

Learning Experience Design and Technology, Graduate Certificate (Online)

The Graduate Certificate in Learning Experience Design and Technology offers a practice-based exploration of the key skills required in the rapidly expanding field of learning design. The need for professionals with LXD expertise has never been so essential across all industry sectors. The certificate is designed to meet this need by grounding designers, educators, technologists, and other professionals in the art and science of effective learning design. Students will have the opportunity to build or strengthen design and technological skills that can be applied across PK–12, higher education, government, military, corporate, and nonprofit environments. Skills can be applied to learners of all ages and in online, mobile, virtual, face-to-face, and blended formats.

The program's innovative approach blends academic and workplace-based learning, focusing on how people learn, foundational learning design skills, and advanced learning design topics. Experiential opportunities are built into each course. Students will have the opportunity to develop an online portfolio of work to demonstrate their capacity to think strategically; put creative ideas into action using various technologies; learn design environments that meet academic, personal, professional, and organizational goals; and interpret and communicate results to stakeholders.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
EDU 6609	How People Learn	3
EDU 6629	Foundations of Learning Experience Design	3
EDU 6639	Advanced Practices in Learning Experience Design	3
Complete 3 semester hours of master's-level coursework (EDU 5000–EDU 6999) offered in the College of Professional Studies Graduate School of Education.		3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required
