

Chemical Engineering and Computer Science, BSChE

The Bachelor of Science in Chemical Engineering and Computer Science provides expertise in computational modeling and simulation of chemical processes. The curriculum is designed to prepare students to practice in the engineering and control of processes involving chemicals, biotechnology feedstocks, and pharmaceuticals, as well as the fundamentals of program design, software development, and algorithms and data.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (<http://catalog.northeastern.edu/undergraduate/university-academics/university-wide-requirements/>).

NUPATH Requirements

All undergraduate students are required to complete the NUPATH Requirements (<http://catalog.northeastern.edu/undergraduate/university-academics/nupath/>).

NUPATH requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.
