

Combined Degrees

Northeastern University's D'Amore-McKim School of Business prepares leaders with deep business expertise. Our interdisciplinary combined-degree programs (<https://damore-mckim.northeastern.edu/programs/?s=&filters%5B%5D=program%7Ctype%7Ccombined-masters-degrees&filters%5B%5D=program%7Ctype%7Cdual-degrees&relation=OR>) offer a powerful opportunity to students whose interests and goals span multiple academic disciplines or areas of expertise.

At Northeastern, experience is at the heart of everything we do. D'Amore-McKim offers an experience-driven educational model that fuses robust classroom education with real-world application. Students benefit from opportunities to apply what they've learned in the classroom to real business challenges.

Our combined-degree programs merge many of the core requirements from a D'Amore-McKim MBA with a specialized master's degree, allowing students to finish their program in less time than it would take to earn the two degrees separately.

Students may enroll in combined-degree programs for full-time or part-time study.

Programs

- Accounting and Business Administration, MSAMBA (<http://catalog.northeastern.edu/graduate/business/combined-degrees/accounting-business-administration-msamba/>)
