. As a doctor of education student, you have an opportunity to collaborate with an accomplished group of fellow practitioners, exposing you to global perspectives and strengthening your ability to think critically about today's educational challenges.

Built on Northeastern University's scholar-practitioner model, the EdD program integrates your professional experience with doctoral-level research, which should enable you to identify and address your practice-based issues while investigating matters of social justice. Through rigorous course work and collaborative opportunities, you have an opportunity to conduct empirical research culminating in a doctoral thesis that examines a compelling educational challenge.

Admission Requirements

Note that all doctor of education degrees offered through the College of Professional Studies have the following admission requirements:

- Online application
- Academic transcripts (undergraduate and graduate)
- Admissions statement (1,000–1,200 words)
- Minimum of three years of professional work experience in a related field
- Professional resumé
- Faculty recommendation
- Two professional recommendations
- English-language proficiency proof (for non-native English-language speakers)

Curriculum, Teaching, Learning, and Leadership Concentration

The Doctor of Education (EdD) curriculum, teaching, learning, and leadership concentration seeks to help educational leaders develop the competencies, dispositions, and values required to pursue educational reform, based on a commitment to social justice. Students have an opportunity to explore the relationship between effective educational leadership and the ways that curriculum and teaching can enhance learning opportunities for students across their life span.

This EdD concentration focuses on preparing transformational leaders who recognize the importance of providing quality educational experiences for all learners.

Higher Education Administration Concentration

The Doctor of Education (EdD) higher education administration concentration includes the study of practice and scholarship across a variety of postsecondary education settings, including community and four-year colleges, for-profit organizations, and research institutions. Addressing globalization trends in higher education, this concentration combines theoretical with practice-based concepts.

This concentration offers students an opportunity to conduct and apply research that advances administrative practice or theory in higher education administration. Students have an opportunity to further their understanding and utilization of research design as they interpret research literature and conduct research studies.

This program seeks to produce graduates well-grounded in the educational roles and critical issues in colleges and universities, including:

- Cultural, ethical, and societal issues in higher education
- Historical considerations in higher education around the world
- Organization, governance, leadership, and administrative theories
- Higher education finance, law, and planning
- Establishing and sustaining initiatives in higher education

Organizational Leadership Studies Concentration

The Doctor of Education (EdD) organizational leadership studies concentration positions experienced leaders to assume greater responsibilities within their organizations. Designed for leaders working in educational, government, healthcare, military, not-for-profit, for-profit, and management consulting organizations, this concentration combines theory, research, and practice to develop individuals who can effectively manage and lead change in today's fast-paced, global environment.

The interdisciplinary curriculum offers a strong foundation in leadership, culture, learning, change, communications, systems, and strategy. Students have an opportunity to conduct and apply doctoral research to develop real-world answers to the leadership challenges facing twenty-first-century organizations.

Throughout the course of the program, students have an opportunity to:

- Review contemporary leadership theory and models emphasizing recent conceptualizations such as adaptive, relational, distributed, complexity, and global leadership to refine their personal leadership knowledge, skills, and abilities.
- Examine key models of organizational culture to build their own capability to understand and interact with different societal and organizational cultures across the world.
- Enhance their ability to think systemically by developing the required competencies to create cultures and structuring processes for learning in their organizations.
- Explore classical and modern theories of organization and design a forward-thinking organization creating all components, including vision, mission, strategy, structure, and processes.
Use both seminal and current theoretical approaches of organizational communication to investigate the dynamic interplay between communication processes and human organizing.

Examine seminal and modern group dynamics research to assess group processes and to stimulate group development inside their organizations.

Investigate topical consulting strategies and organizational assessment tools and conduct an organizational diagnosis to gain a comprehensive understanding of the models, variables, and perspectives used to understand complex organizational processes.

Integrate organizational power theory, research, and practical diagnostic tools to systematically identify and evaluate the political processes and behaviors at play inside their organizations.

This program seeks to produce graduates who have the capacity to contribute new knowledge to leadership scholarship and become positive forces of change.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Note:** A minimum of 51 quarter hours must be taken at the College of Professional Studies.

### Program Credit/GPA Requirements

60 total quarter hours required

Minimum 3.000 GPA required
Public servants, executives, and managers operate in an increasingly complex global environment. A doctoral education seeks to provide the policy, analytic, and research skills necessary to advance one’s career.

Developed jointly by the College of Professional Studies and Northeastern’s Law and Public Policy program, the Doctor of Law and Policy program (DLP) is designed for experienced professionals who are interested in the origins, development, implementation, and analysis of legal and public policy decisions in government and related institutions. The program prepares students to advance their careers within a variety of fields while focusing their thesis research on a precise law and policy topic.

Students undertake the DLP in order to understand the ways in which public and related institutions formulate and execute policy. Students have the opportunity to develop the ability to interpret and assess the research of others, to acquire skills as researchers, and to communicate their knowledge to a wide range of audiences. Those who successfully complete the degree are equipped to bring their skills and knowledge to senior policy and management positions in government, nonprofit agencies, research organizations, consulting firms, and corporations.

The DLP program is structured so course work and the doctoral thesis can be completed in two years. Classes meet one weekend per month in Boston, and the learning continues online throughout the rest of the month.

Northeastern University also offers a traditional PhD in Law, Policy, and Society. To learn more, visit the law and public policy program website (http://www.northeastern.edu/cssh/policyschool/law-public-policy-phd).

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Required Courses**
- LWP 6120 Law and Legal Reasoning 1 2
- LWP 6424 Research Methods 2
- LWP 6121 Law and Legal Reasoning 2 2
- LWP 6402 Law and Policy Concepts 2: Strategizing for Public Policy 2
- LWP 6423 Qualitative Methods 2
- LWP 6122 Law and Legal Reasoning 3 2
- LWP 6403 Law and Policy Concepts 3: Policy Case Studies 2
- LWP 6420 Quantitative Methods 2
- LWP 6123 Law and Legal Reasoning 4 2
- LWP 6410 Economics for Policy Analysis 2
- LWP 6404 Evaluation Research 2
- LWP 6431 Political and Moral Ethics and Dilemmas 2
- LWP 6425 Methods and Theory as Applied to Doctoral Research 2
- LWP 6500 Doctoral Research Design 1 2
- LWP 6450 Public Policy Theory and Practice 1 4
- LWP 6501 Doctoral Research Design 2 2

**Transitional Doctor of Physical Therapy, DPT**

Designed for practicing physical therapists, the transitional Doctor of Physical Therapy (DPT) is an innovative, 100 percent online program. Integrating art and science, as well as professional and experiential learning, this curriculum seeks to provide you with the necessary knowledge base for today’s practitioners with an earned doctoral degree.

Core courses within this physical therapy doctoral program include differential diagnosis and medical screening, diagnostic imaging, pharmacology, nutrition, and motor control. The capstone course, Comprehensive Case Analysis (http://www.cps.neu.edu/courses/detail/PTH6900), is a culmination of all work within the transitional DPT curriculum. Students have an opportunity to prepare a comprehensive and publishable case report or other scholarly work in partial fulfillment of the requirement for a transitional DPT degree.

The transitional DPT also includes specializations in a variety of areas such as orthopaedics, pediatrics, geriatrics, advanced nutrition, women’s health, education, and business management. If you have a unique specialization interest, you may also complete a directed study on a preapproved topic of your choosing.

**Credit Requirement**
The transitional DPT degree is built upon a core of six courses. Beyond the common core, requirements may vary depending on whether the physical therapist is MSPT or BSPT prepared in addition to the student’s past experiences.

For students entering with a Master of Science in Physical Therapy, 26 quarter hours are required.

Residents of the state of North Carolina must have an earned master's degree to be eligible for admission to the transitional Doctor of Physical Therapy program.

For students entering with a Bachelor of Science in Physical Therapy, 35 quarter hours are required.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Required Courses for All Students**
- PTH 6100 Differential Diagnosis and Medical Screening 4
- PTH 6110 Diagnostic Imaging 4
- PTH 6130 Pharmacology 3
- PTH 6900 Comprehensive Case Analysis 4
- PTH 6140 Motor Control 4
The transitional Doctor of Physical Therapy also includes concentrations in a variety of areas such as orthopaedics, pediatrics, geriatrics, advanced nutrition, women's health, education, and business management. If you have a unique concentration interest, you may also complete a directed study on a preapproved topic of your choosing.

Note: Degree requirements differ for North Carolina students. For more information, visit the Northeastern University—Charlotte website (http://www.northeastern.edu/charlotte/find-a-degree-program/healthcare/transitional-doctor-of-physical).

- Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in International Regulatory Affairs (p. 293)
- Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Operational Regulatory Affairs (p. 294)
- Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Regulatory Compliance (p. 295)
- Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Strategic Regulatory Affairs (p. 296)
- Regulatory Affairs of Food and Food Industries (p. 297)
- Respiratory Care Leadership (p. 298)
- Technical Communication (p. 298)

Master of Sports Leadership (MSLD)
- Sports Leadership (p. 299)

Homeland Security, MA

The Master of Arts in Homeland Security is intended to prepare the next generation of emergency managers and homeland security professionals for leadership roles in the public and private sectors. The degree offers a comprehensive program of studies covering core elements of homeland security and emergency management at the graduate level, including management skills, intelligence gathering and analysis, risk management, emergency planning and management, legal issues, technological issues, and social psychology. The master’s in homeland security program is designed to develop high-level operational expertise through the application of the above content to the implementation of emergency response protocols as executed in the United States.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
- HLS 6000 Introduction to Homeland Security 3
- HLS 6010 The Unconventional Threat to Homeland Security 3
- HLS 6020 Technology for Homeland Security 3
- HLS 6030 Intelligence for Homeland Security 3
- HLS 6040 Critical Infrastructure: Vulnerability Analysis and Protection 3
- HLS 6050 Multidisciplinary Approaches to Homeland Security 3
- CMN 6050 Crisis Communication 3

Elective Courses
Complete two of the following (6-8 quarter hours):
- HLS 6035 Advanced Intelligence Applications for Homeland Security 4
- HLS 6983 Topics in Homeland Security 1-4
- CJS 6015 Crisis Management 3
- CJS 6125 Issues in National Security 3
- CJS 6000 Management for Security Professionals 3
- CJS 6010 Advanced Principles of Security Management and Threat Assessment 3
Teaching, Elementary Licensure, MAT

Designed for aspiring teachers and career changers, the Master of Arts in Teaching in Elementary Education (MAT)\(^1\) offers an appreciation for and an understanding of the diverse educational needs, social concerns, and cultural values of today's elementary and secondary schools. This graduate degree in teaching seeks to enhance your foundational skills, broaden your perspectives, and strengthen your ability to inspire and educate. The master's degree, which includes a full term of student teaching, seeks to produce graduates well positioned to make a meaningful impact in their school, in their community, and in the lives of their students.

\(^{1}\) The MAT (grades 1–6) has been approved at the initial licensure level by the Massachusetts Department of Elementary and Secondary Education.

LOOKING TO DEEPEN YOUR KNOWLEDGE AND EXPERTISE?
The MAT+ offers qualifying students the opportunity to complete a MAT with further study in a selected area of expertise. Currently, students can take additional course work to earn either an additional license in special education (teacher of students of moderate disabilities, PreK–8 or 5–12).

MAT+ IN SPECIAL EDUCATION
The MAT+ provides qualifying students with the opportunity to complete a Master of Arts in Teaching (MAT) with further study in a selected area of expertise. Currently, students can take additional course work to earn either an additional license in special education (teacher of students of moderate disabilities, PreK-8 or 5-12), or an additional license in ESL (teacher of English as a Second Language, PreK-8 or 5-12). Teacher candidates may also plan a program of study that allows for triple licensure in consultation with the program director.

The special education course requirements are:

- Advanced special education course 4
- Advanced literacy course 4
- Advanced behavior management course 4
- Assessment course 4
- EDU 6874 Practicum, Portfolio, and Panel Review 4

MAT+ IN ENGLISH AS A SECOND LANGUAGE (ESL)
This Commonwealth of Massachusetts-approved MAT+ program consists of five courses, some of which may be taken as electives in the MAT program.

The English as a Second Language course requirements are:

- EDU 6300 Introduction to Language and Linguistics 4
- EDU 6516 Sheltered English Instruction and Assessment 4
- EDU 6517 Foundations of Teaching English as a Second Language: Research and Practice 4
- EDU 6310 Literacy Development and the Academic Domains 4
- EDU 6874 Practicum, Portfolio, and Panel Review 4

Teaching, Secondary Licensure, MAT

Designed for aspiring teachers and career changers, the Master of Arts in Secondary Education (MAT) offers an appreciation for and an understanding of the diverse educational needs, social concerns, and cultural values of today’s secondary schools.

This MAT in secondary education seeks to enhance your foundational skills, broaden your perspectives, and strengthen your ability to inspire and educate. This master’s degree, which includes a full term of student teaching, seeks to produce graduates well positioned to make a meaningful impact in their school, in their community, and in the lives of their students.

The elearning and instructional design concentration explores the leading edge of next-generation learning design, with the goal of preparing its graduates to thrive in a world of expanded opportunities and delivery modes for learning. The concentration’s innovative approach blends academic and experiential workplace-based learning. During the course of study, students develop an online portfolio of work to demonstrate their capacity to think strategically, put creative ideas into action, and design environments that improve student learning to meet academic, personal, institutional, and organizational goals.

Higher Education Administration Concentration
Due to advances in elearning and increasing student enrollments, the need for capable and effective school administrators has never been greater. In addition to providing solid guidance and direction, they must work to meet the needs of faculty, students, and parents alike. In response, the College of Professional Studies (CPS) offers a Master of Education with a Concentration in Higher Education Administration.

This innovative master’s degree program explores complex industry issues such as student demographics, financial concerns, legal and policy requirements, technology, and competitive forces.

Learning and Instruction Concentration
As the field of education evolves, today’s educators are constantly challenged to be aware of and incorporate best-in-class practices, new technologies, and the latest research and trends within their classrooms. In response, the CPS offers the Master of Education with a Concentration in Learning and Instruction.

Designed for a broad range of educators, this program provides an in-depth look at the critical issues that are transforming the face of education: technology and distance learning, globalization, creative and critical thinking, assessments, and learning outcomes.

Reflecting the new direction of education, this master’s degree program also allows you to choose your area of focus by selecting from degree specializations in math, science, English-language learning, literacy, leadership, and technology.

Whether you are a classroom teacher or an administrator or work in youth development, community education, early childhood, or in a before/aftercare program, you have an opportunity to gain new perspectives and acquire fresh strategies for meeting the needs of today’s students. This program seeks to produce graduates empowered to implement new ideas and innovative strategies that are designed to improve educational effectiveness.

Special Education Concentration
Demand for graduate-level-prepared special education practitioners is on the rise, driven by heightened degree requirements and a shortage of licensed, qualified teachers. In response, the CPS is pleased to offer the Master of Education with a Concentration in Special Education.

Designed for educators who are licensed at the initial or professional level in another discipline, this innovative master’s degree program seeks to prepare you to meet the special needs of students across a variety of school environments.
This program meets the Massachusetts Department of Elementary and Secondary Education standards and competencies for an additional licensure as a Teacher of Students with Moderate Disabilities, PreK–8 and 5–12.

In this advanced program, you have an opportunity to explore specific topics on modifying curriculum, designing curriculum-based assessments, managing severe behaviors, developing individualized education programs (IEPs), leveraging community resources, and improving literacy. As a result, you have an opportunity to enhance your ability to meet the needs of a diverse student population and to achieve the competencies required for this specialized license.

Minimum 3.000 GPA required

New innovations, breakthrough technologies, and changing consumer habits are redefining the media landscape—fueling demand for media professionals who can apply the latest tools and techniques to create compelling digital content.

In response, the Master of Professional Studies in Digital Media provides state-of-the-art digital media courses in moving image, information design, and narrative structure—elements that are critical to producing and developing content-rich and interactive experiences. Complementing the degree's core curriculum are six distinctive concentrations in 3D animation, game design, interactive design, digital video, digital media management, or social media.

Differentiating this digital media master's degree is its cohort format, a team-based structure that allows you to complete your degree with the same group of students. Designed to strengthen your project management and leadership skills, cohorts enable you to collaborate with your colleagues on complex, multimedia projects, preparing you to excel in an increasingly digital world.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Core Courses

Complete 33 quarter hours:

DGM 6105 Visual Communications Foundation 4
DGM 6108 Programming Foundations for Digital Media 4
DGM 6122 Foundations of Digital Storytelling 4
DGM 6501 Web Creation Bootcamp 2 2
DGM 6511 Web Creation Bootcamp 2 2
DGM 6145 Information Technology and Creative Practice 4
DGM 6140 Sound Design 4
DGM 6890 Thesis Proposal Development 1-2
DGM 7990 Thesis 3-6

Complete one of the following:

DGM 6125 Time-Based Media
DGM 6168 Usability and Human Interaction

Elective

DGM 6322 Advanced Digital Storytelling 4

**Geographic Information Technology, MPS**

Increased interest in geographic information and its applications is fueling demand for surveyors, cartographers, photogrammetrists, and mapping technicians. In response to this increased demand, Northeastern University’s College of Professional Studies has developed the Master of Professional Studies in Geographic Information Technology (GIT).

Designed to advance your technical expertise, this online degree in geographic information technology explores a range of topics that are essential to the geographic information systems (GIS) field—from project management and system implementation to database design and execution. In addition, advanced concepts and techniques in areas such as raster-based GIS, geospatial information, and GIS modeling are also addressed within this online master’s degree. Combining technical knowledge with hands-on GIS training, this results-oriented program seeks to enhance your skills and broaden your knowledge base—equipping you to competently apply GIS in your chosen field.

RMS 6110 Digital Image Processing 3

Complete five of the following: 15

- RMS 6210 Technology, Operations, and Requirements for Drones, Helicopters, and Airplanes
- RMS 6220 Geographic Information Systems for Remote Sensing
- RMS 6230 Remote Sensing and Global Change
- RMS 6240 Introduction to Radar and LIDAR Remote Sensing
- RMS 6250 Remote Sensing of Vegetation
- RMS 6260 Remote Sensing for Archaeology
- RMS 6270 Remote Sensing for Disaster Management
- RMS 6280 Automated Feature Extraction for the Geospatial Professional
- RMS 6290 Spectroscopic Image Analysis
- RMS 6292 Photogrammetry and GPS
- GIS 6394 Crisis Mapping for Humanitarian Action

**Open Electives**

Complete 6 quarter hours from the following: 6

- GIS 6340 GIS Customization
- GIS 6350 GIS Management and Implementation
- GIS 6360 Spatial Databases
- GIS 6370 Internet-Based GIS
- GIS 6385 GIS/Cartography
- GIS 6390 Business Applications of Geographic Information Systems
- GIS 6391 Healthcare Applications of Geographic Information Systems
- GIS 6394 Crisis Mapping for Humanitarian Action
- GIS 6395 Geospatial Analysis of Crime
- GIS 6396 GIS for Defense, Homeland Security, and Emergency Response
- RMS 6110 Digital Image Processing
- RMS 6220 Geographic Information Systems for Remote Sensing
- RMS 6230 Remote Sensing and Global Change
- RMS 6240 Introduction to Radar and LIDAR Remote Sensing
- RMS 6250 Remote Sensing of Vegetation
- RMS 6260 Remote Sensing for Archaeology
- RMS 6260 Remote Sensing for Archaeology
Informatics, MPS

A relatively new and rapidly evolving area, informatics is increasingly used to solve today’s problems. Whether it’s used to create information and communication technologies, design decision support systems, develop 3D visualizations, or devise mobile applications, informatics can be applied across a wide range of industries to address a variety of privacy, security, healthcare, environmental, educational, and social challenges. In response, Northeastern University offers the Master of Professional Studies in Informatics. Designed to improve your computing skills and enhance your knowledge of computing applications, this master’s degree seeks to prepare you to excel in the fast-growing and dynamic field of informatics.

Programs Requirement

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

ITC 6000 Database Management Systems 3
ITC 6010 Information Technology Strategy and Governance 3
ITC 6020 Information Systems Design and Development 3
ITC 6035 Information Technology Project Management 3
ITC 6040 Informatics Capstone 3
ITC 6045 Information Technology Policy, Ethics, and Social Responsibility 3
ITC 6300 Foundations of Information Security 3
ITC 6345 Systems and Network Administration 3

Elective Courses

Complete 3–4 quarter hours from the following: 3–4
DGM 6500 Working with Digital Images
DGM 6501 Web Creation Boot Camp
DGM 6511 Web Creation Bootcamp 2
DGM 6145 Information Technology and Creative Practice
ITC 6015 Enterprise Information Architecture
ITC 6030 Computer Systems and Networks
ITC 6335 Data Warehousing and Data Mining
ITC 6340 Mobile and Wireless Networks and Applications
ITC 6355 Web Application Design and Development
ITC 7120 Healthcare Information Systems
GIS 5101 Introduction to Geographic Information Systems
GIS 5102 Fundamentals of GIS Analysis
GIS 6360 Spatial Databases
GIS 6370 Internet-Based GIS
PJM 6000 Project Management Practices
TCC 6110 Information Architecture
TCC 6120 Usability and User Experience

Concentration

Complete the following four concentrations:

Concentration in Information Security Management

ITC 6305 IT Infrastructure (Systems, Networks, Telecom) 3
ITC 6310 Information Security Governance 3
ITC 6315 Information Security Risk Management 3
ITC 6320 Information Security Technology 3

Complete two of the following: 6–8
ITC 6325 CISA Preparation
ITC 6330 CISSP Preparation
MIS 6082 Network Protection
MIS 6080 Network Security Concepts

Concentration in Geographic Information Systems

GIS 5101 Introduction to Geographic Information Systems 3
GIS 5102 Fundamentals of GIS Analysis 3
RMS 5105 Fundamentals of Remote Sensing 3
GIS 5201 Advanced Spatial Analysis 3

Complete two of the following: 6
GIS 6340 GIS Customization
GIS 6350 GIS Management and Implementation
GIS 6360 Spatial Databases
GIS 6370 Internet-Based GIS
GIS 6385 GIS/Cartography
GIS 6390 Business Applications of Geographic Information Systems
GIS 6391 Healthcare Applications of Geographic Information Systems

Concentration in Leading and Managing Technical Projects

PJM 6000 Project Management Practices 3
PJM 6205 Leading and Managing Technical Projects 3
PJM 6210 Communication Skills for Project Managers 3
PJM 6215 Leading Remote Project Teams 3
PJM 6220 Planning and Scheduling Technical Projects 3
ITC 6305 IT Infrastructure (Systems, Networks, Telecom) 3

Concentration in Program and Portfolio Management
Program Credit/GPA Requirements
45 total quarter hours required
Minimum 3.000 GPA required

Applied Nutrition, MS

Increased attention on disease prevention through better dietary habits has heightened the demand for skilled nutrition professionals.

To meet the demands and need in the industry, this Master of Science in Applied Nutrition degree is designed to build upon your clinical knowledge and to allow you to concentrate in one of four specialty areas. This advanced program is open to individuals who hold undergraduate degrees in health science, dietetics, or a related area.

Led by real-world practitioners, including dietitians, an exercise scientist, and a clinical psychologist, this innovative nutrition degree seeks to provide you with a solid grounding in nutrition, metabolism, disease prevention, health promotion, and clinical behavior. Complementing the core nutrition courses is the college’s renowned nutrition practicum that allows you to work directly with registered dietitians, fitness specialists, as well as other health professionals.

Further differentiating this master’s degree in nutrition is the option to choose from four degree concentrations: business and entrepreneurship in nutrition; nutrition education; nutrition and fitness; and obesity and nutritional health. This degree program seeks to give you the knowledge and skills you need to succeed in the field of nutrition.

Commerce and Economic Development, MS

Globalization has created a borderless economy with a host of new opportunities and challenges for those engaged in commerce and economic development. While global markets offer exciting growth prospects, navigating the world stage requires in-depth knowledge of the financial, regulatory, and economic environments and institutions that affect the global economy and international trade. To meet the need for both insight and skills development, Northeastern University’s College of Professional Studies—in collaboration with Northeastern University’s...
College of Social Sciences and Humanities—offers the online Master of Science in Commerce and Economic Development.

This graduate-level program integrates economics, leadership, institutional organization, technology, and public policy into a unique and focused educational experience designed to help guide and advance a rewarding career in the private or public sectors.

### Corporate and Organizational Communication, MS

Across all industries and professions, strong written and oral communication skills are essential to success. Whether you are seeking to advance in a communications-related field or get ahead in your current organization, this program seeks to provide the practical knowledge and valuable perspectives you need to communicate across a variety of contexts and situations.

From negotiation and writing to crisis management and public speaking, the Master of Science in Corporate and Organizational Communication degree program examines topics that are critical to effective organizational communication. Incorporating best practices, case studies, and classroom learning, courses within this innovative master’s degree in communication address complex communication challenges, seeking to provide you with a distinct advantage in today’s competitive marketplace.

### Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

#### Required Courses

**Note:** Introduction to Organizational Communication (CMN 6000) is required for students who do not have any professional experience in communication. Students with professional communication experience should begin the program with Strategic Communication Management (CMN 6010):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 6000</td>
<td>Introduction to Organizational Communication</td>
<td>3</td>
</tr>
<tr>
<td>INT 6000</td>
<td>Communication and Writing Lab</td>
<td>4</td>
</tr>
<tr>
<td>CMN 6010</td>
<td>Strategic Communication Management</td>
<td>3</td>
</tr>
<tr>
<td>CMN 6020</td>
<td>Ethical Issues in Organizational Communication</td>
<td>3</td>
</tr>
<tr>
<td>CMN 6080</td>
<td>Intercultural Communication</td>
<td>3</td>
</tr>
<tr>
<td>CMN 6050</td>
<td>Crisis Communication</td>
<td>3</td>
</tr>
<tr>
<td>CMN 6090</td>
<td>Organizational Culture, Climate, and Communication</td>
<td>3</td>
</tr>
<tr>
<td>CMN 6100</td>
<td>Communication Networks and Managing Information</td>
<td>3</td>
</tr>
<tr>
<td>CMN 6910</td>
<td>Organizational Communication Assessment</td>
<td>3</td>
</tr>
</tbody>
</table>

**Elective Courses**

**Note:** Students who take Introduction to Organizational Communication (CMN 6000) are only required to take two courses in this section.

Complete three of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 6015</td>
<td>Introduction to the Digital Era: The Power of Social Media</td>
<td>3</td>

### Concentration in Leadership

#### Required Courses
- LDR 6100 Developing Your Leadership Capability 3-6
- LDR 6110 Leading Teams 3-6
- LDR 6120 Organizational Leadership 3-6
- LDR 6140 Strategic Leadership 3-6

#### Leadership Electives
Complete one of the following:
- LDR 6135 Ethical Leadership 3
- LDR 6125 Managing Organizational Culture 3

### Concentration in Project Management

#### Required Courses
- Note: Students with project management experience are not required to take PJM 5900:
- PJM 6000 Project Management Practices 3
- PJM 5900 Foundations of Project Management 4
- PJM 6025 Project Scheduling and Cost Planning 3
- PJM 6015 Project Risk Management 3

#### Project Management Electives
Complete two of the following: 6-7
- PJM 5900 Foundations of Project Management
- PJM 6125 Project Evaluation and Assessment
- PJM 6135 Project Quality Management
- PJM 6140 Managing Troubled Projects
- PJM 6705 Portfolio Management in the Enterprise Environment

### Concentration in Social Media and Online Communication

Complete five of the following: 15-18
- CMN 6015 Introduction to the Digital Era: The Power of Social Media
- CMN 6025 Digital Era Skills: Platforms, Tools, and Techniques
- CMN 6035 Legal, Policy, and Ethical Issues in the Digital Era
- CMN 6045 Leveraging Digital Technologies: Strategy, Assessment, and Governance
- CMN 6065 Implementation and Management of Social Media Channels and Online Communities
- DGM 6285 Interactive Marketing Fundamentals
- DGM 6290 Social Media and Brand Strategy Implementation

### Concentration in Community and Family Justice

- COMMUNITY AND FAMILY JUSTICE COURSES
- CJS 6300 Communities and Crime 3

### Concentration in Usability/User Experience

- Content Strategy
- Web Accessibility for Technical Communicators
- Usable Design for Mobile Digital Media
- Prototyping
- Collecting User Data

### Program Credit/GPA Requirements

- 45 total quarter hours required
- Minimum 3.000 GPA required

### Criminal Justice, MS

Criminal justice and security agencies are under increased scrutiny—challenged to provide efficient and effective services; be transparent in their interactions with the public; and respond to changing local, national, and world conditions. To be successful, justice system leaders need to think strategically, communicate locally, and act ethically while developing comprehensive (and often multijurisdictional) solutions to crime and terrorism problems.

In response, Northeastern University's College of Professional Studies—in collaboration with the School of Criminology and Criminal Justice—offers the Master of Science in Criminal Justice. This innovative online master's degree provides a path to excellence for leaders in law enforcement, courts, private security, and corrections organizations. Academically distinctive, graduate courses in this program emphasize leadership, communication, and ethics—themes that are designed to enhance your leadership capacity and improve your career prospects.

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

#### Foundation Courses
- CJS 6020 Contemporary Issues in Criminal Justice Policy 3
- CJS 6400 Administration of Justice 3
- CJS 6405 Criminological Theory for Criminal Justice Leaders 3
- CJS 6415 Legal Decision Making and Leadership 3
- CJS 6470 Criminal Justice Capstone (Recommended as the last course) 3

#### Operations Courses
- CJS 6425 Research Methods 3
- CJS 6435 Program Evaluations 3
- CJS 6440 GIS, Evidence-Based Learning, and Policy 3
- CMN 6050 Crisis Communication 3

#### Concentration

Complete one of the following six concentrations:

### Concentration in Community and Family Justice

- COMMUNITY AND FAMILY JUSTICE COURSES
- CJS 6300 Communities and Crime 3

Globalization has created a world of new opportunities for those savvy enough to recognize them and acquire the new skill sets needed for success in international government, consulting, business and industry, nonprofit, and educational sectors.

This program is designed to prepare students for internationally focused positions that range from traditional practitioners of diplomacy, to development workers, to executives employed in the dynamic world of international consultancy, trade, and industry. With courses enriched by classmates from every continent, students are active learners in a collaborative, cross-cultural setting from their very first course.

The core curriculum ensures all students have a solid grounding in foundational courses such as international politics, economics, security, and diplomacy. Students then select from a broad-based menu of concentrations, allowing them to develop specialties. The program culminates in a capstone experience in which students elect to write a thesis, engage in a case study, or undertake short-term travel to conduct intensive field research.
### Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

#### Required Courses
<table>

Professionals with graduate degrees in human services are needed to address a wide range of societal issues—whether by providing direct services, supervising personnel, or administering programs and policies. Often responsible for working with vulnerable populations, human services professionals must be adept at conducting assessments, developing service plans and policies, leading interdisciplinary teams, and managing care for at-risk clients.
To address this important need, the College of Professional Studies offers the online Master of Science in Human Services. In addition to a solid core curriculum, the program offers several electives, as well as concentrations in leadership, organizational communication, and global studies—enabling you to focus your graduate studies in the area that best matches your interests and career objectives. Reflecting Northeastern's philosophy of practice-oriented education, this human services master’s degree includes work-based applications and a capstone service-learning project, offering you an opportunity to deepen your knowledge within your chosen specialty. This human services graduate degree program seeks to produce graduates with the knowledge and skills they need to pursue a leadership role in the fulfilling field of human services.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
- HSV 6100 Theory and Practice of Human Services 3
- HSV 6110 Human Services Management and Development 3
- HSV 6120 Social Inequality, Social Change, and Community Building 3
- HSV 6630 Research and Evaluation in Human Services 3
- HSV 6640 Policy Issues in Human Services 3
- HSV 6160 Introduction to Employee Assistance Programs 3
- The following course should be taken last:
  - HSV 6980 Capstone 1-4

Elective Courses
Complete three of the following:
- NPM 6120 Financial Management for Nonprofit Organizations 3
- NPM 6130 Fund-Raising and Development for Nonprofit Organizations 3
- NPM 6140 Grant and Report Writing 3
- NPM 6150 Human Resources Management in Nonprofit Organizations 3
- CMN 6015 Introduction to the Digital Era: The Power of Social Media 3
- CMN 6080 Intercultural Communication 3
- INT 6943 Integrative Experiential Learning 3

Concentrations
Complete one of the following three concentrations:

Concentration in Global Studies
GLOBAL STUDIES COURSES
- GST 6100 Globalization and Global Politics and Economics 4
- GST 6101 Global Literacy, Culture, and Community 4
- GST 6320 Peace and Conflict 4

Concentration in Organizational Communication
CMN 6000 and INT 6000 Introduction to Organizational Communication and Writing Lab 3-4
- CMN 6020 Ethical Issues in Organizational Communication 3
- CMN 6050 Crisis Communication 3
- CMN 6090 Organizational Culture, Climate, and Communication 3
- CMN 6110 Group Dynamics and Interpersonal Conflict: Meeting Management 3

Program Credit/GPA Requirements
45 total quarter hours required
Minimum 3.000 GPA required

Leadership, MS

As today’s workforce continues to diversify, leadership tasks and responsibilities have become more complex. The Master of Science in Leadership seeks to prepare you to meet these evolving challenges by helping you cultivate a personal leadership philosophy. Leveraging students’ interdisciplinary backgrounds, this master’s degree in leadership combines real-world lessons with an action-learning approach that is designed to build and strengthen your leadership capabilities.

In September of 2009, the Master of Science in Leadership with a Concentration in Project Management received accreditation by the Project Management Institute’s Global Accreditation Center (GAC), the world’s leading association for project management professionals. Accreditation is achieved by meeting the GAC’s rigorous standards, which include an assessment of program objectives and outcomes, a review of on-site and online resources, evaluations of faculty and students, and proof of continuous improvements in the area of project management.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
- LDR 6100 Developing Your Leadership Capability 3-6
- LDR 6110 Leading Teams 3-6
Facing the threat of privatization and for-profit competition, nonprofit organizations are challenged to find leaders who not only possess keen business and managerial skills but can also effect change at a community or social level. Being successful in this dynamic and rewarding field requires strong leadership, managerial and interpersonal
skills, as well as in-depth knowledge of fund-raising, marketing, program development, and governance issues.

Integrating theoretical approaches with practical applications, the Master of Science in Nonprofit Management seeks to prepare you for a leadership position in a not-for-profit university, hospital, charity, foundation, or religious organization. This nonprofit degree program seeks to produce graduates well equipped to embark on a career in nonprofit management—prepared, and inspired, to make a meaningful impact.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

Project Management, MS

Companies succeed or fail based on their ability to bring quality products and services to market in a timely manner. Without skilled project managers in place, companies are challenged to deliver projects on time, on budget, and according to specifications. From inception to completion, project managers are responsible for every step in the process: project definition, cost and risk estimation, schedule planning and monitoring, budget management, negotiation and conflict resolution, project leadership, and project presentation and evaluation.

The Master of Science in Project Management is designed to provide you with the practical skills and theoretical concepts you need to lead complex projects. Featuring real-world case studies, this project management degree presents techniques and tools for managing long- and short-term projects successfully and cost-effectively. Augmenting the core project management courses are concentrations that seek to provide you with content-specific expertise that enables you to deepen your knowledge in your field of interest.

In September of 2009, the Master of Science in Project Management received accreditation by the Project Management Institute’s Global Accreditation Center (GAC), the world’s leading association for project management professionals. Accreditation is achieved by meeting the GAC’s rigorous standards, which include an assessment of program objectives and outcomes, a review of on-site and online resources, evaluations of faculty and students, and proof of continuous improvements in the area of project management.

**Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Clinical Research Regulatory Affairs, MS**

The rapid growth of the biomedical product industries and the ever-evolving regulatory landscape have driven high demand for trained regulatory affairs professionals in both the public and private sectors. In response to this demand, Northeastern University’s College of Professional Studies offers the Master of Science in Regulatory Affairs for Drugs, Biologics, and Medical Devices.

This unique graduate degree is designed to both broaden and deepen the student’s understanding of current regulations and their practical application in the development of biomedical products. Courses within this program provide students with the opportunity to integrate both scientific knowledge and regulatory perspectives, within the larger context of global commercialization. From discovery through the postmarket phase of product development, this master’s degree covers the regulatory and market access requirements to bring a medical product to—and maintain its presence in—the global marketplace.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Required Courses**

<table>

Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Regulatory Compliance, MS

The rapid growth of the biomedical product industries and the ever-evolving regulatory landscape have driven high demand for trained regulatory affairs professionals in both the public and private sectors. In response to this demand, Northeastern University’s College of Professional Studies offers the Master of Science in Regulatory Affairs for Drugs, Biologics, and Medical Devices.

This unique graduate degree is designed to both broaden and deepen the student's understanding of current regulations and their practical application in the development of biomedical products. Courses within this program provide students with the opportunity to integrate both scientific knowledge and regulatory perspectives, within the larger context of global commercialization. From discovery through the postmarket phase of product development, this master’s degree covers the regulatory and market access requirements to bring a medical product to—and maintain its presence in—the global marketplace.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Required Courses**

- RGA 6201 New Drug Development: A Regulatory Overview
- RGA 6202 Medical Device Development: A Regulatory Overview
- RGA 6200 Biologics Development: A Regulatory Overview
- RGA 6203 Food, Drug, and Medical Device Law: Topics and Cases
- RGA 6217 Biomedical Product Development: From Biotech to Boardroom to Market
- RGA 6210 Strategic Planning and Project Management for Regulatory Affairs
- RGA 6245 Regulation of Generic Pharmaceutical and Biosimilar Products
- RGA 6211 Combination Products and Convergence

**Required Electives**

Students must earn a minimum of 20 quarter hours by choosing at least one course from each elective category.

- RGA 6212 Introduction to Safety Sciences
- BTC 6211 Validation and Auditing of Clinical Trial Information
- BTC 6213 Clinical Trial Design Optimization and Problem Solving
- RGA 6205 Emerging Trends and Issues in the Medical Device Industry
- RGA 6245 Regulation of Generic Pharmaceutical and Biosimilar Products
- RGA 6250 Financing and Reimbursement in Biomedical Product Development
- COP 6940 Personal and Career Development (Enrollment in COP 6940 requires participation in the cooperative education program [subject to availability]. Students must complete two of the following four courses prior to enrolling in COP 6940: RGA 6100, RGA 6201, RGA 6202, or BTC 6210.)
- INT 6943 and RGA 6920 Integrative Experiential Learning and Internship Reflection

**REGULATORY AND CLINICAL OPERATIONS**

Complete one of the following:

- RGA 6220 Advanced Writing on International Biomedical Topics
- RGA 6212 Introduction to Safety Sciences
- BTC 6211 Validation and Auditing of Clinical Trial Information
- BTC 6213 Clinical Trial Design Optimization and Problem Solving
- RGA 6210 Strategic Planning and Project Management for Regulatory Affairs

**REGULATORY PERSPECTIVE: PRODUCT DEVELOPMENT, BUSINESS, AND STRATEGY**

Complete one of the following:

- BTC 6260 The Business of Medicine and Biotechnology
- RGA 6216 The Medical, Social, and Financial Dimensions of Orphan Drugs
- RGA 6235 Emerging Product Categories in the Regulation of Drugs and Biologics
- RGA 6112 Biomedical Intellectual Property Management: Patents
- RGA 6205 Emerging Trends and Issues in the Medical Device Industry
- RGA 6245 Regulation of Generic Pharmaceutical and Biosimilar Products
- RGA 6250 Financing and Reimbursement in Biomedical Product Development
- RGA 6210 Strategic Planning and Project Management for Regulatory Affairs
Regulatory Affairs of Food and Food Industries, MS

The Master of Science in Regulatory Affairs of Food and Food Industries is designed to offer a combination of theory and practical training for professionals looking to enter into, or advance in, the field of food regulatory affairs.

Our courses and curriculum are cross disciplinary, covering topics and methods that lie at the intersection of the life sciences, agricultural planning, food science, nutrition, law, economics, international relations, and regulatory policy. The breadth of the curriculum provides students from various educational and employment backgrounds with the opportunity to contribute to an evolving market.

Successful graduates of the program will gain the necessary knowledge and requisite skills to serve as leaders in the domain of food regulatory affairs. They will be equipped to serve instrumental roles in the formation of public policies, the implementation of regulatory guidelines, industry’s compliance with regulations, and the regulatory strategies of companies looking to create a sustainable competitive advantage in the food industry.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Program Credit/GPA Requirements

Minimum 3.000 GPA required
Respiratory Care Leadership, MS

Emerging environmental issues, recent technological advances, and a growing elderly population are escalating the need for skilled respiratory therapists. To be successful, today's respiratory care leaders must be skilled educators, practitioners, and case managers. In response, Northeastern University's College of Professional Studies has developed the Master of Science in Respiratory Care Leadership.

Created for practicing respiratory therapists, this master's degree in respiratory care incorporates an action-learning approach that seeks to build leadership competencies and to advance your clinical knowledge. Core respiratory care courses cover areas such as advanced cardiopulmonary physiology and research design. In addition, you have the opportunity to focus your studies in one of four concentrations: adult and organizational learning, clinical trial design, health management, and respiratory specialty practice.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Respiratory Care Courses
- RPT 7200 Advanced Cardiopulmonary Physiology 3
- RPT 7205 The Evolving Roles of Respiratory Care Professionals 3
- RPT 7210 Research Design 4
- RPT 7215 Applied Research in Respiratory Care 3
- RPT 7300 Development of Clinical Practice Guidelines and Respiratory Care Protocols 4
- RPT 7302 Respiratory Therapist Education 4
- RPT 6970 Seminar 1-4

Required Leadership Courses
Complete two of the following: 6-12
- LDR 6100 Developing Your Leadership Capability
- LDR 6110 Leading Teams
- LDR 6135 Ethical Leadership
- LDR 6140 Strategic Leadership

Concentration
Complete one of the following four concentrations:

Concentration in Adult and Organizational Learning
Complete four of the following: 16
- EDU 6051 Culture, Equity, Power, and Influence
- EDU 6201 The Landscape of Higher Education
- EDU 6202 Faculty, Curriculum, and Academic Community
- EDU 6221 Enrollment, Retention, Graduation, Success
- EDU 6319 How People Learn

Concentration in Clinical Trial Design
Complete four of the following: 16
- BTC 6210 Human Experimentation: Methodological Issues Fundamentals
- BTC 6211 Validation and Auditing of Clinical Trial Information
- BTC 6213 Clinical Trial Design Optimization and Problem Solving
- BTC 6260 The Business of Medicine and Biotechnology
- RGA 6100 Introduction to Drug and Medical Device Regulation
- RGA 6202 Medical Device Development: A Regulatory Overview
- RGA 6205 Emerging Trends and Issues in the Medical Device Industry

Concentration in Health Management
Complete five of the following: 15
- HMG 6110 Organization, Administration, Financing, and History of Healthcare
- HMG 6120 Human Resource Management in Healthcare
- HMG 6130 Healthcare Strategic Management
- HMG 6140 Principles of Population-Based Management
- HMG 6160 Healthcare Information Systems Management
- HMG 6170 Health Law, Politics, and Policy
- NPM 6120 Financial Management for Nonprofit Organizations
- NPM 6125 Promoting Nonprofit Organizations
- NPM 6130 Fund-Raising and Development for Nonprofit Organizations

Concentration in Respiratory Specialty Practice
Complete two of the following: 4-8
- RPT 7400 Pulmonary Diseases and Disorders
- RPT 7401 Cardiopulmonary Assessment and Diagnostics
- RPT 7402 Adult Critical Care
- RPT 7403 Neonatal and Pediatric Care
- RPT 7404 Pulmonary Wellness Education and Coordination
- RPT 7405 Development of Patient Management Plans

Program Credit/GPA Requirements
48–56 total quarter hours required
Minimum 3.000 GPA required

Technical Communication, MS

A proliferation of new technologies and applications has heightened the call for professionals who can communicate complex technical
Northeastern University’s College of Professional Studies offers the Master of Science in Technical Communication. This online master’s degree is designed to improve your technical communication skills and to provide you with a foundation for applying those skills across a variety of contexts. With three concentrations from which to choose—computer industry writing, social media and online communities, or usability/user experience—this graduate degree in technical communication seeks to prepare you for a rewarding career as a technical writer, editor, tool expert, or technical trainer.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
- TCC 6100 Introduction to Technical and Professional Writing 4
- TCC 6102 Editing Technical Content 4
- TCC 6110 Information Architecture 4
- TCC 6120 Usability and User Experience 4
- The following course should be taken last:
  - TCC 6850 Technical Communications Capstone Project 4

Concentration
If students prefer to focus their studies on a particular concentration, they may select 16–18 quarter hours from one of the concentrations below and complement their studies with 8–10 quarter hours of elective courses (listed at the end of the curriculum), to meet the minimum 46–quarter–hour degree requirement.

Students are not required to complete a concentration. Any combination of 26 quarter hours from concentration and elective courses will satisfy degree requirements.

Concentration in Computer Industry Writing
Complete four of the following: 16
- TCC 6430 Writing for the Computer Industry
- TCC 6440 Advanced Writing for the Computer Industry
- TCC 6400 Structured Documentation
- TCC 6450 Managing Technical Publications
- TCC 6410 Online Documentation

Concentration in Social Media and Online Communities
Required Course
- TCC 6710 Content Strategy 4
Complete 12–14 quarter hours from the following: 12-14
- CMN 6035 Legal, Policy, and Ethical Issues in the Digital Era 3
- CMN 6045 Leveraging Digital Technologies: Strategy, Assessment, and Governance 3
- CMN 6065 Implementation and Management of Social Media Channels and Online Communities 3
- DGM 6285 Interactive Marketing Fundamentals 4
- DGM 6290 Social Media and Brand Strategy Implementation 4

Concentration in Usability/User Experience
Choose any combination of the following courses to complete 16 quarter hours:
- TCC 6710 Content Strategy 4
- TCC 6470 Web Accessibility for Technical Communicators 4
- DGM 6268 Usable Design for Mobile Digital Media 4
- TCC 6610 Prototyping 2
- TCC 6620 Collecting User Data 2
- TCC 6420 Information Design for the Web 4

Open Electives
Choose a combination of 8–10 quarter hours of electives from the list below and any concentration courses above:
- TCC 6480 Instructional Design for Technical Communicators 4
- TCC 6630 Introduction to XML 2
- TCC 6640 Wiki-Based Documentation 2
- TCC 6495 Document Design 2

Program Credit/GPA Requirements
46 total quarter hours required
Minimum 3.000 GPA required

Sports Leadership, MSLD
The practice-oriented sports leadership master’s degree is structured to accommodate midcareer athletic administrators and coaches, as well as individuals seeking to prepare for careers in the sports industry.

Developed in collaboration with Northeastern University’s Center for the Study of Sport in Society, the Master of Sports Leadership seeks to prepare you for a variety of sport-related occupations—whether it’s working with a professional or intercollegiate sports team; with a fitness club or wellness organization; or in marketing, communication, or sports management. Courses within this unique graduate degree examine the social and business issues that are critical to sports leadership. Offered in an online format with an intensive one-week summer institute in Boston, this practice-oriented degree seeks to provide you with a well-rounded educational experience, equipping you to advance your career in the sports industry.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
Note: Sport in Society (LDR 6405) and Sports Media Relations (LDR 6441) are summer institute courses, available on-campus in Boston. Winter institute course available on campus in Charlotte, North Carolina.
- LDR 6100 Developing Your Leadership Capability 3-6
- LDR 6135 Ethical Leadership 3
- LDR 6405 Sport in Society 3
- LDR 6410 Leadership and Organization in Sport 3
- LDR 6430 Sports Law 3
- LDR 6441 Sports Media Relations 3

Complete one of the following. This course should be the last course taken and requires faculty advisor approval:

Graduate Certificate Programs
Enhance your skills and career potential with a graduate certificate from Northeastern University's College of Professional Studies. We offer over 355 certificates that represent fast-growing fields such as education, project management, leadership, and technology. Courses are delivered online, on campus, or in a blended format, offering you maximum flexibility and convenience for your busy schedule.

Programs
- 3-D Animation (p. 300)
- Adult And Organizational Learning (p. 301)
- Advanced Study Of Orthopedics (p. 301)
- Collegiate Athletics Administration (p. 301)
- Construction Management (p. 302)
- Digital Media Management (p. 302)
- Digital Video (p. 302)
- Domestic Biopharmaceutical Regulatory Affairs (p. 303)
- eLearning And Instructional Design (p. 303)
- Financial Markets And Institutions (p. 303)
- Forensic Accounting (p. 304)
- Game Design (p. 304)
- Geographic Information Systems (p. 304)
- Global Student Mobility (p. 305)
- Global Studies And International Relations (p. 305)
- Health Management (p. 306)
- Higher Education Administration (p. 306)
- Human Resources Management (p. 306)
- Information Security Management (p. 307)
- Interactive Design (p. 307)
- Interdisciplinary Professional Studies (p. 307)
- International Biopharmaceutical Regulatory Affairs (p. 309)
- Leadership (p. 309)
- Leading And Managing Technical Projects (p. 309)
- Learning Analytics (p. 310)
- Medical Devices Regulatory Affairs (p. 310)
- Nonprofit Management (p. 311)
- Organizational Communication (p. 311)
- Port Security (p. 311)
- Professional Sports Administration (p. 312)
- Program And Portfolio Management (p. 312)
- Project Management (p. 312)
- Public And Media Relations (p. 313)
- Remote Sensing (p. 313)
- Respiratory Specialty Practice (p. 314)
- Social Media And Online Communities (p. 314)
- Teaching English to Speakers Of Other Languages (p. 314)

3-D Animation, Graduate Certificate
Three-D animation is not only a major component in the film and broadcast industries, it is also a crucial element in online entertainment and a driving force for the gaming industry. Companies use animation in advertisements, websites, and training programs. The growing use of gaming technologies in education and industry (often referred to as Serious Games) has given rise to a need for skilled animators who can work closely with business and academic institutions.

The Graduate Certificate in 3D Animation offers a practice-oriented approach to the art and science of animation, with a particular emphasis on the special requirements of 3D modeling and animating for the gaming industry. Course work is designed to develop students’ powers of visualization as well as provide a conceptual basis for visual narrative. The program seeks to produce graduates who are skilled in the use of industry-standard animation applications; understand visual principles of lighting, modeling, and surfacing; and are conversant with motion and special effects compositing.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Core Course
Complete one of the following. Note: For students with a portfolio waiver, DGM 6450 is the core course:
- DGM 6105: Visual Communications Foundation
- DGM 6450: Animation Basics

Required Courses
- DGM 6122: Foundations of Digital Storytelling 4
- DGM 6510: 3-D Modeling 4
- DGM 6530: Character Animation 4
Northeastern University

Program Credit/GPA Requirements
22 total quarter hours required
Minimum 3.000 GPA required

Adult and Organizational Learning, Graduate Certificate

From globalization to technology, economic volatility to talent management, there is an increasing need to educate today’s workforce for competitive advantage. To meet these needs, trainers, executive development professionals, human resource managers, and educators must stay current in adult and organizational learning.

The Graduate Certificate in Adult and Organizational Learning is designed to provide participants with foundational knowledge in adult learning, needs assessment, and program review. Students have an opportunity to gain expertise and understanding of the methods and models available for instruction, delivery channels, and overall program development.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Core Courses
EDU 6319 How People Learn 4
EDU 6323 Technology as a Medium for Learning 4
Complete one of the following: 4
EDU 6324 Competencies, Assessment, and Learning Analytics
EDU 6437 Assessment in Education

Program Credit/GPA Requirements
16 total quarter hours required
Minimum 3.000 GPA required

Advanced Study of Orthopedics, Graduate Certificate

The Northeastern University Graduate Certificate in Advanced Study of Orthopedics is designed for licensed physical therapists interested in developing advanced skills in orthopedic physical therapy. This program will consist of five courses (18 credits) and be taught 100 percent online. The online design of the program will provide practicing physical therapists the flexibility to adapt to their demanding schedules, save time on travel, and complete the program from the comfort of their homes. The program can be completed in eighteen to thirty-six months with fall, winter, and summer start dates. The online format will foster the development of critical reflective thinking through case studies and discussions focusing on the most current information in orthopedic physical therapy.

Program Objectives:
• Apply knowledge of the anatomy and biomechanics to the evaluation and treatment of the musculoskeletal system
• Interpret and analyze medical and physical examination findings based on the Patient/Client Management Model
• Analyze current surgical interventions for the musculoskeletal system as it applies to physical therapy care
• Provide the student with the knowledge and skills required to sit for the American Physical Therapy Association’s Board of Physical Therapy Specialist Orthopaedic clinical specialization examination

Note: Contact Eric Folmar, program director, for further information: e.folmar@neu.edu (e.folmar@neu.edu?subject=CPS Website Inquiry) or 617.304.9253.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
PTH 6560 Patient Management Models and Evidence-Based Practice in Orthopedics 2
PTH 6561 Evidence-Based Examination and Outcomes for the Cervical-Thoracic Spine and Temporomandibular Joint 4
PTH 6562 Evidence-Based Examination and Outcomes for Upper Extremity: Shoulder, Elbow, and Hand 4
PTH 6563 Evidence-Based Examination and Outcomes for Lumbar Spine and Sacroiliac Joint 4
PTH 6564 Evidence-Based Examination and Outcomes for Lower Extremity: Hip, Knee, Foot, and Ankle 4

An optional two-and-a-half-day hands-on lab that will include components of each of the courses (upper extremity, lower extremity, spine) will be offered each spring. People enrolled in the program will have the option to take the hands-on labs for an extra fee.

Program Credit/GPA Requirements
18 total quarter hours required
Minimum 3.000 GPA required

Collegiate Athletics Administration, Graduate Certificate

College athletics in the United States is comprised of more than 1,200 schools, conferences, and organizations that collectively invest in the well-being of student-athletes—both on and off the field.

The Graduate Certificate in Collegiate Athletics Administration offers students an opportunity to obtain an in-depth understanding of the largest amateur segment of the sports industry. Through the program’s curriculum, students will be given the opportunity to acquire leadership skills and knowledge in a variety of collegiate athletics topics including sports management, NCAA compliance, fund-raising, academic advising, gender and diversity in sport, and Title IX legislation.

Upon completion, all credits earned in the collegiate athletics administration certificate can also be applied directly into the Master of Sports Leadership (p. 299) program.
Construction Management, Graduate Certificate

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
LDR 6400 Sports Management 3
LDR 6427 Gender and Diversity in Sport 3
LDR 6442 Athletic Fund-Raising 3
LDR 6455 NCAA Compliance 3
LDR 6465 Title IX 3
LDR 6615 Academic Advising for Student-Athletes 3

Program Credit/GPA Requirements
18 total quarter hours required
Minimum 3.000 GPA required

Digital Media Management, Graduate Certificate

The digital media market space can present unexpected challenges to standard business models. The Graduate Certificate in Digital Media Management offers courses designed to help managers apply best business practices to these nontraditional challenges. Students are offered the opportunity to gain skills in managing functionally diverse digital media teams, responding effectively to response-critical projects, and implementing marketing strategy in a variety of media channels.

Over the last two decades, construction in both the public and private sector has become increasingly complex, requiring construction and project managers to have a stronger skill base to be successful in acquiring and executing projects.

The Graduate Certificate in Construction Management is intended to serve owners’ representatives, consulting engineers, architects, design engineers, contractors, and subcontractors. Individuals who have a bachelor’s degree, but not necessarily in construction, and who have been identified by their companies as having high potential for advancement are also good candidates for this program.

Courses from this certificate may be applied toward the Master of Science in Project Management.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
CMG 6400 Introduction to Construction Management 4
CMG 6402 Alternative Project Delivery Methods and Project Controls 4
CMG 6403 Safety, Project Risk, and Quality Management 4
CMG 6405 Construction Law 4

Program Credit/GPA Requirements
16 total quarter hours required
Minimum 3.000 GPA required

Digital Video, Graduate Certificate

With the quality and ease-of-use of digital video camcorders, anyone can capture moving images, but the result is like a Stradivarius violin: It takes training to make music. The Graduate Certificate in Digital Video is a hands-on introduction to digital video technologies, as well as an examination of the social, cultural, and political implications of moving-image production in the digital age. Students have an opportunity to gain competency in digital production and postproduction while exploring various formal, conceptual, and structural strategies. Students will also have an opportunity to learn to generate digital video that communicates effectively and inventively, in preparation for positions in the creative industries of gaming, design, and media production.

The courses in this program also serve as a concentration in the Master of Professional Studies in Digital Media.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
DGM 6105 Visual Communications Foundation 4
DGM 6122 Foundations of Digital Storytelling 4
DGM 6880 Portfolio 2

Electives
Complete two of the following: 8
DGM 6435 Digital Video Production
DGM 6440 Editing in the Digital Studio
DGM 6520 Lighting for the Camera

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
DGM 6145 Information Technology and Creative Practice 4
DGM 6279 Project Management for Digital Media 4
DGM 6280 Managing for Digital Media 4
DGM 6285 Interactive Marketing Fundamentals 4

Biopharmaceutical Domestic Regulatory Affairs, Graduate Certificate

The biotechnology and pharmaceutical industries continue to experience rapid growth in the U.S. market. As companies in these industries seek approval to market their products in the United States, demand for qualified regulatory affairs professionals continues to increase. Product development scientists, marketers, quality personnel, as well as legal experts that guide companies through the Food and Drug Administration (FDA) approval process, will benefit from regulatory affairs training.

The Graduate Certificate in Biopharmaceutical Domestic Regulatory Affairs is designed to provide students with a greater understanding of U.S. biologic and pharmaceutical product regulation and their unique development, marketing, manufacturing, and postmarket approval-related issues. The program also seeks to prepare students to ensure regulatory compliance, proper validation, and utilization of proper quantitative measurement techniques. Courses from this certificate may be applied toward the Master of Science in Regulatory Affairs for Drugs, Biologics, and Medical Devices.

e-Learning and Instructional Design, Graduate Certificate

The e-learning and instructional design certificate increases opportunities for professional diversification and advancement as the contemporary landscape of learning increasingly requires a digital component. This curriculum is designed to prepare professionals to design pedagogically sound online, blended, and technology-enhanced educational experiences from stand-alone workshops to program suites.

Certificate participants investigate the latest research on the science of learning, draw on research-based principles to design engaging online and mobile environments, and become prepared to respond innovatively to societal and institutional changes that impact the field of online and mobile education.

Students will have the option of applying their four courses toward the e-learning and instructional design MEd program if they decide to pursue that degree.

Financial Markets and Institutions, Graduate Certificate

In this rapidly changing business environment, the barriers between institutions are eroding, and competition is increasing due to deregulation and new product development. Managing internal operations more efficiently and adapting to the changing external environment is critical to the long-term survival of institutions. The Graduate Certificate in Financial Markets and Institutions seeks to prepare students to measure the impact of accounting decisions on performance; to manage risks, assets, and liabilities in meeting corporate goals; to understand domestic and international financial systems and the institutions within them; and to build financial relationships that foster marketing financial products.

An examination of financial services industry principles and practices seeks to provide individuals working in brokerage houses, investment or commercial banks, insurance companies, or real estate with a greater understanding of financial systems as well as how to manage risks, assets, and liabilities in meeting corporate goals.
Forensic Accounting, Graduate Certificate

Note: Courses from this certificate may not be applied toward the Master of Science in Leadership.

Geographic Information Systems, Graduate Certificate

A geographic information system (GIS) combines layers of data to give needed information on specific locations. Such a system can map environmental sensitivities or geological features or can report on how best to speed emergency personnel to an accident or crime scene. Current fields using GIS include healthcare, public safety, environmental management, transportation and operations technology, real estate, and public utilities.

The Graduate Certificate in Geographic Information Systems program offers hands-on training, seeking to give students the necessary skills and understanding to apply GIS competently and effectively. As a result of the certificate curriculum, students should be well versed in GIS theory, have practical hands-on exposure to GIS software and hardware, understand the representation of data in both mapped and tabular forms, and know how to plan and construct spatial databases.

The courses in this certificate program may be applied to the Master of Professional Studies in Geographic Information Technology.

Game Design, Graduate Certificate

Game design is one of the fastest-growing fields in entertainment, business, and education. From healthcare to political science, companies use games to educate their constituents and enhance employee skills.

The Graduate Certificate in Game Design offers a practice-oriented approach to the art and science of game making. The program emphasizes visual design and programming for video games and fosters conceptual understanding of the principles of game design for all varieties of games—from educational board games to iPhone games.

Courses in this program also serve as a concentration in the Master of Professional Studies in Digital Media.

Global Student Mobility, Graduate Certificate

The Graduate Certificate in Global Student Mobility offers an in-depth look at the dynamic field of international higher education for those wishing to administer programs for domestic and/or international students, faculty, and institutions. Students will receive a grounding in cross-cultural theories while also exploring the widening range of program types, methods of delivery, and the importance of experiential and service-learning exchanges. Courses explore U.S.–government-sponsored programs, the role of nongovernmental organizations (NGOs) dedicated to international academic exchanges, and the fast-growing world of third-party providers. Taught by practitioners with real-world experience, students will have ample opportunity to review case studies illustrating both challenges and innovative practices in this essential and highly specialized area of higher education.

The continual expansion of globalization has changed the landscape of higher education worldwide and fueled the demand for professionals with the skills and knowledge to enter this increasingly specialized field. The graduate certificate is designed to prepare students for employment in various sectors of the international education field including:

- Study abroad
- International student and scholar services
- International admissions and recruitment
- The development and administration of international study, work, and volunteer exchange
- Student ESL and language programs
- The complex range of U.S.–government-sponsored international exchange programs such as Fulbright, Humphrey, Muskie, YES, and scores of others
- NGOs supporting these exchanges such as IIE, Amideast, American Councils, and many others
- Creating and administering exchange programs for working professionals outside of higher education, targeting religious, philanthropic, and thematic programs
- Students can participate in interesting opportunities like this Evening with Philip Altbach event (http://aspireblog.org/uncategorized/experts-debate-current-future-state-international-higher-education).

Global Studies and International Relations, Graduate Certificate

The Graduate Certificate in Global Studies and International Relations is designed to provide students with the skills and training necessary to analyze, research, and evaluate a topic of interest in a global location. Overall, the program curriculum focuses on the themes of transition and development in the global world. Core courses provide a base of knowledge about global issues and are combined with an elective that allows students to focus on a specific area of interest.

Health Management, Graduate Certificate

Projections for the healthcare industry state that job growth will remain above average into the next decade. The needs of an aging population along with the increased human life cycle are just some of the factors contributing to this growth.

The Graduate Certificate in Health Management examines the financial, political, legal, and operational aspects of a healthcare facility and explores the evolution of healthcare delivery in the United States.

Health managers are found in different roles across healthcare organizations including:

- Strategic planning
- Operations
- Human resources
- Fund-raising
- Purchasing

Health managers are responsible for designing, administering, managing, and evaluating health policies, programs, and services. The courses in this certificate also serve as a concentration in the Master of Science in Leadership program.

Higher Education Administration, Graduate Certificate

The effective administration of higher education institutions has never been as critical as at this time. Consider:

- The president of the United States of America and the secretary of education are calling for access to higher education for all
- European and Asian universities are ascending in quality, increasing as market forces
- The electronic delivery of education is escalating, creating new pedagogy and delivery models

To meet these challenges, as well as changing demographics, financial concerns, and legal and policy requirements, administrators and leaders in higher education need to be increasingly sophisticated and knowledgeable.

The Graduate Certificate in Higher Education Administration is designed to provide participants with an overall understanding of managerial concepts as well as the operational and strategic concepts that lead to effective administration. This program is best suited for individuals seeking mid- to senior-level administrative roles and individuals interested in transitioning from industry and other organizations into academia.

The certificate is comprised of 16 quarter hours, which may be applied toward the Master of Education in Higher Education Administration.

Minimum 3.000 GPA required

Information Security Management, Graduate Certificate
Information security is a management issue with global business implications. To succeed in today's network economy requires more than simply a focus on information technology (IT) issues. Succeeding also requires a focus on security strategy and management. IT security governance is an overarching consideration in all risk-assessment and management-related endeavors and is important for information security since many issues have legal, regulatory, policy, and ethical considerations. The associated risks of business today must be clearly understood and managed.

The Graduate Certificate in Information Security Management is designed to provide a conceptual and practical overview of information security management. It begins with an overview of key information security management issues and principles. It presents security governance challenges including the policy, law, regulatory, and ethical accountability frameworks that information security risk managers must work within. The program includes review courses that prepare students for the CISSP and CISA exams.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
ITC 6305 IT Infrastructure (Systems, Networks, Telecom) 3
ITC 6310 Information Security Governance 3
ITC 6315 Information Security Risk Management 3
ITC 6320 Information Security Technology 3

Information Security Management Electives
Complete two of the following: 6-8
ITC 6325 CISA Preparation
ITC 6330 CISSP Preparation

Minimum 3.000 GPA required

Interdisciplinary Professional Studies, Graduate Certificate
The contemporary workplace challenges professionals to develop and sustain the ever-changing skill sets and multidisciplinary workplace competencies required for success as innovators, leaders, and change agents. Organizations are similarly challenged in fostering employee professional development to meet the fluctuating demands of a highly technological and global economy. Today's professionals desire state-of-the-art approaches for continuing their education, including shorter, flexible, modularized, and just-in-time academic opportunities. To meet the growing demand for 21st-century learning, custom tailored to individual and organizational needs, Northeastern University's College of Professional Studies created the Interdisciplinary Graduate Certificate in Professional Studies—or iCert for short.

iCert represents a radically different approach to professional and academic learning. This first-of-its-kind certificate is uniquely designed to provide flexible multidisciplinary course options aligned with individual or organizational needs by incorporating three powerful learning components:

1. Intentional planning and reflection: Students identify and reflect on professional strengths, needs, aptitudes, and career interests in their iCert foundations course, resulting in a personalized professional learning plan (PLP).
2. Individualized program design: Students choose courses from multiple program areas, based on their PLP, customized to meet their academic goals.
3. Innovative experiential learning: Students choose from credit or noncredit real-world learning opportunities through Northeastern’s online Experiential Network and their final iCert capstone course, connecting classroom learning to their current or future professional aspirations.

iCert graduates are encouraged to:

- Identify, reflect on, and articulate professional goals in order to envision a future self
- Develop a career focus that integrates and builds or enhances knowledge, skills, and attitudes around the following multidisciplinary workplace competencies:
  - Communications
  - Creative problem solving
  - Cultural responsiveness
  - Leadership
  - Lifelong learning
  - Management
  - Systems thinking
  - Technological proficiency
- Translate classroom learning into practice through authentic workplace experiences
- Build a professional practice as individuals, members of organizations, and socially responsible members of the global community
- Continue graduate studies in the following ten master’s degrees:
  - Corporate and organizational communication
  - Education
  - Homeland security
  - Human services
  - Leadership
  - Learning analytics
  - Nonprofit management
  - Project management
  - Sports leadership
  - Technical communication

**International Biopharmaceutical Regulatory Affairs, Graduate Certificate**

To work in today's global biopharmaceutical industry, there is a strong need to understand international regulations that impact the development, marketing, and manufacturing of pharmaceutical and biotechnology products.

The Graduate Certificate in Biopharmaceutical International Regulatory Affairs curriculum focuses on factors that facilitate the safety, performance, and efficacy of biomedical goods. Program training covers the assessment of international regulations and interpretation of their likely impact on a company's global commercialization strategies. Through participation in the program, students will have an opportunity to gain an understanding of international regulatory requirements necessary to implement such strategies.

Course work covers biotechnology and pharmaceutical product approval processes, regulatory analysis, and liability laws as they exist across different regulatory systems. The graduate certificate will provide core regulatory knowledge to students entering into the field from bench research, clinical studies, quality control/assurance, pharmacy, bioengineering, business, and legal analysis. The curriculum covers regulatory environments in Europe, Latin America, Australia, Japan, and other emerging economies. Courses from this certificate may be applied toward the Master of Science in Regulatory Affairs for Drugs, Biologics, and Medical Devices.

**Leadership, Graduate Certificate**

Today's cross-functional teams and organizations require a leadership style that capitalizes on the collective expertise and capabilities of the group. The development and mastery of collaborative leadership skills are not typically part of one's focused discipline preparation; hence, leadership requires deliberate development by those who assume leadership roles.

The Graduate Certificate in Leadership starts with the premise that everyone is capable of leadership. The program studies every aspect of leadership dynamics from the leader as an individual to working in teams and from the organization itself to the development of strategic leadership techniques. Course work exposes participants to a series of alternative perspectives of leadership, including collaborative models. Using the course's action-learning methods, participants build a personal model of leadership that they can put to immediate use in their workplace.

**Leading And Managing Technical Projects, Graduate Certificate**

Whether you're an established project manager, or you're working in a technical field and aspire to be one, Northeastern's Graduate Certificate in Leading and Managing Technical Projects seeks to give you the foundational skills and practical knowledge you need to be successful.

Through courses you take online, our technical project management curriculum will give you the opportunity to:

- Develop the leadership and management skills to lead technical projects
- Learn how to communicate technical content to a nontechnical audience
- Gain practice leading remote teams, including global teams
- Plan and schedule projects using the most current and relevant methodologies

**Program Requirements**
17 total quarter hours required
Minimum 3.000 GPA required
• Develop a personal leadership approach to motivate and inspire others

And should you choose, you can apply the credits you earn toward your certificate directly to our master's in project management (p. 290), master's in leadership (p. 287), master's in corporate and organizational communication (p. 279), or master's in Informatics (p. 277).

**Learning Analytics, Graduate Certificate**

Educators today are “swimming” in data about curricula, student assessment, social media, registrations, and demographics stored in data warehouses and “the cloud.” This data makes it possible to collect, manage, and maintain massive amounts of educational information. The need to analyze and make data-based decisions in education has led to the emergence of a new field called learning analytics.

Through a set of focused courses, our curriculum will give you the opportunity to:

• Articulate and integrate diverse perspectives in the field of learning analytics, including learning analytics assumptions, theories, epistemologies, and debates

• Align learning analytics processes to address the needs of educational institutions and answer questions posed by educational leaders

• Select, prepare, implement, interpret, and evaluate learning analytic models appropriately

And should you choose, you can apply the credits you earn toward your certificate directly to our Master of Education concentration in learning analytics.

**Medical Devices Regulatory Affairs, Graduate Certificate**

The national and regional medical device industries have continued to experience significant market growth, despite the fluctuations in the overall global economy. There are more than 7,000 medical device companies in the United States alone, and nearly 1,000 of these are based in Massachusetts. In total, the medical device sector in Massachusetts employs 36,000 workers, has a payroll of over $1.8 billion, and annual product shipments of $7.3 billion.

The Graduate Certificate in Medical Devices Regulatory Affairs provides students with an opportunity to gain a detailed knowledge of the regulations influencing the commercialization of new and existing medical devices. The intensely practical curriculum spans the entire life cycle of product development and introduces students to the salient features governing both pre- and postapproval stages. The program content also examines the relationship between regulatory agencies and the medical device industry. Students have the opportunity to take specialized courses on regulatory systems outside the United States.

The certificate will help advance the careers of students coming from such fields as bioengineering, quality control/assurance, intellectual property, business, and marketing. The choice of several courses makes this certificate ideal for students already working in the regulatory world as well as those just entering into the profession.

Courses from this certificate may be applied toward the Master of Science in Regulatory Affairs for Drugs, Biologics, and Medical Devices.

Nonprofit Management, Graduate Certificate
Nonprofits today simply require a higher level of management expertise. Nonprofit managers are required to manage people and programs more efficiently and effectively. The Graduate Certificate in Nonprofit Management focuses on developing skills in organizational management, financial management, fund-raising, grant and report writing, human resources management, and governance.

The program integrates theoretical approaches with practical application to prepare students for positions in either small or large nonprofit organizations. The program targets individuals who work in the nonprofit sector as executive directors, managers, program staff, board members, and volunteers. Students have an opportunity to participate in case studies, individual and group projects, and class discussions.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Courses
NPM 6110 Legal and Governance Issues in Nonprofit Organizations 3
NPM 6120 Financial Management for Nonprofit Organizations 3
NPM 6125 Promoting Nonprofit Organizations 3
NPM 6130 Fund-Raising and Development for Nonprofit Organizations 3

Organizational Communication, Graduate Certificate
The study of organizational communication focuses on the dynamics of communication in complex organizations for the purpose of learning how individuals within such organizations can become effective communicators. Whether the context of such communication is meetings or professional presentations, communicating during a crisis, or intercultural exchanges, the message is consistent: Effective communication is a crucial factor in determining organizational success.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Port Security, Graduate Certificate
The Graduate Certificate in Port Security examines U.S. and international policy, laws, and regulations for maritime and aviation security in light of current security challenges, terrorism and transnational criminal threats, and the potential U.S. and global impact of maritime and aviation security failures. Emergency response and recovery mechanisms and implementation as well as organizations and associations critical to modern U.S. maritime and aviation port security infrastructure protection will be evaluated and exercised.

The certificate offers leaders an opportunity to evaluate maritime and aviation security risks, threats, and measures to mitigate within applicable U.S. and international policy, assess and implement response and planning mechanisms for maritime transportation system security and aviation and airport security requirements, and conduct real-world actionable planning and strategy development for maritime and aviation security response and crisis management, among other essential skills for senior leaders.

This certificate is ideal for homeland security professionals and industry leaders responsible for maritime and aviation port security, incident management and response, and the planning and execution of maritime and aviation operations within today’s security challenges.
The revenue of the global professional sports industry has grown to $145 billion and also projects an increase in jobs by up to 13 percent by 2020 (PwC, 2015).

The Graduate Certificate in Professional Sports Administration is designed to give students an in-depth understanding of this professional segment of the sports industry. Through the program’s curriculum, students will be given the opportunity to acquire professional leadership skills and knowledge in a variety of topical areas including sports management, marketing, sponsorship, event management, risk management, and finance.

Upon completion, all credits earned in the professional sports administration certificate can also be applied directly into the Master of Sports Leadership (p. 299) program.

Professional Sports Administration, Graduate Certificate

The increasingly important role of program and portfolio managers is clear, as we see more companies orienting their work in a projectized fashion. Not only are companies seeking to projectize their workflow, but they are seeking to better align projects with the strategic direction of the company and industry. Program and portfolio managers need to be able to evidence the strategic value that projects are accomplishing and can continue to accomplish in their organizational context.

The need for organizations to coordinate their related projects into programs and to seek to understand the value of their work through the lens of a portfolio is recognized throughout all industry sectors. This has been made clear through the creation of advanced industry certifications, such as the Program Management Professional (PgMP®) and the Portfolio Management Professional (PFMP®) credential by the Project Management Institute.

Northeastern University's Graduate Certificate in Program and Portfolio Management is designed to prepare individuals with the knowledge, skills, and tools needed to effectively manage project-based programs and portfolios.

Project Management, Graduate Certificate

Technical and managerial employees at all levels of organizations are being asked to manage small and large projects. Many of these professionals have not been specifically trained to effectively and efficiently manage projects. The task of managing projects has its own body of knowledge. This program seeks to provide the practical and theoretical knowledge for which the Project Management Institute tests, and it is expected that individuals who successfully complete this program will be capable of fulfilling the education requirements of the Project Management Professional (PMP) certification exam.

This certificate program in project management is designed with sufficient course flexibility to accommodate professionals with various levels of project management experience. Project management principles are applicable to both manufacturing and service industries, including professionals in fields such as software engineering, construction management, and financial services.

Public and Media Relations, Graduate Certificate

There is growing demand for communication professionals with digital media skills and a strategic perspective on brand and reputation management. According to the Bureau of Labor Statistics, employment of public relations specialists and managers will grow by 12 percent and 13 percent, respectively. The Graduate Certificate in Public and Media Relations is designed to prepare communication professionals who focus on external stakeholders for the challenges of a rapidly changing industry. This program focuses on developing strategic communication plans, crafting compelling messages, and performing audience research, while preparing students with the latest skills in digital platforms, tools, and techniques.

The goal of this program is to equip graduates with the knowledge and skills to:

- Design and produce public and media relations campaigns using written materials, social media, audio, video, and web-based tools
- Identify and anticipate audience behavior and expectations using primary and secondary research methods
- Strategically design, implement, and evaluate campaigns that support organizational performance

The courses in this program also serve as a concentration in the Master of Science in Corporate and Organizational Communication (p. 279).

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Courses

- RMS 5105 Fundamentals of Remote Sensing 3
- RMS 6110 Digital Image Processing 3

Remote Sensing Electives

Complete four of the following: 12

- RMS 6210 Technology, Operations, and Requirements for Drones, Helicopters, and Airplanes
- RMS 6220 Geographic Information Systems for Remote Sensing
- RMS 6230 Remote Sensing and Global Change
- RMS 6240 Introduction to Radar and LiDAR Remote Sensing
- RMS 6250 Remote Sensing of Vegetation
- RMS 6260 Remote Sensing for Archaeology
- RMS 6270 Remote Sensing for Disaster Management
- RMS 6280 Automated Feature Extraction for the Geospatial Professional
- RMS 6290 Spectroscopic Image Analysis
- RMS 6292 Photogrammetry and GPS
- GIS 6394 Crisis Mapping for Humanitarian Action
**Program Credit/GPA Requirements**

18 total quarter hours required  
Minimum 3.000 GPA required

---

**Respiratory Specialty Practice, Graduate Certificate**

The goal and planned outcome of the respiratory specialty practice certificate program is to meet the need for registered respiratory therapists (RRTs) to document their competency in one of four respiratory care specialist practice areas:

1. Adult critical care  
2. Neonatal and pediatric intensive care  
3. Asthma and COPD education/wellness coordination  
4. Pulmonary function testing

The goal and expected outcome is to help students working in these areas to reach a competency level where they can become board-certified specialists in one or more of the four specialty areas.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Required Courses**

- RPT 7400 Pulmonary Diseases and Disorders 4  
- RPT 7401 Cardiopulmonary Assessment and Diagnostics 4

**Electives**

Select two of the following courses:

- RPT 7402 Adult Critical Care 4  
- RPT 7403 Neonatal and Pediatric Care 4  
- RPT 7404 Pulmonary Wellness Education and Coordination 4  
- RPT 7405 Development of Patient Management Plans 4

---

**Social Media and Online Communities, Graduate Certificate**

Social media management and strategy development have become core skills required for communication professionals. According to WANTED Analytics, 1.6 million working professionals utilize social media skills in jobs at the manager and executive level. The Graduate Certificate in Social Media and Online Communities focuses on strategic framework and the role digital media has in supporting organizational performance. The program integrates theory and practice, including experimenting with various tools and platforms and reflecting on lessons learned from active management and experimentation.

Students completing the program will have the opportunity to develop learning e-portfolios as part of their course work.

- Learn how to define metrics for measuring success, develop training, and evaluate the performance of social media activities  
- Manage organizational risks and learn best practices in the creation of social media policies and guidelines

Courses within the social media and online communities certificate program also serve as a concentration through the Master’s in Corporate and Organizational Communication Program (p. 279).

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Required Courses**

Complete six of the following: 19-21

- CMN 6015 Introduction to the Digital Era: The Power of Social Media  
- CMN 6025 Digital Era Skills: Platforms, Tools, and Techniques  
- CMN 6035 Legal, Policy, and Ethical Issues in the Digital Era  
- CMN 6045 Leveraging Digital Technologies: Strategy, Assessment, and Governance  
- CMN 6065 Implementation and Management of Social Media Channels and Online Communities  
- DGM 6285 Interactive Marketing Fundamentals  
- DGM 6290 Social Media and Brand Strategy Implementation  
- TCC 6710 Content Strategy

---

**Teaching English To Speakers Of Other Languages, Graduate Certificate**

The Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) is designed to provide students with a solid foundation in the structure and use of English language. The certificate offers teaching strategies, firmly grounded in research, theory, and practice, to instruct ESL/EFL (English as a Second Language/ English as a Foreign Language) to adults in the United States or internationally. Students have an opportunity to develop learning e-portfolios as part of their course work.

Topics covered by the program include best practices in TESOL methodology through a combination of lecture, small group work, reflection, classroom observation, and a practicum that provides hands-on experience designing lessons, materials, and assessments. Whether students want to teach English abroad, work with immigrant adult populations in the United States, or teach English at the university level, this graduate certificate will provide them with an opportunity to gain a combination of theoretical and practical training to teach English to speakers of other languages in international contexts, community colleges, and within organizations devoted to adult English-language learners.

*This certificate does not lead to Massachusetts licensure.*
SPECIAL REQUIREMENTS:
• The TESOL certificate program may be completed in two quarters and is offered 100 percent online.
• Students have the option to complete the practicum component online or on-ground.
• The program has two start terms: fall quarter and spring quarter.

Program Credit/GPA Requirements
18 total quarter hours required
Minimum 3.00 GPA required
The College of Science seeks to offer advanced students outstanding academics and real-world research experience through cutting-edge research opportunities that are both discipline-based and interdisciplinary. Our doctoral and master’s degree programs in the physical sciences, life sciences, and mathematics seek to give students a deep understanding of emerging fields such as chemical biology, cognition and neuroscience, environmental and marine science, biochemistry, bioinformatics, biotechnology, nanoscience, and network science. Our programs are positioned at the forefront of discovery, invention, and innovation. We seek to prepare students and professionals to enter the scientific workforce serving the academy, government, or private sector.

**Academic Policies and Procedures**

- Grading Policies (p. 316)
- Course Registration (p. 316)
- Transfer Credit (p. 316)
- Awards (p. 316)
- Satisfactory Progress (p. 316)
- Time Limitation (p. 317)
- Changes in Requirements (p. 317)
- The Doctor of Philosophy Degree (PhD) (p. 317)
- The Master’s Degree Academic Requirements (p. 318)

**Grading Policies**

In the College of Science, not more than two courses or 6 semester hours of credit, whichever is greater, may be repeated to satisfy the requirements for the degree. Only such repeats will be counted in calculating the cumulative grade-point average.

No grade changes are permitted after the end of the final examination period one calendar year from the semester in which the student registered for the course. In calculating the overall cumulative average, all graduate-level course work completed at the time of clearance for graduation will be counted unless the student is immediately continuing on for a PhD degree in his or her department.

**Course Registration**

Students are encouraged to obtain advisor approval of course selections each semester. This approval is required for all assistantship recipients, and some departments require it for all students. Students should check with individual departments for specific guidelines.

**Transfer Credit**

A student may petition to transfer up to 9 semester hours of his or her program using credits from another institution, provided that the credits transferred consist of a grade of B (3.000) or better in graduate-level courses, have been earned at a U.S.–accredited institution, and have not been used toward any other degree. Note: If approved by the College of Science, credits from Northeastern University’s College of Professional Studies (CPS) transfer to the College of Science as external credits and count toward the 9-semester-hour maximum of transfer credit. As courses at other institutions may not parallel courses at Northeastern, the student’s academic department will determine the number of semester hours the external course will be worth. This calculation may result in fewer semester hours than the course was assigned at the institution at which the student completed the course. In addition, courses accepted for transfer credit must have been completed within five years of the date the student is admitted to graduate study. Grades are not transferred. Some departments may accept fewer than 9 transfer credits.

**Awards**

Only those students who are registered in degree programs are eligible for awards. Award recipients will receive an official award letter from the College of Science via email. Pay attention to this letter as it is an official contract that should be read carefully. In addition, to maintain awards, students must be making satisfactory progress toward their degrees.

Receipt of financial support administered by the College of Science is contingent on satisfactory academic progress toward the degree and on meeting department-specific guidelines. The College of Science requires that all students receiving awards will generally have two semesters to reach a 3.000 grade-point average (GPA). Students whose cumulative GPA is below 3.000 will be reviewed by their departments and by the College of Science and may have their funding terminated on recommendation of their department or by decision of the College of Science in consultation with their department. Renewals of awards will depend on the student making satisfactory academic progress toward the degree, including a GPA of 3.000 or the department’s minimum GPA, if it is higher than the College of Science minimum, and satisfactory performance of any duties required by the award.

**Satisfactory Progress**

Satisfactory progress means satisfying requirements in the College of Science, in this graduate catalog, and in the regulations specified by the departments.

The College of Science sets minimum standards for all students to fulfill. Departments and programs may have additional requirements.
that exceed those of the College of Science. Students in the College of Science must be making satisfactory progress, including working toward the graduation requirement of a grade-point average of 3.000 in their course work and the timely completion of course work and comprehensive/qualifying examinations. See also the university’s policy on academic standing ("Minimum Cumulative Grade-Point Average (p. 26)").

**Time Limitation**

Refer to university policy regarding time limitations. If students wish to apply for an extension of the time limit, they must submit a petition to their department of study. The petition must include a detailed plan for completion of all remaining degree requirements. In the case of master's degree time limit extension requests for course work, the department must certify that the content of each of the courses has not changed since the time the student completed the course. If deemed appropriate, the department will recommend a time limit extension to graduate student services. The associate dean for academic affairs has final approval of time limit extensions.

**Changes in Requirements**

The continuing development of the College of Science graduate programs requires regular revision of curricula. When no hardship is imposed on the student because of changes and the facilities of the school permit, the student is expected to meet the most recent requirements. However, if it can be demonstrated to the director of graduate admissions and student services that doing so does impose a substantial hardship, the requirements of the year in which the student matriculated will be applicable.

**The Doctor of Philosophy Degree (PhD)**

The Doctor of Philosophy degree is awarded to candidates who provide evidence of high scholastic attainment and research ability in their major field. Specific degree requirements are administered by a committee in charge of the degree program. It is the responsibility of the chair of this committee to certify to the College of Science the completion of each requirement for each candidate.

**Residence Requirement**

A Doctor of Philosophy degree student must spend the equivalent of at least one academic year in residence at the university as a full-time graduate student. The committee of each degree program specifies the method by which the residence requirement is satisfied.

**Qualifying Exam**

In programs where a qualifying exam is required, students must complete this requirement within the time limit set by the program of study.

**Comprehensive Examination**

Degree programs may require a comprehensive examination. Generally, students are expected to complete all of the required degree course work prior to taking the comprehensive examination. Students must complete this requirement within the time limit set by the program of study, usually within one term of completing the required course work.

**Doctoral Degree Candidacy**

PhD degree candidacy is established when students have completed all departmental and university requirements for candidacy. These requirements vary by department and include completing the minimum number of graduate semester hours required of doctoral students by the department (this may include an earned master's degree accepted by the department) and passing a qualifying examination and/or a comprehensive examination. Once students reach doctoral degree candidacy they will be certified, in writing, by the college. Registration in course work is not permitted once a student reaches candidacy.

**Continuity of Registration**

For each of the first two semesters that a doctoral candidate has established candidacy, the student must register for Dissertation. For each semester beyond the two Dissertation registrations, the student must register for Doctoral Dissertation Continuation until the dissertation is approved by the College of Science. During the terms when a student is registered for Doctoral Dissertation or Dissertation Continuation, course work is not permitted as the course requirements for the degree have already been met. If the academic program requires enrollment in seminars or courses in addition to Dissertation or Dissertation Continuation, the department’s graduate coordinator will make a recommendation to the College of Science for approval. Approval must happen prior to registration. Students must be registered for Dissertation or Dissertation Continuation during the semester in which they take the final oral examination (including the full summer semester if that is when defense occurs). Any student who does not attend Northeastern University for a period of one year may be required to apply for readmission.

**Dissertation**

Each doctoral student must complete a dissertation that embodies the results of extended research and makes an original contribution to the field. This work should give evidence of the candidate’s ability to carry out investigation and interpret in a logical manner the results of the research. The method of approval of the dissertation is established by the committee in charge of the degree program. The chair of the dissertation committee must be a full-time member of the faculty of Northeastern University. In addition, the chair of the dissertation committee must hold a doctoral degree. Typically, only one external committee member is allowed.

**Final Oral Examination**

The final oral examination will be on the subject matter of the doctoral dissertation and on important developments in the field of the dissertation. Other fields may be included if recommended by the examining committee. This examination will be taken after completion of all other degree requirements and must be held at least two weeks prior to the Commencement at which the PhD is awarded. The oral exam must take place on campus in the presence of the chair/advisor and other dissertation committee members. The dissertation defense must be publicly announced prior to the defense and the opportunity given for other students, staff, and faculty to attend.

**Interdisciplinary Doctoral Programs**

Some graduate students may wish to pursue doctoral programs that involve substantial work in two or more departments. To meet this need, an interdisciplinary program may be established that corresponds in scope and depth to doctoral standards but does not agree exactly with the individual departmental regulations. Consult this graduate catalog for policies and guidelines pertaining to this doctoral option.
The Master's Degree Academic Requirements

A candidate for the master's degree must complete a minimum of 30 semester hours of graduate-level course work and such other study as may be required by the department in which the student is registered.

To qualify for the degree, a minimum cumulative average of 3.000, equivalent to a grade of B, must be obtained. This average will be calculated each semester according to the university grading system and will exclude any transfer credits or repeated courses. A student who does not make satisfactory progress toward degree requirements, as specified by the individual department, may be terminated from the program.

Comprehensive Examination

A final written or oral comprehensive examination is required in some programs. This examination will be given by the department concerned at least two weeks before the Commencement at which the degree is expected to be conferred.

Thesis

A master's thesis is required in some programs and should demonstrate the individual's capacity to execute independent work based on original material. Registration for Thesis is required in most programs. Theses must be approved by the departmental graduate committee and, in cases in which a grade is required, must receive a grade of B (3.000) or better to be accepted.

Continuity of Registration

Students are expected to maintain satisfactory progress toward their intended degrees. Students who have not completed their thesis after having registered for the specified number of thesis credits must register and pay for Master's Continuation each subsequent semester until the thesis is approved and submitted to ProQuest. Master's Continuation will carry no credit but will be recorded on the student transcript with the appropriate grade (S or U) for each semester of registration. All students must be registered in the last semester of their program.

The biology PhD program seeks to provide a broad background knowledge base in conjunction with in-depth study of a specialized area of biology. Two optional concentrations are available: cell and molecular biology and molecular microbiology. The program emphasizes close interaction between graduate students and faculty members in developing the intellectual and experimental skills required for creative, independent research.

The PhD program entails course work from a core biology curriculum along with advanced courses in the student’s area of research interest. This is complemented by intensive research and completion of a dissertation under faculty supervision. Faculty research includes biochemistry, microbiology, cell and molecular biology, genetics, neurobiology, regenerative biology, and the biology of reproduction.

The Master of Science in Bioinformatics is a professional program that consists of four parts: fundamental courses, core courses, an internship, and electives. All courses are available in the late afternoon or evening to accommodate those who are employed during the day.

Programs

Doctor of Philosophy (PhD)
- Biology (p. 318)
- Biology—Advanced Entry (p. 319)

Master of Science (MS)
- Bioinformatics (p. 319)
- Bioinformatics—ALIGN Program (p. 320)

Minimum 3.000 GPA required

Bioinformatics, MS

The Master of Science (MS) in Bioinformatics seeks to provide students with core knowledge in bioinformatics programming, integrating knowledge from the biological, computational, and mathematical disciplines. Students in the MS program gain professional work experience via co-op. The program offers students an opportunity to become equipped to apply bioinformatics and computational methods to biological problems.

The program entails a required core of course work in computational methods, programming, and statistics, enhanced by electives in molecular biology, biochemistry, molecular modeling, web development, database design and management, data mining, and other related topics.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements
Computational Methods
BINF 6308 Bioinformatics Computational Methods 4

The biology PhD program seeks to provide a broad background knowledge base in conjunction with in-depth study of a specialized area of biology. The program emphasizes close interaction between graduate students and faculty members in developing the intellectual and experimental skills required for creative, independent research.

Students entering the PhD program with a related Master of Science degree typically have significantly reduced course loads. An individualized course of study is designed by the biology graduate curriculum committee in consultation with the student and the student’s advisor. The student can then focus on intensive research and completion of a dissertation under faculty supervision. Faculty research includes biochemistry, microbiology, cell and molecular biology, genetics, neurobiology, regenerative biology, and the biology of reproduction. Financial support (teaching assistantships or research assistantships) is normally provided for PhD students who are making satisfactory progress toward completion of their degree.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Variable total semester hours required
Minimum 3.000 GPA required
The Master of Science in Bioinformatics through the ALIGN program combines core course work in bioinformatics computerized methods, programming, and statistics with graduate electives that offer you the flexibility to specialize and build broader knowledge in both the life sciences and computer sciences. A co-op, frequently completed with leading employers in academia and industry, rounds out the program and assures graduates a competitive edge in the dynamic field of bioinformatics.

j.auclair@northeastern.edu

The department offers thesis- and non-thesis-based advanced degrees with concentrations in analytical, inorganic, organic, and physical chemistry and in interdisciplinary fields such as polymers, materials, and chemical biology.

The PhD program is designed for students who have earned a bachelor’s or a master’s degree in chemistry or related areas and who wish to earn a doctorate in chemistry. Research spans a wide range of multidisciplinary fields, with strengths in clean energy, polymers, materials, medicinal chemistry, bioanalytical chemistry, and chemical biology. Our research programs draw from a strong foundation in analytical, organic, physical, and biological chemistry in a collaborative and diverse environment. Our student-focused approach to mentoring, a strong graduate student association, and faculty deeply rooted both in academics and industry provide a flexible platform for student development toward a large diversity of career paths.

Students typically take courses their first year while supported on teaching assistantships and achieve PhD candidacy the first or second half of year two. The primary emphasis of the program is on the completion of an original research project, its articulation in a well-written thesis, and its subsequent defense before the thesis committee through an open seminar followed by oral examination by the committee members.

Chemistry, PhD—Advanced Entry

Advanced entry into the PhD program requires a master’s degree in chemistry or a related area. Graduate courses taken during acquisition of the Master of Science degree allow completion of the PhD program with fewer course credits. Other than the course requirements, which are specified separately, see the PhD program requirements for details.

Industry Entry PhD
This program is strictly for students who already have a master’s degree in chemistry or related area and have full-time employment at a company. The company must commit to all financial responsibilities accrued in obtaining the degree and allow time for the student to work on a PhD thesis in collaborative research with a company supervisor and one of our faculty members. Graduate courses in the Department of Chemistry and Chemical Biology are taught in the evenings to accommodate the fact that our students work in industry during the day.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Milestones
Three qualifying examinations
Annual review
Candidacy
Dissertation committee
Minimum of three seminars
Dissertation defense

Biotechnology, MS

Overview
The MS in Biotechnology is a Professional Master of Science (PSM) degree, an innovative graduate degree designed to allow students to pursue advanced training and excel in science while simultaneously developing highly valued business skills without acquiring a PhD or MBA. PSM programs are characterized by instruction in advanced science or mathematics, business courses, and a graduate co-op providing a real-world work experience. Graduates are referred to as “T-shaped” professionals with both deep knowledge of a specific discipline and broad knowledge of the communications and relational skills necessary to excel in any business and adapt to a changing workplace. The PSM is a nonthesis degree.

Biopharmaceutical Analytical Sciences Concentration
The biopharmaceutical analytical sciences concentration focuses on structures and activities of biological molecules and their variants formed during the production of biopharmaceuticals. Students discover the diversity of molecular forms derived from the biological products through various biological and chemical mechanisms and the impact of these structural changes on the safety and efficacy of these biopharmaceuticals. The students are exposed to the science and practice applied in the biotechnology industry to analyze and characterize these molecular forms. This is accomplished through both lecture courses of the analytical sciences and project-driven laboratory experience that utilizes analytical techniques such as mass spectrometry and molecular separations.

Biotechnology Enterprise Concentration
The biotechnology enterprise concentration integrates business and management skills with the science of biotechnology. Students are offered an opportunity to learn the fundamental concepts of leadership, entrepreneurship and innovation, financial decision making, and marketing. In the process, the concentration seeks to encourage students to gain teamwork, management, and business development skills and graduate prepared to become scientist-managers.

Pharmaceutical Technologies Concentration
The pharmaceutical technologies concentration focuses on the conversion of purified proteins to biopharmaceutical drug products that are compatible for clinical use. This concentration addresses the design of the product formulation and the development and implementation of the drug product manufacturing processes. Students study the sciences of the interactions of the biologic molecules in the process conditions and the relevant process technology, such as aseptic operations and freeze-drying, needed for drug product manufacturing. This is accomplished through both lecture courses and project-driven laboratory experience that offers hands-on learning of formulation design and drug product process development.

Process Sciences Concentration
The process sciences concentration focuses on the production of drug substance of biopharmaceuticals from cell culture process to purification of the biologic molecules. The students study the principles of development and implementation of biological manufacturing processes through the integration of concepts and fundamentals of engineering and life sciences. The concentration addresses biochemical engineering, mammalian cell culture process development, and protein purification. Both lecture courses and project-driven laboratory experience offer hands-on study of cell culture and protein separation.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements
General Core
BIOT 5120 Introduction to Biotechnology 3
BIOT 5631 Cell Culture Processes for Biopharmaceutical Production 3
BIOT 5219 The Biotechnology Enterprise 2
BIOL 6299 Molecular Cell Biology for Biotechnology 3
Biopharmaceutical Analytical Science, Graduate Certificate

The Graduate Certificate in Biopharmaceutical Analytical Science has been designed in response to a need in the biotechnology industry for individuals with an advanced knowledge of the principles and practices of state-of-the-art analyses of protein with focus on the characterization of innovator and biosimilars. The certificate offers an opportunity for individuals, particularly those who are working in the various sectors of biotechnology—including basic research of biological systems, discovery, development, and manufacturing of biopharmaceuticals—to enhance their competency and practical skills, enabling them to increase productivity and further contribute to their professions. In addition, the certificate was designed for both individuals with and without experience in biopharmaceuticals and their analysis.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Chemistry, MS

Part-time Master’s

The Department of Chemistry and Chemical Biology offers a part-time, course-based master’s degree. Classes are offered in the evenings to accommodate students who have full-time jobs. A research thesis is not a requirement for the degree.

Master’s

The department does not accept applications for the thesis-based master’s degree from students who are not already at Northeastern.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Options

Complete one of the following options:

COURSE WORK OPTION

Complete 30 semester hours from the following courses:

- CHEM 5550—CHEM 7750

THESIS OPTION

Course Work

Complete 18 semester hours from the following:

- CHEM 5550, CHEM 5570, or within the range of CHEM 5610 to CHEM 7320

Graduate Seminar (letter grade required)

- CHEM 5904 Seminar
- or CHEM 8504 Graduate Seminar

Skills and Ethics

- CHEM 5600 Research Skills and Ethics in Chemistry

Laboratory

- CHEM 7730 Advanced Laboratory Methods

Research

- CHEM 5984 Research
- or CHEM 8984 Research

Program Credit/GPA Requirements

Marine and Environmental Sciences

Website (http://www.northeastern.edu/mes)

Geoffrey C. Trussell, PhD
Professor and Chair
Marine Science Center
781.581.7370
781.581.6076 (fax)
gradmes@northeastern.edu

Graduate Coordinator
Jonathan Grabowski, PhD, Associate Professor,
j.grabowski@northeastern.edu

The Department of Marine and Environmental Sciences graduate program offerings include core capacities in marine biology, ecology, and evolution. Students benefit from top-notch research facilities at both the Marine Science Center and the main campus in Boston. The MS in Marine Biology program seeks to prepare students for entry- and mid-level careers in marine research. The doctoral program in ecology, evolution, and marine biology is designed to prepare graduates for careers in academia, government agencies, and the private sector.

Programs

Doctor of Philosophy (PhD)
- Ecology, Evolution, and Marine Biology (p. 324)
- Ecology, Evolution, and Marine Biology—Advanced Entry (p. 324)

Master of Science (MS)
- Marine Biology—Three Seas Program (p. 325)

Ecology, Evolution, and Marine Biology, PhD

The PhD in Ecology, Evolution, and Marine Biology (EEMB) program provides students with advanced course work and training in ecology, evolution, and marine biology. For students entering with a bachelor’s degree, EEMB program completion requires 30 semester hours of graduate-level course work, of which 20 semester hours must carry a letter grade. The remaining 10 semester hours must consist of colloquia, doctoral research, and approved graduate courses. Planned course work must be approved by the student’s dissertation committee.

Students must pass three examinations during the course of their graduate studies:

1. A written examination consisting of questions posed by the student’s written examination committee.
2. An oral examination by the student’s dissertation committee consisting of an oral presentation and defense of the student’s dissertation proposal and including questions about the research areas that the student proposes to work in.
3. A defense of the student’s written dissertation consisting of a public seminar, public question-and-answer period, and private defense of their work to their dissertation committee. Dissertation committees consist of at least four Northeastern faculty and one external faculty member.

A cumulative GPA of 3.000 is required for graduation. All PhD students are required to have at least one first-authored publication submitted to or accepted in a peer-reviewed journal prior to their defense. The PhD will be awarded following submission of a dissertation, approved by the candidate’s dissertation committee, to the College of Science.

Students who are admitted to the PhD program, complete the course work component of the curriculum, and prepare and defend a written thesis (as opposed to a more comprehensive dissertation) may, at the discretion of the graduate committee and their dissertation committee, be awarded a master’s degree (Master of Science in Ecology, Evolution, and Marine Biology). The MS degree will only be awarded in rare instances when students and/or their dissertation committee, after communication with the graduate committee, determine that the PhD is untenable.

Ecology, Evolution, and Marine Biology, PhD—Advanced Entry

The PhD in Ecology, Evolution, and Marine Biology (EEMB) program provides students with advanced course work and training in ecology,
evolution, and marine biology. Students admitted with a master's degree must take two semesters of colloquium. Transcripts detailing their previous course work will be submitted upon arrival to their dissertation committee and the marine and environmental sciences graduate committee to determine whether additional course work is required. The dissertation committee may require the student to pursue additional course work as needed to provide the necessary background for their program of study. Additional course work may also be required depending on the student's performance on written qualifying and oral examinations.

Students must pass three examinations during the course of their graduate studies:

1. A written examination consisting of questions posed by the student's written examination committee.
2. An oral examination by the student's dissertation committee consisting of an oral presentation and defense of the student's dissertation proposal and including questions about the research areas that the student proposes to work in.
3. A defense of the student's written dissertation consisting of a public seminar, public question-and-answer period, and private defense of their work to their dissertation committee. Dissertation committees consist of at least four Northeastern faculty and one external faculty member.

A cumulative GPA of 3.000 is required for graduation. All PhD students are required to have at least one first-authored publication submitted to or accepted in a peer-reviewed journal prior to their defense. The PhD will be awarded following submission of a dissertation, approved by the candidate's dissertation committee, to the College of Science.

**Marine Biology, MS—Three Seas Program**

The MS in Marine Biology—Three Seas Program provides students the opportunity to study marine biology in three distinct environments at three world-renowned research facilities in New England, the Caribbean, and the Pacific Northwest. An internship in the field and independent research project provide the capstone to the fifteen-month graduate program.

Much more than course work in a classroom, the MS in Marine Biology—Three Seas Program delivers inquiry-based curriculum in marine science during which our students formulate research questions, design and conduct critical experiments, and interpret and present results. You will have an opportunity not only learn science, you have an opportunity to learn how to do science and become a marine scientist.

This program is for students eager to broaden their knowledge of marine biology or who want to further refine their interests.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

**YEAR 1**
Students register for International Study—Three Seas Program (ABRS 5120) for the fall and spring terms of year 1.

**Fall Term**

Maxim Braverman, PhD, Professor, m.braverman@northeastern.edu

Graduate Programs Information  
www.math.neu.edu/graduate-programs (http://www.math.neu.edu/graduate-programs)

The graduate programs offer MS and PhD degrees in mathematics, as well as an MS degree in operations research and an MS degree in applied mathematics. The programs are designed to provide students with a broad overview of current mathematics and a strong command of an area of specialization.

**The Master of Science Degree**

This program offers students with a bachelor’s degree in mathematics or a related field an opportunity to broaden their knowledge in the several fields of mathematics and its applications. The program is designed to prepare graduates for careers in business, industry, or government.

**The Doctor of Philosophy Degree**

**TRACKS**  
- Pure mathematics  
- Discrete mathematics  
- Probability/statistics

**Programs**

**Doctor of Philosophy (PhD)**  
- Mathematics (p. 326)  
- Mathematics—Advanced Entry (p. 329)

**Master of Science (MS)**  
- Applied Mathematics (p. 331)  
- Mathematics (p. 331)

**Master of Science in Operations Research (MSOR)**  
- Operations Research (p. 332)

**Course Requirements**

Students entering with a bachelor’s degree are required to take 64 semester hours of course work divided between foundational and advanced offerings. Students entering the program will be allowed to place out of some (possibly all) of the eight basic-level courses; the graduate coordinator together with the first-year graduate advisor will determine the allowable course substitutions and will advise the student which foundational courses to take. Students may satisfy requirements for Algebra 1 (MATH 5111) and Analysis 1: Functions of One Variable (MATH 5101) by taking qualifying exams in algebra 1 and in analysis 1 at the start of the program. Students may satisfy foundational course requirements if they demonstrate proficiency by passing an assessment exam in the course at the beginning of the semester or by demonstrating that they have taken a similar course and have adequate knowledge of the course material (syllabus and transcript are required; a brief oral examination is also required in that case). Academic advising will happen just before the start of each term and during the add/drop period in order to plan a student’s course registration for the term. A complete listing of foundational and advanced courses is available from the Department of Mathematics and the graduate dean’s office. Students are not permitted to register for more than two “readings” courses and three “topics” courses for credit toward the degree without explicit permission from the graduate dean. A minimum GPA of 3.000 is required for degree conferral.

**Teaching Requirement**

Some teaching experience is required while in the program. Students must attend university-led TA training at the start of the program; attend a one-semester TA training course conducted by faculty from the Department of Mathematics teaching committee; spend one semester shadowing faculty in the undergraduate classroom; and perform recitations and grading for the undergraduate course they are shadowing.

**Qualifying Exams**

Qualifying exam sessions are given once in spring and once in fall. Students will be required to pass four qualifying exams: algebra 1, analysis 1, and two other exams. The possible additional topics for qualifying exams are algebra 2, analysis 2, combinatorics, geometry, ordinary differential equations, partial differential equations, probability, statistics, topology, and algebraic geometry. A qualifying exam may be taken twice by any student. Additional attempts may be allowed at the discretion of the graduate committee with permission from the graduate dean in the College of Science. Two qualifying exams should be passed no later than the end of the second year and all four by the end of the third year.

**Doctoral Candidacy**

PhD candidacy is reached when all of the following conditions are met:

- Completion of eight advanced courses
- Identification of an unsolved research problem
- Successful passing of four qualifying exams
- Assignment of PhD supervisor and creation of a one-page initial plan
- Completion of a three-page plan of research
- Completion of a ten-page progress report and a one-hour defense of proposal, presented to supervisor and three faculty members of graduate committee

**Dissertation Requirement**

Each candidate must complete a dissertation that embodies the results of extended research and makes an original contribution to the field. This work should give evidence of the candidate’s ability to carry out independent investigation and interpret, in a logical manner, the results of the research. There are two stages to this process:

- **Stage 1**: Students in the PhD program must have a dissertation supervisor within two years after joining the PhD program. The department views the failure of a student to find a supervisor within two years of joining the PhD program with concern and considers this sufficient cause to review the student’s status in the PhD program. The process of obtaining a dissertation supervisor always involves two choices—the student chooses the supervisor, and the supervisor chooses the student. For this reason, the department does not guarantee a dissertation supervisor for every student, but
the department recognizes its responsibility to help the student find a satisfactory match. This aid is usually provided by the student's graduate advisor, who should be familiar with the student's progress in finding a dissertation supervisor. The dissertation supervisor guides the student's further education as well as directs the student's dissertation. The dissertation itself must represent an original solution of a problem in the chosen area of mathematics that makes a significant contribution to the mathematical knowledge in that area. Students must enroll in Dissertation or Dissertation Continuation while fulfilling the dissertation requirements.

- **Stage 2 (Dissertation Defense):** The final oral examination on the dissertation is held in accordance with university regulations and given by a dissertation committee of four faculty members (three from the university, including the supervisor, and one from outside Northeastern University). The dissertation supervisor should propose this dissertation committee to the graduate committee for its approval at least one month before the PhD dissertation defense.

**Program Requirements**

**Bachelor's Degree Entry**
Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**
Four qualifying examinations
Annual review
Dissertation committee
Teaching requirement
Doctoral candidacy
Progress report and presentation
Dissertation defense

**Prerequisites**

**Algebra and Analysis**
MATH 5101 Analysis 1: Functions of One Variable 4
MATH 5111 Algebra 1 4

**Track**
Complete one of the following three tracks:

**PURE TRACK**

**Analysis**
MATH 5102 Analysis 2: Functions of Several Variables 4
or MATH 7232 Combinatorial Analysis

**Algebra**
MATH 5112 Algebra 2 4
or MATH 7314 Algebraic Geometry 1

**Foundational Courses**
Complete up to 16 semester hours from the following:
MATH 5104 Basics and Probability and Statistics
MATH 5105 Basics of Statistics and Stochastic Processes
MATH 5106 Basics of Complex Analysis
MATH 5107 Basics of Number Theory
MATH 5108 Methods for Teaching Math
MATH 5111 Algebra 1
MATH 5121 Topology 1
MATH 5122 Geometry 1
MATH 5976 Directed Study

**DISCRETE TRACK**

**Algebra**
MATH 5112 Algebra 2 4
or MATH 7232 Combinatorial Analysis

**Probability**
MATH 7241 Probability 1 4

**Foundational Courses**
Complete up to 16 semester hours from the following:
MATH 5102 Analysis 2: Functions of Several Variables
MATH 5104 Basics and Probability and Statistics
MATH 5105 Basics of Statistics and Stochastic Processes
MATH 5106 Basics of Complex Analysis
MATH 5107 Basics of Number Theory
MATH 5108 Methods for Teaching Math
MATH 5111 Algebra 1
MATH 5121 Topology 1
MATH 5122 Geometry 1
MATH 5976 Directed Study
MATH 5978 Independent Study
MATH 5984 Research
MATH 7201 Ordinary Differential Equations
MATH 7203 Numerical Analysis 1
MATH 7205 Numerical Analysis 2
MATH 7221 Topology 2
MATH 7222 Geometry 2
MATH 7232 Combinatorial Analysis
MATH 7233 Graph Theory
MATH 7235 Discrete Geometry 1
MATH 7245 Statistics for Health Sciences
MATH 7260 History of Mathematics
MATH 7314 Algebraic Geometry 1

**Advanced Course Work**

Complete 32 semester hours from the advanced course work list. Only two reading courses are allowed.

**PROBABILITY AND STATISTICS TRACK**

**Analysis**

Complete 4 semester hours from the following:

- MATH 5102 Analysis 2: Functions of Several Variables
- MATH 7203 Numerical Analysis 1
- MATH 7232 Combinatorial Analysis

**Probability**

- MATH 7241 Probability 1
- or MATH 7342 Mathematical Statistics

**Foundational Courses**

Complete up to 16 semester hours from the following:

- MATH 5102 Analysis 2: Functions of Several Variables
- MATH 5104 Basics and Probability and Statistics
- MATH 5105 Basics of Statistics and Stochastic Processes
- MATH 5106 Basics of Complex Analysis
- MATH 5107 Basics of Number Theory
- MATH 5108 Methods for Teaching Math
- MATH 5112 Algebra 2
- MATH 5121 Topology 1
- MATH 5122 Geometry 1
- MATH 5976 Directed Study
- MATH 5978 Independent Study
- MATH 5984 Research
- MATH 7201 Ordinary Differential Equations
- MATH 7203 Numerical Analysis 1
- MATH 7205 Numerical Analysis 2
- MATH 7221 Topology 2
- MATH 7222 Geometry 2
- MATH 7232 Combinatorial Analysis
- MATH 7233 Graph Theory
- MATH 7235 Discrete Geometry 1
- MATH 7241 Probability 1
- MATH 7245 Statistics for Health Sciences
- MATH 7260 History of Mathematics
- MATH 7314 Algebraic Geometry 1
- MATH 7341 Probability 2
- MATH 7342 Mathematical Statistics
- MATH 7343 Applied Statistics

**Advanced Course Work**

Complete 32 semester hours from the advanced course work list. Only two reading courses are allowed.

**Advanced Course Work List**

- MATH 7204 Complex Analysis
- MATH 7213 Algebra 3: Galois Theory

- MATH 7234 Optimization and Complexity
- MATH 7301 Functional Analysis
- MATH 7302 Partial Differential Equations 2
- MATH 7303 Complex Manifolds
- MATH 7311 Commutative Algebra
- MATH 7312 Lie Theory
- MATH 7313 Representation Theory
- MATH 7315 Algebraic Number Theory
- MATH 7316 Lie Algebras
- MATH 7321 Topology 3
- MATH 7322 Geometry 3
- MATH 7323 Differential Geometry 1
- MATH 7324 Differential Geometry 2
- MATH 7331 Algebraic Combinatorics
- MATH 7335 Discrete Geometry 2
- MATH 7344 Regression, ANOVA, and Design
- MATH 7345 Nonparametric Methods in Statistics
- MATH 7346 to MATH 7392
- MATH 7976 to MATH 8986
- MATH 9948 Modern Mathematical Research
- MATH 9984 Research
- MATH 9986 Research
- MATH 7721 Readings in Topology
- MATH 7722 Readings in Algebraic Topology
- MATH 7723 Readings in Geometric Topology
- MATH 7725 Readings in Singularities
- MATH 7730 Readings in Combinatorics
- MATH 7731 Readings in Combinatorics and Algebra
- MATH 7732 Readings in Combinatorial Geometry
- MATH 7733 Readings in Graph Theory
- MATH 7734 Readings in Algebra
- MATH 7735 Readings in Algebraic Geometry
- MATH 7736 Readings in Discrete Geometry
- MATH 7737 Readings in Commutative Algebra
- MATH 7741 Readings in Probability and Statistics
- MATH 7751 Readings: Analysis
- MATH 7752 Readings in Real Analysis
- MATH 7753 Readings in Geometric Analysis
- MATH 7754 Readings in Ordinary Differential Equations
- MATH 7755 Readings in Partial Differential Equations
- MATH 7771 Readings in Geometry
- MATH 7772 Readings in Coding Theory

**Dissertation**

Complete the following (repeatable) course twice:

- MATH 9990 Dissertation

**Program Credit/GPA Requirements**

64 total semester hours required

Minimum 3.000 GPA required
**Course Requirements**

Advanced students who enter the PhD program with a MS degree (or equivalent) will be allowed to place out of some (possibly all) of the eight basic-level courses; the graduate coordinator together with the first-year graduate advisor will determine the allowable course substitutions and will advise the student which foundational courses to take. Students may satisfy requirements for Algebra 1 (Algebra 1 (MATH 5111) and Analysis 1: Functions of One Variable (MATH 5101)) by taking qualifying exams in algebra 1 and in analysis 1 at the start of the program. Students may satisfy foundational course requirements if they demonstrate proficiency by passing an assessment exam in the course at the beginning of the semester or by demonstrating that they have taken a similar course and have adequate knowledge of the course material (syllabus and transcript are required; a brief oral examination is also required in that case). Mathematics, MS

A total of 32 semester hours, this program offers students with a bachelor’s degree in mathematics or a related field an opportunity to broaden their knowledge in the several fields of mathematics and its applications. The program is designed to prepare graduates for careers in business, industry, or government. Previous course work will be evaluated to determine proficiency in certain content areas and degree plan may be tailored accordingly. In some cases, a student may be required to take an assessment exam to determine content and knowledge proficiency. No course can be used to satisfy both a requirement and an elective. To qualify for degree conferral, students must obtain a minimum cumulative average of 3.000, equivalent to a grade of B.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Algebra 1
MATH 5101 Analysis 1: Functions of One Variable 4
MATH 5111 Algebra 1 4

Analysis 2
MATH 5102 Analysis 2: Functions of Several Variables 4
MATH 5112 Algebra 2 4

Algebra 2
MATH 5102 Analysis 2: Functions of Several Variables 4
or MATH 7232 Combinatorial Analysis 4

Math Electives
Complete 12 semester hours from the following subject area: 12
MATH

Open Electives
Complete 8 semester hours. These courses may be chosen from outside the Department of Mathematics with faculty approval. 8

Program Credit/GPA Requirements
32 total semester hours required
Minimum 3.000 GPA required

Dissertation
Complete the following (repeatable) course twice:
MATH 9990 Dissertation 0

Applied Mathematics, MS

Eight graduate courses (32 semester hours of credit) are required for the degree: three required courses and five elective courses. The required courses provide a basic training in mathematical methods, and the elective courses include a wide variety of advanced topics. In addition, the program allows up to two of the elective courses to be taken outside the Department of Mathematics. No course can be used to satisfy both a requirement and an elective.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Methods and Modeling
MATH 5131 Introduction to Mathematical Methods and Modeling 4

Algebra and Analysis
Complete one of the following: 4
MATH 5101 Analysis 1: Functions of One Variable
MATH 5111 Algebra 1
MATH 7241 Probability 1

Statistics
MATH 7342 Mathematical Statistics 4

Operations Research, MSOR

This program seeks to train students in the basic techniques and theory of operations research and their applications to real-world problems. Graduates should have developed their analytical skills to attack complex, large-scale optimization problems of both a deterministic and stochastic nature. Eight 4-semester-hour graduate courses are required for this degree. Previous course work will be evaluated to determine proficiency in certain content areas and degree plan may be tailored accordingly. In some cases, a student may be required to take an assessment exam to determine content and knowledge proficiency. No course can be used to satisfy both a requirement and an elective. To qualify for degree conferral, a minimum cumulative average of 3.000, equivalent to a grade of B, must be obtained. Some courses listed for this program are offered in the College of Engineering or the College of Computer and Information Systems.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

gradphysics@northeastern.edu

The Northeastern Department of Physics performs advanced research in condensed matter, fundamental particles and fields, biophysics, and complexity. Students are expected to have demonstrated a graduate-level understanding of basic physics concepts upon completion of the MS degree. The program for the PhD degree consists of the required course work, a qualifying examination, a preliminary research seminar,
the completion of a dissertation based upon original research performed by the student, and a dissertation defense upon completion of the dissertation. Based on these measures, students are expected to obtain a graduate-level understanding of basic physics concepts and demonstrate the ability to formulate a research plan, communicate orally a research plan, and conduct and present independent research.

Programs
Doctor of Philosophy (PhD)
- Physics (p. 333)
- Physics—Advanced Entry (p. 335)

Master of Science (MS)
- Physics (p. 338)

Physics, PhD

The Department of Physics offers a Doctor of Philosophy in Physics with specializations in different subfields that reflect the forefront research activities of the department, including biological physics, condensed matter physics, elementary particle physics, nanomedicine, and network science. The program for the PhD degree consists of the required coursework, a qualifying examination, a preliminary research seminar, the completion of a dissertation based upon original research performed by the student, and a dissertation defense upon completion of the dissertation. Based on these measures, students are expected to obtain a graduate-level understanding of basic physics concepts and demonstrate the ability to formulate a research plan, communicate orally a research plan, and conduct and present independent research.

Course Work
The required courses are grouped into two sets, Part 1 and Part 2, having a total of 42 semester hours as a minimum. Part 1 courses (first-year courses) are typically taken prior to the qualifying exam. Students without a master’s degree must complete all Part 1 courses in the first year to remain in good academic standing in the graduate program. Part 2 courses (second-year courses) may be taken before or after passing the qualifying exam.

Grade Requirements
The minimum grade required for the successful completion of the Part 1 courses is a B (3.000) average. Students will only be allowed to take the qualifying exam if they fulfill this requirement. The minimum grade required for the successful completion of Part 2 (excluding advanced research) is at least a B (3.000) average for the Part 2 courses. The Part 2 courses, including any makeup of grade-point-average deficiencies (see following), must be completed within two calendar years of passing the qualifying exam. The department expects students to complete the bulk of these courses in the first year after the qualifying exam. The cumulative average will be calculated each semester. No more than two courses or 8 semester hours of credit, whichever is greater, may be repeated in order to satisfy the requirement for the PhD degree. A student who does not maintain a 3.000 cumulative average for two consecutive semesters, or is otherwise not making satisfactory progress toward the PhD degree requirements, may be recommended for termination at the discretion of the graduate committee. Within the above limitations, a required course for which a grade of F is received must be repeated with a grade of C or better and may be repeated only once. In calculating the overall cumulative average, all graduate-level course work completed at the time of clearance for graduation will be counted.

Qualifying Exam Requirement
A student who fails to achieve the required B average for the Part 1 courses must petition the graduate committee in order to remain in the graduate program and be eligible to take the qualifying exam. A student who fails to achieve the required B average for the Part 2 courses must petition the graduate committee in order to remain in the graduate program. All students registered in the PhD program are required to pass a qualifying exam. The qualifying exam may include both written and oral parts.

The qualifying exam consists of two parts:

- **Part 1:** Classical physics (based on classical mechanics and mathematical methods), electromagnetic theory, and statistical physics.
- **Part 2:** Quantum physics (based on quantum mechanics and its applications) and statistical physics. The content of the qualifying exam will be based on the content of the first-year courses, excluding Principles of Experimental Physics (PHYS 5318). A syllabus is available and on request will be distributed by the graduate coordinator to any student prior to the exam.

The qualifying exam is given twice yearly: once prior to the start of the fall semester and again within the first two weeks of the start of the spring semester. The exam will consist of one day each on Part 1 (classical physics/mathematical methods, electromagnetism, and statistical physics) and Part 2 (quantum physics and statistical physics).

All students enrolled in the PhD program must take the fall qualifying exam after completing their first-year course of study with the required grade-point average. Students taking the exam for the first time must take both Part 1 and Part 2. A student who does not pass the exam on his or her first attempt must pass the exam the next time it is given in order to continue in the PhD program. However, a student who passes one part of the first attempt is not required to repeat that part.

A student who fails the written exam by less than 5 percent of the total possible score on the second attempt for that part will be automatically given an oral exam. A student who fails the written exam by more than 10 percent is excluded from taking an oral exam. These provisions apply separately to Parts 1 and 2 of the exam.

PhD Candidacy
Degree candidacy is established when the student has passed the qualifying examination and completed both the Part 1 and Part 2 course requirements. PhD candidacy may be achieved before completion of the advanced elective if the elective in the student’s specialization is not offered in a given year. The elective must be taken at the next opportunity. PhD degree candidacy is certified by the college. A maximum of five years after the establishment of doctoral degree candidacy is allowed for the completion of degree requirements.

PhD Dissertation Requirement
All PhD students are required to complete a dissertation based upon new and original research in one of the three following options:

- In one of the current theoretical or experimental research programs in the department, under direct supervision of an advisor from the Department of Physics. A dissertation committee will be formed consisting of the advisor, two full-time members of the department, and an additional member, either from within the department or from an outside department or institution.
- In a recognized interdisciplinary field involving another research area of the university, under the direct supervision of a faculty member
in that field. In this case, an interdisciplinary committee is formed under the approval of the graduate committee, consisting of the direct supervisor, a departmental advisor, one other member of the department, and an additional member of either the department or the external department.

- In an area of applied research in one of the industrial or high-technology laboratories associated with the department’s industrial PhD program. The direct supervisor is associated with the institution where the research is performed. In this case, a dissertation advisory committee is established by the graduate committee, consisting of the direct supervisor, the departmental advisor, and two other members of the department.

PhD students must select their departmental advisor no later than the end of the spring semester of their second year or their second semester after having passed the qualifying examination, whichever comes first. This process should start as soon as the student has identified a field of research or has passed the qualifying exam.

**PhD Dissertation Committee, Preliminary Thesis Proposal, and Preliminary Research Seminar**

By the end of the spring semester of the third year or the second semester in which the student is enrolled for PhD dissertation, whichever comes first, each PhD student must have an approved dissertation committee and thesis proposal.

The student (with the aid and approval of his or her thesis advisor) will submit a PhD thesis proposal to the graduate committee clearly outlining a plan to carry out new and original research in the context of previously published research in the scientific literature and also describe the methodologies to be employed. The thesis proposal is limited to 15 pages or less, including references. A proposed makeup of the dissertation committee will be submitted at the same time.

The graduate committee will evaluate the merit of the proposal and make recommendations for improvements when necessary, including any changes to the composition of the dissertation committee. No more than two submissions for a particular proposal may be made. In the case where a revised proposal does not meet a minimum academic standard that provides a basis for making such improvements, the graduate committee may instruct the student to select a different thesis topic or advisor.

After approval by the graduate committee, the proposal is circulated to the general faculty for comments. If the graduate coordinator receives any objections, the proposal will be referred back to the graduate committee for final resolution.

After the proposal and dissertation committee have been approved, the student will make a public presentation of the material in the preliminary research seminar before the dissertation committee in a format open to the full department and advertised one week in advance. The dissertation committee will then meet in closed session to evaluate the seminar. The preliminary research seminar must take place no later than the semester after the thesis proposal is approved and, normally, in the same semester.

In the event that the dissertation advisor is changed, a new committee must be formed, with the approval of the graduate committee, and a new preliminary research seminar given.

**PhD Dissertation Defense**

The dissertation defense consists of a public presentation, followed by a question period conducted by the dissertation committee and limited to them and the department faculty. The date of the dissertation presentation must be publicized and a copy of the thesis deposited with the graduate secretary at least one week prior to the defense. If during this posting period or in the two business days following the defense a written objection to the thesis is lodged with the department chair by a member of the faculty, the chair may appoint an ad hoc postdefense review committee to provide advice on the scientific issues raised by the objection. Students should note that they must be registered for Dissertation or Dissertation Continuation during the semester in which they defend their dissertation and that they should schedule their defenses well in advance of the end of the semester in order to accommodate the review/waiting period and the time required to deposit the thesis.

The final dissertation defense is held in accordance with the College of Science regulations.

**Transfer Credit**

Students must petition in writing through the graduate committee to the director of graduate student services for all transfer credit. A copy of an official transcript must be attached to the Request for Transfer Credit form. A maximum of 8 semester hours of credit obtained at another institution may be accepted toward the PhD degree provided that the credits transferred consist of a grade of B or better, are graduate-level courses, have been earned at an accredited U.S. institution, and have not been used toward any other degree. Grades are not transferred.

**Course Waivers**

Course waivers may be accepted toward the PhD degree course requirements, though they will not change the numbers of credits required for the program. The student must have received a B grade or better in equivalent graduate-level core courses that have been earned at an accredited institution. Students must petition in writing to the graduate committee for all course waivers and provide documentation in the form of official transcripts to support their petition.

**Residence Requirement**

The residence requirement is satisfied by at least one year of full-time graduate work (i.e., enrollment in PhD Dissertation, for two consecutive semesters). Students must be continually enrolled throughout the pursuit of the dissertation.

**Internship Option**

A PhD candidate may spend one year in a participating high-technology, industrial, or government laboratory immediately after passing the PhD qualifying examination. In this program, the student is expected to remain in touch with the university by taking one course per semester at the university and by frequent contact with a faculty advisor. After the one-year paid internship, the student returns to the university to do the dissertation. Eligibility for this program is contingent on acceptance both by the department and by the external laboratory.

**Program Requirements**

**Bachelor’s Degree Entrance**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

Two qualifying examinations
Annual review
Candidacy
Preliminary research seminar proposal with proposed dissertation committee
Preliminary research seminar talk
### Year 1

#### Fall Term
- **PHYS 7210** Introduction to Research in Physics 
- **PHYS 7301** Classical Mechanics/Math Methods 
- **PHYS 7302** Electromagnetic Theory 
- **PHYS 7315** Quantum Theory 1

#### Spring Term
- **PHYS 5318** Principles of Experimental Physics 
- **PHYS 7210** Introduction to Research in Physics 
- **PHYS 7305** Statistical Physics 
- **PHYS 7316** Quantum Theory 2

### Year 2

**Complete two of the following:**
- **PHYS 7323** Elementary Particle Physics
- **PHYS 7324** Condensed Matter Physics
- **PHYS 7731** Biological Physics 1

### SPECIALIZATION OPTIONS

Students may elect to pursue one of the following specialization options. Students must have a faculty mentor and preapproval to enroll in the specialization courses.

#### General Option
- Requires 10 semester hours
- Complete the following:
  - **PHYS 7321** Computational Physics
  - **PHYS 9984** Advanced Research
- Complete one of the following:
  - **PHYS 7733** Topics: Elementary Particle Physics and Cosmology
  - **PHYS 7734** Topics: Condensed Matter Physics
  - **PHYS 7741** Biological Physics 2

#### Nanomedicine Option
- Requires 10 semester hours
- **NNMD 5270** Introduction to Nanomedicine Science and Technology
- **PHYS 9984** Advanced Research

#### Network Science Option
- Requires 10 semester hours
- **PHYS 9984** Advanced Research
- **PHYS 5116** Complex Networks and Applications
- **PHYS 7731** Biological Physics 1
- **PHYS 9984** Advanced Research

#### Dissertation Courses

- Complete the following (repeatable) course twice:
  - **PHYS 9990** Dissertation
  - Then register for the following course every term until graduation:
    - **PHYS 9996** Dissertation Continuation

### Program Credit/GPA Requirements

- **42 total semester hours required**
- **Minimum 3.000 GPA required**

### PhD Specialization Options

By approval of the graduate committee, a specialization in biological physics may take a graduate course in biology, physics, or chemistry from an approved course list in place of Biological Physics 2 (PHYS 7741). Additional appropriate courses may also be substituted by approval of the graduate committee.

Students who take Biological Physics 1 (PHYS 7731) and Biological Physics 2 (PHYS 7741) or an approved BIOL or CHEM course will receive a PhD in physics with a biological physics specialization (if it is desired to list a specialization).\(^1\)

Students who take Elementary Particle Physics (PHYS 7323) and Topics: Elementary Particle Physics and Cosmology (PHYS 7733) will receive a PhD in physics with a particle physics specialization (if it is desired to list a specialization).\(^1\)

Students who take Condensed Matter Physics (PHYS 7324) and Topics: Condensed Matter Physics (PHYS 7734) will receive a PhD in physics with a condensed matter physics specialization (if it is desired to list a specialization).\(^1\)

Students who take Complex Networks and Applications (PHYS 5116) and Network Science Data (PHYS 7331) will receive a PhD in physics with a network science specialization (if it is desired to list a specialization).\(^1\)

Students who take Introduction to Nanomedicine Science and Technology (NNMD 5270) and Nanomedicine Research Techniques (NNMD 5370) will receive a PhD in physics with a nanomedicine specialization (if it is desired to list a specialization).\(^1\)

All other combinations that meet the criteria for graduation result in a general PhD in physics. Multiple specializations are allowed if the individual requirements for each specialization are met.

\(^1\) Note that the specialization will not appear on the degree diploma or on the official transcript but can be listed as the field of study on CVs and grant proposals.

---

### Physics, PhD—Advanced Entry

The Department of Physics offers a Doctor of Philosophy in Physics with specializations in different subfields that reflect the forefront research activities of the department, including biological physics, condensed matter physics, elementary particle physics, nanomedicine, and network science. The program for the PhD degree consists of the required course work, a qualifying examination, a preliminary research seminar, the completion of a dissertation based upon original research performed by the student, and a dissertation defense upon completion of the dissertation. Based on these measures, students are expected to obtain a graduate-level understanding of basic physics concepts and demonstrate the ability to formulate a research plan, communicate orally a research plan, and conduct and present independent research.

### Course Work

The required courses are grouped into two sets, Part 1 and Part 2, having a total of 42 semester hours as a minimum. Part 1 courses (first-year courses) are typically taken prior to the qualifying exam. Any new, entering student with a master’s degree from a U.S. institution may take the qualifying exam upon arrival at Northeastern University. Failure of the exam at this time will not be used to limit the two opportunities...
to take the examination in the future. Students who successfully pass both Part 1 and Part 2 of the qualifying exam on entry are exempted from the first-year course work except for Principles of Experimental Physics (PHYS 5318), which all students are required to take.

**Grade Requirements**

The minimum grade required for the successful completion of the Part 1 courses is a B (3.000) average. Students will only be allowed to take the qualifying exam if they fulfill this requirement. The minimum grade required for the successful completion of Part 2 (excluding advanced research), is at least a B (3.000) average for the Part 2 courses. The Part 2 courses, including any makeup of grade-point-average deficiencies (see following), must be completed within two calendar years of passing the qualifying exam. The department expects students to complete the bulk of these courses in the first year after the qualifying exam. The cumulative average will be calculated each semester. No more than two courses or 8 semester hours of credit, whichever is greater, may be repeated in order to satisfy the requirement for the PhD degree. A student who does not maintain a 3.000 cumulative average for two consecutive semesters, or is otherwise not making satisfactory progress toward the PhD degree requirements, may be recommended for termination at the discretion of the graduate committee. Within the above limitations, a required course for which a grade of F is received must be repeated with a grade of C or better and may be repeated only once. In calculating the overall cumulative average, all graduate-level course work completed at the time of clearance for graduation will be counted.

**Qualifying Exam Requirement**

A student who fails to achieve the required B average for the Part 1 courses must petition the graduate committee in order to remain in the graduate program and be eligible to take the qualifying exam. A student who fails to achieve the required B average for the Part 2 courses must petition the graduate committee in order to remain in the graduate program. All students registered in the PhD program are required to pass a qualifying exam. The qualifying exam may include both written and oral parts. Any new, entering student with a master's degree from a U.S. institution may take the qualifying exam upon arriving at Northeastern University. Failure of the exam at this time will not be used to limit the two opportunities to take the examination in the future.

The qualifying exam consists of two parts:

- **Part 1**: Classical physics (based on classical mechanics and mathematical methods), electromagnetic theory, and statistical physics.
- **Part 2**: Quantum physics (based on quantum mechanics and its applications) and statistical physics. The content of the qualifying exam will be based on the content of the first-year courses, excluding (PHYS 5318). A syllabus is available and on request will be distributed by the graduate coordinator to any student prior to the exam.

The qualifying exam is given twice yearly: once prior to the start of the fall semester and again within the first two weeks of the start of the spring semester. The exam will consist of one day each on Part 1 (classical physics/mathematical methods, electromagnetism, and statistical physics) and Part 2 (quantum physics and statistical physics).

Students who enter with a Master of Science degree from a U.S. institution may take the exam at the first opportunity after entering the program. Students who successfully pass both Part 1 and Part 2 of the qualifying exam on entry are exempted from the first-year courses except for (PHYS 5318), which all students must take.

All students enrolled in the PhD program must take the fall qualifying exam after completing their first-year course of study with the required grade-point average. Students taking the exam for the first time must take both Part 1 and Part 2. A student who does not pass the exam on his or her first attempt must pass the exam the next time it is given in order to continue in the PhD program. However, a student who passes one part of the first attempt is not required to repeat that part.

A student who fails the written exam by less than 5 percent of the total possible score on the second attempt for that part will be automatically given an oral exam. A student who fails the written exam by more than 10 percent is excluded from taking an oral exam. These provisions apply separately to Parts 1 and 2 of the exam.

**PhD Candidacy**

Degree candidacy is established when the student has passed the qualifying examination and completed both the Part 1 and Part 2 course requirements. PhD candidacy may be achieved before completion of the advanced elective if the elective in the student’s specialization is not offered in a given year. The elective must be taken at the next opportunity. PhD degree candidacy is certified by the college. A maximum of five years after the establishment of doctoral degree candidacy is allowed for the completion of degree requirements.

**PhD Dissertation Requirement**

All PhD students are required to complete a dissertation based upon new and original research in one of the three following options:

- In one of the current theoretical or experimental research programs in the department, under direct supervision of an advisor from the Department of Physics. A dissertation committee will be formed consisting of the advisor, two full-time members of the department, and an additional member, either from within the department or from an outside department or institution.
- In a recognized interdisciplinary field involving another research area of the university, under the direct supervision of a faculty member in that field. In this case, an interdisciplinary committee is formed under the approval of the graduate committee, consisting of the direct supervisor, a departmental advisor, one other member of the department, and an additional member of either the department or the external department.
- In an area of applied research in one of the industrial or high-technology laboratories associated with the department's industrial PhD program. The direct supervisor is associated with the institution where the research is performed. In this case, a dissertation advisory committee is established by the graduate committee, consisting of the direct supervisor, the departmental advisor, and two other members of the department.

PhD students must select their departmental advisor no later than the end of the spring semester of their second year or their second semester after having passed the qualifying examination, whichever comes first. This process should start as soon as the student has identified a field of research or has passed the qualifying exam.

**PhD Dissertation Committee, Preliminary Thesis Proposal, and Preliminary Research Seminar**

By the end of the spring semester of the third year or the second semester in which the student is enrolled for PhD dissertation, whichever comes first, each PhD student must have an approved dissertation committee and thesis proposal.

The student (with the aid and approval of his or her thesis advisor) will submit a PhD thesis proposal to the graduate committee clearly outlining
a plan to carry out new and original research in the context of previously published research in the scientific literature and also describe the methodologies to be employed. The thesis proposal is limited to 15 pages or less, including references. A proposed makeup of the dissertation committee will be submitted at the same time.

The graduate committee will evaluate the merit of the proposal and make recommendations for improvements when necessary, including any changes to the composition of the dissertation committee. No more than two submissions for a particular proposal may be made. In the case where a revised proposal does not meet a minimum academic standard that provides a basis for making such improvements, the graduate committee may instruct the student to select a different thesis topic or advisor.

After approval by the graduate committee, the proposal is circulated to the general faculty for comments. If the graduate coordinator receives any objections, the proposal will be referred back to the graduate committee for final resolution.

After the proposal and dissertation committee have been approved, the student will make a public presentation of the material in the preliminary research seminar before the dissertation committee in a format open to the full department and advertised one week in advance. The dissertation committee will then meet in closed session to evaluate the seminar. The preliminary research seminar must take place no later than the semester after the thesis proposal is approved and, normally, in the same semester.

In the event that the dissertation advisor is changed, a new committee must be formed, with the approval of the graduate committee, and a new preliminary research seminar given.

**PhD Dissertation Defense**

The dissertation defense consists of a public presentation, followed by a question period conducted by the dissertation committee and limited to them and the department faculty. The date of the dissertation presentation must be publicized and a copy of the thesis deposited with the graduate secretary at least one week prior to the defense. If during this posting period or in the two business days following the defense a written objection to the thesis is lodged with the department chair by a member of the faculty, the chair may appoint an ad hoc postdefense review committee to provide advice on the scientific issues raised by the objection. Students should note that they must be registered for Dissertation or Dissertation Continuation during the semester in which they defend their dissertation and that they should schedule their defenses well in advance of the end of the semester in order to accommodate the review/waiting period and the time required to deposit the thesis.

The final dissertation defense is held in accordance with the College of Science regulations.

**Transfer Credit**

Students must petition in writing through the graduate committee to the director of graduate student services for all transfer credit. A copy of an official transcript must be attached to the Request for Transfer Credit form. A maximum of 8 semester hours of credit obtained at another institution may be accepted toward the PhD degree provided that the credits transferred consist of a grade of B or better, are graduate-level courses, have been earned at an accredited U.S. institution, and have not been used toward any other degree. Grades are not transferred.

**Course Waivers**

Course waivers may be accepted toward the PhD degree course requirements, though they will not change the numbers of credits required for the program. The student must have received a B grade or better in equivalent graduate-level core courses that have been earned at an accredited institution. Students must petition in writing to the graduate committee for all course waivers and provide documentation in the form of official transcripts to support their petition.

**Residence Requirement**

The residence requirement is satisfied by at least one year of full-time graduate work (i.e., enrollment in PhD Dissertation, for two consecutive semesters). Students must be continually enrolled throughout the pursuit of the dissertation.

**Internship Option**

A PhD candidate may spend one year in a participating high-technology, industrial, or government laboratory immediately after passing the PhD qualifying examination. In this program, the student is expected to remain in touch with the university by taking one course per semester at the university and by frequent contact with a faculty advisor. After the one-year paid internship, the student returns to the university to do the dissertation. Eligibility for this program is contingent on acceptance both by the department and by the external laboratory.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

- Two qualifying examinations*
- Annual review
- Candidacy
- Preliminary research seminar proposal with proposed dissertation committee
- Preliminary research seminar talk
- Dissertation defense

*Note: Any new, entering student with a master's degree from a U.S. institution may take the qualifying exam upon arriving at Northeastern University. Failure of the exam at this time will not be used to limit the two opportunities to take the examination in the future.

**Requirements**

**Course Work**

Students entering with an approved MS degree from a U.S. institution will be required to take 10 semester hours of courses. The courses required will be determined by the graduate coordinator based on the student's transcripts.

Complete the following:

**Program Credit/GPA Requirements**

10 total semester hours required
Minimum 3.000 GPA required
The Department of Physics offers Master of Science degrees with several options. The standard physics MS can be obtained by taking a specified set of courses without an MS thesis. Alternatively, an MS thesis may substitute for 8 credit hours of course work. Both of these options may be pursued either full time or part time. Upon completion of the MS degree in physics, students should be able to apply graduate-level knowledge and solve problems in the areas of electrodynamics, quantum mechanics, classical mechanics, statistical mechanics, and advanced mathematical methods.

Grade Requirements
To qualify for the MS degree, a cumulative average of 3.000, equivalent to a grade of B, must be obtained. No more than two courses or 6 semester hours of credit, whichever is greater, may be repeated in order to satisfy the requirements for the MS degree. A student who does not maintain a 3.000 cumulative average for two consecutive semesters, or is otherwise not making satisfactory progress toward the MS degree requirements, may be recommended for termination at the discretion of the graduate committee.

Within the above limitations, a required course for which a grade of F is received must be repeated with a grade of C or better and may be repeated only once. Elective courses in which an F has been received may be repeated once to obtain a C or better.

Transfer Credit
Students must petition, in writing, through the graduate committee to the director of graduate student services for all transfer credit. An official transcript must be attached to the Request for Transfer Credit form. A maximum of 8 semester hours of credit obtained at another institution may be accepted toward the MS degree provided that the credits transferred consist of a grade of B or better in graduate-level courses, have been earned at an accredited U.S. institution, and have not been used toward any other degree. Grades are not transferred.

Current MS Students Interested in the PhD Program
MS students interested in applying to the PhD program must complete the internal admission application.

Special Student Status
Special students are allowed to earn credit for a maximum of 12 semester hours. Students interested in taking more than 12 semester hours must make a formal application to the degree program online.

Course Work
There is a total of 32 semester hours of course work required as a minimum. There are two options for the MS degree:

Option 1 is the standard physics MS with or without an MS thesis. Up to 8 semester hours of courses can be substituted with an MS thesis.

Option 2 is the MS with a specialization (up to 23 semester hours of courses) in applied physics, engineering physics, biophysics, chemical physics, material physics, mathematical physics, and computational physics.

Graduate students desiring the MS with thesis option should arrange a thesis with a faculty advisor. The student may choose a field of research from three possible areas as outlined under the PhD dissertation section. The thesis must demonstrate the individual’s capacity to execute independent work based on original material. The thesis must be approved by the graduate committee. The thesis may be completed in one semester (e.g., summer semester) or in consecutive semesters. Students who have not completed their thesis after the required number of thesis credits (12 semester hours) must register for MS Thesis with the appropriate course number each subsequent semester until the thesis is approved by the graduate school and submitted electronically to Proquest.

Both options require a minimum of 32 semester hours of graduate credit. The 32 semester hours may include up to 8 semester hours of transfer credit as approved by the physics department’s graduate committee and the graduate school.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Required Core

| Fall Term 1 | PHYS 7301 Classical Mechanics/Math Methods | 4 |
| PHYS 7302 Electromagnetic Theory | 4 |
| PHYS 7315 Quantum Theory 1 | 4 |
| May be taken either first or second year: |
| PHYS 7321 Computational Physics | 4 |

| Spring Term 1 | PHYS 7305 Statistical Physics | 4 |
| PHYS 7316 Quantum Theory 2 | 4 |

Options
- Course work
- Thesis
- Thesis with specialization

COURSE WORK OPTION
Note: In consultation with your faculty advisor you may choose an area of specialization from physics, engineering, chemistry, biology, mathematics, psychology, or computer science. Additional elective courses are listed in the PhD program.

Electives
Complete 8 semester hours from the following:

| PHYS 5111 Astrophysics and Cosmology |
| PHYS 5113 Introduction to Particle and Nuclear Physics |
| PHYS 5114 Physics of Advanced Materials |
| PHYS 5115 Quantum Mechanics |
| PHYS 5116 Complex Networks and Applications |
| PHYS 5260 Introduction to Nanoscience and Nanotechnology |
| PHYS 5318 Principles of Experimental Physics |
| PHYS 7323 Elementary Particle Physics |
| PHYS 7324 Condensed Matter Physics |
| PHYS 7731 Biological Physics 1 |

THESIS

| Thesis |
| PHYS 7990 Thesis | 1-4 |

Elective
Complete 4 semester hours from the following: 4
Applied physics, engineering physics, biophysics, chemical physics, materials physics, mathematical physics, or computational physics.

**Thesis**

| PHYS 7990 | Thesis | 1-4 |

**Core/Electives**

Complete course work in consultation with faculty advisor. 28

**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.00 GPA required

Note that the specialization will not appear on the degree diploma or on the official transcript but can be listed as the field of study on CVs and grant proposals.

The PhD program in the Department of Psychology covers a wide spectrum of contemporary behavioral science within a close-knit community of faculty and students. The program offers four distinct areas of experimental emphasis: behavioral neuroscience, cognition, perception, and social/personality. The program does not offer training in clinical or counseling psychology. The objective of the PhD program is to prepare students to become experts in research and teaching in psychology. To accomplish this goal, the department takes a mentoring approach whereby the graduate students are apprentices in faculty laboratories, working closely with their faculty mentors throughout their time in the program. The basic apprenticeship relationship is supplemented by other activities, such as required courses (concentrated in the first and second years), advanced seminars and/or course work in this as well as other departments or universities, a colloquium series, assignments as teaching assistants, the master’s project, and the dissertation and its oral defense. After the first year, the structure of the doctoral program, including course work, is flexible and assumes that the process of learning and scientific discovery must be individualized.

Graduate students also have an opportunity to develop their teaching and research skills through close mentoring of undergraduate research assistants. The PhD program is a five-year, twelve-months-per-year program.

The dissertation committee must include at least three tenured or tenure-track faculty members from within the psychology department—two from the student’s interest area and one from another area. The oral defense committee consists of the dissertation committee plus additional tenured and tenure-track faculty members from the psychology department.

**Program Requirements**

**Bachelor’s Degree Entrance**

Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**

First-year proseminar paper

Master's proposal

Master's paper

Master's presentation

Annual review

Dissertation committee

Dissertation proposal

Dissertation

Dissertation defense

At least two assigned courses as teaching assistant

**Core Course Work**

All graduate courses within the Department of Psychology are graded S/U. A grade of S is required in each psychology department course.

Psychology, PhD—Advanced Entry

The PhD program in the Department of Psychology covers a wide spectrum of contemporary behavioral science within a close-knit community of faculty and students. The program offers four distinct areas of experimental emphasis: behavioral neuroscience, cognition, perception, and social/personality. The program does not offer training in clinical or counseling psychology. The objective of the PhD program is to prepare students to become experts in research and teaching in psychology. To accomplish this goal, the department takes a mentoring approach whereby the graduate students are apprentices in faculty laboratories, working closely with their faculty mentors throughout their time in the program. The basic apprenticeship relationship is supplemented by other activities, such as required courses (concentrated in the first and second years), advanced seminars and/or course work in this as well as other departments or universities, a colloquium series, assignments as teaching assistants, the master’s project, and the dissertation and its oral defense. After the first year, the structure of the doctoral program, including course work, is flexible and assumes that the process of learning and scientific discovery must be individualized. Graduate students also have an opportunity to develop their teaching and research skills through close mentoring of undergraduate research assistants. The PhD program is a five-year, twelve-months-per-year program.

For students who enter the program with a suitable master’s degree, degree candidacy is established through completion of a set of requirements determined on an individual basis. An additional 20 semester hours beyond the master’s degree are required for the PhD degree. The dissertation committee must include at least three tenured or tenure-track faculty members from within the psychology department—two from the student’s interest area and one from another

General Regulations (http://www.northeastern.edu/cssh/graduate/current_students)

Graduate education at Northeastern integrates the highest level of scholarship across disciplinary boundaries with significant research and experiential learning opportunities. This multidimensional learning environment seeks to develop students' critical thinking and creative problem-solving skills while introducing them to new perspectives in their fields. Our doctoral, master's, and professional degree programs seek to produce graduates who are well prepared for the diverse demands of careers in academia, industry, and the professions.

Graduate Programs Booklet (http://www.northeastern.edu/cssh/scbj/graduate)

The School of Criminology and Criminal Justice at Northeastern University seeks to prepare students for professional and research careers in criminal justice, criminology, and related fields by applying multidisciplinary and comparative social science to understand, predict, and explain crime and to contribute to the development of public policy within urban communities. Using an active-learning approach, the school seeks to develop its students intellectually and ethically, while providing them with a keen appreciation for the complexities of crime and public and private efforts to make communities safer and to ensure justice.

The program is full-time and is small and student-centered. It is expected that students entering the program with a bachelor’s degree will be able to complete the program in four to five years, and students entering with a master’s degree will be able to complete the program in three to five years.

Year one in the doctoral program offers students an opportunity to obtain a broad foundational knowledge in the discipline: two semesters of criminological theory, two semesters of statistics, and one semester of advanced research methods. To ensure that all students have mastered the foundational material emphasized across the required courses for the PhD program and can successfully integrate theory, research, and policy, all PhD students take a “foundations” qualifying examination at the end of their first year in the doctoral program.

After demonstrating mastery of the foundational knowledge in year one, students devote themselves to a more specific area of research in year two. Students demonstrate this commitment through a second qualifying examination, which consists of two stages: an area exam and a publishable paper. The two stages of this exam are required and should be related.

Following successful completion of the first and second qualifying examinations, and required and elective course work (totaling 50 semester hours), the students proceed to a formal dissertation proposal defense.

### Doctoral Degree Candidacy

A student achieves candidacy when he or she has successfully completed all course work (50 semester hours for students entering with a bachelor’s degree), passed the foundations qualifying examination, the area qualifying examination, and deposited the final version of their
dissertation proposal (approved by their full committee) with the school's graduate program office. Candidacy is certified, in writing, by the college.

Dissertation

Complete the following (repeatable) course twice:
The master’s program in criminal justice at Northeastern University concentrates both on the problem of crime as a form of deviant behavior and on the criminal justice and private security systems that deal with it. The program emphasizes a systems approach to criminal justice, stressing policy development and analysis, as well as the impact these policies have on the individuals and organizations charged with delivering justice in a fair and equitable manner. Broad in concept and scope, it encompasses such related disciplines as law, sociology, political science, psychology, criminology, and public administration.

The master’s program is comprised of required courses encompassing both substantive and technical skills. Additionally, students choose elective courses from offerings within the graduate program in criminal justice or in other graduate programs in the College of Social Sciences and Humanities. The course offerings afford students the flexibility to customize their own programs, which may include an internship, directed study, or master’s thesis.

Faculty members in the graduate program represent several different academic disciplines, and teaching activities vary in nature depending on the instructors’ specific objectives. The faculty’s specialized interests help make possible a broad range of program offerings, including courses on the criminal justice process, victimology, security management, criminal law, juvenile justice, law and psychology, and terrorism.

Briefly stated, the graduate program in criminal justice endeavors to:

• Assist in developing criminal justice and private security leaders capable of assuming responsibility for policy planning and administration
• Offer students an opportunity to acquire the necessary skills and knowledge to conduct applied research while assisting them in developing the ability to apply this research in a variety of criminal justice settings
• Provide an opportunity for a solid educational foundation for those who wish to pursue more advanced graduate study beyond the Master of Science degree

Graduate study in criminal justice may be pursued on either a full- or part-time basis. All candidates for the Master of Science in Criminal Justice degree must successfully complete a minimum of 30 semester hours of credit in course work.

**Global Criminology, Graduate Certificate**

The Certificate in Global Criminology is designed to respond to recent developments in the field of international and global criminology and criminal justice that require different and specific knowledge among law enforcement personnel, nongovernmental organization (NGO) staff, as well as local and national policymakers. As borders become more permeable and crime becomes more sophisticated, crime has become increasingly global. The graduate certificate highlights how globalization and internationalization affect crime and crime control, linking the supranational, the national, and local domains.

Globalization of world economies, communications, and transportation requires criminologists, criminal justice practitioners, policymakers, and law enforcement personnel to become more globally minded. This certificate program offers students an opportunity to learn how the processes of globalization influence crime and criminal justice across the globe, with emphases on globalization and recent developments in global crime; global trends in policing and security; convergence and divergence in criminal justice and penal policy; and international criminal justice, war crimes, and the global protection of human rights.

The certificate may be completed on its own or in conjunction with other graduate degree programs including, but not limited to, criminology and criminal justice, sociology, public administration, urban and regional policy, and international affairs. Students are expected to complete the four-course certificate in one year.

Master of Arts (MA)
- English (p. 348)

Graduate Certificate
- Digital Humanities (p. 350)

The PhD program seeks to train students to be productive scholars and teachers in the fields of both literary studies and rhetoric and composition. In course work, students read and analyze the important texts, current issues, and critical methodologies of the discipline. Drawing on the breadth of this preparation, students demonstrate their ability to recognize and produce scholarly arguments in designing the three comprehensive field papers in areas of scholarly interest and competence corresponding to recognized and emerging fields of study. Finally, the dissertation offers students an opportunity to design a focused research project in consultation with a dissertation advisor. Throughout the program, faculty work closely with doctoral students to develop their scholarly and professional identities in preparation for careers in academia.

Academic Standing/Progress
To be considered in good academic standing, PhD students must be making progress toward their degree requirements, including maintaining a 3.500 minimum cumulative grade-point average.

Doctoral Degree Candidacy
Students entering with a relevant BA must complete 42 semester hours, complete the language requirement, and pass the comprehensive examination.

**Exam Preparation**
ENGL 8960 Exam Preparation—Doctoral 0

**Research**
Complete the following (repeatable) course twice:
ENGL 9986 Research 0

**Dissertation**
Complete the following (repeatable) course twice:
ENGL 9990 Dissertation 0

**Program Credit/GPA Requirements**
- 42 total semester hours required
- Minimum 3.500 GPA required

**English, PhD—Advanced Entry**

The PhD program seeks to train students to be productive scholars and teachers in the fields of both literary studies and rhetoric and composition. In course work, students read and analyze the important texts, current issues, and critical methodologies of the discipline. Drawing on the breadth of this preparation, students demonstrate their ability to recognize and produce scholarly arguments in designing the three comprehensive field papers in areas of scholarly interest and competence corresponding to recognized and emerging fields of study. Finally, the dissertation offers students an opportunity to design a focused research project in consultation with a dissertation advisor. Throughout the program, faculty work closely with doctoral students to develop their scholarly and professional identities in preparation for careers in academia.

**Academic Standing/Progress**
To be considered in good academic standing, PhD students must be making progress toward their degree requirements, including maintaining a 3.500 minimum cumulative grade-point average.

**Doctoral Degree Candidacy**
Students entering with a relevant MA must complete 21 semester hours, complete the language requirement, and pass the comprehensive examination.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**Milestones**
- Comprehensive examination
- Annual review
- Two languages
- Dissertation committee
- Dissertation prospectus
- Dissertation defense

**Open Electives**

Digital Humanities, Graduate Certificate

Digital humanities (DH) is an emerging field of research that is interdisciplinary in scope and collaborative in nature. The field is developing in relation to new digital technologies that have changed the methods and opportunities for research and teaching in existing humanities fields. Digitized texts are now read and accessed in new ways; digitized corpora of texts make possible new modes of quantitative and qualitative analysis (including “distant reading,” text mining, mapping, and network analysis); and modes of encoding, aggregating, and connecting texts enable the creation of new archival resources that are changing our understanding of the archive itself as well as revealing new historical, literary, and cultural patterns.

The field is new and developing rapidly and many students are eager for training in this area—both because DH is at the cutting edge of disciplinary work and because it offers new opportunities for employment within the academy and outside of it. The Certificate in Digital Humanities will allow students to pursue an organized course of study in DH with the interdisciplinary faculty of the NULab for Texts, Maps, and Networks (http://www.northeastern.edu/nulab) while completing requirements for their degrees in existing doctoral and master’s programs. This is not a stand-alone certificate; rather, it will be completed by students in the course of their existing program of study.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Graduate Programs Booklet (http://www.northeastern.edu/cssh/history/graduate/current-student-resources)

Graduate work in history focuses on global and world history, which study the interactions among geographical regions and historical processes around the globe. Students at both the master’s and doctoral levels concentrate their work on the history of regions or peoples in Africa, Asia, Europe, Latin America, or the United States, with attention to the intersections and connections between national, regional, and global developments. The Department of History also offers a master’s degree with a concentration in public history that emphasizes the study of topics such as material culture, historical exhibits and museums, historical agencies, and archival administration. Recent doctoral students have been the recipients of major fellowships for conducting dissertation research abroad, including Fulbright, Fulbright-Hays, Social Science Research Council, and Chateaubriand fellowships.

History, PhD

The PhD program, with a focus on global, transnational, and comparative history, seeks to train research historians who plan to teach at the college and university level. Systematic training in theory and methodology and preparation for college teaching are distinctive features of the Northeastern program.

Academic Standing/Progress

Students are required to maintain an overall GPA of at least 3.500. In addition, the PhD annual review is based on a report by the student’s advisor, with attention to:

1. Success in setting up a doctoral committee
2. Passing the departmental language examination in the language of their field
3. Successful performance of teaching assistant duties
4. Successful completion of courses in the tiered system (i.e., the required course sequence)
5. Successful completion, where appropriate, of other required activities, including construction of the comprehensive examination list and the dissertation proposal and scheduling of comprehensive examinations

Doctoral Degree Candidacy

Students entering without an MA in history must complete 37 semester hours. Students must pass the qualifying examination by the end of the first semester of the third year in the program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Program Credit/GPA Requirements

37 total semester hours required
Minimum 3.500 GPA required

History, PhD—Advanced Entry

The PhD program, with a focus on global, transnational, and comparative history seeks to train research historians who plan to teach at the college and university level. Systematic training in theory and methodology and preparation for college teaching are distinctive features of the Northeastern program.

Academic Standing/Progress

Students are required to maintain an overall GPA of at least 3.500. In addition, the PhD annual review is based on a report by the student’s advisor, with attention to:

1. Success in setting up a doctoral committee
2. Passing the departmental language examination in the language of their field
3. Successful performance of teaching assistant duties
4. Successful completion of courses in the tiered system (i.e., the required course sequence)
5. Successful completion, where appropriate, of other required activities, including construction of the comprehensive examination list and the dissertation proposal and scheduling of comprehensive examinations

Doctoral Degree Candidacy

Students entering with an MA in history from outside Northeastern must complete 31 semester hours. Students must pass the qualifying examination by the end of the first semester of the third year in the program.

Program Requirements

Program Credit/GPA Requirements

33 total semester hours required
Minimum 3.000 GPA required

History, MA

The department offers a Master of Arts in History; students can choose from concentrations in world history and public history.

World history focuses on the history of regions or peoples in Africa, Europe, Latin America, Asia, or the United States, with attention to the intersections and connections between national, regional, and global developments.

Public history emphasizes the study of topics such as material culture, historical exhibits and museums, historical agencies, and archival administration.

Academic Standing/Progress

Students are expected to maintain a 3.000 grade-point average (GPA). Should the GPA drop below 3.000, the student will be placed on academic probation and allowed one more semester to bring his or her GPA to the 3.000 level. If the student is not able to meet this requirement by the end of the following semester, the student may be asked to leave the program.

Program Requirements

Program pending approval.
Public History, Graduate Certificate

The Graduate Certificate in Public History allows students to pursue an organized course of study in public history while completing requirements for their degrees in existing doctoral and master’s programs. Students have an opportunity to gain a knowledge of core methods and issues in the field of public history and are enabled to use public history approaches in their own research and work.

Public history is a well-established field of practice that marries academic research and methods to public applications and collaborations. Public historians typically work in museums, archives, historical societies, documentary film production, and social activism, though training in public history is useful to a wide variety of humanistic, social science, and legal fields.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Graduate Programs Booklet (http://www.northeastern.edu/cssh/polisci/programs)

Graduate training in political science seeks to prepare students to analyze the most important issues in world affairs and to prepare students for a wide array of careers—from government and academia to the nonprofit and private sectors. Graduate programs in political science, public policy, public administration, security and resilience studies, and international affairs at Northeastern explore the theory and practice of politics, public policy, and public management in the United States and throughout the world. In teaching and research, faculty members in the department cover a broad range of topics and issues in the field of political science. Core areas of inquiry within our department include national and international security, international public policy, U.S. public policy and administration, network science, European studies, Middle East studies, and democratization and development.

- Public Administration (p. 357)

Master of Science (MS)

- Security and Resilience Studies (p. 358)

Graduate Certificate

- Security and Resilience Studies (p. 359)

Political Science, PhD

The Doctor of Philosophy in Political Science is grounded in the core fields of the discipline—American government and politics, comparative politics, international relations, and public policy. Students identify a primary and secondary field as areas of emphasis. The curriculum introduces students to all four fields and also seeks to develop their research skills through a series of methods courses. Students may develop a traditional, academic focus in one of the fields, or they may combine it with public policy to highlight a policy orientation. The program focuses on preparing students to be academic scholars and teachers as well as practitioners in research and public service. The PhD degree requires completion of required courses, passing a written and oral comprehensive examination, and the successful defense of the dissertation before a faculty committee.

Credit Requirements

Students entering with a bachelor’s degree must complete 48 semester hours. Students currently in the MA or MPA program and accepted into the PhD program before completing the MA or MPA must complete 48 semester hours.
Doctoral Degree Candidacy

Doctoral degree candidacy is attained after successfully completing all course work and passing written and oral comprehensive examinations.

Academic Standing/Progress

All doctoral students must maintain an overall cumulative grade-point average of 3.500 while making progress toward the degree requirements. Students who fall below any applicable standard for two consecutive semesters are subject to dismissal from the graduate program. Additionally, receipt of financial support administered by the department, college, or university is contingent on satisfactory academic progress toward the degree and specific guidelines as published in the terms of award. Students who have ungraded courses or courses graded as incomplete risk no longer being eligible for financial aid awards.

Language Proficiency

Students who conduct research in a language other than English must demonstrate proficiency as necessary for completion of the dissertation. Language courses do not count as electives.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

**Program Credit/GPA Requirements**
6–30 total semester hours required  
Minimum 3.500 GPA required

To earn the Master of Arts in Political Science degree at Northeastern, you must successfully complete 30 semester hours (typically 10 courses) of credit. Full-time students can expect to complete the degree within two academic years. Course work consists of 3 semester hours in a required statistics course, 12 semester hours within a chosen concentration, 3 semester hours outside the student’s area of concentration, and a remaining 12 elective semester hours. To see the full breakdown, click the Program Requirements tab above.

**Academic Standing/Progress**
Satisfactory progress in the MA program includes maintaining a grade-point average (GPA) of 3.000 overall as well as in the student’s concentration area. A final cumulative GPA of at least 3.000 in all course work is required to qualify for the Master of Arts degree. Any course in which a student earns lower than a C grade cannot be used to fulfill concentration area requirements. A student who fails to make satisfactory progress is placed on academic probation, which is a warning that the student may not be allowed to continue in the graduate program unless the deficiency is addressed.

**Experiential Education Requirement**
In addition to in-class course work, students are required to complete an experiential education component that advances their learning, research, and/or career objectives. Experiential education offers MA students a direct experience with focused reflection relevant to their academic studies. For students with research interests, the experience focuses on related activities, such as primary source analysis and data gathering. For other students, the experience involves engagement with areas of practice and policy, such as an internship. An experiential education opportunity will be satisfied with a minimum of 3 semester hours and a maximum of 6 semester hours.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**General Requirements**
- Quantitative Techniques
  - POLS 7202 Quantitative Techniques 3

**Concentrations**
Complete one of the following concentrations:
- American Government (p. 355)
- International Relations (p. 356)
- Comparative Politics (p. 356)
- Public Policy (p. )

**Electives**
Complete 15 semester hours from the following range: 15
- POLS 5100 to POLS 7978

**AMERICAN GOVERNMENT CONCENTRATION**

**Seminar**
- POLS 7205 Seminar in American Government and Politics 3

**American Government Courses**
Complete 9 semester hours from the following: 9
- POLS 7250 American Political Institutions and Processes
- POLS 7251 Congress and Policy

---

**Political Science, MA**

The Master of Arts program focuses on the core scholarly areas of political science. Students specialize in one of five concentration areas: American government and politics, comparative government and politics, international relations, public policy, and security studies. Courses in the MA program serve as a foundation for work in a doctoral program or as preparation for careers in government, nonprofit organizations, or related work in the private sector.

The Master of Public Administration (MPA) is the management and leadership degree for those seeking to serve the public good. The program seeks to equip its students with skills in policy analysis, program evaluation, research methods, and written and verbal communications. Students have an opportunity to develop competencies in budgeting and human resources, organizational management and leadership, and the interplay between ethics and accountability in a diverse society. Throughout the degree program, students gain career-oriented experience through internships, small group projects, and other interactions with professionals in the field. These experiences are designed to enable the Northeastern MPA graduate to move into a wide array of public and nonprofit sector positions at the local, state, national, and international levels.

Mission Statement

The mission of the MPA program at Northeastern University is to serve the needs of the public affairs community, including students, working professionals, faculty, and researchers, by providing a practice-oriented and research-based graduate educational experience. The faculty pledges the best instruction available in a set of courses designed to integrate theoretical foundations with practical skills. The MPA program will prepare students to be effective in a dynamic and increasingly diverse professional environment. We also commit ourselves to assisting students in every possible way to secure internships, postgraduate employment, and overall career advancement. Students, in turn, are expected to meet high levels of academic excellence combined with ethical and professional integrity. Committed to the ideals of public service and advancing the public interest, we seek students who share the same enthusiasm.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.00 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.00 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

General Requirements

**Quantitative Techniques**

- LPSC 7305 Research and Statistical Methods or POLS 7202 Quantitative Techniques 3

**Analysis**

- PPUA 6506 Techniques of Policy Analysis 3
- PPUA 6502 Economic Institutions and Analysis 3

**Administration and Management**

- PPUA 6500 Principles of Public Administration 3
- PPUA 6503 Public Personnel Administration 3
- PPUA 6504 Organizational Theory and Management 3
- PPUA 6505 Public Budgeting and Financial Management 3
- PPUA 6507 Institutional Leadership and the Public Manager 3

**Capstone**

- PPUA 7673 Capstone in Public Policy and Urban Affairs 3

**Internship Requirement**

An approved internship or waiver is required.

**INTERNSHIP WAIVED**

Complete 15 semester hours from the Course List. (p. 357)

**INTERNSHIP COMPLETED FOR COURSE CREDIT**

**Internship**

- PPUA 6407 Internship in Public Policy and Urban Affairs 3

**Electives**

Complete 12 semester hours from the Course List. (p. 357)

**Course List**

- LPSC 5000 to LPSC 7999
- PPUA 5000 to PPU 7999
- CRIM 5000 to CRIM 7999 (by advisement only)
- ECON 5000 to ECON 7999 (by advisement only)
- ENGL 5000 to ENGL 7999 (by advisement only)
- HIST 5000 to HIST 7999 (by advisement only)
POLS 5000 to POLS 7999 (by advisement only)
SOCL 5000 to SOCL 7999 (by advisement only)

**Program Credit/GPA Requirements**

42 total semester hours required
Minimum 3.000 GPA in the core courses and overall required

**Security and Resilience Studies, MS**

Security and resilience studies is an emerging field of inquiry that focuses on how global, national, and subnational actors manage a range of chronic transnational challenges—such as terrorism, organized crime, weapons proliferation, cyber-attacks, bioterrorism, climate change and catastrophic disasters, migration, and radicalization—that can be destabilizing to societies. It explores how strategic doctrines, organization processes, bureaucratic behaviors, and security tools and tactics are adapting to these challenges by placing greater emphasis on resilience. Resilience is a concept rooted in multiple disciplines that is gaining widespread currency at the community, societal, and global levels given the prevalence of human-made and naturally occurring threats that do not lend themselves to preventive and protective measures. Strategies for dealing with these threats emphasize measures that mitigate, respond to, recover from, and adapt to risk in order to safeguard essential functions and societal values. Many of these measures involve the role of technologies, system design, and engineering as well as policy, regulatory, and governance issues. Students at Northeastern who enroll in the Master of Science in Security and Resilience Studies have an opportunity to become prepared to inform and support domestic and international efforts to deal with the major sources of turbulence in the 21st century.

To earn the Master of Science in Security and Resilience Studies degree at Northeastern, you must successfully complete 30 semester hours of credit. Full-time students can expect to complete the degree within one calendar year. Course work is divided between 12 credits in core courses required of all MS students, 12 elective credits within a chosen specialization, and a 6-credit capstone course (with some experiential component). These requirements are described in more detail under the Program Requirements tab. This program can be completed either by students who are in residence at Northeastern University’s Boston campus or by students who live outside the Boston area. The core courses are offered in a hybrid format with much of the course content available online; typically once per month, students and the professor meet in extended face-to-face sessions. Low-residency students have the option of selecting elective courses that are available in a fully online format. Traditional students can select either traditional classroom-based courses or online courses to meet their 12 elective credits.

**Academic Standing/Progress**

Satisfactory progress in the MS program includes maintaining a grade-point average of 3.000. Students must attain a final cumulative GPA of at least 3.000 in all course work, as well as a 3.000 in all five core requirements (including capstone) to qualify for the Master of Science degree.

**Program Requirements**

Graduate Programs Booklet (http://www.northeastern.edu/cssh/economics/graduate/current-student-resources-and-forms)

The Department of Economics offers both a MA and a PhD program. The most distinctive feature of these programs is their emphasis on applied economics, coupled with attention to providing a solid grounding in microeconomic and macroeconomic theory, and econometrics. Students come from all over the world, and the curriculum is designed with this in mind, striving for balance in coverage of economies that are rich and poor, large and small, mixed and market. This gives a unique flavor to the course of study, making it well-suited to the analysis of the emerging global economy of the twenty-first century.

The Master of Arts program is in applied economic policy analysis, with broad specialization areas. The program is large enough to support a full slate of core and area courses each year, yet small enough to maintain a sense of community among the students. The program is especially appropriate for those who wish to work in or return to positions in government, teaching, finance, or industry while providing a rigorous basis for those who want to continue their studies to the doctoral level.

The PhD program is a small and focused one. Students may concentrate in either industrial organization, competition policy, regulatory economics, or labor economics. Each field is covered in two semester-long courses. Students who elect the industrial organization, competition
policy, and regulatory economics field may further elect a second field in transportation economics.

Programs

Doctor of Philosophy (PhD)
- Economics (p. 360)
- Economics—Advanced Entry (p. 360)

Master of Arts (MA)
- Economics (p. 361)

Economics, PhD

The PhD program is a small and focused one, specializing in industrial organization, competition policy, regulatory economics, and labor economics. Admission from the bachelor’s level requires taking the MA core courses and two additional elective courses plus the PhD requirements. The program requirements shown here are for those students entering the PhD program directly from a bachelor’s program.

Doctoral Degree Candidacy

Degree candidacy is attained following satisfactory completion of the required 48 credits of course work, passing qualifying examinations in microeconomics and macroeconomics, passing a field comprehensive examination, and meeting the other program requirements as shown on the program requirements page.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones
- Two qualifying examinations—microeconomics and macroeconomics
- Field comprehensive examination
- Annual review
- Dissertation committee
- Dissertation proposal
- Dissertation defense
- Field lunch participation
- Practical experience
- Seminar series participation

- Minimum 3.000 GPA required

Economics, PhD—Advanced Entry

The PhD program is a small and focused one, specializing in industrial organization, competition policy, regulatory economics, and labor economics. The program requirements page shows requirements for those students entering the PhD program with a master’s degree. If the master’s degree is not in economics, additional course work may be required in order to meet course prerequisites.

Doctoral Degree Candidacy

Degree candidacy is attained following satisfactory completion of the required 24 credits of course work, passing qualifying examinations in microeconomics and macroeconomics, passing a field comprehensive examination, and meeting the other program requirements as shown on the program requirements page.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones
- Two qualifying examinations—microeconomics and macroeconomics
- Field comprehensive examination
- Annual review
- Dissertation committee
- Dissertation proposal

The School of Public Policy and Urban Affairs is nationally and internationally recognized for excellence and innovation in policy-oriented education, applied research, and engagement. Our mission is to educate professional master’s and doctoral students who are sought after as policy analysts, program evaluators, and leaders of nonprofit, public, private sector, and academic institutions; to create and disseminate policy-relevant knowledge and analytical methods of value to policymakers and the public; and to serve the broader community through policy analysis and technical assistance.

The school is committed to excellence in research and education on pressing and emerging policy issues of the day—public health, climate change, environmental challenges, the court and justice systems, and creating sustainable and resilient cities that provide economic opportunity for their residents. We define our approach as locally informed and internationally relevant. Our hallmark is to engage students in building the world that they would like to live in through experiential learning opportunities and applied research.

Programs
Doctor of Philosophy (PhD)
- Law and Public Policy (p. 362)
- Law and Public Policy—Advanced Entry (p. 363)
Law and Public Policy, PhD

This is an interdisciplinary social science program that combines several social science and legal theoretical perspectives with both quantitative and qualitative research methodologies. The wide-ranging faculty in the School of Public Policy and Urban Affairs can support students’ research and dissertations in many fields—urban policy and regional economic development; sustainability and climate change; health policy; crime, social justice, and inequality; and the intersection of law and policy. Students work with faculty members to formulate a plan of study within their field of concentration by choosing courses from graduate programs offered in the policy school, the College of Social Sciences and Humanities, and in other colleges and schools at Northeastern University. Students also study a common body of knowledge developed in core courses on policy, research methods, and law. The school’s research centers and faculty members’ research projects provide opportunities for students to develop insight, experience, and synergies to help with their own research goals. The college and school offer a high level of support allowing all students to be devoted full-time to their studies and research.

Doctoral Degree Candidacy
Complete all required course work with a minimum 3.50 GPA in the core courses and pass the comprehensive examinations. Students entering with a bachelor’s degree must complete 42 semester hours.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

Milestones
Comprehensive examination
Seminars
Annual review
Dissertation committee
Dissertation proposal
Dissertation defense

Major Requirements
Research and Statistical Methods

A grade of B+ or higher is required:
LPSC 7305 Research and Statistical Methods 3
or POLS 7202 Quantitative Techniques

Economics
ECON 7270 Economics of Law and Regulation 4

Policy Course
A grade of B+ or higher is required:
LPSC 7311 Strategizing Public Policy 3

Research Design
A grade of B+ or higher is required:
LPSC 7310 Research Design and Analysis 3
or PPUA 6205 Research Design and Methodology in Urban and Regional Policy

Electives

General Electives
Complete 6 semester hours from the following: 6

LPSC 6313 Economic Analysis for Law, Policy, and Planning
PPUA 6201 The Twenty-First Century City: Urban Opportunities and Challenges in a Global Context
PPUA 6506 Techniques of Policy Analysis
PPUA 6509 Techniques of Program Evaluation
PPUA 6525 Institutions and Public Policy

Public Policy Elective
Complete 3 semester hours of PPUA 6000-series (or higher) course or any 6000-series (or higher) course or LPSC 7976 Directed Study with program approval.

Methodology Elective
Complete 3 semester hours from the following: 3

LPSC 7215 Advanced Quantitative Techniques
CRIM 7316 Advanced Topics in Methods
PHTH 6320 Qualitative Methods in Health and Illness

Any 6000-series (or higher) course or LPSC 7976 Directed Study with program approval

Law Elective
Complete 2 semester hours of LW course work 2

Economics Elective
Complete 3 semester hours of ECON 6000-series (or higher) course or any 6000-series (or higher) course or LPSC 7976 Directed Study with program approval.

Open Electives
Complete 12 semester hours of 6000-series (or higher) courses in subject area PPUA or any 6000-series (or higher) courses or LPSC 7976 Directed Study with program approval.

International Affairs, MA

We live in an increasingly interconnected global environment where people, goods, ideas, and conflicts traverse borders with rising frequency. Leaders in the activist, policy, and academic spheres must learn not only how to critically analyze these phenomena but also to envisage harnessing their constructive potential. The MA in International Affairs is an interdisciplinary graduate program dedicated to preparing tomorrow’s global citizens.

A holistic approach to enhancing our understanding of the world must span the limits of any one academic field and embrace cross-disciplinary analytical competencies. Spanning several social sciences and humanities, our courses are taught by leading scholars who research democratization, gender, globalization, ethnic conflict and cooperation, human rights and international law, international relations, social activism, social justice, and many other topics. Through its core courses, its two tracks—democratization, globalization, and social justice; and international public policy—as well as global and regional electives, this graduate program allows students to pursue a variety of themes.

Academic Standing/Progress
Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does
not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

**Program Requirements**
Complete all courses and requirements listed below unless otherwise indicated.

**General Requirements**

**Political Economy**
- **INTL 5200** Political Economy: Interdisciplinary Perspectives 3

**Social Science Methods**
Complete 3 semester hours from the following:
- **ECON 5110** Microeconomic Theory
- **ECON 5120** Macroeconomic Theory
- **ECON 7251** International Finance
- **LPSC 7305** Research and Statistical Methods
- **POLS 7201** Research Design
- **POLS 7202** Quantitative Techniques
- **SOCL 7210** Statistical Methods of Sociology
- **SOCL 7211** Research Methods
- **SOCL 7220** Seminar in Qualitative Analysis

**Public Policy**
Complete 3 semester hours from the following:
- **PPUA 6502** Economic Institutions and Analysis
- **PPUA 6506** Techniques of Policy Analysis
- **PPUA 6507** Institutional Leadership and the Public Manager
- **PPUA 6509** Techniques of Program Evaluation
- **PPUA 6551** Nonprofit Organizations and Social Change
- **PPUA 6553** Nonprofit Financial Resource Development

**Required Electives**

**Global Issues Elective**
Complete 3 semester hours from the following:
- **CRIM 7201** Global Criminology
- **CRIM 7336** Globalization of Crime and Justice
- **HIST 7227** Twentieth-Century China: Revolutionary Change in a Global Context
- **HIST 7237** Legal History around the World
- **HIST 7239** Space and Place
- **HIST 7316** Research Seminar in Global Environmental History
- **PHIL 5003** Ethics, Justice, and Global Climate Change
- **POLS 7325** Contemporary Issues in Third World Development
- **POLS 7351** Democratization and Governance
- **POLS 7362** Nationalism
- **POLS 7366** Genocide in a Comparative Perspective
- **POLS 7370** Europe and European Union Governance
- **POLS 7376** Government and Politics of the Middle East
- **POLS 7379** Chinese Politics and Foreign Policy
- **POLS 7383** Government and Politics of Latin America
- **POLS 7384** Government and Politics of Africa
- **POLS 7385** Transatlantic Relations

**Open Electives**
Complete 12 semester hours from the following:
- **CRIM 7201** Global Criminology
- **CRIM 7336** Globalization of Crime and Justice
- **HIST 7227** Twentieth-Century China: Revolutionary Change in a Global Context
- **HIST 7237** Legal History around the World
- **HIST 7239** Space and Place
- **HIST 7252** Topics in Middle Eastern History
- **HIST 7316** Research Seminar in Global Environmental History
- **HIST 7323** Seminar: Modern Colonialism
- **PHIL 5001** Global Justice
- **PHIL 5003** Ethics, Justice, and Global Climate Change
- **POLS 7325** Contemporary Issues in Third World Development
- **POLS 7351** Democratization and Governance
- **POLS 7362** Nationalism
- **POLS 7366** Genocide in a Comparative Perspective
- **POLS 7370** Europe and European Union Governance
- **POLS 7376** Government and Politics of the Middle East
- **POLS 7379** Chinese Politics and Foreign Policy
- **POLS 7383** Government and Politics of Latin America
- **POLS 7384** Government and Politics of Africa
- **POLS 7385** Transatlantic Relations
- **PPUA 5260** Ecological Economics
- **PPUA 5263** Geographic Information Systems for Urban and Regional Policy
- **PPUA 5265** Urban and Regional Policy in Developing Countries
- **PPUA 6407** Internship in Public Policy and Urban Affairs
- **PPUA 6966** Practicum
- **PPUA 7238** Climate Change and Urbanization in Developing Countries
- **PPUA 7243** International Development Administration and Planning
Northeastern University

* Directed Study
  - SOCL 7100 Queer Theory: Sexualities, Genders, Politics
  - SOCL 7221 Globalization, Development, and Social Justice
  - SOCL 7222 Gender and Globalization
  - SOCL 7225 Gender and Social Movements
  - SOCL 7268 Globalization and the City
  - SOCL 7230 Political Ecology of Global Capitalism

Electives may also be chosen from any other track or elective category. Six of the twelve credits may be fulfilled by a thesis.

**Tracks**

Complete one of the following tracks:

### INTERNATIONAL PUBLIC POLICY TRACK

**Global Governance**

- POLS 7387 Global Governance 3

**International Public Policy Electives**

Complete 6 semester hours from the following: 6

- CRIM 7242 Terrorism and International Crime
- POLS 7207 Seminar in International Relations
- POLS 7282 Contemporary Political Thought
- POLS 7333 Science, Technology, and Public Policy
- POLS 7351 Democratization and Governance
- POLS 7356 Comparative Political Economy
- POLS 7357 International Political Economy
- POLS 7359 International Law
- POLS 7369 International Security
- PPUA 7244 Comparative Public Policy and Administration

### GLOBALIZATION, DEVELOPMENT, AND SOCIAL JUSTICE TRACK

**Globalization, Development, and Social Justice**

- SOCL 7221 Globalization, Development, and Social Justice 3

**Globalization, Development, and Social Justice Electives**

Complete 6 semester hours from the following: 6

- HIST 7323 Seminar: Modern Colonialism
- PHIL 5001 Global Justice
- POLS 7325 Contemporary Issues in Third World Development
- POLS 7351 Democratization and Governance
- SOCL 7100 Queer Theory: Sexualities, Genders, Politics
- SOCL 7221 Globalization, Development, and Social Justice
- SOCL 7222 Gender and Globalization
- SOCL 7225 Gender and Social Movements
- SOCL 7268 Globalization and the City

### Program Credit/GPA Requirements

- 36 total semester hours required
- Minimum 3.000 GPA required

---

**Public Administration, MPA**

The Master of Public Administration (MPA) is the management and leadership degree for those seeking to serve the public good. The program seeks to equip its students with skills in policy analysis, program evaluation, research methods, and written and verbal communications. Students have an opportunity to develop competencies in budgeting and human resources, organizational management and leadership, and the interplay between ethics and accountability in a diverse society. Throughout the degree program, students gain career-oriented experience through internships, small group projects, and other interactions with professionals in the field. These experiences are designed to enable the Northeastern MPA graduate to move into a wide array of public and nonprofit sector positions at the local, state, national, and international levels.

**Mission Statement**

The mission of the MPA program at Northeastern University is to serve the needs of the public affairs community, including students, working professionals, faculty, and researchers, by providing a practice-oriented and research-based graduate educational experience. The faculty pledges the best instruction available in a set of courses designed to integrate theoretical foundations with practical skills. The MPA program will prepare students to be effective in a dynamic and increasingly diverse professional environment. We also commit ourselves to assisting students in every possible way to secure internships, postgraduate employment, and overall career advancement. Students, in turn, are expected to meet high levels of academic excellence combined with ethical and professional integrity. Committed to the ideals of public service and advancing the public interest, we seek students who share the same enthusiasm.

**Academic Standing/Progress**

Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**General Requirements**

**Quantitative Techniques**

- LPSC 7305 Research and Statistical Methods 3
- or POLS 7202 Quantitative Techniques

**Analysis**

- PPUA 6506 Techniques of Policy Analysis 3
- PPUA 6502 Economic Institutions and Analysis 3

**Administration and Management**

- PPUA 6500 Principles of Public Administration 3
- PPUA 6503 Public Personnel Administration 3
- PPUA 6504 Organizational Theory and Management 3
- PPUA 6505 Public Budgeting and Financial Management 3
- PPUA 6507 Institutional Leadership and the Public Manager 3

Public Policy, MPP

The Master of Public Policy (MPP) is the recognized industry standard for those seeking careers in public policy analysis and design. As such, a typical MPP degree emphasizes the analysis of data and other relevant information to enable graduates to assess public problems, develop appropriate policy responses, and evaluate program effectiveness. MPP graduates enter careers as policy analysts, researchers, consultants, program evaluators, and policymakers in a broad range of public and nonprofit settings, ranging from the local to the international, and in the private sector. At Northeastern, the MPP joins our long-established and nationally accredited Master of Public Administration (MPA) as well as our Master of Science in Urban and Regional Policy (MURP), Urban Informatics, and International Affairs. As such, MPP students will be part of a larger School of Public Policy and Urban Affairs community of great intellectual and policy area diversity.

Academic Standing/Progress
Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements
Complete all courses and requirements listed below unless otherwise indicated.

General Requirements
Methods, Statistics, and Applications Core
LPSC 7305  Research and Statistical Methods  3

or POLS 7202  Quantitative Techniques
PPUA 6509  Techniques of Program Evaluation  3
PPUA 6205  Research Design and Methodology in Urban and Regional Policy  3

Policy Frameworks and Practice Core
LPSC 6313  Economic Analysis for Law, Policy, and Planning  3
LPSC 7311  Strategizing Public Policy  3
PPUA 6506  Techniques of Policy Analysis  3
PPUA 6525  Institutions and Public Policy  3

Urban Informatics, MS

The Master of Science in Urban Informatics (MSUI) degree couples comprehensive data analytics skills with an understanding of the big questions faced by cities in the 21st-century city. This cutting-edge program is built upon a unique cross-college initiative, which offers comprehensive state-of-the-art training in the core skills of data analytics—including quantitative analysis, data mining, machine learning, and data visualization. Urban informatics students supplement training in these foundational skills with a specialized sequence of courses that address how data and technology are being used to tackle key social, infrastructural, and environmental challenges.

By combining a theoretically informed perspective of cities with advanced skills in accessing, managing, analyzing, and communicating insights from large complex, data sets, graduates are a part of the next wave of urban professionals ready to lead in the public, private, and nonprofit sectors. Given the continuous growth in urban data and technology, these professionals are essential to shaping the future of urban areas around the globe.

This program provides a uniquely integrated urban and informatics degree with a substantial experiential education component. The focus throughout is on practical application, and students have multiple opportunities to apply what they are learning.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Urban and Regional Policy, MS

The Master of Science in Urban and Regional Policy (MURP) seeks to equip students with the skills to solve today’s critical urban problems through the use of policy analysis, research, and strategic action. Many of the major issues that societies face today—issues of climate change and sustainability, equity and social justice, and economic growth—have their roots in urban growth and change. Solutions to these issues require a multisystem approach that coordinates interventions in economic, environmental, sociocultural, political, spatial, and infrastructural systems in order to maximize impact. For example, revitalizing a distressed community requires connecting it to economic opportunity through transportation and economic development interventions, providing good-quality affordable housing, fostering social interaction through the creation of public space, encouraging the development of strong social institutions, and dealing with environmental concerns.

The MURP degree marries training in theories and frameworks of urban development with an understanding of urban politics and the way in which different policy strategies evolve through the interplay between branches and levels of government. Students have an opportunity to learn skills of policy analysis, economic analysis, quantitative and qualitative research, and oral and written communication. Moreover, students have opportunities to gain experience in the application of their knowledge and skills through internships, class projects, and a capstone research report. Students graduate and enter the workforce with a unique set of perspectives, skills, experiences, and professional connections. Many go on to careers working for state and local government, federal agencies, community development corporations and other nonprofit organizations, research institutes, and as private-sector policy consultants.

Nonprofit Sector, Philanthropy, and Social Change, Graduate Certificate

The Graduate Certificate in Nonprofit Sector, Philanthropy, and Social Change is a response to recent developments in social change theory, practice, and funding that are placing new demands and expectations on social change actors in the nonprofit, public, and private sectors, including nonprofit leaders, philanthropists, policymakers, and corporate social responsibility managers. These developments include the emergence of hybrid, cross-sector business models and new intermediary mechanisms for channeling the flow of capital into social change; new expectations and standards for performance measurement, transparency, and accountability; more sophisticated use of data and technology to support decision making, evaluation, and continual improvement; decreased public funding for traditional nonprofit activities; and the emergence of social media as a vehicle for mobilizing people and resources. The certificate enables social change professionals in all sectors to respond to these changes more effectively and will distinguish itself from other nonprofit certificate programs by focusing on the relationship between social program implementation and funding.

Academic Standing/Progress
Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Urban Informatics, Graduate Certificate

With seventy-five percent of the world’s population projected to be living in cities by 2050, the need for professionals in urban planning and related careers will only increase. The Graduate Certificate in Urban Informatics seeks to prepare students to manage the progressively complex issues involved with rapidly expanding data and technological resources in cities. As Claire Lane of the City of Boston recently noted, "The blueprints for great cities are increasingly anchored in big data, expressed in GIS [Geographic Information Systems] and codified in coherent policy." Successful graduates with an urban informatics certificate have skills in each of these areas, which prepares them to be professionals ready to shape the future of cities across the globe.

Students are trained with the practical and theoretical knowledge necessary to understand the intricacies of interconnected urban systems and to analyze how these systems work together to create sustainable, resilient, and just cities. The curriculum emphasizes the expertise needed to bridge emerging technological capacities and traditional policy-making processes. Students cultivate applied skills in visual presentation, analysis, and modeling of new data sets—all of which helps to inform investment and policy making. Inspired by Northeastern’s leadership in experiential education, students use Boston and cities around the world as learning labs.

Academic Standing/Progress
Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Law and Public Policy, JD/MS

The JD/MS in Law and Public Policy (LPP) is a joint program with and open only to students in the Northeastern University School of Law designed to equip graduates with a unique blend of skills for navigating a complex and rapidly changing policy landscape. The program builds on students' legal training with a compelling blend of skills in applied public policy analysis, policy design, and strategic policy formation. Students also gain career-relevant experience through internships, small group capstone projects, and other interactions.
with professionals in the field. All are part of a learning process designed

to enable the Northeastern law and public policy graduates to navigate,

to redefine, diverse policy areas.

graduate/current-student-resources)

Uncertainty about the economy, health care, and the labor market. Ethnic
conflicts in an era of rapid globalization. Concern for the environment.
Shifting gender arrangements as work and family come into conflict.
Violence in school and even in houses of worship.

Never has there been a greater need for sociological research focused on
the problems and issues of our time.

The Department of Sociology and Anthropology at Northeastern
University offers MA and PhD degrees in sociology within a flexible
program attractive to students interested in both academic and
nonacademic careers. The MA program has two tracks—one academic
and one applied (in which the student substitutes an additional research
methods course for one of the required courses in social theory).
Students pursuing the PhD degree earn the MA degree (academic
version) en route to completing the doctorate, unless they earned the MA
in sociology elsewhere. The program seeks to provide students with the
theoretical foundation and research skills needed to engage in a career
in teaching and research, in the public sector, or in industry. Thirty-two
faculty members bring a wide range of substantive interests, organized
around four specialization areas: the sociology of gender; globalization;
environment and health; and urban sociology. Apart from these formal
areas of concentration, the department has extraordinary strengths in
inequality and social movements.

Our faculty have won numerous prizes for excellence in the classroom,
and many have also played leadership roles in establishing prestigious
centers and interdisciplinary programs on Northeastern’s campus.

The Department of Sociology and Anthropology is a founding unit
of Northeastern’s School of Public Policy and Urban Affairs, which
is dedicated to providing advanced research opportunities in a
multidisciplinary environment. The department also maintains strong
ties with the Brudnick Center for the Study of Conflict and Violence;
the Women’s, Gender, and Sexuality Studies program; the Kitty and
Michael Dukakis Center for Urban and Regional Policy; the Northeastern
Environmental Justice Research Collaborative; the Social Science
Environmental Health Research Institute; and the Law and Public Policy
program.

Sociology, PhD

The PhD program is designed to attract students who wish to develop a
broad base of sociological knowledge, such as would equip students to
embark on academic careers in leading institutions of higher education.
The PhD program boasts a wide array of curricular strengths and diverse
methodological offerings, all of which draw upon the department’s
emphasis on the study of social inequalities along lines of race, class,
and gender. Faculty expertise ranges widely from domestic U.S. concerns to issues that affect groups, regions, and societies on a global scale.

The PhD program is organized around four key areas of specialization:

- Globalization (http://www.northeastern.edu/cssh/socant/graduate/globalization)
- Urban Sociology (http://www.northeastern.edu/cssh/socant/graduate/urban-sociology)
- Sociology of Gender (http://www.northeastern.edu/cssh/socant/graduate/sociology-of-gender)
- Environment and Health (http://www.northeastern.edu/cssh/socant/graduate/environment-and-health)

In addition to the graduate courses offered in the areas of specialization, the program offers a strong foundation in both theory (classical and contemporary) and methods (quantitative and qualitative). Reflecting the program’s distinctive emphasis on social inequalities, students are required to select a core elective in this field, choosing from a list of approved courses maintained by the department (e.g., Social Psychology of Stratification (SOCL 7263). As students complete their core requirements, they also work closely with individual faculty members to advance their work within one of the department’s standing areas of specialization. Students also have the right to petition to construct their own areas of specialization (pending departmental approval) and have completed area examinations in a host of subfields. Among these are environmental justice, political economy of global capitalism, theoretical criminology, feminist theory, political sociology, social psychology, sociology of violence, and immigration, among many others.

The PhD program is designed to admit relatively small numbers of graduate students each year, which affords students the opportunity to forge close working relationships with the faculty. Our faculty and graduate students work together in a number of interdisciplinary research projects, programs, and centers, including the Social Science Environmental Health Research Institute (http://www.northeastern.edu/environmentalhealth); the Brudnick Center on Violence and Conflict (http://www.northeastern.edu/brudnickcenter); the Kitty and Michael Dukakis Center for Urban and Regional Policy (http://www.northeastern.edu/dukakiscenter); the Institute for Urban Health Research (http://www.northeastern.edu/uirp); the Northeastern Environmental Justice Research Collaborative (http://www.northeastern.edu/nejrc); the Institute on Race and Justice (http://www.northeastern.edu/irij); and the Women’s, Gender, and Sexuality Studies Program (http://www.dac.neu.edu/womens.studies). Many of the faculty in the Department of Sociology and Anthropology have additional interests and are affiliated with other departments on campus, including environmental studies; law and public policy; Latino, Latin American, and Caribbean studies; African-American studies; international affairs, Jewish studies; and criminal justice. Students who wish to work with faculty in other disciplines are encouraged to enlist the aid of the sociology graduate director or their advisors in contacting individual faculty members.

Admissions

Students interested in the PhD should apply directly to that program. Students admitted without a master’s degree earn the MA in sociology en route to completing their PhD requirements. Please note that all applicants for the doctoral program are required to submit a writing sample that should consist of written materials that demonstrate their capacity for scholarship at the doctoral level. (Copies of several course or term papers or a copy of a master’s thesis or paper are appropriate.)

Residency Requirement

The university’s residence requirement can be satisfied by one year of full-time graduate work, or its equivalent, beyond the Master of Arts degree. If the student’s MA degree is not in sociology, a longer period of residence is typically required. Most students should expect to spend approximately two years, or the equivalent, in full-time graduate study beyond the requirements of the master’s degree.

Theory Examination

Students entering the graduate program must take a theory qualifying examination at the conclusion of their first year of study during the spring semester. The theory qualifying examination is a standard exam taken by all students in the same cohort. The exam is graded on a pass/fail basis. Students who fail the examination may take it a second time but will not be allowed to enroll for course work beyond the 30-semester-hour MA requirement or their first year of PhD residence (whichever case applies) until successfully completing the qualifying exam. Students who fail the examination on their second attempt will be asked to leave the program. In the latter case, a student may petition the graduate committee for a review of the student’s record and performance in the program.

Course Requirements

As prerequisites, all doctoral candidates are expected to have completed the core methodology and theory requirements for the Master of Arts in Sociology:

- Statistical Methods of Sociology (SOCL 7210)
- Research Methods (SOCL 7211)
- Foundations of Social Theory 1 (SOCL 7200)
- Foundations of Social Theory 2 (SOCL 7201)

Doctoral candidates are also required to complete two advanced methods classes from a list of approved courses maintained by the department. Finally, doctoral students must take a course in the area of social inequality, choosing from a list of approved courses maintained by the department.

A minimum of 24 semester hours of graduate work beyond the master’s degree is required.

Degree Candidacy

To enter into degree candidacy, the student must have earned a Master of Arts degree or its departmental semester-hour equivalent, passed the qualifying examination, established a graduate committee of three faculty members from the sociology department, and successfully completed the candidacy examination.

Once students complete doctoral course work, they will register for the following courses in the following sequence:

- Exam Preparation—Doctoral (SOCL 8960) The semester following completion of course work, students will register for Exam Preparation. During this semester, students should complete their first comprehensive exam. Students only register for Exam Preparation once. Even if a student is unable to complete their first comprehensive exam during this time frame, they will not register for Exam Preparation again.
- Research (SOCL 9986) The next semester, students will register for Research, during which their second comprehensive examination should be completed. Upon completion of both comprehensive
examinations, students will have achieved PhD degree candidacy, be certified by the graduate school, and will have five years to complete the dissertation.

- Dissertation (SOCL 9990) Upon achieving PhD degree candidacy, students will register for two consecutive semesters of Dissertation, during which they should complete and defend their dissertation proposal.
- Dissertation Continuation (SOCL 9996) Following the successful defense of their dissertation proposal, students will register for Dissertation Continuation for their remaining semesters until the dissertation is approved by the graduate school and submitted electronically to Proquest. Students do not have to register for Dissertation Continuation during the summer unless that is when their dissertation defense occurs.

**Program Credit/GPA Requirements**

54 total semester hours required
Minimum 3.000 GPA required

The PhD program is designed to attract students who wish to develop a broad base of sociological knowledge, such as would equip students to embark on academic careers in leading institutions of higher education. The PhD program boasts a wide array of curricular strengths and diverse methodological offerings, all of which draw upon the department’s emphasis on the study of social inequalities along lines of race, class, and gender. Faculty expertise ranges widely from domestic U.S. concerns to issues that affect groups, regions, and societies on a global scale.

The PhD program is organized around four key areas of specialization.

- Globalization ([http://www.northeastern.edu/cssh/socant/graduate/globalization](http://www.northeastern.edu/cssh/socant/graduate/globalization))
- Urban Sociology ([http://www.northeastern.edu/cssh/socant/graduate/urban-sociology](http://www.northeastern.edu/cssh/socant/graduate/urban-sociology))
- Sociology of Gender ([http://www.northeastern.edu/cssh/socant/graduate/sociology-of-gender](http://www.northeastern.edu/cssh/socant/graduate/sociology-of-gender))
- Environment and Health ([http://www.northeastern.edu/cssh/socant/graduate/environment-and-health](http://www.northeastern.edu/cssh/socant/graduate/environment-and-health))

In addition to the graduate courses offered in the areas of specialization, the program provides a strong foundation in both theory (classical and contemporary) and methods (quantitative and qualitative). Reflecting the program’s distinctive emphasis on social inequalities, students are required to select a core elective in this field, choosing from a list of approved courses maintained by the department (e.g., a course on the social psychology of stratification or a seminar in social inequality).

As students complete their core requirements, they also work closely with individual faculty members to advance their work within one of the department’s standing areas of concentration. Students also have the right to petition to construct their own areas of specialization (pending departmental approval) and have completed area examinations in a host of subfields. Among these are environmental justice, political economy of global capitalism, theoretical criminology, feminist theory, political sociology, social psychology, sociology of violence, and immigration, among many others.

The PhD program is designed to admit relatively small numbers of graduate students each year, which affords students the opportunity to forge close working relationships with the faculty. Our faculty and graduate students work together in a number of interdisciplinary research projects, programs, and centers, including the Social Science Environmental Health Research Institute ([http://www.northeastern.edu/environmentalhealth](http://www.northeastern.edu/environmentalhealth)); the Brudnick Center on Violence and Conflict ([http://www.northeastern.edu/brudnickcenter](http://www.northeastern.edu/brudnickcenter)); Kitty and Michael Dukakis Center for Urban and Regional Policy ([http://www.northeastern.edu/dukakiscenter](http://www.northeastern.edu/dukakiscenter)); the Institute for Urban Health Research ([http://www.northeastern.edu/irj](http://www.northeastern.edu/irj)); the Women’s, Gender and Sexuality Studies Program ([http://www.dac.neu.edu/womens.studies](http://www.dac.neu.edu/womens.studies)).

Many of the faculty in the Department of Sociology and Anthropology have additional interests and are affiliated with other departments on campus, including environmental studies; law, policy, and society; Latino, Latin American, and Caribbean studies; African-American studies; international affairs; Jewish studies; and criminal justice. Students who wish to work with faculty in other disciplines are encouraged to enlist the aid of the sociology graduate program director or their advisers in contacting individual faculty members.

**Admissions**

Students admitted with a master’s degree in sociology from another institution may be exempt from taking the theory exam but may be required to do some additional course work in theory and methods. For students admitted with a master’s degree in a field other than
sociology, the theory exam requirement and supplementary course work requirements will be determined on a case-by-case basis. Please note that all applicants for the doctoral program are required to submit a writing sample. The writing sample should consist of written materials that demonstrate students’ capacity for scholarship at the doctoral level. (Copies of several course or term papers or a copy of a master’s thesis or paper are appropriate.)

Residency Requirement
The university’s residence requirement can be satisfied by one year of full-time graduate work, or its equivalent, beyond the Master of Arts degree. If the student’s MA degree is not in sociology, a longer period of residence is typically required. Most students should expect to spend approximately two years, or the equivalent, in full-time graduate study beyond the requirements of the master’s degree.

Theory Examination
Students entering the graduate program must take a theory qualifying examination at the conclusion of their first year of study during the spring semester. The theory qualifying examination is a standard exam taken by all students in the same cohort. The exam is graded on a pass/fail basis. Students who fail the examination may take it a second time but will not be allowed to enroll for course work beyond the 30-semester-hour MA requirement or their first year of PhD residence (whichever case applies) until successfully completing the qualifying exam. Students who fail the examination on their second attempt will be asked to leave the program. In the latter case, a student may petition the graduate committee for a review of the student’s record and performance in the program.

Degree Candidacy
To enter into degree candidacy, the student must have earned a Master of Arts degree or its departmental semester hour’s equivalent, passed the qualifying examination, established a graduate committee of three faculty members from the sociology department, and successfully completed the candidacy examination.

Course Requirements
Students entering the PhD program from another university will be required to take the core requirements courses unless they can provide evidence of the completion of equivalent courses during their master’s degree work. Credits earned for master’s-level core requirements cannot be counted toward the doctorate.

- Statistical Methods of Sociology (SOCL 7210)
- Research Methods (SOCL 7211)
- Foundations of Social Theory 1 (SOCL 7200)
- Foundations of Social Theory 2 (SOCL 7201)

Doctoral candidates are also required to complete two advanced methods classes from a list of approved courses maintained by the department. Finally, doctoral students must take a course in the area of social inequality, choosing from a list of approved courses maintained by the department.

A minimum of 24 semester hours of graduate work beyond the master’s degree is required.

Once students complete doctoral course work, they will register for the following courses in the following sequence:

- Exam Preparation—Doctoral (SOCL 8960) The semester following completion of course work, students will register for Exam Preparation. During this semester, students should complete their first comprehensive exam. Students only register for Exam Preparation once. Even if a student is unable to complete their first comprehensive exam during this time frame, they will not register for Exam Preparation again.
- Research (SOCL 9986) The next semester, students will register for Research, during which their second comprehensive examination should be completed. Upon completion of both comprehensive examinations, students will have achieved PhD degree candidacy, be certified by the graduate office, and will have five years to complete the dissertation.
- Dissertation (SOCL 9990) Upon achieving PhD degree candidacy, students will register for two consecutive semesters of Dissertation, during which they should complete and defend their dissertation proposal.
- Dissertation Continuation (SOCL 9996) Following the successful defense of their dissertation proposal, students will register for Dissertation Continuation for their remaining semesters until the dissertation is approved by the graduate office and submitted electronically to Proquest.

Students do not have to register for Dissertation Continuation during the summer unless that is when their dissertation defense occurs.

Sociology, MA

The flexible, stand-alone MA degree is designed to meet the needs of applicants who seek professional training in a focused area of social research that can be chosen from urban sociology, the sociology of the environment, medical sociology, and several other fields. The program encourages students to develop expertise in research design, methodological techniques (whether quantitative or qualitative), evaluation research, and other research skills that are essential to data analysis and decision making in varied organizational settings. The MA program also seeks to equip students with substantive knowledge in fields that are relevant to consulting organizations, social policy and planning contexts, and nonprofit organizations. Some proportion of MA students may elect to go on to academic PhD training, though this is not the core mission of the MA program. Thirty semester hours of academic work, completed with a B (3.000) average or better, are required for the degree. The program consists of four required and six elective courses.

Students are encouraged to fashion a program of study best suited to their interests. Those who wish to pursue careers in applied social research or policy and administrative contexts are encouraged to emphasize methodological training. Students who may wish to pursue academic careers may instead favor courses in substantive and theoretical fields. All entering students should consult with the graduate program director, who helps the student to articulate interests and plan courses but also suggests other faculty members whose areas of interest and competence intersect with those of the student and with whom the student might consult on a regular basis. A student will be assigned an advisor; students may terminate or initiate an advisor/advisee relationship at any time simply by consulting with and informing the parties concerned. The graduate program administrator should also be informed of any changes.

The MA program is designed to afford students the opportunity to forge close working relationships with the faculty. Top applicants to the MA program are eligible for funding in the form of College of Social Sciences and Humanities Dean’s Scholarships; the program is shorter and culminates in a master’s paper that must be approved by two faculty members. The MA program confers a professional degree that is of immediate use in furthering the student’s career.

617.373.5884 (fax)

Website (http://www.networkscienceinstitute.org)
networkscience@northeastern.edu

The PhD program in network science aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is an intrinsically multidisciplinary activity, with members of the network science community representing a wide range of fields including computer science, information science, complexity, physics, sociology, communication, organizational behavior, political science, and epidemiology. This is an interdisciplinary doctoral program focused on training students in network science across several colleges—including the College of Science, the College of Computer and Information Science, the College of Social Sciences and Humanities, Bouvé College of Health Sciences, the College of Engineering, and the College of Arts, Media and Design—with several research areas, including computational sciences, information sciences, health and life sciences, social sciences, and theoretical physics. See other collaborating colleges’ catalog sections for possible concentration courses.

Course work is dependent on a student’s area of concentration and subject to prior approval by their faculty advisor. Required course work includes the following: three foundational courses in network science Complex Networks and Applications (PHYS 5116); Network Science Data (PHYS 7331); and Dynamical Processes in Complex Networks (PHYS 7335); one of two approved courses (Social Network Analysis or Network Data Mining); 12 semester hours of elective course work defined by their specific track; and two research courses with core faculty of...
the program. A minimum of 32 credit hours of course work is required, though the graduate program committee may recommend additional course work based on student research interests.

Satisfactory progress in the program will be ongoing and formally evaluated at the end of both the first and second years of the program. Students are expected to maintain a cumulative GPA of 3.000 or better in all course work. Students are not allowed to retake courses. A student who does not maintain the 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for termination by the graduate program committee.

Each student will have one primary research advisor from the network science doctoral program faculty.

Students will be expected to select their research advisor by the end of the spring semester of their second year in the program.

The dissertation committee consists of at least four members: the dissertation advisor, one additional network science doctoral program faculty member, one member expert in the specific topic of research (can be from outside the university), and one additional tenured/tenure-track faculty member from the concentration department/conferring college. The dissertation advisor must be a full-time tenured or tenure-track member of the Northeastern University faculty. The dissertation committee must be approved by the graduate program committee and constituted no later than the end of the spring semester of the first year of the program. Students may repeat the comprehensive examination once if they are unsuccessful.

Qualifying Examination

The qualifying examination consists of a two-part exam conducted by the Qualifying Examination and Dissertation Committee. The technical component of the exam is fulfilled when the student passes the comprehensive exam (see below), normally expected to be completed the spring semester of the second year. The research core of the qualifying exam is fulfilled with the acceptance of a high-quality paper to a strong peer-reviewed conference or journal. This might happen anytime during the PhD program but at least one year prior to the dissertation defense. Students who fail to complete the two-part qualifying examination but who have completed all the PhD program’s required course work with a cumulative GPA of 3.000 or better will be awarded a terminal Master of Science in Network Science degree. Note that no students will be admitted directly into the network science program for receipt of a master’s degree.

Degree Candidacy

A student is considered a PhD degree candidate upon completion of required course work with a minimum GPA of 3.000 overall in all courses and satisfactory completion of the two-part qualifying examination.

Comprehensive Examination

Students must submit a written dissertation proposal to the Qualifying Examination and Dissertation Committee. The proposal should identify the research problem, the research plan, and the potential impact on the field. A presentation of the proposal will be made in an open forum, and the student must successfully defend it before the Qualifying Examination and Dissertation Committee. The comprehensive exam must precede the final dissertation defense by at least one year.

Dissertation Defense

A PhD student must complete and defend a dissertation that involves original research in network science. The dissertation defense must adhere to the College of Science policies.

The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the College of Computer and Information Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policy-making processes. The program is designed to provide students with foundational knowledge in data science—including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.

For more information on the certificate, refer to the program’s website (http://www.northeastern.edu/datascience).

Women’s, Gender, and Sexuality Studies, Graduate Certificate

The Graduate Certificate in Women’s, Gender, and Sexuality Studies (WGSS) is a supplementary program designed for students currently enrolled in a Northeastern University master’s or doctoral program. The certificate aims to provide enhanced competency by:

- Analyzing contemporary feminist theoretical frameworks, methodologies, issues, and topics and their relation to established disciplines
- Focusing on the intersection of gender with sexuality, race, class, and other vectors of power and identity
- Broadening and enriching analytical skills in one or more disciplines while drawing on the interdisciplinary perspectives of WGSS
- Challenging the traditional separation of academic theory from political and professional practice

### Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

**Topics/Readings/Methods**
- **ENGL 7370** Topics in Digital Humanities (Introduction to Digital Humanities) 3
- **or HIST 7370** Texts, Maps, and Networks: Readings and Methods for Digital History

**Lab Project Seminar**
Repeat the following course three times:
- **INSH 7910** NULab Project Seminar (Repeatable) 1

**Final Project**
Complete 3 semester hours from the following:
- Independent Study or Thesis within student’s home program

**Elective**
Complete 3-4 semester hours from the following:
- **ARTG 5100** Information Design Studio 1—Principles
- **CS 6120** Natural Language Processing
- **ENGL 7370** Topics in Digital Humanities
- **HIST 7219** Topics in Cultural History
- **POLS 7344** Hard Power, Soft Power, and Smart Power
- **PPUA 6301** Introduction to Computational Statistics 4

Program Credit/GPA Requirements
Minimum 12 total semester hours required
Minimum 3.000 GPA required
Certificate students will work with an advisor in their primary or a closely related discipline to develop a plan for completing the certificate. The advisory relationship is intended to be facilitative; students are free to request a different advisor at any time.

**Program Requirements**

Complete all courses and requirements listed below unless otherwise indicated.

**Requirements**

**Required Course Work**

Complete 3 semester hours from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>WMNS 6100</td>
<td>Theorizing Gender and Sexuality</td>
</tr>
<tr>
<td>WMNS 7615</td>
<td>Feminist Inquiry</td>
</tr>
<tr>
<td>WMNS 7100</td>
<td>Queer Theory: Sexualities, Genders, Politics</td>
</tr>
</tbody>
</table>

**Electives**

Complete 9 semester hours from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAEP 6380</td>
<td>Seminar in Feminist Psychology</td>
</tr>
<tr>
<td>CRIM 7210</td>
<td>Gender, Crime, and Justice</td>
</tr>
<tr>
<td>HIST 7290</td>
<td>Race and Gender Frontiers: U.S. Encounters with Empire</td>
</tr>
<tr>
<td>HIST 7304</td>
<td>Research Seminar in Gender and Society in the Modern World</td>
</tr>
<tr>
<td>SOCL 7100</td>
<td>Queer Theory: Sexualities, Genders, Politics</td>
</tr>
<tr>
<td>SOCL 7202</td>
<td>Feminist Theory</td>
</tr>
<tr>
<td>SOCL 7212</td>
<td>Feminist Methodologies</td>
</tr>
<tr>
<td>SOCL 7222</td>
<td>Gender and Globalization</td>
</tr>
<tr>
<td>SOCL 7225</td>
<td>Gender and Social Movements</td>
</tr>
<tr>
<td>SOCL 7236</td>
<td>The Family</td>
</tr>
<tr>
<td>SOCL 7237</td>
<td>Women, Men, and Social Change</td>
</tr>

**Program Credit/GPA Requirements**

12 total semester hours required

Minimum 3.000 GPA required
A

Mehdi Abedi
Assistant Teaching Professor, Mechanical and Industrial Engineering; Northeastern University, PhD

Kuzhikalai M. Abraham
Research Professor, Chemistry and Chemical Biology; Tufts University, PhD

Max Abrahms
Assistant Professor, Political Science; University of California, Los Angeles, PhD

Ali Abur
Professor, Electrical and Computer Engineering; Ohio State University, PhD

Daniel Adams
Associate Professor, Architecture; Harvard University, MArch

George G. Adams
College of Engineering Distinguished Professor, Mechanical and Industrial Engineering; University of California, Berkeley, PhD

Jeffrey Agar
Associate Professor, Chemistry and Chemical Biology and Pharmaceutical Sciences; University of Georgia, PhD

Rajesh Aggarwal
Professor, Finance; Harvard University, PhD

Ruth Aguiler
Professor, International Business and Strategy; Harvard University, PhD

Amal Ahmed
Assistant Professor, Computer and Information Science; Princeton University, PhD

Sophia Ainslie
Lecturer, Art + Design; School of the Museum of Fine Arts/Tufts University, MFA

M. Shahid Alam
Professor, Economics; University of Western Ontario (Canada), PhD

Noor E. Alam
Assistant Professor, Mechanical and Industrial Engineering; University of Alberta (Canada), PhD

Brian Albrecht
Assistant Cooperative Education Coordinator, College of Engineering; Carnegie Mellon University, MS

Len Albright
Assistant Professor, Sociology and Anthropology and Public Policy and Urban Affairs; University of Chicago, PhD

Daniel P. Aldrich
Professor, Political Science and Public Policy and Urban Affairs; Harvard University, PhD

Todd M. Alessandri
Associate Professor, International Business and Strategy; University of North Carolina, Chapel Hill, PhD

Jacques Alexis
Assistant Academic Specialist, College of Professional Studies; University of Wisconsin, Platteville, MS

Nicole N. Aljoe
Associate Professor, English; Tufts University, PhD

Michael Allshouse
Assistant Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Meryl Alper
Assistant Professor, Communication Studies; University of Southern California, PhD

Neil O. Alper
Associate Professor, Economics; University of Pittsburgh, PhD

Akram N. Alshawabkeh
George A. Snell Professor of Engineering, Civil and Environmental Engineering; Louisiana State University, PhD

Sari Altschuler
Visiting Assistant Professor, English; City University of New York, PhD

George O. Alverson
Associate Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Steve Amato
Associate Teaching Professor, College of Professional Studies; Boston College, PhD

Jane Amidon
Professor, Architecture; Harvard University, MLA

Mansoor M. Amiji
University Distinguished Professor, Pharmaceutical Sciences; Purdue University, PhD

Mahshid Amirabadi
Assistant Professor, Electrical and Computer Engineering; Texas AM University, PhD

Won-Hee An
Lecturer, Music; Boston University, DMA

James S. Anderson
Lecturer, Music; Berklee College of Music, BM

Teiichi Ando
Professor, Mechanical and Industrial Engineering; Colorado School of Mines, PhD

Rae Andre
Professor, Management and Organizational Development; University of Michigan, PhD
Jonathan Andrew  
Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; SIT Graduate Institute, MA

Edwin C. Andrews  
Associate Professor, Art + Design; Indiana University, MFA

Nasim Annabi  
Assistant Professor, Chemical Engineering; University of Sydney (Australia), PhD

Daniel Archabal  
Senior Academic Specialist, Accounting; University of Pittsburgh, MBA

Arnold Arluke  
Professor, Sociology and Anthropology; New York University, PhD

Carmen G. Armengol  
Associate Professor, Applied Psychology; Pennsylvania State University, PhD

Richard Arrowood  
Associate Teaching Professor, College of Professional Studies; Massachusetts School of Law, JD

Cheryl Arruda  
Assistant Cooperative Education Coordinator, College of Engineering; Northeastern University, MEd

Susan Asai  
Associate Professor, Music; University of California, Los Angeles, PhD

Lori Ashline  
Assistant Teaching Professor, College of Professional Studies; Western New England University School of Law, JD

Javed A. Aslam  
Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Yernat Assylbekov  
Postdoctoral Teaching Associate, Mathematics; University of Washington, PhD

Anand Asthagiri  
Associate Professor, Bioengineering; Massachusetts Institute of Technology, PhD

Nicholas Athanassiou  
Associate Professor, International Business and Strategy; University of South Carolina, PhD

Polly Attwood  
Associate Teaching Professor, Education; Harvard University, EdD

John Auerbach  
Professor of the Practice, Institute on Urban Health Research; Boston University, MBA

Debra Auguste  
Professor, Chemical Engineering; Princeton University, PhD

Earlene Avalon  
Assistant Teaching Professor, College of Professional Studies; Simmons College, PhD

Cheryl Avitabile  
Assistant Clinical Professor, Nursing; Massachusetts General Hospital Institute of Health Professions, DNP

Joseph L. Ayers  
Professor, Marine and Environmental Sciences; University of California, Santa Cruz, PhD

B

Kenneth P. Baclawski  
Associate Professor, Computer and Information Science; Harvard University, PhD

Sophie Bacq  
Assistant Professor, Entrepreneurship and Innovation; Louvain School of Management (Belgium), PhD

Robert Baginski  
Assistant Clinical Professor, Physician Assistant Program; University of Connecticut, DSc

Rekha Bai  
Lecturer, Mathematics; University of Iowa, PhD

Moya Bailey  
Assistant Professor, English; Emory University, PhD

Richard H. Bailey  
Professor, Marine and Environmental Sciences; University of North Carolina, Chapel Hill, PhD

Wendy Bailey  
Associate Professor, Accounting; University of Pittsburgh, PhD

Carolyn Bair  
Assistant Teaching Professor, College of Professional Studies; Loyola University, Chicago, PhD

Ambika Bajpayee  
Assistant Professor, Bioengineering; Massachusetts Institute of Technology, PhD

Allison Baker  
Lecturer, Psychology; Northeastern University, PhD

Julie Baker  
Associate Teaching Professor, English; Southern New Hampshire University, MFA

Apostolia Baki  
Research Assistant Professor, Pharmaceutical Sciences; University of Athens (Greece), PhD

Charles Bame-Aldred  
Associate Academic Specialist, Accounting; University of Massachusetts, Amherst, PhD

Elitsa Banalieva  
Associate Professor and Gary Gregg Faculty Fellow, International Business and Strategy; Indiana University, PhD

Debra Bangs  
Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Massachusetts General Hospital Institute of Health Professions, DPT
Brendan Bannister
Associate Professor, Management and Organizational Development; Kent State University, DBA

Arun Bansil
University Distinguished Professor, Physics; Harvard University, PhD

Albert-Laszlo Barabasi
Robert Gray Dodge Professor of Network Science and University Distinguished Professor, Computer and Information Science and Physics; Boston University, PhD

Amy Barber
Postdoctoral Teaching Associate, Communication Studies; University of Wisconsin, Madison, PhD

Emanuela Barberis
Associate Professor, Physics; University of California, Santa Cruz, PhD

G. Elise Barboza
Assistant Professor, African-American Studies and Criminology and Criminal Justice; Michigan State University, PhD

Gloria Barczak
Professor, Marketing; Syracuse University, PhD

Jay Bardhan
Assistant Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Cynthia L. Baron
Associate Academic Specialist, College of Professional Studies; Northeastern University, MBA

Amílcar A. Barreto Jr.
Associate Professor, Political Science; State University of New York, Buffalo, PhD

Yakov Bart
Assistant Professor, Marketing; University of California, Berkeley, PhD

Stefano Basagni
Associate Professor, Electrical and Computer Engineering; University of Texas, Dallas, PhD

Marla Baskerville
Assistant Professor, Management and Organizational Development; Tulane University, PhD

John Basl
Assistant Professor, Philosophy and Religion; University of Wisconsin, Madison, PhD

Maureen Basmajian
Associate Cooperative Education Coordinator, D’Amore-McKim School of Business; Boston College, MBA

Linnea M. Basu
Assistant Cooperative Education Coordinator, College of Social Sciences and Humanities; Northeastern University, MS

Oleg Batischchev
Professor of the Practice, Physics; Moscow Institute of Physics and Technology (Russia), PhD

Christopher E. Beasley
Associate Professor, Mathematics; Princeton University, PhD

Nicholas Beauchamp
Assistant Professor, Political Science; New York University, PhD

Michelle A. Beauchesne
Associate Professor, Nursing; Boston University, DNSc

Mike Beaudet
Professor of the Practice, Journalism; Northeastern University, MS

Gail S. Begley
Teaching Professor, Biology; Boston University, PhD

Mehdi Behroozi
Assistant Professor, Mechanical and Industrial Engineering; University of Minnesota, PhD

Edward Beighley
Associate Professor, Civil and Environmental Engineering; University of Maryland, PhD

Kerri Beiswenger
Associate Cooperative Education Coordinator, College of Engineering; Northeastern University, MBA

Bianca T. Belcher
Assistant Clinical Professor, Physician Assistant Program; Northeastern University, MS

Leo Beletsky
Assistant Professor, Health Sciences and Law; Temple University, JD

Carole Bell
Assistant Professor, Communication Studies; University of North Carolina, Chapel Hill, PhD

Chiara Bellini
Assistant Professor, Bioengineering; University of Calgary (Canada), PhD

Sidi Bencherif
Assistant Professor, Chemical Engineering; Carnegie Mellon University, PhD

Jonathan Benda
Lecturer, English; Syracuse University, PhD

Elizabeth Bennett
Associate Teaching Professor, Education; University of Georgia, PhD

James C. Benneyan
Professor, Mechanical and Industrial Engineering; University of Massachusetts, Amherst, PhD

Iris Berent
Professor, Psychology; University of Pittsburgh, PhD

Kostia Bergman
Associate Professor, Biology; California Institute of Technology, PhD

Dionisio Bernal
Professor, Civil and Environmental Engineering; University of Tennessee, PhD

Eugene A. Bernstein
Associate Teaching Professor, Pharmaceutical Sciences; Ivanovo Medical Institute (Russia), PhD
Craig T. Bettinson  
Director of Cooperative Education, College of Arts, Media and Design; Northeastern University, MEd

Penny Beuning  
Associate Professor, Chemistry and Chemical Biology; University of Minnesota, PhD

Peter Bex  
Professor, Psychology; Cardiff University (United Kingdom), PhD

Dapeng Bi  
Assistant Professor, Physics; Brandeis University, PhD

Timothy Bickmore  
Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Ricardo Binetti  
Assistant Academic Specialist, World Languages Center; University of Massachusetts, Amherst, MA

Allan Bird  
Brodsky Trustee Professor of Global Business, International Business and Strategy; University of Oregon, PhD

Donna M. Bishop  
Professor, Criminology and Criminal Justice; State University of New York, Albany, PhD

Nathan Blake  
Associate Teaching Professor, Media and Screen Studies; University of California, PhD

Samuel J. Blank  
Professor, Mathematics; Brandeis University, PhD

Robert J. Blaser  
Associate Cooperative Education Coordinator, Bouvé College of Health Sciences; Massachusetts College of Pharmacy, MS

Martin H. Blatt  
Professor of the Practice, History; Boston University, PhD

Francis C. Blessington  
Professor, English; Brown University, PhD

Cameron Blevis  
Assistant Professor, History; Stanford University, PhD

Aaron S. Block  
Assistant Teaching Professor, English; Emerson College, MFA

Barry Bluestone  
Russell B. and Andrée B. Stearns Trustee Professor of Political Economy, Public Policy and Urban Affairs; University of Michigan, PhD

Linda M. Blum  
Professor, Sociology and Anthropology; University of California, Berkeley, PhD

Rhonda M. Board  
Associate Professor, Nursing; Ohio State University, PhD

Janet Bobcean  
Associate Professor, Theatre; Ohio University, MFA

Erika M. Boeckeler  
Assistant Professor, English; Harvard University, PhD

Charles Bognanni  
Senior Cooperative Education Coordinator, D’Amore-McKim School of Business; Northeastern University, MEd

Norman R. Boisse  
Associate Professor, Pharmaceutical Sciences; Cornell University, PhD

Paul J. Bolster  
Professor, Finance; Virginia Polytechnic Institute, PhD

Alice Bonner  
Associate Professor, Nursing; University of Massachusetts, Worcester, PhD

Lorraine A. Book  
Assistant Clinical Professor, Communication Sciences and Disorders; Florida State University, PhD

Raymond G. Booth  
Professor, Pharmaceutical Sciences and Chemistry and Chemical Biology; University of California, San Francisco, PhD

Michelle Borkin  
Assistant Professor, Computer and Information Science; Harvard University, PhD

Natalie Bormann  
Associate Teaching Professor, Political Science; University of Newcastle upon Tyne (United Kingdom), PhD

Jeffery A. Born  
Professor, Finance; University of North Carolina, Chapel Hill, PhD

Christopher J. Bosso  
Professor, Public Policy and Urban Affairs; University of Pittsburgh, PhD

Ekaterina Botchkovar  
Associate Professor, Criminology and Criminal Justice; North Carolina State University, PhD

Kevin Boudreau  
Associate Professor, Entrepreneurship and Innovation; Massachusetts Institute of Technology, PhD

Alma L. Bouman  
Associate Academic Specialist, World Languages Center; Western Maryland College, MS

Stacey Bouma  
Professor, College of Social Sciences and Humanities; University of Texas, Austin, PhD

Carla Bouwmeester  
Associate Clinical Professor, Pharmacy and Health Systems Sciences; Massachusetts College of Pharmacy, PharmD

Jennifer Bowen  
Associate Professor, Marine and Environmental Sciences; Boston University, PhD

James Boyer  
Assistant Academic Specialist, Accounting; Northeastern University, MBA
Nicole M. Boyson  
Associate Professor and William Conley Faculty Fellow, Finance; Ohio State University, PhD

Kara Braciale  
Lecturer, Art + Design; University of Illinois, Chicago, MFA

Anthony Braga  
Distinguished Professor, School of Criminology and Criminal Justice; Rutgers University, PhD

Maxim Braverman  
Professor, Mathematics; Tel Aviv University (Israel), PhD

Heather Brenhouse  
Assistant Professor, Psychology; Northeastern University, PhD

Janet Briand-McGowan  
Assistant Clinical Professor, Nursing; Northeastern University, DNP

Becky A. Briesacher  
Associate Professor, Pharmacy and Health Systems Sciences; University of Maryland, Baltimore, PhD

Amy M. Briesch  
Associate Professor, Applied Psychology; University of Connecticut, PhD

Elizabeth C. Britt  
Associate Professor, English; Rensselaer Polytechnic Institute, PhD

Sharon M. Britton  
Assistant Cooperative Education Coordinator, College of Engineering; Massachusetts Institute of Technology, MS

Bonnie Brock  
Associate Cooperative Education Coordinator, D’Amore-McKim School of Business; University of Vermont, MEd

Oscar T. Brookins  
Associate Professor, Economics; State University of New York, Buffalo, PhD

Dana H. Brooks  
Professor, Electrical and Computer Engineering; Northeastern University, PhD

Cammy Brothers  
Associate Professor, Architecture and Art + Design; Harvard University, PhD

Michael E. Brown  
Professor, Sociology and Anthropology; University of Michigan, JD, PhD

Philip M. Brown  
Professor, Sociology and Anthropology and Health Sciences; Brandeis University, PhD

Ronald Brown  
Assistant Teaching Professor, College of Professional Studies; Harvard University, EdD

Timothy S. Brown  
Professor, History; University of California, Berkeley, PhD

Todd A. Brown  
Clinical Instructor, Pharmacy and Health Systems Sciences; Northeastern University, MHP

Corliss Brown-Thompson  
Assistant Teaching Professor, College of Professional Studies; University of North Carolina, Chapel Hill, PhD

Maria Brucato  
Associate Academic Specialist, World Languages Center; University of Texas, PhD

Elizabeth M. Bucar  
Associate Professor, Philosophy and Religion; University of Chicago, PhD

David E. Budil  
Associate Professor, Chemistry and Chemical Biology; University of Chicago, PhD

Mindelyn Buford II  
Assistant Professor, Sociology and Anthropology; Johns Hopkins University, PhD

Lucy Bunning  
Assistant Teaching Professor, College of Professional Studies; Lesley University, PhD

Jeffrey Burds  
Associate Professor, History; Yale University, PhD

Lynn H. Burke  
Senior Cooperative Education Coordinator, College of Arts, Media and Design; University of Massachusetts, Amherst, MEd

Pamela J. Burke  
Clinical Professor, Nursing; Boston College, PhD

Jose Buscaglia  
Professor, Languages, Literatures, and Cultures; University of Buffalo, PhD

Jeremy P. Bushnell  
Assistant Teaching Professor, English; University of Arizona, Tucson, MFA

Ahmed A. Busnaina  
William Lincoln Smith Professor of Mechanical Engineering, Mechanical and Industrial Engineering; Oklahoma State University, PhD

Michael Butera  
Clinical Instructor, Nursing; Northeastern University, MS

Victoria Cain  
Assistant Professor, History; Columbia University, PhD

Paula Caligiuri  
Distinguished Professor of Global Leadership, International Business and Strategy; Pennsylvania State University, PhD

Lisa Campagnoni  
Assistant Cooperative Education Coordinator, College of Science; Northeastern University, MA

Octavia Camps  
Professor, Electrical and Computer Engineering; University of Washington, PhD

Clinton Canal  
Research Assistant Professor, Pharmaceutical Sciences; University of Illinois, PhD
Yanet Canavan
Assistant Academic Specialist, World Languages Center; Salem State College, MA

Kristopher Cannon
Assistant Teaching Professor, Media and Screen Studies; Georgia State University, PhD

Alessandro Canossa
Associate Professor, Game Design; Royal Danish Academy of Fine Arts (Netherlands), PhD

Mira Cantor
Professor, Art + Design; University of Illinois, Urbana-Champaign, MFA

Michele Cao-Danh
Associate Academic Specialist, World Languages Center; Boston University, PhD

Luca Caracoglia
Associate Professor, Civil and Environmental Engineering; University of Trieste (Italy), PhD

Benjamin Caras
Lecturer, Art + Design; University of Massachusetts, Amherst, MFA

Michele Carletti
Assistant Teaching Professor, Pharmaceutical Sciences; State University of New York, Buffalo, PhD

Joelle Carlo
Assistant Teaching Professor, Pharmaceutical Sciences; State University of New York, Buffalo, PhD

Alexa A. Carlson
Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Butler University, PharmD

Mary Carney
Associate Cooperative Education Coordinator, Bouvé College of Health Sciences; Boston College, MSN

Heather Carpenter
Assistant Cooperative Education Coordinator, College of Engineering; Northeastern University, MS

Jonathan Carr
Assistant Teaching Professor, Theatre; Columbia University, MFA

Michelle Carr
Lecturer, Communication Studies; Kingston University (United Kingdom), MA

Rebecca L. Carrier
Associate Professor, Chemical Engineering; Massachusetts Institute of Technology, PhD

Patricia Case
Assistant Teaching Professor, Health Sciences; Harvard University, ScD

Ana-Maria Castravet
Associate Professor, Mathematics; Massachusetts Institute of Technology, PhD

Smajl Cenjic
Assistant Cooperative Education Coordinator, Computer and Information Science; Cambridge College, MA

Robert J. Cersosimo
Associate Professor, Pharmacy and Health Systems Sciences; University of Utah, PharmD

Christopher Cesario
Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Yunrong Chai
Assistant Professor, Biology; Cornell University, PhD

Srinath Chakravarthy
Assistant Professor, Mechanical and Industrial Engineering; University of Connecticut, PhD

Christopher Chambers
Lecturer, Sociology and Anthropology; Texas AM University, PhD

Paul M. Champion
Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Chee Chan
Assistant Academic Specialist, Marketing; Michigan State University, PhD

Robin M. Chandler
Associate Professor, African-American Studies; Northeastern University, PhD

Suzanne Charles
Assistant Professor, Architecture; Harvard University, PhD

Yi-Da Chen
Assistant Professor, Supply Chain and Information Management; University of Arizona, PhD

Esther Chewning
Associate Cooperative Education Coordinator, D’Amore-McKim School of Business; Suffolk University, MS

Elizabeth A. Chilvers
Associate Professor, Cooperative Education, D’Amore-McKim School of Business; Northeastern University, MEd

W. Paul Chiu
Assistant Teaching Professor, Finance; Rutgers University, PhD

David R. Choffnes
Assistant Professor, Computer and Information Science; Northwestern University, PhD

Sam S. Choi
Associate Teaching Professor, Architecture; Harvard University, MArch

Sunho Choi
Assistant Professor, Chemical Engineering; University of Minnesota, PhD

Chun-An Chou
Assistant Professor, Mechanical and Industrial Engineering; Rutgers University, PhD

Kaushik Roy Chowdhury
Associate Professor, Electrical and Computer Engineering; University of Cincinnati, MS

Ken Chung
Assistant Teaching Professor, Chemistry and Chemical Biology; Michigan State University, PhD
Hillary Chute  
Professor, English; Rutgers University, PhD

John W. Cipolla Jr.  
Donald W. Smith Professor of Mechanical Engineering and College of Engineering Distinguished Professor, Mechanical and Industrial Engineering; Brown University, PhD

Dawn M. Cisewski  
Assistant Teaching Professor, Psychology; Indiana University of Pennsylvania, PsyD

Bruce H. Clark  
Associate Professor, Marketing; Stanford University, PhD

Edmund L. Clark  
Associate Academic Specialist, Entrepreneurship and Innovation; Clark University, MBA

Heather Clark  
Professor, Pharmaceutical Sciences; University of Michigan, PhD

Sean Clark  
Postdoctoral Teaching Associate, Mathematics; University of Virginia, PhD

Stephen B. Clark  
Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Alison Clayton-Matthews  
Associate Professor, Public Policy and Urban Affairs and Economics; Boston College, PhD

Sandra S. Cleveland  
Assistant Clinical Professor, Communication Sciences and Disorders; Pennsylvania College of Optometry, Aud

William D. Clinger  
Associate Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Paul Closas  
Assistant Professor, Electrical and Computer Engineering; Universitat Politècnica de Catalunya (Spain), PhD

Irina Cojuharenco  
Assistant Teaching Professor, Management and Organizational Development; Universitat Pompeu Fabra (Spain), PhD

Dennis R. Cokely  
Professor, American Sign Language and Languages, Literatures, and Cultures and World Languages Center; Georgetown University, PhD

Maxine Cokely  
Associate Academic Specialist, College of Professional Studies; Bowie State University, MEd

Stephanie Colby  
Assistant Teaching Professor, College of Professional Studies; Eastern University, PhD

John D. Coley  
Associate Professor, Psychology; University of Michigan, PhD

C. Randall Colvin  
Associate Professor, Psychology; University of Illinois, Urbana-Champaign, PhD

Sally Conant  
Assistant Cooperative Education Coordinator, College of Engineering; Salve Regina University, MA

Michelle Conceison  
Assistant Teaching Professor, Music; Simmons College, MBA

Michael Conley  
Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Richard C. Conley  
Assistant Cooperative Education Coordinator, College of Social Sciences and Humanities; Boston University, JD

Kelly Conn  
Assistant Teaching Professor, College of Professional Studies; Boston University, PhD

Carol Connolly  
Clinical Instructor, Nursing; Northeastern University, MS

Gregory Connolly  
Research Professor, Law and Health Sciences; Tufts University, PhD

James J. Connolly  
Assistant Professor, Public Policy and Urban Affairs and Political Science; Columbia University, PhD

Adam Cooper  
Lecturer, Linguistics; Cornell University, PhD

Seth Cooper  
Assistant Professor, Computer and Information Science; University of Washington, PhD

Gene D. Cooperman  
Professor, Computer and Information Science; Brown University, PhD

Debra Copeland  
Associate Clinical Professor, Pharmacy and Health Systems Sciences; University of Rhode Island, PharmD

Ryan C. Cordell  
Assistant Professor, English; University of Virginia, PhD

Marie B. Corkery  
Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Felipe Cortes  
Assistant Professor, Finance; Washington University, St. Louis, PhD

Kristen Costa  
Assistant Teaching Professor, College of Professional Studies; Northeastern University, EdD

Hugh G. Courtney  
Professor, International Business and Strategy; Massachusetts Institute of Technology, PhD

Arthur J. Coury  
Professor, Chemical Engineering; University of Minnesota, PhD
Erin Cram  
Associate Professor, Biology; University of California, Berkeley, PhD

Frederick Crane  
Senior Academic Specialist, Entrepreneurship and Innovation; Bradford University, PhD

Steven Cranford  
Assistant Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

William F. Crittenden  
Professor, International Business and Strategy; University of Arkansas, PhD

Mai’a K. D. Cross  
Associate Professor, Political Science; Princeton University, PhD

Christina Crowe  
Lecturer, Psychology; Boston College, PhD

Jessica Crowley  
Assistant Cooperative Education Coordinator, D’Amore-McKim School of Business; Boston College, MA

Alvaro Cuervo-Cazurra  
Professor and Robert Morrison Fellow, International Business and Strategy; Massachusetts Institute of Technology, PhD

Carlos A. Cuevas  
Associate Professor, Criminology and Criminal Justice; Alliant International University, PhD

Thomas P. Cullinane  
Professor, Mechanical and Industrial Engineering; Virginia Polytechnic Institute and State University, PhD

Kamran M. Dadkhah  
Associate Professor, Economics; Indiana University, PhD

Guohao Dai  
Associate Professor, Bioengineering; Massachusetts Institute of Technology, PhD

Elise J. Dallimore  
Associate Professor, Communication Studies; University of Washington, PhD

James D. Dana Jr.  
Professor, Economics and International Business and Strategy; Massachusetts Institute of Technology, PhD

Luis Dau  
Associate Professor, International Business and Strategy; University of South Carolina, PhD

Geoffrey Davies  
Matthews Distinguished University Professor, Chemistry and Chemical Biology; Birmingham University (United Kingdom), PhD, DSc

Frederick C. Davis  
Professor, Biology; University of Texas, Austin, PhD

Michael Davis  
Postdoctoral Teaching Associate, Communication Studies; University of Tennessee, PhD

Theo Davis  
Associate Professor, English; Johns Hopkins University, PhD

Leslie Day  
Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, PhD

Anthony P. De Ritis  
Professor, Music and Entrepreneurship and Innovation; University of California, Berkeley, PhD

Adenekan (Nick) Dedeke  
Lecturer, Supply Chain and Information Management; Technische Universität Kaiserslautern (Germany), PhD

Plinio DeGoes  
Assistant Academic Specialist, College of Professional Studies; Northwood University, MA

Mohammad Dehghanimohammadabadi  
Assistant Teaching Professor, Mechanical and Industrial Engineering; Western New England University, PhD

Richard DeJordy  
Assistant Professor, Management and Organizational Development; Boston College, PhD

Candice Delams  
Assistant Professor, Political Science and Philosophy; Boston University, PhD

John Dencker  
Associate Professor, Management and Organizational Development; Harvard University, PhD

Jack Dennerlein  
Professor, Physical Therapy, Movement, and Rehabilitation Sciences; University of California, PhD

Jacob Depue  
Postdoctoral Teaching Associate, Communication Studies; University of Minnesota, PhD

Leila Deravi  
Assistant Professor, Chemistry and Chemical Biology; Vanderbilt University, PhD

Marco Deseriis  
Assistant Professor, Media and Screen Studies; New York University, PhD

Peter J. Desnoyers  
Associate Professor, Computer and Information Science; University of Massachusetts, Amherst, PhD

David A. DeSteno  
Professor, Psychology; Yale University, PhD

Sebastian Deterding  
Assistant Professor, Game Design; Hamburg University (Germany), PhD

H. William Detrich  
Professor, Marine and Environmental Sciences; Yale University, PhD

John W. Devlin  
Professor, Pharmacy and Health Systems Sciences; University of Toronto (Canada), PharmD
Janet Dewan  
Assistant Clinical Professor, Nursing; Northeastern University, PhD

Jacqueline Diani  
Senior Cooperative Education Coordinator, Bouvé College of Health Sciences; University of Virginia, MEd

Martin Dias  
Assistant Professor, Supply Chain and Information Management; Bentley University, PhD

William T. Dickens  
University Distinguished Professor, Economics and Public Policy and Urban Affairs; Massachusetts Institute of Technology, PhD

Alessandra DiCredico  
Lecturer, Physics; University of Rome (Italy), PhD

Max Diem  
Professor, Chemistry and Chemical Biology; University of Toledo, PhD

Elizabeth Maddock Dillon  
Professor, English; University of California, Berkeley, PhD

Charles DiMarzio  
Associate Professor, Electrical and Computer Engineering; Northeastern University, PhD

Paul DiMilla  
Associate Teaching Professor, Chemistry and Chemical Biology and Chemical Engineering; University of Pennsylvania, PhD

Edward Dinan  
Lecturer, Accounting; Harvard University, MS

Aidong Adam Ding  
Associate Professor, Mathematics; Cornell University, PhD

Kathleen B. Dioli  
Assistant Cooperative Education Coordinator, Chemistry and Chemical Biology; Bowling Green State University, MA

Brandon Dionne  
Assistant Clinical Professor, Pharmacy and Health Systems Sciences; University of New England, PharmD

Daniel Distel  
Research Professor, Marine and Environmental Sciences; University of California, San Diego, PhD

Margarita V. DiVall  
Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Lisa Cantwell Doherty  
Assistant Cooperative Education Coordinator, College of Social Sciences and Humanities; Northeastern University, MA

Silvia Domínguez  
Associate Professor, Sociology and Anthropology; Boston University, PhD

Hua Dong  
Associate Academic Specialist, World Languages Center; Emerson College, MA

Brenda Douglas  
Associate Clinical Professor, Nursing; Northeastern University, PhD

Mark Douglass  
Associate Clinical Professor, Pharmacy and Health Systems Sciences; University of Michigan, PharmD

Kevin M. Drakulich  
Assistant Professor, Criminology and Criminal Justice; University of Washington, PhD

Laura Dudley  
Clinical Instructor, Applied Psychology; Northeastern University, MS

Molly Dugan  
Assistant Teaching Professor, College of Professional Studies; Boston College, PhD

Michael S. Dukakis  
Distinguished Professor, Political Science; Harvard University, JD

Daniel M. Dulaski  
Associate Teaching Professor, Civil and Environmental Engineering; University of Massachusetts, Amherst, PhD

Catherine Dunand  
Assistant Academic Specialist, World Languages Center; Boston University, MA

Joanne Dupuis  
Assistant Clinical Professor, Nursing; Massachusetts School of Law, JD

Douglas F. Durant  
Lecturer, Music; Brandeis University, PhD

Kathleen Durant  
Lecturer, Computer and Information Science; Harvard University, PhD

Jennifer G. Dy  
Associate Professor, Electrical and Computer Engineering; Purdue University, PhD

Lauren D’Abrasca  
Assistant Cooperative Education Coordinator, Finance; Boston University, MEd

Philip Anthony D’Agati  
Associate Teaching Professor, Political Science; Northeastern University, MA

E

Eno Ebong  
Assistant Professor, Chemical Engineering; Rensselaer Polytechnic Institute, PhD

Matthew Eckelman  
Assistant Professor, Civil and Environmental Engineering; Yale University, PhD

Kimberly Eddleston  
Professor and Daniel and Dorothy Grady Faculty Fellow, Entrepreneurship and Innovation; University of Connecticut, PhD

Scott Edmiston  
Professor of the Practice, Theatre; Boston University, MFA

Laurie E. Edwards  
Associate Teaching Professor, English; Emerson College, MFA
Jessica Edwards George
Associate Clinical Professor, Applied Psychology; Northeastern University, PhD

Christopher Egan
Assistant Cooperative Education Coordinator, College of Science; Boston University, MA

Jean F. Egan
Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; Northeastern University, MEd

Stanley J. Eigen
Professor, Mathematics; McGill University (Canada), PhD

Adam Ekenseair
Assistant Professor, Chemical Engineering; University of Texas, Austin, PhD

Ehsan Elhamifar
Assistant Professor, Computer and Information Science; Johns Hopkins University, PhD

Simone Elias
Assistant Academic Specialist, World Languages Center; Harvard University, MA

Tina Eliassi-Rad
Associate Professor, Computer and Information Science; University of Wisconsin, Madison, PhD

Ryan Ellis
Assistant Professor, Communication Studies; University of California, San Diego, PhD

Constance Emerson
Assistant Academic Specialist, College of Professional Studies; Purdue University, West Lafayette, MS

John Engen
Professor, Chemistry and Chemical Biology and Barnett Institute; University of Nebraska, Lincoln, PhD

Christen Enos
Lecturer, English; Emerson College, MFA

Slava S. Epstein
Professor, Biology; Moscow State University (Russia), PhD

Randall Erb
Assistant Professor, Mechanical and Industrial Engineering; Duke University, PhD

Deniz Erdogmus
Associate Professor, Electrical and Computer Engineering; University of Florida, PhD

Awatef Ergai
Assistant Teaching Professor, Mechanical and Industrial Engineering; Clemson University, PhD

Ozlem Ergun
Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Cuneyt Eroglu
Associate Professor, Supply Chain and Information Management; Ohio State University, PhD

Bilge Erten
Assistant Professor, Economics and International Affairs; University of Massachusetts, Amherst, PhD

Rhea T. Eskew
Professor, Psychology; Georgia Institute of Technology, PhD

Jonathan Esole
Assistant Professor, Mathematics; Leiden University (Netherlands), PhD

Neenah Estrella-Luna
Associate Teaching Professor, College of Professional Studies; Northeastern University, PhD

Sara Ewell
Associate Teaching Professor, College of Professional Studies; University of North Carolina, Chapel Hill, PhD

F

Daniel R. Faber
Professor, Sociology and Anthropology; University of California, Santa Cruz, PhD

Olubunmi Faley
Professor, Trahan Family Faculty Fellow, and Walsh Research Professor, Finance; University of Alberta (Canada), PhD

Hui Fang
Assistant Professor, Electrical and Computer Engineering; University of California, Berkeley, PhD

Qianqian Fang
Assistant Professor, Bioengineering; Dartmouth University, PhD

David Fannon
Assistant Professor, Architecture and Civil and Environmental Engineering; University of California, Berkeley, MS Arch

Nasser S. Fard
Associate Professor, Mechanical and Industrial Engineering; University of Arizona, PhD

Amir Farhat
Associate Teaching Professor, Electrical and Computer Engineering; University of Pennsylvania, PhD

Amy S. Farrell
Associate Professor, Criminology and Criminal Justice; Northeastern University, PhD

Christopher Featherman
Assistant Teaching Professor, English; University of Washington, PhD

Mary Federico
Assistant Cooperative Education Coordinator, College of Engineering; Indiana University, MS

Yunsi Fei
Associate Professor, Electrical and Computer Engineering; Princeton University, PhD
Adrian Feiguin  
Assistant Professor, Physics; Universidad Nacional de Rosario (Argentina), PhD

Daniel Feinberg  
Assistant Clinical Instructor, Computer and Information Science and Health Sciences; Boston University, MBA

Allen G. Feinstein  
Teaching Professor, Music; New England Conservatory of Music, MM

Nathan I. Felde  
Professor, Art + Design; Massachusetts Institute of Technology, MS

Lisa Feldman Barrett  
University Distinguished Professor, Psychology; University of Waterloo (Canada), PhD

Matthias Felleisen  
Trustee Professor, Computer and Information Science; Indiana University, PhD

Samuel Felton  
Assistant Professor, Mechanical and Industrial Engineering; Harvard University, PhD

Carol Femia  
Clinical Instructor, Nursing; Massachusetts General Hospital Institute of Health Professions, MS

Hicham Fenniri  
Professor, Chemical Engineering; Université de Strasbourg (France), PhD

Loretta A. Fernandez  
Assistant Professor, Civil and Environmental Engineering and Marine and Environmental Sciences; Massachusetts Institute of Technology, PhD

Waththage Neranga Fernando  
Lecturer, Mathematics; University of South Florida, PhD

Craig F. Ferris  
Professor, Psychology and Pharmaceutical Sciences; New York Medical College, PhD

Kirsten Fertuck  
Assistant Teaching Professor, Biochemistry; Michigan State University, PhD

Susan F. Fine  
Clinical Instructor, Communication Sciences and Disorders; New York University, MA

Sarah Finn  
Assistant Teaching Professor, English; University of Massachusetts, Amherst, PhD

Branden Fitelson  
Distinguished Professor, Philosophy and Religion; California Institute of Technology, PhD

Brian Fitzgerald  
Assistant Professor, Accounting; Texas AM University, PhD

Joan Fitzgerald  
Professor, Law and Public Policy and Public Policy and Urban Affairs; Pennsylvania State University, PhD

John E. Fitzmaurice  
Assistant Cooperative Education Coordinator, College of Engineering; College of William and Mary, MBA

Diane F. Fitzpatrick  
Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Julia H. Flanders  
Professor of the Practice, English and University Libraries; Brown University, PhD

Peggy L. Fletcher  
Lecturer, Finance; University of Pittsburgh, MBA

Ann Marie Flores  
Assistant Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Ohio State University, PhD

Marcial Flores  
Assistant Academic Specialist, World Languages Center; Boston College, MA

Eric Folmar  
Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Paul Fombelle  
Associate Professor, Marketing; Arizona State University, PhD

Murray Forman  
Professor, Media and Screen Studies; McGill University (Canada), PhD

Lisa M. Foster  
Assistant Cooperative Education Coordinator, Bouvé College of Health Sciences; Northeastern University, MS

Dimitrios Fotiadis  
Lecturer, Supply Chain and Information Management; Northeastern University, MS

Brooke Foucault Welles  
Assistant Professor, Communication Studies; Northwestern University, PhD

Charles F. Fountain  
Associate Professor, Journalism; Columbia University, MS

William M. Fowler Jr.  
Distinguished Professor, History; University of Notre Dame, PhD

James Alan Fox  
Lipman Family Professor, Criminology and Criminal Justice and Law and Public Policy; University of Pennsylvania, PhD

Laura L. Frader  
Professor, History; University of Rochester, PhD

Debra L. Franko  
Professor, Applied Psychology; McGill University (Canada), PhD

Susan Freeman  
Teaching Professor, Engineering; Northeastern University, PhD

Clark Freifeld  
Lecturer, Computer and Information Science; Boston University, PhD
Michael Frengel  
Associate Academic Specialist, Music; City University London (United Kingdom), PhD

John H. Friar  
Senior Academic Specialist, Entrepreneurship and Innovation; Massachusetts Institute of Technology, PhD

Natasha Frost  
Associate Professor, Criminology and Criminal Justice; City University of New York, PhD

Yun (Raymond) Fu  
Assistant Professor, Electrical and Computer Engineering and Computer and Information Science; University of Illinois, Urbana-Champaign, PhD

Brian Fulton  
Lecturer, Chemistry and Chemical Biology; Iowa State University, PhD

Peter G. Furth  
Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

Terence J. Gaffney  
Professor, Mathematics; Brandeis University, PhD

Timothy Gagnon  
Associate Academic Specialist, Accounting; Sacred Heart University, MBA

Ronen Gal-Or  
Assistant Professor, Accounting; University of Arizona, PhD

Chris W. Gallagher  
Professor, English; University of New York, Albany, PhD

Susan Gallagher  
Clinical Instructor, Nursing; Massachusetts General Hospital Institute of Health Professions, MS

Auroop Ganguly  
Associate Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

Denise Garcia  
Associate Professor, Political Science and International Affairs; University of Geneva (Switzerland), PhD

Lori Gardinier  
Associate Teaching Professor, Human Services; Northeastern University, PhD

Karen Garneau  
Associate Teaching Professor, English; Northeastern University, PhD

Samuel John Gatley  
Professor, Pharmaceutical Sciences; University of Newcastle upon Tyne (United Kingdom), PhD

Nicole Georgallas  
Lecturer, Communication Studies; Emerson College, MA

Prasanth George  
Assistant Teaching Professor, Mathematics; State University of New York, Buffalo, PhD

Carleton Gholz  
Postdoctoral Teaching Associate, Communication Studies; University of Pittsburgh, PhD

Roger W. Giese  
Professor, Pharmaceutical Sciences; Massachusetts Institute of Technology, PhD

Joseph M. Giglio  
Senior Academic Specialist, International Business and Strategy; Northeastern University, PhD

Richard Gilbert  
Research Professor, Chemistry and Chemical Biology; New Jersey Medical School, PhD

Thomas R. Gilbert  
Associate Professor, Chemistry and Chemical Biology; Massachusetts Institute of Technology, PhD

Laurance Ginsberg  
Assistant Academic Specialist, Accounting; Bentley University, MST

Leonard J. Glick  
Senior Academic Specialist, Management and Organizational Development; Harvard University, EdD

Veronica Godoy-Carter  
Associate Professor, Biology; Tufts University, PhD

Michael Bradford Goetz  
Assistant Teaching Professor, Architecture; University of Pennsylvania, MLA

Gregory Goodale  
Associate Professor, Communication Studies; University of Illinois, Urbana-Champaign, PhD
Pamela W. Goodale  
Senior Cooperative Education Coordinator, College of Arts, Media and Design; Boston College, MA

Teresa Goode  
Assistant Teaching Professor, College of Professional Studies; Columbia University, EdD

Patricia Goodman  
Assistant Teaching Professor, College of Professional Studies; George Washington University, EdD

Matthew Goodwin  
Assistant Professor, Health Sciences and Health Informatics; University of Rhode Island, PhD

Mark Gooley  
Lecturer, Finance; Northwestern University, MM

Margaret Gorman Kirchoff  
Assistant Teaching Professor, College of Professional Studies; George Washington University, EdD

Gary Goshgarian  
Professor, English; University of Wisconsin, Madison, PhD

Tarik Gouhier  
Assistant Professor, Marine and Environmental Sciences; McGill University (Canada), PhD

Robson Goulart  
Assistant Cooperative Education Coordinator, College of Engineering; Boston University, MS

Andrew Gouldstone  
Associate Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Eugene H. Gover  
Associate Professor, Mathematics; Brandeis University, PhD

Jonathan H. Grabowski  
Associate Professor, Marine and Environmental Sciences; University of North Carolina, Chapel Hill, PhD

Susan Gracia  
Assistant Teaching Professor, College of Professional Studies; Boston College, PhD

Matthew Gray  
Assistant Professor, Theatre; London Academy of Music and Dramatic Arts (United Kingdom), MFA

Laura Green  
Professor, English; University of California, Berkeley, PhD

Jack R. Greene  
Professor, Criminology and Criminal Justice; Michigan State University, PhD

Kristin Curry Greenwood  
Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Daniel S. Gregory  
Senior Academic Specialist, Entrepreneurship and Innovation and Art + Design; Harvard University, MBA

Sara Grier  
Assistant Cooperative Education Coordinator, College of Engineering; Northeastern University, MS

Brent Griffin  
Assistant Teaching Professor, CPS International Programs; Northeastern University, PhD

Jacqueline Griffin  
Assistant Professor, Mechanical and Industrial Engineering; Georgia Institute of Technology, PhD

Joseph Griffin  
Associate Teaching Professor, Project Management; Gordon-Conwell Theological Seminary, South Hamilton, DMin

John Griffith  
Clinical Professor, Applied Psychology; Boston University, PhD

Amir Grinstein  
Associate Professor, Marketing; Hebrew University of Jerusalem (Israel), PhD

Francesca Grippa  
Associate Teaching Professor, College of Professional Studies; University of Salento (Italy), PhD

Craig Gruber  
Assistant Teaching Professor, College of Professional Studies; Clark University, PhD

April Gu  
Associate Professor, Civil and Environmental Engineering; University of Washington, PhD

Tiantian Gu  
Assistant Professor, Finance; University of Wisconsin, Madison, PhD

Jason Guo  
Associate Research Professor, Pharmaceutical Sciences; University of Connecticut, Storrs, PhD

Surendra M. Gupta  
Professor, Mechanical and Industrial Engineering; Purdue University, PhD

Barbara Guthrie  
Professor, Nursing; New York University, PhD

Mohamed Habibullah  
Assistant Teaching Professor, Supply Chain and Information Management; University of Missouri, Columbia, PhD

David Hagen  
Assistant Teaching Professor, College of Professional Studies; New England School of Law, JD

Jerome F. Hajjar  
Professor, Civil and Environmental Engineering; Cornell University, PhD

Judith A. Hall  
University Distinguished Professor, Psychology; Harvard University, PhD

Robert L. Hall  
Associate Professor, African-American Studies and History; Florida State University, PhD
James Halverson  
Assistant Professor, Physics; University of Pennsylvania, PhD

Pauline Hamel  
Associate Clinical Professor, Health Sciences; Boston University, EdD

Scott R. Hamilton  
Associate Cooperative Education Coordinator, College of Engineering; Stanford University, PhD

William S. Hancock  
Raymond and Claire Bradstreet Chair, Chemistry and Chemical Biology; University of Adelaide (Australia), PhD

Michael J. Handel  
Associate Professor, Sociology and Anthropology; Harvard University, PhD

Nancy Hanrahan  
Professor, Nursing; Boston College, PhD

Bonnie Jo Hanson  
Assistant Clinical Professor, Physician Assistant Program; University of New England, MS

Robert N. Hanson  
Matthews Distinguished University Professor, Chemistry and Chemical Biology; University of California, Berkeley, PhD

Stephen G. Harkins  
Professor, Psychology; University of Missouri, PhD

Sharon Harlan  
Professor, Health Sciences; Cornell University, PhD

Kelly Harrington  
Assistant Cooperative Education Coordinator, D’Amore-McKim School of Business; Suffolk University, MBA

Shaunna Harrington  
Associate Academic Specialist, College of Professional Studies; Boston University, MAT

Vincent Harris  
William Lincoln Smith Professor of Electrical and Computer Engineering, Electrical and Computer Engineering; Northeastern University, PhD

Vanecia Harrison-Sanders  
Associate Cooperative Education Coordinator, Bouvé College of Health Sciences and College of Science; Emmanuel College, MA

Casper Harteveild  
Assistant Professor, Game Design; Delft University of Technology (Netherlands), PhD

Christopher Hasson  
Assistant Professor, Physical Therapy, Movement, and Rehabilitation Sciences; University of Massachusetts, Amherst, PhD

Bradley Hatfield  
Assistant Teaching Professor, Music; Cambridge College, MM

Stephanie Hattoty  
Assistant Clinical Professor, Pharmacy and Health Systems Sciences; University of Rhode Island, PharmD

Heather Hauck  
Associate Cooperative Education Coordinator, D’Amore-McKim School of Business; Northeastern University, MS

Thomas Havens  
Professor, History; University of California, Berkeley, PhD

Loma Hayward  
Associate Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Boston University, EdD

Ni He  
Associate Professor, Criminology and Criminal Justice; University of Nebraska, Omaha, PhD

Julia Hechtman  
Lecturer, Art + Design; University of Illinois, Chicago, MFA

Inez Hedges  
Professor, Languages, Literatures, and Cultures; University of Wisconsin, Madison, PhD

Gretchen A. Heefner  
Assistant Professor, History; Yale University, PhD

Donald E. Heiman  
Professor, Physics; University of California, Irvine, PhD

Ferdinand L. Hellweger  
Associate Professor, Civil and Environmental Engineering; Columbia University, EngScD

Brian Helmuth  
Professor, Marine and Environmental Sciences and Public Policy and Urban Affairs; University of Washington, PhD

Carlene Hempel  
Assistant Teaching Professor, Journalism; University of North Carolina, Chapel Hill, MA

Dale Herbeck  
Professor, Communication Studies; University of Iowa, PhD

David A. Herlihy  
Teaching Professor, Music; Boston College, JD

Catalina Herrera Almanza  
Assistant Professor, Economics and International Affairs; Cornell University, PhD

Carie Hersh  
Assistant Teaching Professor, Sociology and Anthropology; Duke University, JD

Julie Hertenstein  
Associate Professor, Accounting; Harvard University, DBA

Joshua Hertz  
Assistant Teaching Professor, Engineering; Massachusetts Institute of Technology, PhD

Mary J. Hickey  
Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Carlos Hidrovo Chavez  
Assistant Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD
Malcolm D. Hill  
Associate Professor, Marine and Environmental Sciences; University of California, Santa Cruz, PhD

Charles Hillman  
Professor, Psychology and Health Sciences; University of Maryland, College Park, PhD

Elizabeth Hirsch  
Assistant Professor, Pharmacy and Health Systems Sciences; Creighton University, PharmD

Leslie Hitch  
Associate Teaching Professor, College of Professional Studies; University of Massachusetts, Boston, EdD

Hubert Ho  
Lecturer, Music; University of California, Berkeley, PhD

Marie Odile Hobelka  
Postdoctoral Teaching Associate, Communication Studies; University of Pittsburgh, PhD

Lynda Hodgson  
Assistant Teaching Professor, College of Professional Studies; Virginia Commonwealth University, PhD

Timothy J. Hoff  
Associate Professor, Management and Organizational Development and Public Policy and Urban Affairs; Rockefeller College, PhD

Jessica Hoffman  
Associate Professor, Applied Psychology; Lehigh University, PhD

Udi Hoitash  
Associate Professor and Denise and Robert DiCenzo Term Fellow, Accounting; Rutgers University, PhD

Trenton Honda  
Assistant Clinical Professor, Physician Assistant Program; Saint Francis University, MS

Michael J. Hoppmann  
Assistant Teaching Professor, Communication Studies; University of Tübingen (Germany), PhD

Elizabeth M. Howard  
Associate Professor, Nursing; Boston College, PhD

Jeffrey P. Howe  
Assistant Professor, Journalism; Boston University, MFA

Hanchen Huang  
Professor, Mechanical and Industrial Engineering; University of California, Los Angeles, PhD

Ian Hudson  
Assistant Teaching Professor, College of Professional Studies; Nova Southeastern University, PhD

Anne Randall Hughes  
Assistant Professor, Marine and Environmental Sciences; University of California, Davis, PhD

Katlyn Hughes  
Assistant Cooperative Education Coordinator, Computer and Information Science; Northeastern University, Certificate of Advanced Study

Francisco Hung  
Associate Professor, Chemical Engineering; North Carolina State University, PhD

Matthew O. Hunt  
Professor, Sociology and Anthropology; Indiana University, PhD

Mark Huselid  
Distinguished Professor of Workforce Analytics, International Business and Strategy; State University of New York, Buffalo, PhD

J. Benjamin Hutchinson  
Assistant Professor, Psychology; Stanford University, PhD

Roxana Iacob  
Research Assistant Professor, Barnett Institute; Konstanz University (Germany), PhD

Anthony Iarrobino  
Professor, Mathematics; Massachusetts Institute of Technology, PhD

Vinay K. Ingle  
Associate Professor, Electrical and Computer Engineering; Rensselaer Polytechnic Institute, PhD

Rei Okamoto Inouye  
Associate Academic Specialist, World Languages Center; Temple University, PhD

Stephen S. Intille  
Associate Professor, Computer and Information Science and Health Sciences; Massachusetts Institute of Technology, PhD

Efstratis Ioannidis  
Assistant Professor, Electrical and Computer Engineering; University of Toronto (Canada), PhD

Roderick L. Ireland  
Distinguished Professor, Criminology and Criminal Justice; Harvard University, LLM; Northeastern University, PhD

Derek Isaacowitz  
Professor, Psychology; University of Pennsylvania, PhD

Jacqueline A. Isaacs  
Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Michelle L. Israel  
Associate Cooperative Education Coordinator, College of Science; Northeastern University, MS

Nathan Israeloff  
Associate Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Alexander Ivanov  
Research Associate Professor, Barnett Institute; Russian Academy of Science, Institute of Bioorganic Chemistry (Moscow), PhD
Maura Daly Iversen  
Professor, Physical Therapy, Movement, and Rehabilitation Sciences;   
Harvard University, SD; Massachusetts General Hospital Institute of   
Health Professions, DPT

Julia Ivy  
Associate Teaching Professor, International Business and Strategy;   
Lancaster University (United Kingdom), PhD

J  
Denise Jackson  
Associate Professor, Psychology; University of Pittsburgh, PhD

Ellen Jackson  
Assistant Teaching Professor, English; Stanford University, MFA

Jason Jackson  
Future Faculty Fellow, Political Science; Massachusetts Institute of   
Technology, PhD

Sarah Jackson  
Assistant Professor, Communication Studies; University of Minnesota,   
PhD

William J. Jackson  
Senior Cooperative Education Coordinator, College of Arts, Media and   
Design; University of Massachusetts, Boston, MEd

Michelle Jacobs  
Assistant Clinical Professor, Pharmacy and Health Systems Sciences;   
University of California, San Francisco, PharmD

Joshua R. Jacobson  
Professor, Music; University of Cincinnati, DMA

Beverly Jaeger  
Teaching Professor, Mechanical and Industrial Engineering; Northeastern   
University, PhD

Michael Jaegli  
Assistant Teaching Professor, Bioengineering; Clemson University, PhD

Nader Jalili  
Professor, Mechanical and Industrial Engineering; University of   
Connecticut, PhD

Bogume Jang  
Lecturer, Mathematics; Purdue University, PhD

Leon C. Janikian  
Associate Professor, Music; University of Massachusetts, Amherst, MM

Torbjorn Jarbe  
Research Professor, Pharmaceutical Sciences; University of Uppsala   
(Sweden), PhD

Solomon M. Jekel  
Associate Professor, Mathematics; Dartmouth College, PhD

Qingying Jia  
Research Assistant Professor, Chemistry and Chemical Biology; Illinois   
Institute of Technology, PhD

Benedict S. Jimenez  
Associate Professor, Political Science; University of Illinois, Chicago, PhD

Holly Jimison  
Professor of the Practice, Nursing and Computer and Information   
Science; Stanford University, PhD

Xiaoning Jin  
Assistant Professor, Mechanical and Industrial Engineering; University of   
Michigan, PhD

Dinesh John  
Assistant Professor, Health Sciences; University of Tennessee, PhD

Brooke Johnson  
Assistant Cooperative Education Coordinator, D’Amore-McKim School of   
Business; Boston College, MEd

Vanessa D. Johnson  
Associate Professor, Applied Psychology; Western Michigan University,   
EdD

Kimberly L. Jones  
Associate Teaching Professor, International Affairs; Northeastern   
University, PhD

Rachel Jones  
Associate Professor, Nursing; New York University, PhD

T. Anthony Jones  
Associate Professor, Sociology and Anthropology; Princeton University,   
PhD

Dierdre Jordan  
Associate Cooperative Education Coordinator, Bouvé College of Health   
Sciences; Northeastern University, MS

Yung Joon Jung  
Associate Professor, Mechanical and Industrial Engineering; Rensselaer   
Polytechnic Institute, PhD

Jeffrey S. Juris  
Associate Professor, Sociology and Anthropology; University of   
California, Berkeley, PhD

K  
David R. Kaeli  
Professor, Electrical and Computer Engineering; Rutgers University, PhD

Sallyann Kakas  
Assistant Cooperative Education Coordinator, Finance; Northeastern   
University, BS

Jayant Kale  
Professor and Philip R. McDonald Chair, Finance; University of Texas,   
Austin, PhD

Sagar V. Kamarthi  
Associate Professor, Mechanical and Industrial Engineering;   
Pennsylvania State University, PhD

John Kane  
Lecturer, Art + Design; Yale University, BA

Mary M. Kane  
Senior Cooperative Education Coordinator, D’Amore-McKim School of   
Business; University of Massachusetts, Boston, MEd
Michael Kane  
Assistant Professor, Civil and Environmental Engineering; University of Michigan, PhD

Carla Kaplan  
Davis Distinguished Professor of American Literature, English and Women’s, Gender, and Sexuality Studies; Northwestern University, PhD

Swastik Kar  
Associate Professor, Physics; Indian Institute of Physics (India), PhD

Ali reza Karimi  
Assistant Professor, Mechanical and Industrial Engineering; Virginia Polytechnic Institute and State University, PhD

Alain S. Karma  
College of Arts and Sciences Distinguished Professor, Physics; University of California, Santa Barbara, PhD

Ralph Katz  
Professor, Entrepreneurship and Innovation; University of Pennsylvania, PhD

William D. Kay  
Associate Professor, Political Science; Indiana University, PhD

Bret Keeling  
Associate Teaching Professor, English; University of Washington, PhD

Maureen Kelleher  
Associate Professor, Sociology and Anthropology; University of Missouri, Columbia, PhD

Karen P. Kelley  
Senior Cooperative Education Coordinator, College of Engineering; Northeastern University, MEd

Ryan Kelley  
Assistant Cooperative Education Coordinator, Finance; Northeastern University, MEd

Thomas Kelley  
Lecturer, Physics; University of Minnesota, PhD

Kathleen Kelly  
Professor, English; University of North Carolina, Chapel Hill, PhD

M. Whitney Kelting  
Associate Professor, Philosophy and Religion; University of Wisconsin, Madison, PhD

Daniel D. Kennedy  
Associate Professor, Journalism; Boston University, MLA

Aileen Kent Yates  
Assistant Cooperative Education Coordinator, Computer and Information Science; University of Massachusetts, Amherst, BA

Richard M. Kesner  
Lecturer, Supply Chain and Information Management; Stanford University, PhD

Heidi Kevoe Feldman  
Associate Professor, Communication Studies; Rutgers University, PhD

Ban-An Khaw  
Professor, Pharmaceutical Sciences; Boston College, PhD

Konstantin Khapko  
Professor, Biology and Pharmaceutical Sciences; Engelhardt Institute of Molecular Biology, Moscow (Russia), PhD

Ilham Khuri-Makdisi  
Associate Professor, History; Harvard University, PhD

Sheri Kiami  
Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Simmons College, DPT

Daniel Kim  
Assistant Professor, Health Sciences; University of Toronto (Canada), MD; Harvard University, PhD

Jonghan Kim  
Assistant Professor, Pharmaceutical Sciences; Ohio State University, PhD

Miso Kim  
Assistant Professor, Art + Design; Carnegie Mellon University, PhD

Nancy S. Kim  
Associate Professor, Psychology; Yale University, PhD

Tiffany Kim  
Assistant Clinical Professor, Nursing; University of Pennsylvania, PhD

Yong-Bin Kim  
Associate Professor, Electrical and Computer Engineering; Colorado State University, PhD

John Kimani  
Assistant Teaching Professor, Electrical and Computer Engineering; University of Wisconsin, Milwaukee, PhD

David Kimbro  
Assistant Professor, Marine and Environmental Sciences; University of California, Davis, PhD

Nancy Kindelan  
Professor, Theatre; University of Wisconsin, Madison, PhD

Christopher K. King  
Professor, Mathematics; Harvard University, PhD

Donald R. King  
Associate Professor, Mathematics; Massachusetts Institute of Technology, PhD

Engin Kirda  
Professor, Computer and Information Science and Electrical and Computer Engineering; Technical University of Vienna (Austria), PhD

Rein U. Kirss  
Associate Professor, Chemistry and Chemical Biology; University of Wisconsin, Madison, PhD

William Kirtz  
Associate Professor, Journalism; Columbia University, MS

Jennifer L. Kirwin  
Associate Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Alan M. Klein  
Professor, Sociology and Anthropology; State University of New York, Buffalo, PhD
Sarah Klionsky  
Assistant Cooperative Education Coordinator, College of Science; University of Wisconsin, Madison, MA

Kristian Kloeckl  
Associate Professor, Art + Design; University of Venice (Italy), PhD

Thomas H. Koenig  
Professor, Sociology and Anthropology; University of California, Santa Barbara, PhD

Mieczyslaw M. Kokar  
Professor, Electrical and Computer Engineering; University of Wroclaw (Poland), PhD

Ying-Yee Kong  
Associate Professor, Communication Sciences and Disorders; University of California, PhD

Tania Konry  
Assistant Professor, Pharmaceutical Sciences; Ben Gurion University (Israel), PhD

Abigail N. Koppes  
Assistant Professor, Chemical Engineering; Rensselaer Polytechnic Institute, PhD

Ryan Koppes  
Assistant Professor, Chemical Engineering; Rensselaer Polytechnic Institute, PhD

Sarah Kostanski  
Assistant Cooperative Education Coordinator, College of Engineering; Framingham State University, MS

Ilka Kostka  
Assistant Teaching Professor, CPS International Programs; New York University, PhD

Christopher Kottke  
Postdoctoral Teaching Associate, Mathematics; Massachusetts Institute of Technology, PhD

Harilaos Koutsoopoulos  
Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

Linda Kowalcy  
Professor of the Practice, School of Public Policy and Urban Affairs; Johns Hopkins University, PhD

Gregory J. Kowalski  
Associate Professor, Mechanical and Industrial Engineering; University of Wisconsin, Madison, PhD

Sergey Kravchenko  
Professor, Physics; Institute of Solid State Physics (Russia), PhD

Dmitri Krioukov  
Associate Professor, Physics; Old Dominion University, PhD

Ganesh Krishnamoorthy  
Professor, Accounting; University of Southern California, PhD

Karthik Krishnan  
Assistant Professor and Thomas Moore Faculty Fellow, Finance; Boston College, PhD

Louis J. Kruger  
Associate Professor, Applied Psychology; Rutgers University, PsyD

Steven R. Kursh  
Associate Academic Specialist, Finance; University of Pennsylvania, PhD

John E. Kwoka Jr.  
Neal F. Finnegan Chair, Economics; University of Pennsylvania, PhD

Michelle Laboy  
Assistant Professor, Architecture; University of Michigan, MArch

Jamie Ladge  
Associate Professor, Management and Organizational Development; Boston College, PhD

Jay Laird  
Assistant Teaching Professor, College of Professional Studies; Lesley University, MFA

Venkatraman Lakshmibai  
Professor, Mathematics; Tata University (India), PhD

Charlotte Lam  
Assistant Cooperative Education Coordinator, College of Science; California State University, Sacramento, MA

Joan Lamachia  
Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; Boston College, MEd

Arthur LaMan  
Assistant Academic Specialist, College of Professional Studies; Northeastern University, MS

Anna Lamin  
Associate Professor and Matthew Eagan Faculty Fellow, International Business and Strategy; University of Minnesota, PhD

Jason Lancaster  
Associate Clinical Professor, Pharmacy and Health Systems Sciences; Massachusetts College of Pharmacy, PharmD

William Lancaster  
Senior Lecturer, Communication Studies; Michigan State University, MA

Lucas J. Landherr  
Associate Teaching Professor, Chemical Engineering; Cornell University, PhD

Henry W. Lane  
Professor, International Business and Strategy; Harvard University, DBA

David Lang  
Lecturer, Mathematics; Boston College, PhD; Northeastern University, PhD

Amy Lantinga  
Associate Teaching Professor, College of Professional Studies; University of Tennessee, Knoxville, EdD

Paul LaPlante  
Assistant Academic Specialist, World Languages Center; Brown University, MA
Philip Larese-Casanova
Associate Professor, Civil and Environmental Engineering; University of Iowa, PhD

Sonya L. Larrieux
Clinical Instructor, Physical Therapy, Movement, and Rehabilitation Sciences; Columbia University, MA

Barbara Larson
Assistant Academic Specialist, Management and Organizational Development; Harvard Business School, DBA

Elizabeth Larson
Assistant Cooperative Education Coordinator, D’Amore-McKim School of Business; Northeastern University, MBA

Kimberly Larson
Associate Teaching Professor, College of Professional Studies; Villanova University School of Law, JD; Drexel University, PhD

Felicia G. Lassk
Associate Professor, Marketing; University of South Florida, PhD

Amanda Reeser Lawrence
Associate Professor, Architecture; Harvard University, PhD

David M. Lazer
Professor, Political Science and Computer and Information Science; University of Michigan, Ann Arbor, PhD

Christina Lee
Assistant Professor, Applied Psychology; New York University, PhD

Cynthia Lee
Professor, Management and Organizational Development; University of Maryland, PhD

Doreen Lee
Associate Professor, Sociology and Anthropology; Cornell University, PhD

Jung H. Lee
Associate Professor, Philosophy and Religion; Brown University, PhD

Lee-Peng Lee
Lecturer, Mathematics; Massachusetts Institute of Technology, PhD

Yang W. Lee
Associate Professor, Supply Chain and Information Management; Massachusetts Institute of Technology, PhD

Carolyn W. T. Lee-Parsons
Associate Professor, Chemical Engineering and Chemistry and Chemical Biology; Cornell University, PhD

Miriam E. Leeser
Professor, Electrical and Computer Engineering; Cambridge University (United Kingdom), PhD

Laurel Leff
Associate Professor and Stotsky Professor of Jewish and Cultural Studies, Journalism; Yale University, MA

Lori H. Lefkovitz
Ruderman Professor, Jewish Studies and English; Brown University, PhD

Patrick Legros
Distinguished Professor, Economics; California Institute of Technology, PhD

Bradley M. Lehman
Professor, Electrical and Computer Engineering; Georgia Institute of Technology, PhD

Tricia Lenihan
Assistant Cooperative Education Coordinator, College of Engineering; Boston University, MEd

Robert Lentz
Assistant Academic Specialist, Entrepreneurship and Innovation; Babson College, MBA

Neal Lerner
Associate Professor, English; Boston University, EdD

Marina Leslie
Associate Professor, English; Yale University, PhD

Hanoch Lev-Ari
Professor, Electrical and Computer Engineering; Stanford University, PhD

Danielle Levac
Assistant Professor, Physical Therapy, Movement, and Rehabilitation Sciences; McMaster University (Canada), PhD

Tatyana Levchenko
Research Assistant Professor, Pharmaceutical Sciences; Academy of Medical Sciences Moscow (Russia), PhD

Yiannis A. Levendis
College of Engineering Distinguished Professor, Mechanical and Industrial Engineering; California Institute of Technology, PhD

Jack Levin
Irving S. and Betty Brudnick Distinguished Professor, Sociology and Anthropology; Boston University, PhD

Elinor Levine
Assistant Cooperative Education Coordinator, D’Amore-McKim School of Business; University of Massachusetts, Amherst, MEd

Kim Lewis
University Distinguished Professor, Biology; Moscow University (Russia), PhD

Laura H. Lewis
Cabot Professor, Chemical Engineering and Mechanical and Industrial Engineering; University of Texas, Austin, PhD

David J. Lewkowicz
Professor, Communication Sciences and Disorders; University of New York, PhD

Chieh Li
Associate Professor, Applied Psychology; University of Massachusetts, Amherst, EdD

Rui Li
Assistant Clinical Professor, Health Sciences; Baylor University, PhD

Dirk Libaers
Associate Professor, Entrepreneurship and Innovation; Georgia Institute of Technology, PhD

Robert Lieb
Professor, Supply Chain and Information Management; University of Maryland, DBA
Karl J. Lieberherr  
Professor, Computer and Information Science; Eidgenössische Technische Hochschule Zürich (Switzerland), PhD

Karin N. Lifter  
Professor, Applied Psychology; Columbia University, PhD

Xue Lin  
Assistant Professor, Electrical and Computer Engineering; University of Southern California, PhD

Yingzi Lin  
Associate Professor, Mechanical and Industrial Engineering; University of Saskatchewan (Canada), PhD

Alisa K. Lincoln  
Professor, Health Sciences and Sociology and Anthropology; Columbia University, PhD

Margo Lindauer  
Associate Teaching Professor, Health Sciences; Georgetown University Law Center, MS

John Lindhe  
Lecturer, Mathematics; Northeastern University, MA

Charles Linshaw  
Visiting Lecturer, Theatre; Columbia University, MFA

Gabor Lippner  
Assistant Professor, Mathematics; Eotvos University (Hungary), PhD

James Lipsky  
Associate Academic Specialist, World Languages Center; Boston University, MA

Heather Littlefield  
Associate Teaching Professor, Linguistics; Boston University, PhD

Kelvin Liu  
Associate Professor, Accounting; University of South Carolina, PhD

Yongmin Liu  
Assistant Professor, Mechanical and Industrial Engineering and Electrical and Computer Engineering; University of California, Berkeley, PhD

Grigorios Livanis  
Assistant Professor, International Business and Strategy; University of Florida, PhD

Ioannis Livanis  
Associate Teaching Professor, International Affairs and Political Science; University of Florida, PhD

Carol Livermore  
Associate Professor, Mechanical and Industrial Engineering; Harvard University, PhD

Mary Loeffelholz  
Professor, English; Yale University, PhD

Martha Loftus  
Assistant Teaching Professor, College of Professional Studies; Harvard University, EdD

Diomedes E. Logothetis  
Professor, Pharmaceutical Sciences; Harvard University, PhD

Jane Lohmann  
Associate Teaching Professor, College of Professional Studies; Harvard University, EdD

Mark Lomanno  
Visiting Assistant Professor, Music; University of Texas, Austin, PhD

Fabrizio Lombardi  
International Test Conference Professor, Electrical and Computer Engineering; University of London (United Kingdom), PhD

Marissa Lombardi  
Assistant Teaching Professor, College of Professional Studies; Northeastern University, EdD

Guido Lopez  
Associate Teaching Professor, College of Professional Studies; Northeastern University, PhD

Connie Lorette  
Assistant Clinical Professor, Nursing; Boston College, PhD

Ralph H. Loring  
Associate Professor, Pharmaceutical Sciences; Cornell University, PhD

Ivan Loseu  
Associate Professor, Mathematics; Moscow State University (Russia), PhD

Kathleen Lotterhos  
Assistant Professor, Marine and Environmental Sciences; Florida State University, PhD

Salam A. Lotuff III  
Teaching Professor, Communication Studies; Northeastern University, MA

Deirdre Loughridge  
Assistant Professor, Music; University of Pennsylvania, PhD

Tania Muino Loureiro  
Assistant Academic Specialist, World Languages Center; University of Barcelona (Spain), MA

Jennifer O. Love  
Associate Academic Specialist, Engineering; University of Iowa, MS

Timothy Love  
Associate Professor, Architecture; Harvard University, MArch

William Lovely  
Assistant Academic Specialist, International Business and Strategy; Northeastern University, DLP

Amy Lu  
Assistant Professor, Communication Studies and Health Sciences; University of North Carolina, Chapel Hill, PhD

Katherine A. Luongo  
Associate Professor, History; University of Michigan, Ann Arbor, PhD

Steven Lustig  
Associate Professor, Chemical Engineering; Purdue University, PhD

David E. Luzzi  
Professor, Mechanical and Industrial Engineering; Northwestern University, PhD
Spencer Lynn
Research Assistant Professor, Psychology; University of Arizona, PhD

M
Linlin Ma
Assistant Professor, Finance; Georgia State University, PhD

Patricia A. Mabrouk
Professor, Chemistry and Chemical Biology; Massachusetts Institute of Technology, PhD

Andrew Mackie
Assistant Clinical Professor, Physician Assistant Program; University of Nebraska, MS

Emanuele Macri
Associate Professor, Mathematics; SISSA (Italy), PhD

Jeanne Madden
Associate Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Harvard University, PhD

Kristin Madison
Professor, Health Sciences and Law; Stanford University, PhD

Tracy Magee
Assistant Clinical Professor, Nursing; Boston College, PhD

Bala Maheswaran
Teaching Professor, Engineering; Northeastern University, PhD

Elizabeth Mahler
Assistant Teaching Professor, College of Professional Studies; George Washington University, EdD

Luigia Gina Maiellaro
Senior Academic Specialist, World Languages Center; Russian State University for the Humanities (Russia), PhD

Lee Makowski
Professor, Bioengineering and Chemistry and Chemical Biology; Massachusetts Institute of Technology, PhD

Purnima Makris
Associate Professor, Electrical and Computer Engineering; Massachusetts Institute of Technology, PhD

Alexandros Makriyannis
Behrakis Trustee Chair in Pharmaceutical Biotechnology and University Distinguished Professor, Pharmaceutical Sciences and Chemistry and Chemical Biology; University of Kansas, PhD

Michael Malamas
Research Associate Professor, Pharmaceutical Sciences and Chemistry and Chemical Biology; University of Pennsylvania, PhD

Shiti Malhotra
Lecturer, Linguistics; University of Maryland, PhD

Veronika Maliborska
Assistant Teaching Professor, College of Professional Studies; Purdue University, PhD

Mikhail Maliutov
Professor, Mathematics; Moscow State University (Russia), PhD

Andrew Mall
Visiting Assistant Teaching Professor, Music; University of Chicago, PhD

Craig E. Maloney
Associate Professor, Mechanical and Industrial Engineering; University of California, Santa Barbara, PhD

Roman Manetsch
Associate Professor, Chemistry and Chemical Biology and Pharmaceutical Sciences; University of Basel (Switzerland), PhD

Justin Manjourides
Assistant Professor, Health Sciences; Harvard University, PhD

Emily Mann
Teaching Professor, Human Services; University of Wisconsin, Madison, PhD

James M. Manning
Professor, Biology; Tufts University, PhD

Peter K. Manning
Elmer V. H. and Eileen M. Brooks Trustee Professor, Criminology and Criminal Justice; Duke University, PhD

Moira C. Mannix
Associate Cooperative Education Coordinator, Bouvé College of Health Sciences; Columbia University, MA

Peter Manolios
Professor, Computer and Information Science; University of Texas, Austin, PhD

Valentina Marano
Assistant Professor, International Business and Strategy; University of South Carolina, PhD

Edwin Marengo
Associate Professor, Electrical and Computer Engineering; Northeastern University, PhD

Donald G. Margotta
Associate Professor, Finance; University of North Carolina, Chapel Hill, PhD

Alina Marian
Associate Professor, Mathematics; Harvard University, PhD

Tucker Marion
Associate Professor and Altschuler Research Fellow, Entrepreneurship and Innovation; Pennsylvania State University, PhD

Robert S. Markiewicz
Professor, Physics; University of California, Berkeley, PhD

Alycia Markowski
Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Mindy Marks
Associate Professor, Economics; Washington University, PhD

Stacy Marsella
Professor, Computer and Information Science and Psychology; Rutgers University, PhD
Ineke Haen Marshall  
Professor, Sociology and Anthropology and Criminology and Criminal Justice; Bowling Green State University, PhD

Dayna L. Martinez  
Assistant Teaching Professor, Mechanical and Industrial Engineering; University of South Florida, Tampa, PhD

Ramiro Martinez Jr.  
Professor, Criminology and Criminal Justice and Sociology and Anthropology; Ohio State University, PhD

José Angel Martinez-Lorenzo  
Assistant Professor, Mechanical and Industrial Engineering and Electrical and Computer Engineering; Universidad de Vigo (Spain), PhD

Ivan Martino  
Visiting Postdoctoral Teaching Associate, Mathematics; Stockholm University (Sweden), PhD

Mauro Martino  
Assistant Professor, Art + Design and Public Policy and Urban Affairs; Polytechnic University of Milan (Italy), PhD

Alexander Martysovsky  
Associate Professor, Mathematics; Brandeis University, PhD

Emanuel J. Mason  
Professor, Applied Psychology; Temple University, EdD

David Massey  
Professor, Mathematics; Duke University, PhD

Jude Mathews  
Assistant Teaching Professor, Chemistry and Chemical Biology; Clemson University, PhD

Kristen Mathieu Gonzalez  
Clinical Instructor, Nursing; University of Phoenix, MS

Thomas M. Matta  
Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Xavier University of Louissiana, PharmD

Samuel J. Matthews  
Associate Professor, Pharmacy and Health Systems Sciences; University of Minnesota, PharmD

Gail Matthews-DeNatale  
Assistant Teaching Professor, College of Professional Studies; Indiana University, Bloomington, PhD

Carla Mattos  
Professor, Chemistry and Chemical Biology; Massachusetts Institute of Technology, PhD

Lucy Maulsby  
Associate Professor, Architecture; Columbia University, PhD

Ernest Mauristhene  
Associate Cooperative Education Coordinator, D’Amore-McKim School of Business; Hardin-Simmons University, MBA

William G. Mayer  
Professor, Political Science; Harvard University, PhD

Mary Mayville  
Assistant Clinical Professor, Nursing; Northeastern University, DNP

Dori P. Mazor  
Assistant Cooperative Education Coordinator, College of Arts, Media and Design; Brandeis University, MBA

Laurie McCadden  
Clinical Instructor, Nursing; University of Massachusetts, Lowell, MSN

Daniel J. McCarthy  
McKim and D’Amore Distinguished Professor of Global Management and Innovation, Entrepreneurship and Innovation; Harvard University, DBA

Paulette McCarty  
Assistant Academic Specialist, Management and Organizational Development; University of Tennessee, PhD

Jane McCool  
Assistant Clinical Professor, Nursing; University of Rhode Island, PhD

Eileen L. McDonagh  
Professor, Political Science; Harvard University, PhD

Ann McDonald  
Associate Professor, Art + Design; Yale University, MFA

Matthew McDonald  
Associate Professor, Music; Yale University, PhD

Melissa McElligott  
Assistant Teaching Professor, Biology; Northeastern University, PhD

Seamus McGovern  
Lecturer, Supply Chain and Information Management; Northeastern University, PhD

Nicol E. McGrue  
Professor of the Practice, Health Sciences; Brandeis University, PhD

Brendan McElrnan  
Postdoctoral Teaching Associate, Mathematics; University of Toronto (Canada), PhD

Cristine McMartin-Miller  
Associate Teaching Professor, CPS International Programs; Purdue University, PhD

Joseph McNabb  
Professor of the Practice, College of Professional Studies; Northeastern University, PhD

Robert C. McOwen  
Professor, Mathematics; University of California, Berkeley, PhD

Frances Nelson McSherry  
Teaching Professor, Theatre; New York University, MFA

Thomas L. Meade  
Postdoctoral Teaching Associate, Communication Studies; University of Alabama, PhD

Isabel Meirelles  
Associate Professor, Art + Design; Massachusetts College of Art, MFA
Emanuel S. Melachrinoudis  
Associate Professor, Mechanical and Industrial Engineering; University of Massachusetts, Amherst, PhD

Waleed Meleis  
Associate Professor, Electrical and Computer Engineering; University of Michigan, PhD

Susan L. Mello  
Assistant Professor, Communication Studies; University of Pennsylvania, PhD

Tina Mello  
Assistant Cooperative Education Coordinator, College of Science; Boston College, MA

Richard H. Melloni Jr.  
Professor, Psychology; University of Massachusetts Medical Center, PhD

Tommaso Melodia  
Associate Professor, Electrical and Computer Engineering; Georgia Institute of Technology, PhD

Latika Menon  
Associate Professor, Physics; Tata Institute of Fundamental Research, Bombay (India), PhD

David Merry  
Associate Cooperative Education Coordinator, Cooperative Education; University of Iowa, MA

Hameed Metghalchi  
Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, ScD

Marc H. Meyer  
Robert J. Shillman Professor of Entrepreneurship and Matthews Distinguished University Professor, Entrepreneurship and Innovation; Massachusetts Institute of Technology, PhD

Michael C. Meyer  
Lecturer, Philosophy and Religion; Boston University, PhD

Ningfang Mi  
Associate Professor, Electrical and Computer Engineering; University of Texas, Dallas, MS

Dean Michael  
Assistant Teaching Professor, College of Professional Studies; Columbia University, PhD

Srboljub Mijailovich  
Research Professor, Chemistry and Chemical Biology; Massachusetts Institute of Technology, PhD

Loiza Miles  
Assistant Academic Specialist, World Languages Center; Sorbonne University (France), MA

William F. S. Miles  
Professor, Political Science; Tufts University, PhD

Danielle M. Miller  
Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Dennis H. Miller  
Professor, Music; Columbia University, DMA

Edward Miller  
Assistant Teaching Professor, CPS International Programs; Boston College, PhD

Gregory Miller  
Associate Professor, Pharmaceutical Sciences; Mount Sinai School of Medicine, PhD

Joanne L. Miller  
Matthews Distinguished University Professor, Psychology; University of Minnesota, PhD

Matthew Miller  
Professor, Health Sciences; Yale University, MD; Harvard University, ScD

Sara Minard  
Assistant Academic Specialist, Entrepreneurship and Innovation; Institute d'Etudes Politiques (France), PhD

Ennio Mingolla  
Professor, Communication Sciences and Disorders; University of Connecticut, PhD

Marilyn L. Minus  
Associate Professor, Mechanical and Industrial Engineering; Georgia Institute of Technology, PhD

Alan Mislove  
Associate Professor, Computer and Information Science; Rice University, PhD

Cheryl Mitteness  
Academic Specialist, Entrepreneurship and Innovation; University of Louisville, PhD

Nancy Mizzoni  
Clinical Instructor, Nursing; Northeastern University, MS

Anahit Mkrtchyan  
Assistant Professor, Finance; Pennsylvania State University, PhD

Vallentine Moghadam  
Professor, Sociology and Anthropology and International Affairs; American University, PhD

Shan Mohammed  
Associate Professor, Health Sciences; Case Western Reserve University, MD

Changiz Mohiyeddini  
Associate Professor, Applied Psychology; University of Trier (Germany), PhD

Beth Molnar  
Associate Professor, Health Sciences; Harvard University, ScD

James Monaghan  
Assistant Professor, Biology; University of Kentucky, PhD

Katelyn Monaghan  
Assistant Clinical Professor, Communication Sciences and Disorders; A.T. Still University School of Health Sciences - Mesa, AuD
Laura Nelson
Assistant Professor, Sociology and Anthropology; University of California, Berkeley, PhD

Van Nguyen
Postdoctoral Teaching Associate, Mathematics; Texas AM University, PhD

Sandy Nickel
Assistant Teaching Professor, College of Professional Studies; University of Iowa, PhD

Mark J. Niedre
Associate Professor, Electrical and Computer Engineering and Bioengineering; University of Toronto (Canada), PhD

Spyridon Nikas
Research Associate Professor, Pharmaceutical Sciences; Aristotle University (Greece), PhD

Matthew Nippins
Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Massachusetts General Hospital Institute of Health Professions, DPT

Matthew C Nisbet
Associate Professor, Communication Studies; Cornell University, PhD

Cristina Nita-Rotaru
Professor, Computer and Information Science; Johns Hopkins University, PhD

Daniel R. Noemi Voionmaa
Associate Professor, History; Yale University, PhD

Alison Nogueira
Associate Cooperative Education Coordinator, College of Engineering; Suffolk University, MEd

David Nolan
Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Massachusetts General Hospital Institute of Health Professions, DPT

Kimberly Nolan
Assistant Teaching Professor, College of Professional Studies; University of Vermont, EdD

Carey Noland
Associate Professor, Communication Studies; Ohio University, PhD

Ellen Noonan
Associate Teaching Professor, English; Emerson College, MFA

Matthew P. Noonan
Associate Teaching Professor, English; Massachusetts College of Art, MFA

Guevara Noubir
Professor, Computer and Information Science; Swiss Federal Institute of Technology, Lausanne (Switzerland), PhD

Welville B. Nowak
Senior Research Scientist, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Gilbert Nyaga
Associate Professor and Joe Dichiavcchio Faculty Fellow, Supply Chain and Information Management; Michigan State University, PhD

Jessica Oakes
Assistant Professor, Bioengineering; University of California, San Diego, PhD

Antonio Ocampo-Guzman
Associate Professor, Theatre; York University (Canada), MFA

Lydia Odgen
Associate Teaching Professor, Human Services; Columbia University, PhD

Curtis Odom
Visiting Lecturer, Management and Organizational Development; Pepperdine University, EdD

Dietmar Offenhuber
Assistant Professor, Art + Design; Massachusetts Institute of Technology, PhD

Marvin Onabajo
Assistant Professor, Electrical and Computer Engineering; Texas AM University, PhD

Kay Onan
Associate Professor, Chemistry and Chemical Biology; Duke University, PhD

Mary Jo Ondrechen
Professor, Chemistry and Chemical Biology; Northwestern University, PhD

Annalisa Onnis-Hayden
Associate Teaching Professor, Civil and Environmental Engineering; University of Cagliari (Italy), PhD

Stephen Onu
Assistant Academic Specialist, College of Professional Studies; University of Phoenix, DBA

Toyoko Orimoto
Assistant Professor, Physics; University of California, Berkeley, PhD

Elika Ortega Guzman
Assistant Professor, Languages, Literatures, and Cultures; University of Western Ontario (Canada), PhD

Oleksiy Osiyevskyy
Assistant Professor, Entrepreneurship and Innovation; University of Calgary (Canada), PhD

Jacek Ossowski
Lecturer, Computer and Information Science; New York University, PhD

Sarah Ostadabbas
Assistant Professor, Electrical and Computer Engineering; University of Texas, Dallas, PhD

Timothy Ouillette
Assistant Teaching Professor, Communication Studies; Art Institute of Boston, MFA
Oyindasola Oyelaran
Associate Teaching Professor, Chemistry and Chemical Biology; Harvard University, PhD

Yusuf Ozbek
Assistant Teaching Professor, Graduate School of Engineering; Northeastern University, PhD

Dan O’Brien
Assistant Professor, Public Policy and Urban Affairs and Criminology and Criminal Justice; Binghamton University, PhD

Sean O’Connell
Assistant Academic Specialist, College of Professional Studies; University of Massachusetts, Boston, MA

Catherine O’Connor
Clinical Instructor, Nursing; Boston College, MS

George A. O’Doherty
Professor, Chemistry and Chemical Biology; Ohio State University, PhD

Russ O’Haver
Senior Academic Specialist, Accounting; University of New York, PhD

Peggy L. O’Kelly
Senior Lecturer, Accounting; University of Michigan, MBA

Donald M. O’Malley
Associate Professor, Biology; Harvard University, PhD

Therese M. O’Neil-Pirozzi
Associate Professor, Communication Sciences and Disorders; Boston University, ScD

P

Taskin Padir
Associate Professor, Electrical and Computer Engineering; Purdue University, PhD

Robert Painter
Lecturer, Linguistics; State University of New York, Buffalo, PhD

Himlona Palikhe
Assistant Teaching Professor, Graduate School of Engineering; Texas Tech University, PhD

Kwamina Panford
Associate Professor, African-American Studies; Northeastern University, PhD

Coleen C. Pantalone
Associate Professor, Finance; Iowa State University, PhD

Jeremy Papadopoulos
Assistant Teaching Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Harikrishnan Parameswaran
Assistant Professor, Bioengineering; Boston University, PhD

Serena Parekh McGushin
Associate Professor, Philosophy and Religion; Boston College, PhD

Andrea Parker
Assistant Professor, Computer and Information Science and Health Sciences; Georgia Institute of Technology, PhD

Christopher M. Parsons
Assistant Professor, History; University of Toronto (Canada), PhD

Nikos Passas
Professor, Criminology and Criminal Justice; University of Edinburgh (Scotland), PhD

Rupal Patel
Professor, Communication Sciences and Disorders and Computer and Information Science; University of Toronto (Canada), PhD

Dipu Patel-Junankar
Assistant Clinical Professor, Physician Assistant Program; University of Nebraska, MPAS

Mark Patterson
Professor, Marine and Environmental Sciences and Civil and Environmental Engineering; Harvard University, PhD

Misha Pavel
Professor of the Practice, Computer and Information Science and Health Sciences; New York University, PhD

Nancy Pawlyshyn
Assistant Teaching Professor, College of Professional Studies; Capella University, PhD

Celia Pearce
Associate Professor, Game Design; University of the Arts London (United Kingdom), PhD

Neal Pearlmutter
Associate Professor, Psychology; Massachusetts Institute of Technology, PhD

Melissa Pearson
Assistant Teaching Professor, English; University of South Carolina, PhD

Melissa Peiken
Associate Cooperative Education Coordinator, Computer and Information Science; Emerson College, MEd

Russell Pensyl
Professor, Art + Design; Western Michigan University, MFA

Pablo Perez Ramos
Visiting Assistant Professor, Architecture; Harvard University, MLA

Natalie Perry
Assistant Teaching Professor, College of Professional Studies; University of Virginia, PhD

Stuart S. Peterfreund
Professor, English; University of Washington, PhD

Courtney Pfluger
Assistant Teaching Professor, Engineering; Northeastern University, PhD

Susan E. Picillo
Senior Lecturer, Communication Studies; Cambridge College, MEd

Sara Picklesmier
Postdoctoral Teaching Associate, Communication Studies; University of Connecticut, PhD

Pamela Pietrucci
Postdoctoral Teaching Associate, Communication Studies; University of Washington, PhD
Ameet Pinto
Assistant Professor, Civil and Environmental Engineering; Virginia Polytechnic Institute and State University, PhD

Jacqueline M. Piret
Associate Professor, Biology; Massachusetts Institute of Technology, PhD

Jennifer Pirri
Assistant Teaching Professor, Behavioral Neuroscience; University of Massachusetts Medical School, PhD

Steven D Pizer
Associate Professor, Pharmacy and Health Systems Sciences; Boston College, PhD

Harlan D. Platt
Professor, Finance; University of Michigan, PhD

Marjorie Platt
Professor, Accounting; University of Michigan, PhD

Robert Platt Jr.
Assistant Professor, Computer and Information Science; University of Massachusetts, Amherst, PhD

Peter Plourde
Assistant Academic Specialist, College of Professional Studies; University of Massachusetts, Lowell, MS

Elizabeth J. Podlaha-Murphy
Professor, Chemical Engineering; Columbia University, PhD

Mya Poe
Assistant Professor, English; University of Massachusetts, Amherst, PhD

Hermine Poghosyan
Assistant Professor, Nursing; University of Massachusetts Boston, PhD

Uta G. Poiger
Professor, History; Brown University, PhD

Ann Polcari
Associate Clinical Professor, Nursing; Boston College, PhD

Michael Pollastri
Associate Professor, Chemistry and Chemical Biology; Brown University, PhD

Marius Popescu
Visiting Assistant Professor, Finance; Virginia Polytechnic Institute and State University, PhD

Hilary Poriss
Associate Professor, Music; University of Chicago, PhD

Richard D. Porter
Professor, Mathematics; Yale University, PhD

Veronica L. Porter
Associate Professor, Cooperative Education, College of Science; Northeastern University, MEd

John H. Portz
Professor, Political Science; University of Wisconsin, Madison, PhD

David Potter
Associate Cooperative Education Coordinator, College of Engineering; Northeastern University, MSEE

Mary-Susan Potts-Santone
Associate Teaching Professor, Biology; University of New Hampshire, PhD

Karen Pounds
Assistant Clinical Professor, Nursing; University of Rhode Island, PhD

Michael J. Power
Lecturer, Supply Chain and Information Management; Northeastern University, MBA

Susan Powers-Lee
Professor, Biology; University of California, Berkeley, PhD

Robert Prior
Associate Teaching Professor, College of Professional Studies; Nova Southeastern University, EdD

Mark Prokosch
Lecturer, Psychology; University of California, Davis, PhD

Sheila M. Puffer
Professor and University Distinguished Professor, International Business and Strategy; University of California, Berkeley, PhD

Karen Quigley
Research Associate Professor, Psychology; Ohio State University, PhD

William G. Quill
Associate Professor, Applied Psychology; University of Massachusetts, Amherst, PhD

Daniel F. Quinn
Teaching Professor, Psychology; Northeastern University, PhD

Samuel Rabino
Professor, Marketing; New York University, PhD

Gordana Rabrenovic
Associate Professor, Sociology and Anthropology; State University of New York, Albany, PhD

Joseph A. Raelin
Professor and Asa S. Knowles Chair of Practice-Oriented Education, Management and Organizational Development; State University of New York, Buffalo, PhD

Rajmohan Rajaraman
Professor, Computer and Information Science; University of Texas, Austin, PhD

Ravi Ramamurti
Distinguished Chair Professor, International Business and Strategy; Harvard University, DBA

Valeria Ramdin
Clinical Instructor, Nursing; Northeastern University, PhD

Janet H. Randall
Professor, English; University of Massachusetts, Amherst, PhD
Carey M. Rappaport  
College of Engineering Distinguished Professor, Electrical and Computer Engineering; Massachusetts Institute of Technology, ScD

Richard A. Rasala  
Professor, Computer and Information Science; Harvard University, PhD

Andrea Raynor  
Teaching Professor, Art + Design; School of Visual Arts, MFA

Joseph Reagle  
Assistant Professor, Communication Studies; New York University, PhD

Debra J. Reid  
Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Imke C. Reimers  
Assistant Professor, Economics; University of Minnesota, PhD

Karen Reiss Medwed  
Assistant Teaching Professor, College of Professional Studies; New York University, PhD

Marketa Rejtarova  
Assistant Clinical Professor, Nursing; Massachusetts General Hospital Institute of Health Professions, DNP

Alessandra Renzi  
Assistant Professor, Art + Design; University of Toronto (Canada), PhD

John R. Reynolds  
Professor, Pharmacy and Health Systems Sciences; Duquesne University, PharmD

Karl Reynolds  
Associate Teaching Professor, CPS International Programs; University of Washington, PhD

Mahtab Rezvani  
Assistant Academic Specialist, CPS International Programs; California State University, Los Angeles, MA

Lesley Ricci  
Visiting Lecturer, Psychology; Northeastern University, PhD

Christopher Richardson  
Lecturer, Biology; Boston University, PhD

Milda Richardson  
Lecturer, Art + Design; Boston University, PhD

Megan Richmond  
Assistant Cooperative Education Coordinator, D’Amore-McKim School of Business; Boston College, MEd

Janet S. Rico  
Associate Clinical Professor, Nursing; Northeastern University, PhD

Mirek Riedewald  
Associate Professor, Computer and Information Science; University of California, Santa Barbara, PhD

Christoph Riedl  
Assistant Professor, Supply Chain and Information Management and Computer and Information Science; Technische Universität München (Germany), PhD

Justin Ries  
Associate Professor, Marine and Environmental Sciences; Johns Hopkins University, PhD

Matteo Rinaldi  
Assistant Professor, Electrical and Computer Engineering; University of Pennsylvania, PhD

Christie Rizzo  
Assistant Professor, Applied Psychology; University of Southern California, Los Angeles, PhD

Christina Roberts  
Assistant Cooperative Education Coordinator, D’Amore-McKim School of Business; Simmons College, MBA

Susan J. Roberts  
Professor, Nursing; Boston University, DNSc

Christopher J. Robertson  
Professor, International Business and Strategy; Florida State University, PhD

Craig M. Robertson  
Assistant Professor, Computer and Information Science and Electrical and Computer Engineering; University of California, Santa Barbara, PhD

Cordula Robinson  
Associate Teaching Professor, College of Professional Studies; University College London (United Kingdom), PhD

Harlow L. Robinson  
Matthews Distinguished University Professor, History; University of California, Berkeley, PhD

Holbrook C. Robinson  
Associate Professor, Languages, Literatures, and Cultures; Harvard University, PhD

Tracy L. Robinson Wood  
Professor, Applied Psychology; Harvard University, EdD

Brian Robison  
Assistant Teaching Professor, Music; Cornell University, DMA

David A. Rochefort  
College of Arts and Sciences Distinguished Professor, Political Science; Brown University, PhD

Rachel Rodgers  
Associate Professor, Applied Psychology; Université de Toulouse-Le Mirail (France), PhD

Kirsten Rodine Hardy  
Associate Professor, Political Science; University of California, Berkeley, PhD

Bruce Ronkin  
Professor, Music; University of Maryland, DMA

Tayla Rose  
Visiting Assistant Clinical Professor, Pharmacy and Health Systems Sciences; University of Connecticut, PharmD
Karyn Rosen  
Associate Cooperative Education Coordinator, Computer and Information Science; Salem State College, MA

Rebeca B. Rosengaus  
Associate Professor, Marine and Environmental Sciences; Boston University, PhD

James R. Ross  
Associate Professor, Journalism; American University, MA

Martin E. Ross  
Associate Professor, Marine and Environmental Sciences; University of Idaho, PhD

Alexandra Roth  
Associate Academic Specialist, International Business and Strategy; University of Frankfurt (Germany), PhD

Amit K. Roy  
Assistant Teaching Professor, Chemical Engineering; University of Calcutta (India), PhD

Jeffrey W. Ruberti  
Professor, Bioengineering; Tulane University, PhD

Martin Ruff  
Assistant Teaching Professor, Accounting; Bentley University, PhD

Timothy J. Rupert  
Professor, Accounting; Pennsylvania State University, PhD

Vineet Rupnik  
Associate Professor, Architecture; Harvard University, MArch

Bruce Russell  
Associate Academic Specialist, Supply Chain and Information Management; National University of Ireland (Ireland), PhD

Matthais Ruth  
Professor, Public Policy and Urban Affairs and Civil and Environmental Engineering; University of Illinois, Urbana-Champaign, PhD

Jane Saczynski  
Associate Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Pennsylvania State University, EdD

Hanai A. Sadaka  
Lecturer, Mathematics; Northeastern University, PhD

J. Timothy Sage  
Associate Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Vindh Sahney  
Professor, Mechanical and Industrial Engineering; University of Wisconsin, Madison, PhD

Masoud Salehi  
Associate Professor, Electrical and Computer Engineering; Stanford University, PhD

Carmel Salhi  
Assistant Professor, Health Sciences; Harvard University, ScD

William Sanchez  
Associate Professor, Applied Psychology; Boston University, PhD

Nada Sanders  
Distinguished Professor of Supply Chain Management, Supply Chain and Information Management; Ohio State University, PhD

Tova Sanders  
Associate Teaching Professor, College of Professional Studies; George Washington University, EdD

Ronald L. Sandler  
Professor, Philosophy and Religion; University of Wisconsin, Madison, PhD

Bilkye Sankofs-Waters  
Associate Teaching Professor, College of Professional Studies; University of North Carolina, Chapel Hill, PhD

Ravi Sarathy  
Professor, International Business and Strategy; University of Michigan, PhD

Linda Sarkisian  
Assistant Cooperative Education Coordinator, D’Amore-McKim School of Business; Lynn University, MBA

Jennifer I. Sartori  
Assistant Academic Specialist, Jewish Studies; Haverford College of Pennsylvania, PhD

Mehrda Sasani-Kolori  
Associate Professor, Civil and Environmental Engineering; University of California, Berkeley, PhD

Alicya Sasser Modestino  
Associate Professor, Public Policy and Urban Affairs and Economics; Harvard University, PhD

Cinthia Satornino  
Assistant Professor, Marketing; Florida State University, PhD

Behrooz (Barry) Satvat  
Associate Teaching Professor, Chemical Engineering; Massachusetts Institute of Technology, ScD

Daniel Saulnier  
Associate Cooperative Education Coordinator, College of Engineering; Babson College, MBA

Kevin Scanlon  
Professor of the Practice, Entrepreneurship and Innovation; University of London (United Kingdom), PhD

Carmen Sceppa  
Professor, Health Sciences; Francisco Marroquin University (Guatemala), MD; Tufts University, PhD

Martin Schreilbauer  
Associate Clinical Professor, Computer and Information Science; University of Massachusetts, PhD

Gunar Schirner  
Associate Professor, Electrical and Computer Engineering; University of California, Irvine, PhD
Ralf W. Schlosser
Professor, Communication Sciences and Disorders; Purdue University, PhD

Benjamin M. Schmidt
Assistant Professor, History; Princeton University, PhD

Paul Schreyer
Assistant Academic Specialist, World Languages Center; Western Maryland College, MEd

Alan Schroeder
Professor, Journalism; Harvard University, MPA

Egon Schulte
Professor, Mathematics; University of Dortmund (Germany), PhD

Kathryn Schulte Grahame
Associate Teaching Professor, Engineering; Columbia University, PhD

Joseph Schwartz
Assistant Teaching Professor, Communication Studies; University of Iowa, PhD

Martin Schwarz
Associate Professor, Mathematics; Courant Institute, PhD

Douglass Scott
Senior Lecturer, Art + Design; Yale University, MFA

Frank (Alex) Scott
Assistant Professor, Supply Chain and Information Management; Pennsylvania State University, PhD

Steven Scyphers
Assistant Professor, Marine and Environmental Sciences; University of South Alabama, PhD

Magy Seif El-Nasr
Associate Professor, Game Design; Northwestern University, PhD

Laura Senier
Assistant Professor, Sociology and Anthropology and Health Sciences; Brown University, PhD

Soomi Seo
Lecturer, Mathematics; University of Missouri, Columbia, PhD

Susan M. Setta
Associate Professor, Philosophy and Religion; Pennsylvania State University, PhD

Bahram Shafai
Professor, Electrical and Computer Engineering; George Washington University, ScD

Jayant M. Shah
Professor, Mathematics; Massachusetts Institute of Technology, PhD

Rebecca Shansky
Assistant Professor, Psychology; Yale University, PhD

Harvey D. Shapiro
Associate Clinical Professor, Education; Hebrew Union College, PhD

Nancy H. Sharby
Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

William Sharp
Lecturer, Psychology, Boston Graduate School of Psychoanalysis, PhD

Gavin M. Shatkin
Associate Professor, Public Policy and Urban Affairs and Architecture; Rutgers University, PhD

Dennis R. Shaughnessy
Senior Academic Specialist, Entrepreneurship and Innovation; University of Maryland, JD

Margaret Shea
Associate Cooperative Education Coordinator, D’Amore-McKim School of Business; Boston University, BLS

Thomas C. Sheahan
Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, ScD

Sandra Shefelbine
Associate Professor, Mechanical and Industrial Engineering and Bioengineering; Stanford University, PhD

Paxton Sheldahl
Assistant Teaching Professor, Architecture; Harvard University, MArch

Eliot Sherman
Senior Lecturer, Finance; Bentley College, MST

H. David Sherman
Professor, Accounting; Harvard University, DBA

Amit Shesh
Associate Teaching Professor, Computer and Information Science; University of Minnesota, Twin Cities, PhD

Shiaoming Shi
Assistant Teaching Professor, Bioengineering; University of Pittsburgh, PhD

Craig Shillaber
Assistant Teaching Professor, Civil and Environmental Engineering; Virginia Polytechnic Institute and State University, MS

Olin Shivers
Professor, Computer and Information Science; Carnegie Mellon University, PhD

Mariya Shiyko
Assistant Professor, Applied Psychology; City University of New York, PhD

Aatmesh Shrivastava
Assistant Professor, Electrical and Computer Engineering; University of Virginia, Charlottesville, PhD

Brandon Sichling
Visiting Lecturer, Art + Design; Emerson College, MFA

Susan F. Sieloff
Senior Lecturer, Marketing; University of Michigan, MBA

Robert Sikes
Associate Professor, Physical Therapy, Movement, and Rehabilitation Sciences; University of Texas, Houston, PhD
Michael B. Silevitch
Robert Black Professor of Engineering and College of Engineering
Distinguished Professor, Electrical and Computer Engineering;
Northeastern University, PhD

Peter J. Simon
Teaching Professor, Economics; Northern Illinois University, PhD

Simon I. Singer
Professor, Criminology and Criminal Justice; University of Pennsylvania, PhD

Hanumant Singh
Professor, Electrical and Computer Engineering and Marine and Environmental Sciences; Massachusetts Institute of Technology, PhD

Sarah S. Sinwell
Assistant Teaching Professor, Media and Screen Studies; Indiana University, PhD

Rifat Sipahi
Associate Professor, Mechanical and Industrial Engineering; University of Connecticut, PhD

Michail V. Sitkovsky
Eleanor W. Black Chair in Immunophysiology and Pharmaceutical Biotechnology and Professor, Pharmaceutical Sciences and Biology; Moscow State University (Russia), PhD

Mark Sivak
Associate Teaching Professor, Art + Design and Engineering; Northeastern University, PhD

Andrew Skirvin
Associate Clinical Professor, Pharmacy and Health Systems Sciences; University of Texas, Austin, PharmD

Nikolai Slavov
Assistant Professor, Bioengineering; Princeton University, PhD

Rory Smead
Assistant Professor, Philosophy and Religion; University of California, Irvine, PhD

David A. Smith
Assistant Professor, Computer and Information Science; Johns Hopkins University, PhD

Gillian Smith
Assistant Professor, Computer and Information Science and Game Design; University of California, Santa Cruz, PhD

Keith Smith
Assistant Professor, Marketing; University of Georgia, PhD

Michael Smith
Assistant Teaching Professor, Architecture; Harvard University, MArch

Ronald Bruce Smith
Associate Professor, Music; University of California, Berkeley, PhD

Wendy A. Smith
College of Arts and Sciences Distinguished Associate Professor, Biology; Duke University, PhD

Eugene Smotkin
Professor, Chemistry and Chemical Biology; University of Texas, Austin, PhD

Bridget Smyser
Associate Teaching Professor, Mechanical and Industrial Engineering; Worcester Polytechnic Institute, PhD

Nancy P. Snyder
Associate Teaching Professor, Psychology; Harvard University, EdD

Claudia Sokol
Assistant Academic Specialist, World Languages Center; University of Buenos Aires (Argentina), MD

Marius M. Solomon
Professor, Supply Chain and Information Management; University of Pennsylvania, PhD

Susan J. Soroka
Assistant Teaching Professor, English; Drew University, PhD

Bert A. Spector
Associate Professor, International Business and Strategy; University of Missouri, PhD

Denise Spencer
Lecturer, Supply Chain and Information Management; Boston College, PhD

Karen M. Spikes
Lecturer, Psychology; Cornell University, PhD

Srinivas Sridhar
College of Arts and Sciences Distinguished Professor, Physics; California Institute of Technology, PhD

Thomas Starr
Professor, Art + Design; Yale University, MFA

Joshua Stefanik
Assistant Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Boston University School of Medicine, PhD

Mary Steffel
Assistant Professor, Marketing; Princeton University, PhD; University of Florida, PhD

Armen Stepanyants
Associate Professor, Physics; University of Rhode Island, PhD

Jennie Stephens
Professor, School of Public Policy and Urban Affairs; California Institute of Technology, PhD

Dagmar Sternad
Professor, Biology and Electrical and Computer Engineering; University of Connecticut, PhD

Sebastian Stockman
Assistant Teaching Professor, English; Emerson College, MFA

Milica Stojanovic
Professor, Electrical and Computer Engineering; Northeastern University, PhD

Janos Stone
Lecturer, Art + Design; Boston University, MFA
Michael Stone  
Assistant Teaching Professor, Economics; University of Connecticut, PhD

Jacob I. Stowell  
Associate Professor, Criminology and Criminal Justice; State University of New York, Albany, PhD

Tracy Strain  
Professor of the Practice, Media and Screen Studies; Harvard University, MEd

Amy Stratman  
Assistant Academic Specialist, College of Professional Studies; Simmons College, MAT

Phyllis R. Strauss  
Matthews Distinguished University Professor, Biology; Rockefeller University, PhD

Heather Streets-Salter  
Associate Professor, History; Duke University, PhD

Ming Su  
Associate Professor, Chemical Engineering; Northwestern University, PhD

Fernando Suarez  
Jean C. Tempel Professor, Entrepreneurship and Innovation; Massachusetts Institute of Technology, PhD

Alexandru I. Suciu  
Professor, Mathematics; Columbia University, PhD

Helen Suh  
Professor, Health Sciences; Harvard University, ScD

Annemarie C. Sullivan  
Clinical Instructor, Health Sciences; Northeastern University, MS

Denis J. Sullivan  
Professor, Political Science and International Affairs; University of Michigan, PhD

Fareena Sultan  
Professor, Marketing; Columbia University, PhD

Nian-Xiang Sun  
Professor, Electrical and Computer Engineering; Stanford University, PhD

Ravi Sundaram  
Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Gloria Sutton  
Assistant Professor, Art + Design; University of California, Los Angeles, PhD

John D. Swain  
Associate Professor, Physics; University of Toronto (Canada), PhD

Richard S. Swasey Jr.  
Senior Lecturer, Finance; University of Virginia, MBA

Jacqueline F. Sweeney  
Senior Cooperative Education Coordinator, College of Arts, Media and Design; Northeastern University, MS

Nina Sylvanus  
Assistant Professor, Sociology and Anthropology; Ecole des Hautes Etudes en Sciences Sociales, Paris (France), PhD

Lynne Sylvia  
Clinical Professor, Pharmacy and Health Systems Sciences; Duquesne University, PharmD

Balazs Szelenyi  
Associate Teaching Professor, CPS International Programs; University of California, Los Angeles, PhD

Mario Sznaier  
Dennis Picard Trustee Professor, Electrical and Computer Engineering; University of Washington, PhD

T  
Gilead Tadmor  
Professor, Electrical and Computer Engineering; Weizmann Institute of Science (Israel), PhD

Paul Tagliamonte  
Visiting Lecturer, Supply Chain and Information Management; Boston College, MS

David Tamés  
Visiting Assistant Teaching Professor, Art + Design; Massachusetts College of Art and Design, MFA

Lloyd Tanlu  
Assistant Professor, Accounting; Harvard Business School, PhD

Peter Tarasewich  
Assistant Teaching Professor, Supply Chain and Information Management; University of Connecticut, PhD

Mary Suzanne Tarmina  
Associate Clinical Professor, Nursing; University of Utah, PhD

Mohammad E. Taslim  
Professor, Mechanical and Industrial Engineering; University of Arizona, PhD

Tomasz Taylor  
Professor, Physics; University of Warsaw (Poland), PhD

Philip Thai  
Assistant Professor, History; Stanford University, PhD

Ganesh Thakur  
Associate Professor, Pharmaceutical Sciences; Institute of Chemical Technology (India), PhD

Anna F. Thimsen  
Postdoctoral Teaching Associate, Communication Studies; University of North Carolina, PhD

Helen Thomas  
Lecturer, Management and Organizational Development; Indiana University, PhD

Ronald S. Thomas  
Senior Lecturer, International Business and Strategy; Harvard University, PhD
Mary Thompson-Jones  
Professor of the Practice, College of Professional Studies; University of Pennsylvania, EdD

Jamal Thorne  
Assistant Teaching Professor, Art + Design; Northeastern University, MFA

George Thrush  
Professor, Architecture; Harvard University, MArch

Stefanie Tignor  
Visiting Assistant Professor, Marketing; Northeastern University, PhD

Jonathan Tilly  
University Distinguished Professor, Biology; Rutgers, the State University of New Jersey, PhD

Devesh Tiwari  
Assistant Professor, Electrical and Computer Engineering; North Carolina State University, PhD

Gordana G. Todorov  
Professor, Mathematics; Brandeis University, PhD

Alessio Tognetti  
Assistant Academic Specialist, World Languages Center; University of Washington, MA

Valerio Toledano Laredo  
Professor, Mathematics; University of Cambridge (United Kingdom), PhD

Michael C. Tolley  
Associate Professor, Political Science; Johns Hopkins University, PhD

Iraz Topaloglu  
Assistant Cooperative Education Coordinator, College of Engineering; California State University, Long Beach, MS

Peter Topalov  
Associate Professor, Mathematics; Moscow State University (Russia), PhD

Vladimir P. Torchilin  
University Distinguished Professor, Pharmaceutical Sciences; Moscow State University (Russia), PhD, DSc

Ali Touran  
Professor, Civil and Environmental Engineering; Stanford University, PhD

Emery A. Trahan  
Professor, Finance; State University of New York, Albany, PhD

Andrew Trotman  
Assistant Professor, Accounting; Bond University (Australia), PhD

Geoffrey C. Trussell  
Professor, Marine and Environmental Sciences; College of William and Mary, PhD

Kumiko Tsuji  
Assistant Academic Specialist, World Languages Center; Georgetown University, PhD

Eugene Tunik  
Associate Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Rutgers University, PhD

Berna Turam  
Professor, International Affairs and Sociology and Anthropology; McGill University (Canada), PhD

Ayten Turkcan Upasani  
Assistant Professor, Mechanical and Industrial Engineering; Bilkent University, Ankara (Turkey), PhD

Bonnie TuSmith  
Associate Professor, English; Washington State University, PhD

Esther Tutella  
Assistant Academic Specialist, College of Professional Studies; Vanderbilt University, MEd

U

Rafael Ubal Tena  
Assistant Teaching Professor, Electrical and Computer Engineering; Universidad Politecnica de Valencia (Spain), PhD

Jonathan Ullman  
Assistant Professor, Computer and Information Science; Harvard University, PhD

Annique Un  
Associate Professor, International Business and Strategy; Massachusetts Institute of Technology, PhD

Christopher Unger  
Assistant Teaching Professor, College of Professional Studies; Harvard University, PhD

Steven R. Untersee  
Lecturer, Biology; Tufts University, PhD

Moneesh Upmanyu  
Associate Professor, Mechanical and Industrial Engineering; University of Michigan, PhD

Daniel Urman  
Assistant Teaching Professor, College of Professional Studies; Harvard University, JD

V

Steven P. Vallas  
Professor, Sociology and Anthropology; Rutgers University, PhD

Jenny A. Van Amburgh  
Clinical Professor, Pharmacy and Health Systems Sciences; Albany College of Pharmacy, PharmD

Bobbi Van Gilder  
Postdoctoral Teaching Associate, Communication Studies; University of Oklahoma, PhD

Kathi Vander Laan  
Assistant Cooperative Education Coordinator, Computer and Information Science; Salem State University, MBA

Jan Vanselow  
Associate Cooperative Education Coordinator, College of Engineering; Northeastern University, MS

Ashkan Vaziri  
Associate Professor, Mechanical and Industrial Engineering; Northeastern University, PhD
Silvani Vejar
Assistant Academic Specialist, College of Professional Studies; University of Massachusetts, Lowell, MS

Oana Veliche
Lecturer, Mathematics; Purdue University, PhD

Venkata Venuri
Research Assistant Professor, Pharmaceutical Sciences; Osmania University (India), PhD

Anand Venkateswaran
Associate Professor and Chase Research Fellow, Finance; Georgia State University, PhD

Susan H. Ventura
Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, PhD

Alessandro Vespignani
Distinguished Professor and Sternberg Family Endowed Chair, Physics and Health Sciences and Computer and Information Science; University of Rome La Sapienza (Italy), PhD

Gustavo Vicentini
Assistant Teaching Professor, Economics; Boston University, PhD

Thomas J. Vicino
Associate Professor, Political Science; University of Maryland, PhD

Emanuele Viola
Associate Professor, Computer and Information Science; Harvard University, PhD

Jan Vitěk
Professor, Computer and Information Science; University of Geneva (Switzerland), PhD

Olga Vitěk
Sy and Laurie Sternberg Interdisciplinary Associate Professor, Chemistry and Chemical Biology and Computer and Information Science; Purdue University, PhD

Steven Vollmer
Associate Professor, Marine and Environmental Sciences; Harvard University, PhD

Robert J. Volpe
Associate Professor, Applied Psychology; Lehigh University, PhD

Erik Voss
Associate Teaching Professor, CPS International Programs; Iowa State University, PhD

Paul Vouros
Professor, Chemistry and Chemical Biology; Massachusetts Institute of Technology, PhD

W
Sara Wadia-Fascetti
Professor, Civil and Environmental Engineering; Stanford University, PhD

Nancy Waggener
Associate Cooperative Education Coordinator, Pharmaceutical Sciences; Suffolk University, JD

Thomas Wahl
Assistant Professor, Computer and Information Science; University of Texas, Austin, PhD

Thomas Wales
Research Associate Professor, Chemistry and Chemical Biology; Duke University, PhD

Jacob Walker
Assistant Cooperative Education Coordinator, College of Engineering; Northeastern University, MS

Louise E. Walker
Associate Professor, History; Yale University, PhD

Rachel Walsh
Assistant Cooperative Education Coordinator, College of Engineering; Suffolk University, MS

Robin Walters
Postdoctoral Teaching Associate, Psychology; University of Chicago, PhD

Suzanna Danuta Walters
Professor, Sociology and Anthropology and Women's, Gender, and Sexuality Studies; City University of New York, PhD

Richard G. Wamai
Associate Professor, African-American Studies; University of Helsinki (Finland), PhD

Kai-tak Wan
Associate Professor, Mechanical and Industrial Engineering; University of Maryland, College Park, PhD

Lu Wang
Assistant Professor, Computer and Information Science; Cornell University, PhD

Ming Wang
College of Engineering Distinguished Professor, Civil and Environmental Engineering; University of New Mexico, PhD

Qi Wang
Assistant Professor, Civil and Environmental Engineering; Virginia Polytechnic Institute and State University, PhD

Meni Wanunu
Assistant Professor, Physics; Weizmann Institute of Science (Israel), PhD

Robert J. Ward
Lecturer, Music; University of California, San Diego, MA

Gregory H. Wassall
Associate Professor, Economics; Rutgers University, PhD

Barbara L. Waszczak
Professor, Pharmaceutical Sciences; University of Michigan, PhD

Maureen Watkins
Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Natalya Watson
Assistant Teaching Professor, CPS International Programs; University of Colorado, PhD
Stephen Williams  
Assistant Cooperative Education Coordinator, College of Social Sciences and Humanities; Suffolk University, JD

Christo Wilson  
Assistant Professor, Computer and Information Science; University of California, Santa Barbara, PhD

Sheila Winborne  
Visiting Lecturer, Philosophy and Religion; Harvard University, PhD

Frederick Wiseman  
Professor, Supply Chain and Information Management; Cornell University, PhD

John Wolfe  
Associate Teaching Professor, College of Professional Studies; Columbia University, EdD

Paul Wolff  
Assistant Cooperative Education Coordinator, College of Engineering; University of Pennsylvania, PhD

Darien Wood  
Professor, Physics; University of California, Berkeley, PhD

Dori Woods  
Assistant Professor, Biology; University of Notre Dame, PhD

Adam Wooley  
Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Massachusetts College of Pharmacy, PharmD

Lisa C. Worsh  
Senior Cooperative Education Coordinator, College of Social Sciences and Humanities; Bridgewater State College, MEd

Nicole Wright  
Assistant Professor, Accounting; Virginia Polytechnic Institute and State University, PhD

Shu-Shih Wu  
Lecturer, Mathematics; Northeastern University, PhD

Sara A. Wylie  
Assistant Professor, Sociology and Anthropology and Health Sciences; Massachusetts Institute of Technology, PhD

X  
Yu (Amy) Xia  
Associate Professor, Supply Chain and Information Management; Washington State University, PhD

Y  
Shiawee X. Yang  
Associate Professor, Finance; Pennsylvania State University, PhD

Mishac K. Yegian  
College of Engineering Distinguished Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

Edmund Yeh  
Associate Professor, Electrical and Computer Engineering; Massachusetts Institute of Technology, PhD
Benjamin Yelle  
Assistant Teaching Professor, Philosophy and Religion; University of Miami, PhD

Sheng-Che Yen  
Assistant Professor, Physical Therapy, Movement, and Rehabilitation Sciences; New York University, PhD

Mark L. Yorra  
Senior Cooperative Education Coordinator, Bouvé College of Health Sciences; Northeastern University, EdD

Gary Young  
Professor, International Business and Strategy and Health Sciences; State University of New York, Buffalo, PhD

Lydia Young  
Associate Teaching Professor, College of Professional Studies; Boston College, PhD

Sara C. Young-Hong  
Clinical Instructor, Communication Sciences and Disorders; University of Pittsburgh, MA

Shuishan Yu  
Associate Professor, Architecture; University of Washington, PhD

Jennifer Yule  
Assistant Academic Specialist, Marketing; Glasgow Caledonian University (Scotland), PhD

Z

Nizar Zaarour  
Assistant Teaching Professor, Supply Chain and Information Management; Northeastern University, PhD

Michelle Zaff  
Assistant Cooperative Education Coordinator, College of Social Sciences and Humanities; Suffolk University, JD

Christos Zahopoulos  
Associate Professor, Education; Northeastern University, PhD

Carl Zangerl  
Assistant Teaching Professor, College of Professional Studies; University of Illinois, PhD

Alan J. Zaremba  
Associate Professor, Communication Studies; State University of New York, Buffalo, PhD

Michele Jade Zee  
Assistant Teaching Professor, Behavioral Neuroscience; University of Oregon, PhD

Ibrahim Zead  
Professor, Mechanical and Industrial Engineering; University of Akron, PhD

Edward David Zepeda  
Assistant Professor, Supply Chain and Information Management; University of Minnesota, PhD

David P. Zgarrick  
Professor, Pharmacy and Health Systems Sciences; Ohio State University, PhD

Ke Zhang  
Assistant Professor, Chemistry and Chemical Biology; Washington University, St. Louis, PhD

Yue May Zhang  
Associate Professor, Accounting; University of Pittsburgh, PhD

Ting Zhou  
Associate Professor, Mathematics; University of Washington, PhD

Zhaohui Zhou  
Professor, Chemistry and Chemical Biology; Scripps Research Institute, PhD

Hongli Zhu  
Assistant Professor, Mechanical and Industrial Engineering; South China University of Technology (China), PhD

Sally Tebourne Ziane  
Associate Academic Specialist, World Languages Center; University of Paris XIII (France), PhD

Nathanial Ziegler  
Assistant Cooperative Education Coordinator, College of Engineering; Indiana University of Pennsylvania, MEd

Katherine S. Ziemer  
Professor, Chemical Engineering; West Virginia University, PhD

Emily Zimmerman  
Assistant Professor, Communication Sciences and Disorders; University of Kansas, PhD

Gregory M. Zimmerman  
Assistant Professor, Criminology and Criminal Justice; State University of New York, Albany, PhD

Kathrin Zippel  
Associate Professor, Sociology and Anthropology; University of Wisconsin, Madison, PhD

Ronald Zullo  
Lecturer, Accounting; Bentley University, MS

Günter K. H. Zupec  
Professor, Biology; University of California, San Diego, PhD; University of Tübingen (Germany), Dr. rer. nat. habil.

Nikolai Zvonok  
Research Assistant Professor, Pharmaceutical Sciences; Russian Academy of Sciences (Russia), PhD

Officers of the University
Joseph E. Aoun, BA, MA, PhD, President
Michael A. Armini, BA, MA, Senior Vice President for External Affairs
James C. Bean, BS, MS, PhD, Provost and Senior Vice President for Academic Affairs
Diane Nishigaya MacGillivray, BA, MA, Senior Vice President for University Advancement
Philomena V. Mantella, BS, MSW, PhD, Senior Vice President and CEO of the Northeastern University Global Network
Ralph C. Martin II, BA, JD, Senior Vice President and General Counsel
Thomas Nedell, BA, MBA, Senior Vice President for Finance and Treasurer

Academic Deans
Nadine Aubry, BS, MS, PhD, Dean of the College of Engineering
Carla E. Brodley, BA, MS, PhD, Dean of the College of Computer and Information Science
Hugh G. Courtney, BA, PhD, Dean of the D’Amore-McKim School of Business
Kenneth W. Henderson, BSc, PhD, Dean of the College of Science
Elizabeth Hudson, BA, MA, PhD, Dean of the College of Arts, Media and Design
Mary Loeffelholz, BA, MA, PhD, Interim Dean of the College of Professional Studies
Jeremy Paul, AB, JD, Dean of the School of Law
Uta Poiger, BA, MA, AM, PhD, Dean of the College of Social Sciences and Humanities
Jack Reynolds, BS, PharmD, Interim Dean of Bouvé College of Health Sciences

Vice Provosts
Susan Ambrose, BA, MA, PhD, Senior Vice Provost for Undergraduate Education and Experiential Learning
John Armendariz, EdD, Vice Provost for Institutional Diversity and Inclusion
Debra Franko, BA, PhD, Interim Vice Provost for Academic Affairs
Arthur F. Kramer, BS, PhD, Senior Vice Provost for Research and Graduate Education
Anthony Rini, BA, MPA, EdD, Vice Provost for Budget, Planning, and Administration

Vice Presidents
Greg Connell, BA, MBA, Vice President for Finance
Rick Davis, BS, MA, Vice President for Alumni Relations
Joseph J. Donnelly Jr., BA, Vice President for Advancement and Campaign Director
Nicholas F. Ducoff, BBA, JD, Vice President for New Ventures
Madeleine A. Estabrook, AB, JD, Vice President for Student Affairs and Dean of Students
Seamus Harreys, BA, EdM, MBA, Vice President for Business Affairs, Graduate Campuses
Rehan Khan, BS, MBA, Vice President and Chief Information Officer
Luanne M. Kirwin, BA, MA, Vice President of Development
Sundar Kumarsamy, BA, MS, Vice President for Enrollment Management
Vincent J. Lembo, BA, JD, Vice President and Senior Counsel
Timothy E. Leshan, BA, MPA, Vice President for Government Relations
Chris Mallet, BS, MPA, Vice President of Online Programs
Nancy May, AS, BS, Vice President for Facilities
Katherine N. Pendergast, BA, MED, Vice President for Human Resources Management
Lisa Sinclair, BA, JD, Vice President of Legal Affairs
Kathy Spiegelman, BA, MS, Vice President, Chief of Campus Planning and Development
Brian Sullivan, BS, MBA, Vice President and Chief Marketing Officer
John Tobin, BA, Vice President for City and Community Affairs

Other Administrative Leaders
Linda D. Allen, BA, MEd, Assistant Vice President and University Registrar
Michael A. Davis, BA, MA, Director of Public Safety and Chief of Police
James R. Hackney, AB, JD, Chief of Staff, Senior Strategy Advisor, and Professor of Law
Renata Nyul, BA, MS, Assistant Vice President for Communications
Peter P. Roby, BA, MS, Director of Athletics and Recreation
Kerry Salerno, BS, MBA, Assistant Vice President for Enrollment and Dean of Admissions and Marketing
William Wakeling, BA, MA, MA, Dean, University Libraries

## Statements of Accreditation

### Accreditation
Northeastern University has maintained its status as a member in good standing of the New England Association of Schools and Colleges (NEASC) Commission on Institutions of Higher Education (CIHE) since it was awarded its initial accreditation in 1940. The university was last reviewed by NEASC in 2008 and will be reviewed again in fall 2018.

Northeastern University possesses degree-granting authority in Massachusetts, under the auspices of the Massachusetts Board of Higher Education.

General Information

The Northeastern University Graduate Catalog contains the university’s primary statements about these academic programs and degree requirements, as authorized by the president or the Board of Trustees. For information about other academic policies and procedures; student responsibilities; student academic and cocurricular life; faculty rights and responsibilities; or general personnel policies, benefits, and services, please refer to the Cooperative Education Student Handbook, Faculty Handbook, and related procedural guides, as appropriate.

Accreditation. Northeastern University is accredited by the New England Association of Schools and Colleges, Inc.

Delivery of Services. Northeastern University assumes no liability for delay or failure to provide educational or other services or facilities due to causes beyond its reasonable control. Causes include, without limitation, power failure, fire, strikes by university employees or others, damage by natural elements, and acts of public authorities. The university will, however, exert reasonable efforts, when it judges them to be appropriate, to provide comparable services, facilities, or performance; but its inability or failure to do so shall not subject the university to liability.

The Northeastern University Graduate Catalog contains current information about the university calendar, admissions, degree requirements, fees, and regulations; however, such information is not intended and should not be regarded to be contractual.

Northeastern University reserves the sole right to promulgate and change rules and regulations and to make changes of any nature in its program; calendar; admissions policies, procedures, and standards; degree requirements; fees; and academic schedule whenever necessary or desirable, including, without limitation, changes in course content and class schedule, the cancellation of scheduled classes and other academic activities, and the substitution of alternatives for scheduled classes and other academic activities. In any such case, the university will give whatever notice is reasonably practical.

Northeastern University will endeavor to make available to its students a fine education and a stimulating and congenial environment. However, the quality and rate of progress of an individual’s academic career and professional advancement upon completion of a degree or program are largely dependent on his or her own abilities, commitment, and effort. In many professions and occupations, there are also requirements imposed by federal and state statutes and regulatory agencies for certification or entry into a particular field. These requirements may change while a student is enrolled in a program and may vary from state to state or country to country. Although the university stands ready to help its students find out about requirements and changes in them, it is the student’s responsibility to initiate the inquiry.

Tuition Default Policy. In cases where the student defaults on his or her tuition, the student shall be liable for the outstanding tuition and all reasonable associated collection costs incurred by the university, including attorneys’ fees.

Emergency Closing of the University. Northeastern University posts emergency announcements, including news of weather-related closings, on its homepage (http://www.northeastern.edu) and notifies members of the community individually through the NU ALERT system. In addition, the university has made arrangements to notify students, faculty, and staff by radio and television when it becomes necessary to cancel classes because of extremely inclement weather. AM stations WBZ (1030), WILD (1090), and WRKO (680), and FM station WBUR (90.9) are
the radio stations authorized to announce the university's decision to
close. Television stations WBZ-TV4, WCVB-TV5, and WHDH-TV7 will also
report cancellations. Since instructional television courses originate from
live or broadcast facilities at the university, neither the classes nor the
courier service operates when the university is closed. Please listen to
the radio or television to determine whether the university will be closed.

If a storm occurs at night, the announcement of university closing is
given to the radio stations at approximately 6 a.m. Classes are generally
canceled for that entire day and evening at all campus locations unless
stated otherwise. When a storm begins late in the day, cancellations of
evening classes may be announced. This announcement is usually made
between 2 p.m. and 3 p.m.

*Equal Opportunity Policy.* Northeastern University does not discriminate
on the basis of race, color, religion, sex, sexual orientation, age, national
origin, disability, or veteran status in admission to, access to, treatment
in, or employment in its programs and activities. In addition, Northeastern
University will not condone any form of sexual harassment. Handbooks
containing the university's nondiscrimination policies and its grievance
procedures are available in the Office of Institutional Diversity and
Inclusion, 125 Richards Hall. Inquiries regarding the university's
nondiscrimination policies may be directed to:

Office of Institutional Diversity and Inclusion
125 Richards Hall
Northeastern University
Boston, Massachusetts 02115
617.373.2133

Inquiries concerning the application of nondiscrimination policies
may also be referred to the Regional Director, Office for Civil Rights,
U.S. Department of Education, 8th Floor, 5 Post Office Square, Boston,
MA 02109-3921.

*Disability Resource Center.* The Disability Resource Center provides
a variety of disability-related services and accommodations to
Northeastern University's students and employees with disabilities.

Northeastern University's compliance with Section 504 of the
Rehabilitation Act of 1973 and the Americans with Disabilities Act
of 1990 are coordinated by the senior director of the Disability Resource
Center. Persons requiring information regarding the Disability Resource
Center should contact the center at 617.373.2675 or, if using TTY, via
Relay 711.

*Family Educational Rights and Privacy Act.* In accordance with the Family
Educational Rights and Privacy Act of 1974, Northeastern University
permits its students to inspect their records wherever appropriate and
to challenge specific parts of them when they feel it is necessary to do
so. Specific details of the law as it applies to Northeastern are printed in
the *Undergraduate Student Handbook* and *Graduate Student Handbook* and
are distributed annually at registration for the university's colleges and
graduate schools.

*Cleary Act.* Northeastern is committed to assisting all members of the
university community in providing for their own safety and security.
Information regarding campus security and personal safety, including
topics such as crime prevention, university police law enforcement
authority, crime reporting policies, crime statistics for the most recent
three-year period, and disciplinary procedures, is available upon
request from the Northeastern University Director of Public Safety,
360 Huntington Avenue, Boston, MA 02115, or by calling 617.373.2696.

*Mission Statement:*
To educate students for a life of fulfillment and accomplishment.
