

Immunization Requirements

State law requires that all students provide proof of immunity to certain diseases before arriving at the university. The immunization requirements are specified at University Health and Counseling Services (<https://healthandwellness.northeastern.edu/documentation-of-immunity/>). Northeastern University partners with Sentry MD, a confidential health record compliance service, to provide a streamlined document review and tracking solution. This process is designed to ease the management of your health requirements. All incoming, full-time on-ground students were asked to submit the completed vaccination documentation to Sentry MD by July 15, 2026.

To learn more and submit immunization information, review Sentry MD in the Student (<https://me.northeastern.edu/>)Hub (<https://me.northeastern.edu/>) under Health and Wellness. Any student failing to provide the required immunization documentation will be prohibited from registering for classes. For questions about immunization requirements or submitting documentation, contact Sentry MD at Northeastern.immunizations@sentrymd.com (Northeastern.immunizations@sentrymd.com).

Nonresidential Campuses

Students enrolled at a nonresidential campus or virtually are not required to submit proof of immunity; however, we recommend they ensure their immunizations are up-to-date and keep their records easily accessible (digital or printed copy).
