

# Global Health, Minor

The area of global health has become a critical field of study across and within diverse disciplines, because of the cross-border and cross-national implications of health-related risks for national security, commerce, transportation, and healthcare delivery itself. In collaboration with the College of Social Sciences and Humanities, the minor in global health is designed to provide undergraduate students an opportunity to explore and discuss the implications with an interdisciplinary lens. The minor is comprised of five courses: one foundation and one core course, three electives, and a global health experience to be approved by the global health minor advisor.

## Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

### Required Foundation Course

Code	Title	Hours
AFRS 1270	Introduction to Global Health	4
or PHTH 1270	Introduction to Global Health	

### Core Course

Code	Title	Hours
Complete one of the following. If additional courses are taken, they may be used as electives.		3-4

AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora
PHTH 4120	Global Perspectives on Discrimination and Health
PHTH 5230	Global Health

### Elective Courses

Code	Title	Hours
Complete three courses from the following areas. Only two courses from any one area may count toward the minor electives. No more than two required courses in the student's major may count toward the minor electives. At least one of the minor electives must be at the 3000-level or above.		9-12
