

Mechanical Engineering, Minor

This minor provides an opportunity for students to explore core aspects of mechanical engineering, including mechanical and thermofluid foundations, along with a technical focus into one of the mechanical engineering disciplines (mechanics, thermofluids, materials, and/or controls). This minor is not open to students majoring in Mechanical Engineering.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Students are permitted to substitute one equivalent required course from another engineering major, to satisfy this minor.

Required Courses

Code	Title	Hours
ME 2350	Statics	4
ME 2380 and ME 2381	Thermodynamics and Recitation for ME 2380	4

Mechanical Engineering Technical Electives

Code	Title	Hours
Complete two of the following:		8
ME 2340	Introduction to Material Science	
ME 2355	Mechanics of Materials	
ME 3455	Dynamics	
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	
ME 4508 or ME 4565	Mechanical Engineering Computation and Design Introduction to Computational Fluid Dynamics	
ME 4550	Mechanical Engineering Design	
ME 4555	System Analysis and Control	
ME 4570	Thermal Systems Analysis and Design	

GPA Requirement

2.000 GPA required in the minor
