

Accelerated Bachelor/Graduate Degree Programs

Northeastern University's D'Amore-McKim School of Business develops leaders and thinkers who will guide the future of work that is being transformed by technology and data. The D'Amore-McKim PlusOne accelerated master's programs (<https://damore-mckim.northeastern.edu/programs/?s=&filters%5B%5D=program%7Ctype%7Cplus-one&filters%5B%5D=program%7Ctype%7Cundergraduate>) provide motivated students with the opportunity to start earning their master's degree while pursuing their undergraduate education.

Depending on the program, students accepted into a PlusOne accelerated master's may take up to a total of 16 graduate credits while they are undergraduates and can apply those credits toward both the bachelor and master's degrees.
