Students have access to their Husky email accounts upon activation of their myNortheastern account. It is important to check this account regularly as all official college and university correspondence is sent to students’ Husky email accounts, e.g., billing, academic standing, student newsletters, graduation information, important announcements.

Students have the option to:

1. Forward their Husky emails to a preferred email account. This can be done via their myNortheastern account. Students with a preferred personal email account are encouraged to enter that information in their myNortheastern account. Visit the Information Technology Services website (http://www.northeastern.edu/its/services/huskymail) for further instructions.

2. Configure their HuskyMail on a smartphone. Visit the Information Technology Services website (http://www.northeastern.edu/its/services/huskymail) for further instructions.
